OFFICE PENNSYLVANIA RAIL-ROAD COMPANY,

PHILADELPHIA, August 15, 1865.

The Mortgage Bonds of the Connecting Railway Company, between the station of the Pennsylvania Railroad Company in West Philadelphia and Frankford, a distance of seven miles, can be obtained at this Office, No. 238 South THIRD Street.

These bonds are in sums of one thousand dollars, with interest coupons attached, payable at said office on the 15th day of March and September in each year, at the rate of six per centum per annum, and the principal payable in five equal annual amounts, at the rate of $200,000 per annum—the first series on September 15, A. D. 1866. The principal and interest are secured by a mortgage for one million of dollars upon all the railway and property of the company, and are guaranteed by the Pennsylvania Railroad Company. These bonds are made free of State taxes by the Company.

The railway being constructed in the most substantial manner, and will be completed during the ensuing year. This road perfects the connection between the Pennsylvania Railroad and the New York lines via Philadelphia, and becoming, as it will, the main channel of communication between New York and the West, as well as to and from the National Capital, will always obtain large revenues, and be one of the most important railways in the Union.

Under a contract with the Philadelphia and Trenton Railroad Company, that company leases the road of the Connecting Railway Company, and agrees to pay an annual rent for 999 years of the net return upon the cost of the road, clear of taxes. These bonds are therefore recommended as a first-class security.

From Messrs. Hall & Garrison, whose large four-story Picture-Frame Manufactory, Third and Poplar streets, was destroyed by fire on the morning of the 18th instant:

PHILADELPHIA, August 18, 1865.

Messrs. EVANS & WATSON:

GENTLEMEN: We take great pleasure in informing you that your make of Safe, which has been used by us, and was exposed to an intense heat for several hours at the destruction of our Factory by Fire early this morning, proved a perfect protection to our Books and Papers, which were found not to have been injured in the least degree. The great security of the Safe was shown by its falling from the third story, and being in no wise injured by the fall.

We take great pleasure in recommending your make of Safe to any person desirous of a perfect Fire-Proof Safe. HALL & GARRISON.

HALL'S

HAIR RENEWER.

As the name indicates, it not only renews the growth of the Hair when thin and falling out, but it will positively renew the color to its originality even when it is turning gray or white, whether by disease, grief, or old age. It will certainly

do what is claimed for it—a fact which hundreds, aye, thousands who have used it, are ready to testify. Where one bottle is fairly used, in any community, its reputation "spreads like wildfire," and is the best advertisement and recommendation we desire. In the

Eastern States, where the "Renewer" originally, it is used by all young ladies as a dressing, and by the fashionable ladies of young men (after their barbers,) while older men and women will not be without it, as a renewer and restorative for

their gray locks and bald heads, which it changes to their entire satisfaction.

We are selling, in the city of Boston alone, upwards of 16,000 bottles per month, the dealers giving "Renewer" the preference to all other Hair preparations.

HALL'S HAIR RENEWER.

Its effect is marvellous. The old, middle-aged, and young unite in praising its virtues. It is an entirely science discovery, combining many of the best restoratives in the vegetable kingdom. It will restore gray hair. It will restore dry, faded, and

$3.00 FISHER'S SELF-SEALING FRUIT CANS.

Every housekeeper in the city and country should use this excellent Can. It is the most convenient and reliable Can in use, and gives entire satisfaction wherever introduced. It is sealed in an instant, by hooking and spring, thus clamping a tin cap over and around the opening, and pressing it upon a ring of cemented paper. The contents in the paper wells by the heat of the fruit, and as the pressing continues the fruit cools, and the sealing is perfect. The cap is unfastened by unhooking the spring and running a thin knife around under the cemented paper.
