CITY ITEMS.

RELIGIOUS SERVICES TO-MORROW.—At the Church of the Covenant (Concert Hall) there will be preaching to-morrow morning at half-past ten o'clock, by Rev Dr. Newton, and, at eight P. M. by the Rev. Elvin E Smith, of New Jersey.

At half-past five o'clock to-morrow morning there will be preaching at the Union Tabernacle Tent, Fourth and George streets, by the Rev. Dr. Schlegger, and at five P. M. by the Rev. Dr. Stork. Preaching at eight P. M. in German.

The Rev. E. H. Stokes, D. D., will preach in the main salon of National Hall to-morrow morning at half past nine o'clock. From five to six P. M. there will be a prayer meeting at the same place.

FINERTY'S PRAYER MEETINGS.—In our advertising columns will be found a carefully-prepared directory, showing the various engine houses in this city where prayer meetings are in progress, on what evenings they are held, and the hour of commencing. To-morrow there will be meetings held at the halls of the Western Engine, Delaware Engine, Pennsylvania House, and United States Engine Companies. The meetings at the latter place are held between the hours of 5 and 6, and are said to be attended with a good degree of interest.

FLOURING MILL.—*Mr. Editor*: It is not every day that one sees anything so *distinguishingly* interesting as to render such day worthy of being marked with a white stone. But such a thing we have seen to-day in the apparatus above mentioned, and we would advise *all who delight in the triumphs of science, or in* its application to practical utilities, to visit Pemberton Court, and inspect it. Certainly, there is a wide interval between the stone mortar, in which the Arab woman painfully bruises as much grain as will yield a coarse, ashes-baked cake for the family supper, and this most ingenious, yet beautifully simple mechanism, which, with any species of motive power, will turn out from two to three barrels per hour of the rarest kinds of flour producible from wheat.

Our best flouring mills, even in these advanced times, have been but clumsy and costly affairs; certainly possessing no beauty to attract the eye. But *here* is a moist clog which may actually be styled beautiful—beautiful in its compactness, in the rare ingenuity and perfection of its apparatus, and even in its form. It is but thirty feet long, four feet wide, and eight feet high; may be transported from place to place *in a couple of* wagons; may be set up anywhere, either where other machinery is going, or even in the open air, with a simple roof to shed dust; is, and may be driven by steam, or water, or horse power, and but little of this, it being estimated that a six-horse power is sufficient to impel it.

How invaluable such a machine would be to the newly-settled and sparsely-inhabited portions of our immense domain, must be obvious to all. One truck might serve to supply a vast compass of territory—easily transferrable, as it is, from one point to another—supply, too, qualities of flour such as the wealthiest classes in our cities have heretofore been unable to procure.

One striking peculiarity of this mill is that at one *operation it produces seven* distinct qualities of flour and feed. A second is, that it extracts from the wheat a larger amount of extra and superfine flour than any other process; for fed, may be said to *exhaust* the kernel of *all* the materials capable of yielding these qualities. Again, it *improves* the excellence of the flour by *virtually* grinding and bolting *separately* the two constituents of the wheat—the starch and the gluten. The old mill ground them *together*, and as the gluten is *harder* than the starch, the *fineliness* of the latter was *impaired* by the amount of *pressure* applied.

Consider, moreover, that this mill costs but from four to seven hundred dollars—a trifle compared with the cost of the old mills. With so numerous and so great superiorities to the ordinary mill, they must erelong come into universal use.

Our object in this notice is not so much to describe this beautiful invention *in full*, as to induce the reader to visit and examine it for himself. He will find it in Pemberton Court, or Lodge street, north of the old Pennsylvania Bank, where the gentlemanly inventor, James M. Clark, or his courteous coadjutor, is ever ready to supply all requisite explanations.

EDWIN CLARK'S FLOURING MILL.—After repeated examinations, made in company with friends, who have a decided interest in knowing its true merits, we are constrained to say that, taking it as a whole, it is without exception the most wonderful piece of mechanism of modern times, no matter what interested parties may say to the contrary. We have tried its rain to drop into where it is located—No. 235 Race street—and find it not in full operation, which we take for granted is no slight evidence of its eminently practical character. Indeed, when we consider that it has not been long since a mill of the same capacity would have cost thousands of dollars to construct, and which, when constructed, would have occupied some ten times the space in which the present mill is contained, the *fact becomes perfectly irresistible that the destiny of* this invention of Mr. Edwin Clark is to supplant, at no distant day, every other description of flouring mill now in use. It is a matter which should interest the million, and we feel that we are doing the public a service in referring to it in the terms we have. We are glad to learn from the patentee that his place, at No. 235 Race street, is being daily thronged with applicants for State and county rights, and there can be no doubt that by those who embrace the opportunity in time, immense fortunes will be realized.

WORTH REMEMBERING.—Of the various manufacturing places in this city there are none more inviting than the great confectionery establishment of Messrs. R. G. Whitman & Company, on Second street below Chestnut. Their means for supplying the trade are unsurpassed, and as a place for our citizens to purchase this delicious class of article for the palate, for home consumption, their place has no superior in this country. In manufacturing they use none but the best materials.

WRAPPERS! WRAPPERS!—We do not mean the Spanish article with "common fillers," of which we have "heard tell on," but those elegant, comfortable, and truly genteel articles made by Messrs. R. O. Walborn & Company, for gentlemen to rear back in. These exquisite garments are deservedly popular, and Walborn's is *the* place to obtain them. Place (*note*) Nos 5 and 7 north Sixth street.

PHEW!—Saturday morning—the sun scorching hot, the mercury begging for ice to keep from running over—what's to be done? Our advice is to out for the seashore and take a dip. *First*, however, go to Sloan's, No. 806 Market street, and procure a bathing suit, or if you prefer, you can purchase or hire of him at Cape Island or Atlantic City, on arriving at either of these popular resorts.

FRED, idly strolling out one day,
Was told that Kate had passed that way;
And, though somewhat a fop in taste,
His clothes thrown loosely on in haste,
His hair dishevelled, stock untied,
With panting breath he reached her side;
Surprised, she gazed on Frederick's plight,
And, justly angered at the sight,
Bade him go do as other folks,
And buy his clothes of Granville Stokes,
No. 607 Chestnut street.

GENERAL SCOTT.—This veteran, we are told, passed through our city a day or two since, *en route for* Cape May. The General stopped in town only long enough to pay a flying visit to the "Old Franklin Hall Clothing Emporium" of E. H. Eldridge, No. 824 Chestnut street, where he provided himself with a beautiful bathing robe, of Eldridge's new style. We are requested to state that there are a few more of the same sort left, which are being sold at the same compatively low rates.

A ONE-EYED COLT.—The Richmond *Messenger* mentions a freak of nature which is without a parallel in the animal kingdom. It is a colt with one eye. It was foaled on a farm in Madison county. The eye is considerably larger than the usual size, and in the middle of the forehead. This phenomenon is suggestive of the often-made remark that persons with but half an eye can see the superior excellence of the garments made at the Brown Stone Clothing Hall of Rockhill & Wilson, Nos. 603 and 605 Chestnut street, above Sixth.

New York Markets yesterday.

ASHES.—Demand fair and market better; sales 140 bbls at $6 for Pots and $6.12½ for Pearls.

COTTON.—Market steady with a moderate business doing at 12¾@12¾c for middling Uplands; sales 650 bales.

PROVISIONS.—The market for Pork continues buoyant, with a fair sale doing; prices, however, do not show any important change from yesterday.

Sales 665 bbls at $16.55@16 71 for Mess; $15.75@16 for thin Mess; $17.75 for clear; $16 for Prime Mess, and $13 50@13 65 for Prime.

Beef is steady with a good home consumptive demand; sales 200 bbls at $10 75@11 50 for country mess; $12@13 50 for repacked Western mess; and $14@14 50 for extra do. Prime mess Beef is quiet and nominal at $18@21.

Beef Hams are steady, with small sales within the range of $18@17. Bacon is firm with a fair demand; sales 350 boxes at 9½c for short ribbed Middles; 10c for clear do, and 9¾c for loose do.

WHISKEY.—The market is heavy with sales of 206 bbls at 24c.

COFFEE.—Since the auction sale noticed yesterday, Rio has remained quiet but firm. In other descriptions we note a steady market, with sales since our last of 535 bags at 11½@12c for Maracaibo, and 15c for Java.

FLOUR.—Not much business doing, but the market is firm for choice superfine flour, which is quite scarce, and wanted at full prices. The receipts are moderate. The demand is chiefly confined to the wants of the home trade, with however some little doing for export; sales 12,000 bbls, at $3.50@3.60 for superfine State; with the bulk of sales at $3.62½@3.75; $3.75@4.06 for extra State, $3.50@3.90 for superfine Western; $3.95@4.25 for common to medium extra Ohio, Indiana, Illinois, Wisconsin and Michigan; and $4.50@4.70 for the shipping brands of extra round hoop Ohio.

In Canadian Flour we notice a moderate business doing, and the sales at prices steady and unchanged. Sales 565 bbls at $3.62½@3.75 for extras. For Southern Flour there is moderate inquiry, chiefly for the medium qualities, and prices have undergone no change of moment. Sales 350 bbls at $4.25@4.75 for mixed to good brands, and $4 8@6 for fancy favorite and extra do. There is nothing doing in Rye Flour or Corn Meal; the latter is scarce and nominal at $3 10@3 50 for Jersey and $3 25@4 for Brandywine.

GRAIN.—The wheat market is dull. Nothing of moment doing for export, and the home trade are only purchasing sufficient for the immediate supply of their pressing wants.

Sales of 500 bush at $3 30@3 35 for Milwaukee Club; $1.02 for common red southern; and $1 26 for new red Tennessee. The nominal quotations for Chicago Spring are $3 25 for badly injured to ordinary do; $3 32 for fair, and $3 38 for Prime. Milwaukee Club is nominal at 75@85 for ordinary and 90@95 for sound. Rye is dull at 60c.

Sales 27,000 bbs at 33@33½ for badly damaged Western mixed; 70@75c for common to prime do; 80@85c for white Southern; and 88c for Southern yellow. Oats are firm, with a fair business doing, at 36@36½c for Virginia; 41@42c for Jersey, Delaware, and Pennsylvania; and 44@45c for State and Western.

SUGARS.—The tendency of the sugar market is upward, and in some instances an advance has already been paid, but this is not yet fairly established, though the market is very buoyant, with a good demand.

Sales since our last 1,336 hhds at 6¾@8¾c for Porto Rico; 6@7¾c for Cuba; and 5@6¾c for English Island. In Havana there have been sales of 100 boxes on terms not made public.

MOLASSES.—There is only a moderate inquiry, but holders are very firm; quotations, therefore, in the absence of sales, are entirely nominal.

Importations.

Special Notices.

Messrs. John O. Mead & Sons, exclusive Silver Plate manufacturers, have now on hand a new improved patent ICE PITCHER, which they believe to be superior to any article of the kind now in the market. Also, a large assortment of fine Cutlery, Tea Sets, Urns, &c. All goods warranted. Northeast corner NINTH and CHESTNUT Streets. jy10-3t

Neuralgia.—This terrible disease, so various in its forms, so racking in its pains, and so difficult of cure, will, in the great majority of cases, yield to the judicious use of the PERUVIAN SYRUP. So remarkable has been the relief obtained from this Syrup that many physicians rely upon it as a certain and radical cure. For sale at HASSARD & CO.'S, Twelfth and Chestnut, and BROWN'S, Fifth and Chestnut. jy8-tjy17 wlt

Jules Hauel's Eau Athenienne, or Hair Restorer, possesses four wonderful properties: 1st. It is a beautifier and preserver of the hair. 2d. It prevents it becoming loose and falling off. 3d. It produces a new growth of hair where baldness exists. 4th. It changes gray hair and whiskers to their original hue color. It is the greatest chemical wonder of the age! It is not a dye; it easily applied, and will not soil the skin or linen. Sold by all Druggists, and by JULES HAUEL & CO., No. 704 CHESTNUT Street. jy5-d6t wlt

Singer's Sewing Machines.—After a fair trial of the several machines that have yet been offered to the public, the unanimous verdict of operators has been given in favor of Singer's. This is, in fact, the *only* machine capable of performing every kind of sewing.

SINGER'S NEW FAMILY SEWING MACHINE is, beyond all question, the most complete article for *family use yet invented*, being at once ornamental, easily operated, and superior, in every respect, to any other machine. On this statement we challenge the world. I. M. SINGER & CO.,
