THE LAW OF NEWSPAPERS.

Subscribers order the discontinuance of their newspapers, the publisher may continue to send them until arrearages are paid.

Subscribers neglect or refuse to take their newspapers from the offices to which they are directed, they are held responsible until they have settled the bill and ordered them discontinued.

If subscribers remove to other places without informing the publishers, and the newspapers are sent to the former place, they are held responsible.

Courts have decided that refusing to take newspapers from the office, or removing, and leaving them unclaimed, is prima facie evidence of intentional fraud.

THE MINERS' JOURNAL, AND POTTSVILLE GENERAL ADVERTISER.

I WILL TEACH YOU TO PIERCE THE BOWELS OF THE EARTH, AND BRING OUT FROM THE CAVERNS OF MOUNTAINS, METALS WHICH WILL GIVE STRENGTH TO OUR HANDS AND SUBJECT ALL NATURE TO OUR USE AND PLEASURE.—*Dr. Johnson.*

TAMAQUA IRON WORKS.
Carter & Allen,
Iron Founders, Machinists, Boiler and Blacksmiths' Tool Makers and Car Builders.
The subscribers have now prepared to receive orders for all kinds of Stationary Engines and machinery for collieries, blast furnaces, mills, &c. Extensive facilities and practical experience in the business warrant them in taking the largest contracts at the lowest prices.
Particular attention is paid to Irens & Allen's New Style Patent Winding Machinery, by which the Slope or Shaft rope or chains run on the top of both drums in double wings.
This arrangement, it is confidently believed, will save in the wear and tear of ropes or chains, the price of the machinery in five years; and for fast winding, simplicity of construction and durability, it cannot be surpassed. We also recommend the new car wheel, invented by Mr. Lucien H. Allen. This wheel can only be had at our works, and has stood the test of the several severe winters past, triumphantly; not a single wheel has broken or been cracked since. We have now in use plenty if under the ears of some of the principal Railroad Companies in the country.
We would also call the attention of the public to the Tamaqua Gas Shop, connected with the above works, and recently erected for the manufacture of Railroad, Drift, Freight Cars and Trucks, and furnished with all the latest improvements, so that they are thus enabled to execute work much cheaper and with more despatch than heretofore.
All work guaranteed. Persons wanting anything in our line would do well to give us a call.

Broad and Hamilton streets, Philadelphia, Penna.
Would call the attention of Railroad Managers, and those interested in Railroad Property, to their *System of Locomotive Engines*, in which they are adapted to the particular business for which they may be required; by the use of one, two, three or four pairs of driving wheels, coupled, they have so adapted or so much of the weight as may be desirable for adhesion; and in accommodating them to the tender curves, strength of superstruction, and other points, they have done. By these means they have combined an useful effect of the power is secured with the least expense for attendance, cost of fuel, and repairs to Road and Engine. With these objects in view, and as the result of twenty-three years practical experience in the business by our senior partner, we manufacture *five different kinds of Engines*, and several classes of sizes of each kind. Far less attention is paid to the strength of the machine in the plan and workmanship of all the details. Our long experience and opportunities of obtaining information enables us to offer these engines with the assurance that in efficiency, economy and durability, they will compare favorably with those of any other kind in use. We also furnish to order, wheels, axles, bowling or low mortiers (to centre whitney boring) composition castings for bearings; every description of Copper, Sheet Iron and Boiler Works; and every article appertaining to the repair or renewal of Locomotive Engines. [WRITTEN FOR THE MINERS' JOURNAL.]

ECHO.

BY J. B.

By the nymph Narcissus passed,
Nought her presence apprehending;
Echo's eyes upon him cast,
Fixed as though they'd gone unending.

O, what youth and grace were there!
O what fashioned form and feature!
Orbs of light beyond compare,
Bloom so of immortal nature!

Not a nymph of Dian bore,
Mould that was diviner rarer;
Winning, never youth was more;
Beauteous, never flower was fairer.

Pain she would his step arrest,
With her words the boy detaining;
But dire spells her lips invest,
All her powers of speech enchaining.

(For what time when Echo's tongue
Thwarting had Juno given,
Aiding faithless Jove, then sung,
Thus th' Imperious Queen of Heaven:

"Mischievous! that tongue of thine,
Other bathers all outvieing,
Banned *for evermore*, relize—
Henceforth only speak replying!")

Now within the wooland she's,
Where perplexed his feet are falling,
Having from his fellows strayed,
Loves Narcissus, to them calling.

Viewless Echo, lurking nigh,
Anxious, o'er the impending meeting,
To him speedy makes reply,
His own words and tones repeating.

Whence that imitated sound?
Off he pauses to discover,
As amid the sylvans round
Breaths the mystic accents over.

"Till from out her green retreat,
There no longer now concealing,
Him with arms apart to greet,
Forth she comes, her form revealing.

Startled by the stranger face,
Answering not his sm'ous glances,
Backward he from her embrace
Shrinks, then flees her warm advances.

Vainly she pursues the youth,
More her lips, but words there smother;
Its not passion has nor ruth,
Beauty heeds not in another.

Scorned! with fury flame her eyes;
Wildly stream in air her tresses
As the baleful scene she flies,
To the rocks and lone recesses.

Hill and cave yield no relief;
Thought, each hour the theme resuming,
Brings her back to love and grief,
Grief and love her frame consuming.

Slow declining, day by day,
Like a star in dimness waning,
Pines her form and fades away,
Voice and essence but remaining.

Yet does Echo haunt the hill,
Yet unseen she keeps the mountain,
Brooding in some cavern still,
Listning by the crystal fountain.

And if called to win reply,
Though no mortal eye may view her,
From her secret place on high,
Sad she speaks—as to her wooer.

LETTER FROM EGYPT.

[Through the politeness of the friends of the writer, we are enabled to lay before our readers, the following letters from a young man of Schuylkill Haven, at present on a cruise in a Government vessel. As descriptive of scenes and life at the various points touched before reaching Alexandria, in the land of Pyramids, they will we are sure, interest all our readers]:

ALEXANDRIA, EGYPT, *February 10th, 1861.*

DEAR FRIEND:—The boat fut island or reef of Key West, from, when I wrote last, is about two or six miles long, and some two miles broad; it contains about 2,000 inhabitants, of a mixed character. The private residences stand back from the streets and are surrounded on all sides by large pine, cocoanut, orange, lemon, banana, plantain and other trees. The breezes coming from the sea during the day, and wandering like spirit voices through the waving branches of these Palms and Brass Castings suitable for the Coal mining or other business, on the most reasonable terms. Also, Blowing Cylinders for Blast Furnaces and Machine work in general.

Repairing of all kinds done with neatness and despatch at the lowest prices. All work furnished by them warranted to perform well, if properly used, in the custom of those who may want articles in the line in this vicinity. All orders will meet with immediate and prompt attention.
