ROLLING MILL FOR SALE.—The undersigned offer for sale the "MOUNT CARBON ROLLING MILL" located at Mount Carbon, near Pottsville, Schuylkill County, Pa.

The Mill contains 4 double puddling furnaces, 3 heating furnaces, 1 train 16-inch rolls for puddled iron, 1 merchant bar iron train, 1 train plate rolls 72 inches in length by 34 inches diameter, and all other machinery for the manufacture of the above description of iron.—The plate and piddling mills are propelled by a vertical engine of 800 horse power; the balance of the mill by a horizontal engine of 50 horse power, and the remainder of the machinery, such as shaffing, shears, fan, &c., by 2 engines of 40 and 10 horse power respectively.

The Mill buildings which cover an area of over 24,000 square feet, are all of stone (as are the furnaces and machinery they contain) of recent construction, built in the most substantial manner, and covered with slate. A switching from the Reading Railroad, which immediately adjoins, serves for the convenient discharge of coal, metal, &c., and for shipment.

Lying contiguous and appurtenant to the Rolling Mill, are 187 acres of arable and woodland, also an office, iron house, 2½ pool and convenient dwelling houses and an excellent barn. Part of the land, if laid out in town lots, would sell more with a ready sale. A capacious reservoir near the Mill, affords to the holders a plentiful supply of water for spring water. There is also an excellent stone quarry on the premises. For the successful prosecution of the manufacture of iron, the location is such as is rarely surpassed. Coal of the best quality is mined in the immediate vicinity.—The facilities of transportation are simply unrivalled by the Reading Railroad and its numerous connections, or by the Schuylkill Canal. The large quantity of iron consumed in the coal region, affords an excellent home market and an abundant supply of scrap iron.

☞ **PATENT IMPROVEMENT OF STEAM USE.—To all whom it may Concern:**—Be it known that I, LEWIS WREN, of the Borough of Pottsville, County of Schuylkill, to Lewis Kinderby of Philadelphia, the county whereof has been acknowledged, the said Kinderby has sold to said JAMES WREN the right to apply it in the County of Schuylkill, State of Pennsylvania, on all Steam Engines now in use or that may hereafter be used, Lewis Kinderby's **Improved Cut-off for Economizing Steam by Expansion**—for which Letters patent, dated November 19, 1861, have been granted to the said Lewis Kinderby by the United States. All persons desirous of information regarding the benefit of this Valve can receive the same at my office in Coal street. Are pronounced by those who use them EQUAL TO ANY HAMS EXTANT. The pigs are selected from only strictly corn fed hogs, and all the ingredients used in curing are all of the very best quality.
