PITTSBURGH CHEMICAL AND FARMING WORKS.

FINCH & CO.,

RESPECTFULLY inform Druggists and Dealers in Varnishes generally that they have for some time been engaged in the preparation of varnishes of great and other VARNISHES, and are now prepared to supply their friends and the public generally with articles of the very best quality, made of the best material, and selected with the greatest care and on the most favorable terms.

FINCH & CO. intend to devote themselves to cultivating a first class trade, and believe doubt that their efforts to obtain will prove satisfactory. Their tariff of prices for an article that having acquired a reputation for quality will be found equally low with any of the inferior articles, and, being determined that no article shall leave their works but of approved and tested quality, they only ask for a trial and a share of public patronage.

To our fine Body COACH VARNISH we would call particular attention. This article is equal to any English Coach Varnish of the very best brands, being made exactly in the process of the first class English houses, by Mr. Thomas Douglass, who for many years was engaged in some of the most extensive establishments in England and Scotland.

Our Anti-Corrosive BLACK VARNISH is confidently recommended to Founders, Boilerpublishers, and Manufacturers of iron generally, its peculiar qualities prevent oxydation entirely, and it is found to be equal to tar in those using varnish for iron, and preferable to asphaltum and other compounds.

All orders left at Messrs. JOHN IRWIN & SONS' Front street, will be punctually attended to or with J. FINCH, 137 Third st.

Reed's Patent Steam Engine.

THESE IMPROVED ENGINES (for which patents have been granted and first premiums awarded to the inventor, both in the United States and Europe,) continue to give such satisfaction, on account of their simplicity and economy, that we have now established an extensive manufactory, and are prepared to deliver at the shortest notice engines from two horse power and upwards.

These engines have been accurately tested, and have shown an economy of twenty per cent in fuel, and about the same in oil and repairs. This saving is effected by letting the steam in and cut both sides of the cylinder through large openings, removing the pressure from the valves and allowing no steam to escape or exhaust from the passages except from the cylinder alone, thus by reducing the weight and friction to about half that of the ordinary engines. We place the single; gives upon an improved boiler with all the pipes attached, and the whole mounted on small wheels convenient to ship to any part of the country, and to avoid the necessity of an experienced engineer to start them, they are all tested before leaving the factory.

Reed's Patent Steam Pumpgave also coming into general use on steamboats, in mines, and for supplying cities, where they are now giving great satisfaction. They are preferred to any in use because of their compactness and simplicity. These engines and pumps may be seen in operation, or further information had by calling or addressing

To Consumers of Pickles.

BELIEVING that the Public have become tired of purchasing Pickles in Packages, holding, in many cases, fifty per cent. less than represented, we have commenced putting up and selling our Pickles in Glass Jars, of every article which we are labeling "WM. UNDERWOOD & CO'S EXTRA PICKLES," and are selling into full size, which are lightly stamped on the bottom with their exact contents in ounces—thus enabling the purchaser to verify their truth.

These Extra Pickles are put up with *every* regard to style, quality and flavor, and will be sold at fairly remunerative prices.

We have made no change in our manner of Greening Pickles, never having resorted to any deleterious means to attain this end. The Cider Vinegar which we use is made from sound fruit, and is entirely free from Vitriol or any other mineral acid, which is not the case with that used in most brands of English Pickles found in this country.
