LACTATION IN THE HUMAN FACE.—In vigorous women the secretion of milk is copious. The amount ordinarily furnished by a good nurse is from one and a half to two quarts daily, or from four to five pounds; but cases often occur in which two children receive abundant supplies from one mother, involving a secretion of eight pounds at least. An infant, three months old, will take from forty-eight to sixty-four fluid ounces daily, in six or eight half-pint doses. During the first year, therefore, he will take from one thousand to thirteen hundred pounds. In one thousand pounds of milk there are twenty-six ounces of salts, of which nine ounces are phosphate of lime. In thirteen hundred pounds of milk the salts amounts to thirty-three and a half ounces, of which twelve ounces, are phosphate of lime. It thus appears that, during the first year, the child recieves from one hundred and ten to one hundred and forty-three pounds of dry solids. He may thus readily gain fifteen or twenty pounds in weight—implying less than three pounds of dry solids—and yet have a large residue, from one hundred and seven to one hundred and forty pounds, to be expended in the production of heat, and in the activity of an energetic vitality. A child thus nourished can make teeth and bone without difficulty.

MR. CURTIS'S LECTURE IN PHILADELPHIA.—Mr. George W. Curtis, in a card, denies having used in his lecture in Philadelphia, any language derogatory to the memory of Washington, or to the status of the Justices of the Supreme Court, as attributed to him by a letter written from Washington, and his denial is sustained by fourteen gentlemen of Philadelphia who heard the lecture. The only passages of the lecture which referred to Washington or the Supreme Court were the following:

"Thus, therefore, as I believe, the Constitution of the United States, in its essential spirit and intention, recognizes the manhood of Dred Scott as absolutely as it does that of the President, of the Chief Justice, or of any senator of the United States."

"If Washington, or Jefferson, or Madison, should utter to day, upon their native soil, the opinions they entertained upon this question, they would be denounced as fanatical Abolitionists."

At Barton's Office, cor. 5th & Grant sts.

Ohio Land for Sale.

THE subscriber offers for sale section ten, township 12, range in, Stark county, Ohio, commonly known as "Bowman's Section," containing 640 acres. It is situated three miles west of Massillon, on the State Road leading to Wooster, and within about two miles of the Pittsburgh, Ft. Wayne and Chicago Railroad. The south, east and north-east quarters are partly cleared and improved—the remainder is covered with superior timber—and the whole is well watered by springs and running streams.—This section is considered the finest body of land in the county. It will be divided or in lots to suit purchasers. To those who desire to invest in real estate a better opportunity is rarely offered.
de23:3t&wtf J. B. SWEIZER,
No. 161 4th street, Pittsburgh.

IOWA FARMING LAND.—The subscribers offer for sale on favorable terms six hundred acres Choice Lands, situated in Wright and Hancock counties, adjacent to lines of Railroads now in course of construction, and one tract only two miles from County seat.
The above will be sold low for cash, or exchanged for farming lands in this or adjoining counties.

Medical.

POPULAR ESSAY ON THE DISEASES INCIDENT TO TRADES AND OCCUPATIONS.

It is our purpose to write, as briefly as possible, concerning the disease and suffering incident to certain occupations, including their causes, symptoms and modes of cure. We shall do this in plain language, and in a straight forward way. Our purpose is two-fold—firstly, to give some curious facts not generally known; and, secondly, to bring home forcibly to view the ready relief at hand in RADWAY'S REMEDIES. We freshly know that the truth we are taking is a business transaction, meant to benefit both the public and ourselves.

The diseases springing from various trades arise either from the very nature of the occupations, from the materials handled or used, or from both causes. Scarcely any of these pursuits are necessarily unhealthy, but men will be as imprudent in their avocations as in their pleasures, and suffer for their neglect of precaution.

Let us look first at those who suffer from poisonous materials.

Coppersmiths, Brass-Founders, Braziers, and Pinmakers. from their manipulation of copper and its compounds, take into their system either the impalpable dust of its oxides or salts, or their fumes. The results a copper disease, whose symptoms may vary more or less in violence, sometimes creeping slowly along until the system is nearly destroyed, or else opening an avenue to more apparent diseases. The victims to the copper disease notice, perhaps, on rising in the morning, a slightly acrid taste in the mouth, a slight constriction of the throat, the tongue dry and parched, and, sometimes, sickness at the stomach. He thinks he has caught cold, and probably, takes some aperient medicine and the symptoms pass about. It may as well be mentioned here, that the making of a really good poultice is little understood. Slate Bread should be rolled into a fine crumb and placed in a soup-plate or large saucer, over which water, *while boiling*, must be poured. A similar plate or saucer is placed over this, the tea grasped firmly and held up sideways, so that the water will drain out. The wet crumb is now to be rolled into a pasty consistence with a spoon, placed on a rag at once, and applied to the part as warm as the patient will bear. As soon as it begins to harden around the edges a fresh one should be substituted, and thus a continual fermentation be kept up. That is the true poultice, which may be medicated by the RELIEF, or otherwise, if required.

Basket-Makers, Boot and Shoe Makers, and Tailors, from their sedentary habits, are subject to piles, anemia, tympanitis, constipation, hypochondria, dyspepsia, St. Vitus' dance, dropsy of chest, general debility, and, if the habit of the body is bad that way, to apoplexy or if not, to consumption and lung disease. The treatment of these complaints is summary and effectual. For hypochondria, the READY RELIEF and Pills for dropsy and St. Vitus' dance, the REGULATING PILLS and RESOLVENT; and for earache, all three of the remedies. The treatment of the other affections have been already indicated.

The complaints of females engaged at various occupations are somewhat different from males, in consequence of their peculiarity of organization. It is true that those who lead a sedentary life, or are occupied in pursuits which require them to stand or lean over their labor, are subject to similar diseases with those of the opposite sex in like occupation. Thus,

Feather-Dressers, Milliners, Paper-Folders, Paper-Box Makers, Match-Dippers, Seamstresses, and the like,

are liable to costiveness, piles, and general debility. But the main disease to which they are subject is the derangement of those secretions which nature has wisely given them for their health and comfort. They are particularly liable to hysteria, obstructed, painful, or irregular menstruation, whites, kidney weakness, nervous debility, sensation of the head increased action of the ovaries, and womb disease, for all of which the READY RELIEF and REGULATING PILLS are confidently prescribed; or subject to chlorosis, to be removed by the use of the RESOLVENT, in addition to the other two remedies named.

Perhaps of all female occupations, that of

The Factory Girl

is liable to the most direct injury, especially when the ventilation of the work-room is not perfect. Standing for protracted periods, monotonous employment, and floating particles continually drawn into the air passages, all combine to weaken, depress and destroy. Yet by prudence, care and the use of Radway's Remedies, even the factory girl may bid defiance to death and the doctors—the latter is a very formidable partnership to fight.

For the present we draw our remarks to a close. But it does not follow that all occupations should be abandoned when people are subjected to acid fumes, poisonous materials, irritating vapors or particles, intense heat, changes of weather, exposure, and the debilitating effects of stationary or constrained positions. With ordinary prudence, out-door exercise, and the use, when indicated by symptoms, of Radway's celebrated remedies, their lives may not only be saved, but their sufferings limited, and their comfort insured. RADWAY'S READY RELIEF and RESOLVENT PILLS will be found sufficient to prevent or cure, except in chronic cases, or those in which the system has been prostrated; and even there, RADWAY'S REGULATING RESOLVENT will speedily remove all obstacles to thoroughly influence of nature, and thus restore the system to perfect health.

In truth, if the Ready Relief is kept constantly on hand, and used at the onset of every attack according to directions, it alone will be found equal to all forms of cholera or the deleterious effects we have named, and may be confidently recommended to those who otherwise would be overcome by disease and death.

It is not so many years since Radway's Remedies have been introduced; for his birth of the art of perfection of chemical and pathological science upon which their success is based is comparatively new. The principles of their action are as old as humanity itself, but it remained for modern science to develop and apply them. How successfully this has been done, the overwhelming popularity and universal sale of Radway's Remedies show. The astonishing power of these blessings to the sick and suffering is indisputable; they are in themselves the entire vegetable materia medica; and they are rapidly supersoiling all the inert or poisonous drugs whose use and abuse has done so much to bring

"Death into the world, and all our woe."

The price of Radway's Remedies places them within the reach of every human being—the Ready relief is sold for 25 cents, 50 cents and $1 per bottle; Radway's Pills, 25 cents per box; Resolvent, $1 a bottle. RADWAY & CO.,
