DENTISTRY.—The improved sets of ARTIFICIAL TEETH, still manufactured at 907 ARCH Street, Philadelphia, by Dr. J. Parrish, M. D., Surgeon Dentist.

The Mineral Plate sets of Teeth are superseding all others, principally from the following reasons: Pure mineral is used in place of gold or silver, for plates, making them much lighter, and at the same time much stronger, as their greatest thickness is where the gums have shrunken, and leaving a space for the tongue in the anatomical shape and contour of the mouth and face, and giving the exact original expression to the features; and they will not change color nor wear out of repair; they are responsibly warranted for a lifetime; they are more durable than a multitude of particles of food; they are wholly free from all galvanic action, and can never produce palpitation of the heart, inflammation of the stomach, or any other ailment.

THORLEY'S FOOD FOR CATTLE,

(As Imported from England.)

For Horses, this food is indispensable in promoting and sustaining all the animal functions to a health and Vigor. For Milch Cows it is invaluable, increasing the quantity and improving the quality of milk. For Sheep and Pigs the effect produced in one month is equal all expectation.

The addition of this food may be attended with a subtraction of other food, to the extent of one third, thereby rendering its application one of economy, while at the same time it materially assists the digestive powers of every animal, in extracting a larger portion of nourishment from the ordinary food, which would otherwise be lost, consequent upon the impaired or defective action of those organs.
