"A very remarkable book, a very bold book."—Church of England Review.

Now Ready,

OUT OF THE DEPTHS;

THE STORY OF A WOMAN'S LIFE.

370 pages, 12mo., neatly bound. Price $1.

The following extracts, from lengthy reviews in prominent English journals, will enable the reader to form some idea of the character of the work:

[From the Church of England Review.]

"This is a very remarkable book; a very bold book; and the writer must have made up his mind to have a good deal of fault found with him by very different kinds of people.

"In the first place, what is called the 'religious world,' will dislike some of the doctrines implied in portions of the story; then the downright immoral and ungodly will, of course ridicule its reprobation of vice, and its honor given to virtue and godliness; while last, though not least, there is a very large class of highly respectable persons who will say that the author ought not to have meddled with such a foul sink of vice as that in which his heroine has wallowed. They know that such things are, that the social evil, as it is emphatically called, is working most perniciously; but, shut up in their comfortable homes, with their home enjoyments and family pleasures, ostrich-like, they *prefer to close* their eyes to what is going on around them, to forget the mischief and to ignore the evil. Such persons will find themselves rudely shaken from their tranquility by the perusal of the book before us, and will exclaim against its author as having written a very bad book, a very improper book; one which lays bare a large class of society, the existence of which ought not to be known, or, at any rate, ought not to be spoken of, or even alluded to, by decent people. With such objectors as these we have no sympathy. The 'silent Amydas' are too exact a type of the course which they would recommend; and the destruction which befell that stupid city is too true a prototype of the threatening destruction of civilized society for us to refuse to take warning by those things 'which were written aforetime, and written for our learning, upon whom the ends of the world are come.' If the evil could be eradicated by silence, the case would, of course, be different; but has it been so? Have they the faintest notion that silence is doing good? We do not think that they have; their only feeling on the matter is, that it is better to let ill alone; they do not like to have their comfortable quietude disturbed, by having *painful images obtruded off their minds.*

* * * * * * *

"We think that we have provided the author with a good store of objectors to his book; but they (if Mr. Puff's principles are correct) are likely to recommend it more successfully than those who would bestow upon it the highest encomiums. "It is irreligious,' says one: 'It is immoral,' says another. While a third declares that it only tells what the greater part of the world does, and what he moreover would do, if it was not afraid. What greater inducements than these can a writer have to make any one read a book? It is a faithful picture, and nobody ought to read it, because of its irreligion and immorality.

"While we allow that it contains far too faithful a picture, we will not call it *irreligious or immoral*; on the contrary, we call it most truly religious and moral; or, better still, most godly and manly. We have in it the 'Rise of a Woman's Life,' recording her down fall, her gradual degradation to the lowest of the low, and her painful and laborious ascent again to purer regions—in short, the 'Harlot's Progress' of the nineteenth century, in Prose instead of in painting; provided also with a reflexion of the moral of the Progress, as the great painter-moralist of the last century so powerfully depicted.

* * * * * * *

"We now take leave of this brave and honest book, thanking the author for his courage and faithfulness. He (for we must call the author a he, notwithstanding so to a woman's autobiography) does not profess to have *found an immediate specific for the social evil*; but he has done better: he has written a book which cannot but tell well upon every young man who reads it, and is not wholly dead to virtue and to godliness—a book which may be of the greatest value in helping to stem the course of the social evil, the miserable and hardening effects of which he has portrayed faithfully as Hogarth, while he has supplied us with a sequel as *instructive as, and far less painful than*, that great moralist has given us."

OUT OF THE DEPTHS;

THE STORY OF A WOMAN'S LIFE.

One vol., 12mo., 370 pages. Price $1.

[From the London Literary Gazette.]

"A woman's story and a woman's book—'Out of the Depths'—will interest many and terrify some; but it can disgust none, for it is a book written with a tender and delicate hand, and even the foul things of which it treats lose much of their revolting nature by the method of treatment. It is the old, terrible tale of suffering, sin, and shame; the old cry of anguish sweeping up *from the abysses of human degradation and spiritual* misery, and the old place-and-hell lore to be learned, not to see if perchance there may be wise and clever physicians who can heal it.

"The book needed a skilful touch to render it readable by the general public. It needed to be written clearly and distinctly, yet with extreme delicacy; more allusively than by direct description, suggesting rather than relating. These difficulties the authoress has managed with all a woman's admirable tact and judgment, and has succeeded in producing a very interesting novel, on a loathsome and revolting subject."

OUT OF THE DEPTHS;

THE STORY OF A WOMAN'S LIFE.

*370 pages; 12mo. Price $1.*

[From the Examiner (London), June 3.]

"The book is, we believe, as to its essential character, no fiction, but the authentic story of a woman's descent into the lowest depths of degradation, and of her recovery into a pure state of fervent piety. The narrative is written with a sacred purpose, and it is by her religious feeling that the writer has been guided safely through a strangely honest narrative that extends over the most perilous of ground. Our literature does not contain—perhaps no literature—a story of pollution told so fully, yet so utterly without offence.

"Whatever may be its influences, the book is a remarkable one: and its main features are top clearly authentic to escape public attention.

[From the Critic (London), June 11.]

"It is a well-written volume, and contains many powerful scenes, proving that the author is not unacquainted with the phases of life which he has undertaken to describe. We can conscientiously recommend its careful perusal."

This charming volume will find its way to many American homes, and win for its author a place by the side of the masters of English fiction, of whom he discusses so pleasantly. It is entertaining and instructive, inclining a large acquaintance with the works of British Novelists, and a sharp discernment of their merits and their faults. English reviews speak of it in the highest and unqualified commendation, as one of the most genial and entertaining books of the day. GOULD & LINCOLN,
