THERE are a lot of reasons you can expect a new GMC to keep hauling a lot longer than any other truck you can buy.

First is the fact of horsepower. Whether it's a gasoline-powered 1/2. to 2-tonner with horsepower unbeaten in its class, or one of the new heavy-duty Dieselsyou can't beat a GMC for "go"!

But the extra value you find in these great trucks doesn't end at the power plant.

There's the smooth GMC Synchro-Mesh Transmission linked to a sharpshooting drive line, pouring every ounce of power back to the rugged rear axle. And the solid way horsepower becomes wheel-action-you know there's extra depth of truck performance engineered right down through a GMC's broadshouldered frame!

And standing guard over these longtime trucks are husky brakes with more area than most-the surest, easiest steering ever devised to direct a pay load home-all controlled from a spacious "Six-Footer" Cab that's Weathersealed for a lifetime.

GMC's come in the widest range of engine-body-chassis combinations to fit any trucking need. The prices? No better buy anywhere! Come see for yourself.

You'll do better on a used truck with your GMC dealer
