DR. McLANE'S VERMIFUGE

MEDICINE which is perfectly safe, and may be given to children, from tender infancy to advanced age, lays under no restraint as to cold water, or any kind of food. Purges mildly, subduing fever,—destroys and expels worms with invariable success—and is easily administered to children.

That it possesses these valuable properties, is fearlessly asserted—still claiming the additional advantages of being given in small bulk, and requiring none of the drenching which Worm Teas and other supposed Vermifuges demand. During its brilliant career, it has been introduced into many families, where every other known and esteemed Vermifuge has been tried without the least success, where it has promptly expelled Worms to an almost incredible amount.

As evidence of the surprising effects of Dr. M'LANE'S WORM SPECIFIC, we give the following:—

On Saturday, February 7th, 1846, Mr. James Richardson called at the Drug Store of J. Kidd & Co. corner of Wood and Fourth streets, Pittsburg, Pa. and made the following statement:—"A child of mine had been very much troubled with worms for a long time; gave purgative medicines, but it had done her no good. One of our neighbours came in and said it was Worms that were destroying the child, and at the same time spoke of the wonderful effects he had witnessed from using *Dr. M'Lane's Worm Specific*, in that neighborhood. We procured a vial—gave one teaspoonful, and the child discharged *forty-two worms*! Then gave another teaspoonful, which brought forty-six more, making in all *eighty-eight* Worms. As a duty I owe to you, and the community at large, I freely make known these facts. My child is now well. That it was removed by the *Worm Specific* expelled the Worms alive, in about four hours after I gave it to the child."

Built with all the gorgeous magnificence of which modern art is capable, at an expenditure hitherto unequalled. The first is the Golden Chariot Drawn by 20 Cream Colored Horses! The splendor and magnificence of this gorgeous and collossal carriage, baffles description. The length of the Chariot is 32 feet six inches, its height is 18 feet. The Chariot is appropriated to the conveyance of the celebrated New York Brass Band, led by Peter Voorst. The twenty horses are driven by Mr. Mark Johnson. The next feature is the Arab's Winged Dragon of old England. The body represents the monster with extended wings, and coiled up in an attitude of defiance.

Seven real Bedouin Arabs, in their Native Costume, who will take a part in the performances. Another sight of great interest to the spectator, is a Fairy Chariot, drawn by 12 Diminutive Shetland Ponies! The body is in form not unlike a huge bird. The interior contains three seats, and is designed for the conveyance of 8 Beautiful Fairies.

The managers announce that they have at an enormous expense, engaged the services of a troupe of real Bedouin Arabs! The stones by which the members of this astonishing troupe are known among themselves, are

Hamlet—The Man of Good Councils.
Mahomet—The Strong.
Kazrac—The Leader in Deeds of War.
Mahmoud—The Favorite.
Alla—The Ever Enduring.
Kabri—The Sorcerer.

Some description of the Acts and Performances of these strange people is necessary in detail—in the performance of Flying Leaps and Double Somersetts.

Among other surprising feats they leap over horses, springing from solid battoor, and when turning two somersets in the air, will discharge muskets, seize daggers from a table, &c. They form Pyramids of Human Figures!

FOR the disposal of their choice GREEN AND BLACK TEAS, of the latest importations, would respectfully invite a call from country merchants and others visiting our city. Our teas are of the finest quality, and very fragrant, having been selected with the greatest care and at unusually low prices.

For one country trade they will be packed in quarter, half or pound packages, if preferred; thus furnishing two advantages; 1st no loss in drought. 2d an assortment of teas for a very small amount of capital. The latter particularly is of advantage to persons of moderate means and whose sales of the article are limited. Our determination is to avoid all unnecessary expense that will have a tendency to increase the cost of our teas, hence the present course of circular letters to the trade instead of traveling agents, a practice pursued by some of our competitors, is very great expense. These Agents must be paid whether they make sales or not. With the advantages we possess of procuring Teas, and a close application to business, to say nothing of attending to our own business, and not entrusting it to others muft ultimately insure us a share of your custom.

PATENT METALLIC ROPES,

FOR THE USE OF MINES, RAILWAYS, &c.,

For sale, or imported to order, by the subscriber.

THESE Ropes are now almost exclusively used in the Collieries and on the Railways in Great Britain, and are found to be greatly superior to Hempen ones as regards safety, durability and economy.

The Patent Wire Ropes, have proved to be still in good condition after three year's service, in the same situation where the Hempen ones, previously used, of double the size and weight would wear out in nine or ten months. They have been used for almost every purpose to which Hempen Ropes and chains have been applied. Mines, Railways, Heavy Cranes, Standing Rigging, Window Cords, Lightning Conductors, Signal Halyards, Tiller Ropes, &c. They are made either of Iron or Copper Wire, and in cases of much exposure to dampness, of Galvanized Wire.

Testimonials from the most eminent Engineers in England can be shown as to their efficiency, and any additional information required respecting the different descriptions and application will be given by
