Another Sea Mystery.

DISCOVERY OF THE BODY OF A CAPTAIN—THE BODY FOUND—A SAILOR MISSING.

(From the New York Tribune.)

Coroner Gedney, of Jersey City, yesterday instituted an inquest upon the body of a man found floating in the East river on Sunday afternoon, which was subsequently identified as that of Richard C. Kelly, captain of the schooner Thomas Hooper, of West Farms, Westchester county, New York. The general impression of the friends of deceased, as well as all others acquainted with the facts, is that the captain came to his death by foul play. On Sunday afternoon, Sept. 30, the Catherine Margaret was discovered lying at anchor about a hundred yards from the Hoboken Ferry, loaded with brick, with her signal light burning, and the vessel in a sinking condition. Several persons went out in small boats to render assistance, and on arriving at the vessel, found no person on board.

In the cabin was found a piece of fresh beef some potatoes, cabbages, and other food, and a bottle of gin. These articles had apparently been brought on board very recently. The vessel was towed to the dock, where she shortly after sunk. Since that time the friends of the captain have been on the lookout to ascertain the cause of his mysterious disappearance, without success, until the finding of his body on Sunday. Justice Whitley, of Hoboken, viewed the body, and it is stated without taking any evidence, gave permission to the friends to remove it to Weehawken cemetery. A young man, named William Hooper, was the only person employed on board the schooner, and he, together with the yawl-boat, have been missing since the sinking of the vessel. About eleven o'clock on the night of the 29th of September, the night before the schooner was found in a sinking state, two young men, belonging to the yacht Ziegs, discovered a yawl-boat floating down the river, and, upon rowing out to it, saw a man in it, with his head rest one side of the boat, apparently intoxicated. His general appearance answered somewhat to the description of Hooper. He is 5 ft 7 in tall, very dark complexioned man, with black hair, small black whiskers, and black eyes. The men at the time supposed him to be a colored man, but could not be positive, on account of the darkness. Capt Kelly's face was considerably eaten away, but several marks were discovered upon the head, and particularly a severe cut over the left eye.

Upon the above facts becoming known, a number of the citizens of Hoboken were dissatisfied with the manner in which Justice Whitley had disposed of the case, and accordingly notified Coroner Gedney in order that a thorough investigation might be had.

After hearing the evidence the coroner decided to adjourn the investigation for the purpose of procuring further evidence, and, if possible, to find the yawl, which may lead to other developments. His theory is, that a drunken frenzy may have occurred between Hooper and Capt. Kelly, which may have resulted in the death of the latter.

GENERAL NEWS.

Census Finals.—The census returns of all but 27 towns in Connecticut, foot up a gain of 50,000 from 1850. The large towns to be returned will probably bring the gain up to 85 000, making the whole population of the State 445 000. Winter county, Vermont, has a population of 37,253, and has lost 1,087 in ten years. Hartford, where the related junction village has grown up, has gained 227, and is the only town making any considerable gain, while Woodstock has gained but 21; Windsor has fallen off 229, and Hartford, the town above it, has fallen off 512. The population of Dubuque, Iowa, has fallen off 4 000 in three years, and is now about 12 000. Cape May county, New Jersey, has a population of 7,135, having gained 703 in ten years. Austin, Texas, has 2 480 blacks and 980 negroes; the whole of Travis county, in which it is situated, has 4,960 whites and 3,149 slaves. Concordia parish, Louisiana, has 1,238 whites and 12 800 blacks.

Curious Mistake.—Sir Henry Bulwer, the English ambassador, lately had an interview with the Sultan, in which, after remonstrating upon the inapacity of the Sultan's officers in the provinces, he suggested some reforms in the internal policy of the Empire, and said, among other things: "Women are expensive in Turkey, and in your Majesty's household they cause enormous waste. Your Majesty knows, and you have ordered [illegible] but perhaps not sufficient for the prudent reform. The plain language was made still plainer by the Sultan, evidently in the best temper, and the Sultan, evidently in the best temper, replied: "Sir Henry, I am more so by the interpreter." The interpreter declared that "Sir Henry" had ordered the Sultan's wives to be put down, and the Sultan, evidently supposing that the "Grand Turk" was going to curtail his wife-department, replied: "Sir Henry would be willing to receive advice, he must be insulted, and immediately retired. It was not before the next day that explanations could be made satisfactory, and Sir Henry admitted to another interview.—*Philadelphia Ledger.*

Just Arrived.—About forty mechanics, to be employed by the Lester Manufacturing Company, arrived here yesterday morning from Philadelphia. They walked in a body from the wharf to the factory on Cary street, (where the gas works formerly stood,) and on reaching their journey's end gave three lusty cheers, and then proceeded to survey the premises. The company has already commenced operations on a limited scale, and now that the main body of their operative force has arrived, will proceed to supply all demands that may be made upon them for sewing machine, and other kinds of patent machinery.—*Richmond Whig.*

We copy the above, since it welcomes to a Southern sister the operatives lately employed in this city by the Singer Sewing-Machine Company, who it will be remembered, left in consequence of a decision in the great sewing machine case.

Cuba.—The Island of Cuba, in spite of Spanish misrule, says the *London American*, is one of the most prosperous portions of the earth. Its total population is estimated at 1,350 000, of which nearly 550 000 are white inhabitants, 220,000 free colored, 400 000 slaves, and 28 000 Asiatics and Indians. The sugar estates are immensely productive. Twenty-three of the principal plantations, comprising about 100,000 acres of land and 10,175 slaves, are valued at $3 000,000. These twenty-three estates produced, in 1859, 25,000 boxes, the worth of which was $4 each box, making in all $100,000. There are 1 600 sugar plantations in Cuba, the aggregate products of which amounted to about $10,000,000 per annum.

Skeleton in Fitchburg.—The Worcester *Times* says that in digging a cellar in that part of West Fitchburg known as Crockerville, the laborers exhumed a human skeleton. Some of the buttons of the clothing, and also the shoes, were in a good state of preservation. The skeleton is believed to be that of one of the Irish laborers who worked on the railroad in that place in 1847. The laborers had then a riot which the military were called upon to quell. At the first sound of the drum the rioters fled—but have ever declared that one man was mortally injured at the time, whose body never could be found. It is supposed that he was buried just as he died, to prevent all knowledge of his death by others.

Cigarette Papers.—Mention has been made of the discovery of a new kind of paper for making cigarettes, and a manufactory has been established in Algiers for working this new invention. The paper in question is made from the refuse stalks and portion of the leaves which have been hitherto thrown away or burnt as useless. It has been calculated that the value of the rags from which the paper for the cigarettes has been usually made, amounted annually to from 9 000 000 to 10,000 000f. The benefit which France will derive from this invention may be therefore readily conceived, and no doubt can exist that the manufacture must be attended with great success.—*Galignani.*

A very beautiful gravestone has just been prepared at Hartford, Ct., for the grave of a young girl in Albany. Under the projecting moulding at the top of the stone is a bird cage in relief with a bird escaping through the open door. The cage is made in bars not as large as pipe stems, and every detail is wrought out with the nicest delicacy. The face of the stone under the cage is as smooth and level as any other portion, though there is no space wider than half an inch through which to work upon the marble. The cage appears so fragile that one dares hardly to touch it lest it might crumble to pieces.

Short Honeymoon.—An incident concerning a gentleman of wealth and good standing is making considerable gossip in a neighboring town. It seems that a widow lady with children entered the bonds of wedlock with him, and after a honeymoon of four weeks, a note for $200 was presented him for payment by one of his wife's creditors. While the victimized husband was visiting another town for the purpose of getting money from a bank with which to pay the debt, his new wife picked up her children and started for other localities.—*Manchester (N. H) Mirror.*

A Boston paper, hearing of the extraordinary solicitude shown by a Western railway company for the safety of the Prince of Wales, in a special examination of rails and bridges, in a line of circuit-men, and in a pilot engine, is naturally troubled in behalf of the American traveller who has been over and who will go over the road without any such precaution. If this one is a precaution, and necessary on one occasion, it certainly is not less necessary on any other; it is not probable that the public will appreciate the higher value set on the life of a prince than that of a common man.

It is said that nothing now extant admits of comparison with Spurgeon's new tabernacle in London. The maximum of utility has fairly been attained. It is not easy to conceive any substantial advancement on it. Everything is vast, and yet that very vastness is so concealed as to give it an air of compactness. It is a wonderful creation of practical genius, and the skilful builder will deserve the glowing eulogium pronounced on him by Mr. Spurgeon.

A Vindictive Woman.—A Mr. Barger, of Indianapolis, who was married last spring, has since found himself obliged to supply a former paramour with money. On Thursday last she entered his shop, (where his wife was sitting,) on pretence of demanding a good bill in exchange for a counterfeit, and, as he was handing her the money, dashed in his face a bowl-full of vitriol, destroying one and probably both of his eyes.

The Ottawa Rescues Surrender.—The parties convicted at the July term of the United States Court for participating in the rescue of a fugitive slave at Ottawa last October, were sentenced at Chicago last Wednesday as follows: John Hossack, ten days' imprisonment and one hundred dollars fine; Joseph Stout, ten days' imprisonment and fifty dollars fine; Claudius B. King, one day's imprisonment and ten dollars fine.

A nugget of gold worth $2,400, has been exhibited at Denver City, as an evidence of the richness of the Pike's Peak mines, but the discovery has been made that the nugget was manufactured at Denver City, for the purpose of creating a sensation. The most rascally means are being reported to bolster up the reputation of the Pike's Peak mines, but it will not be successful.

A venerable bureau was recently exhibited at a town fair in Connecticut, which was brought to this country at its early settlement, and is still preserved in the same family. A chair that has been in one family 150 years, and another some 200 years old, were also exhibited, as well as a pair of Britain's shoes, that have been worn by three generations, and are still in good preservation.

Two men who were hunting in Utah, not long since, got into a fight with a large grizzly bear. Grizzly pounced upon the foremost man, knocking him down, and tore his face badly, but having on a thick pair of boots, he finally succeeded in driving the bear away by kicking his nose, while the other was stood by too much frightened to offer any resistance.

The Newark Grand Jury, at their recent term, which lasted ten days, found one hundred and forty-four bills of indictment, and dismissed a still larger number.

The Paris police, one of the best organized and most effective bodies of its character in the world, now numbers 4,000 agents; the pay is $280 per annum per man.

The Methodist Conference, in session at Dover, Mass., has declared against tobacco and slavery.

Barney Dock-rent, Esq., for many years one of the most skillful contractors in Ohio, died in Texas last month, of consumption.

PREPARED GLUE.

SPALDING'S

PREPARED GLUE!

"A STITCH IN TIME SAVES NINE."

ECONOMY! *SAVE THE PIECES!* DISPATCH!

As accidents will happen, even in well-regulated families it is very desirable to have some clean and convenient way for repairing Furniture, Toys, Crocks ry, &c.

SPALDING'S PREPARED GLUE

meets all such emergencies, and no household can afford to be without it. It is always ready and up to the sticking point. There is no longer a necessity for limping chairs, crippled tables, and broken toys to old mariners. It is just the article for one, shell, and other ornamental work, so popular with ladies of refinement and taste.

This admirable preparation is used cold, being chemically held in solution, and possessing all the valuable qualities of the best cabinet-makers' glue. It may be used in the place of ordinary mucilage, being vastly more adhesive.

"USEFUL IN EVERY HOUSE."

N. B. A brush accompanies each bottle.

PRICE TWENTY-FIVE CENTS.

Wholesale Depot, No. 48 CEDAR Street, New York.

Address

HENRY O. SPALDING & CO.,

MEDICINAL.

MOTHERS.

MOTHERS.
MOTHERS.
MOTHERS.
MOTHERS.

It must be obvious not only to you but to every attentive and intelligent person, that the first diseases of infants are chiefly those of a disordered condition of the bowels, and in this connection we present to your notice the following testimonial as a most decisive remedy known as

DR. EATON'S

INFANTILE CORDIAL.

Prepared from a formula used by Dr. Eaton with remarkable success during a very long practice, and know it to be a most reliable and efficacious remedy for infantile complaints, and one trial alone will convince you of its superiority over every other preparation of the kind. It is particularly recommended

TO MOTHERS

And at this period of infantile life, when your anxious hearts are pained by witnessing the sufferings of your little ones, and when, in addition to all your cares of *Gums, Reducing Inflammation,* and *Relieving all Pain and Spasms,* you will find it a most *Soothing* and *Invigorating Cordial.* We now ask your attention to a subject of vital interest to yourself, as well as to your suffering child. Dr. Eaton's Infantile Cordial contains

NO MORPHINE OR OPIATE

of any kind, or of whatever name, and we do not think that we are fully warranted in stating cannot be said of any other preparation for the relief of infants at this time before the public. We find that throughout the country Mothers are becoming convinced of this truth, and of the safe and blessing consequences which are certain to result from the use of narcotics disguised in Cordials or Quieting Syrups, when continued administration being invariably followed by stupefaction, and constipation of the bowels, ending subsequently in convulsions. Hence DR. EATON'S INFANTILE CORDIAL differs from every other preparation in that it

DOES NOT CONSTIPATE

the bowels, neither does it act by deadening the sensibilities of your children, but natura ly, through its rare medicinal virtues, it relieves the pain and cause of disease. We earnestly recommend you, therefore, to lose no time in procuring a bottle, that you may have at hand a remedy which will *never* fail to relieve your child in times of need, *when its sufferings demand it, and can not injure its most delicate infant.*

Take care that DR. EATON'S INFANTILE CORDIAL *This you can rely upon.* Price 25 cents per bottle.

Prepared only by

CHURCH & DUYONT,

STOOD THE TEST OF YEARS,

AND GROWS MORE AND MORE POPULAR EVERY DAY.

And testimonials, new, and almost without number, which are either published or in manuscript, in the hands of society, whose united testimony none do let retain, that Prof. Wood's Hair Restorative, for restoring the hair and gray, will preserve the hair of the youth to old age in all its youthful beauty!

PROF. WOOD: Thee will please accept a line to inform thee that the hair on my head all fell off over twenty years ago, caused by a complicated chronic disease attended with an eruption on the head. A continual course of suffering through life having reduced me to a skeleton, I despaired of ever being able to obtain stuff for caps, neither have I been able to them up, in consequence of which my head has suffered much from cold. Thee will remember I had but a few Bristol & Boston almost the last cent I had on earth for a two dollar bottle of thy Hair Restorative about the 1st of August last. I have faithfully followed the directions, which thee kindly wrote out, and have covered the bald block, though short, it is also coming in all over my head. Thee may depend on it, if one bottle would restore it entirely and permanently, I feel satisfied I would purchase any more. I think it a *very desirable article to* have in every family. I would say, thee is welcome to use my name in any way thee may think it will do thee good. Yours truly, SUSANNAH KIRBY.

PROF. O. J. WOOD: Dear Sir: In the latter part of the year 1857, while attending the State and National Law School at Ballston, I had the misfortune to contract a disease unknown to me, commenced falling off very rapidly, so much so that in a few months the whole upper part of my scalp was almost entirely bare of its covering, and from the left temporal portion upon the top and back part of my head scarcely a lock became gray; so that you will see I was young when I commenced using my return to the State of Indiana my mode attracted considerable attention, but was not much at a loss to discover the cause of the change in my appearance, as no more intimate acquaintances were to recognise me at all. I commenced application to the most skilful physicians in the country, but, receiving no assurance from them that my hair could again be restored I was forced to become reconciled to my fate, until, fortunately, in the latter part of the year 1857, your Restorative was recommended to me by a druggist as being the most valuable Hair Restorative in the world. Suffice it to say, I found to my great satisfaction that it was producing the desired effect, and in a short time I have used seven dollars' worth of your Restorative, and as a result, have a fine coat of very soft black hair, which no money can buy.

As a mark of my gratitude for your labor and skill in the production of this wonderful article, I do recommend its use to many of my friends and acquaintances, who, I am happy to inform you, are using it with like effect. Very respectfully, yours,

W. M. LATTA,
Attorney and Counsellor at Law.

Depot, 444 Broadway, and sold by all dealers throughout the world.

The Restorative is put up in Bottles of three sizes, viz: large size, retail, $1 50; medium size, half a pint, and retails for one dollar per bottle; the medium bottle at least contains one third more than the small, retails for two dollars a bottle; the large size, which is equal to three of the small size, retails for $3 a bottle.

O. J. WOOD & CO., Proprietors, 444 BROADWAY, New York, and 114 MARKET Street, St. Louis, Mo.

And sold by all good Druggists and Fancy Goods Dealers.

Sold here by DYOTT & CO., 232 North SECOND street. su13-tuw1-6-owW1

OAK ORCHARD ACID SPRINGS.

These Springs are situated in the valley of the *Oak Orchard Creek*, in the town of *Alabama, Genesee co., N. Y.*, eight miles south of the village of *Batavia*, on the Erie Railroad, twenty miles from *Batavia*, on the Erie Canal, and fourteen miles from Batavia.

The waters are highly medicinal in a great number; besides these there are six others. They are all located within a circuit of about fifty rods. (the medicinal properties of the waters are fully shown in the subjoined testimonials. They contain a very large amount of *Sulphur, Soda, Magnesia, Sulphuric Acid, and Sulphate of Iron.* The great medicinal virtues possessed by these waters depend very largely upon this last ingredience, in such unusual quantities, of these curative substances.

Hundreds of cases of disease, especially those resulting *from the scrofulous diathesis*, have been cured by these waters.

In skin diseases—even in confirmed *leprosy*—the waters have been signally successful.

Opinions of medical and scientific gentlemen are given in the pamphlet, following eminent gentlemen speak in strong terms of the medicinal value of these waters: Prof. Emmons, Albany; T. Romeyn Beck, M. D., of Albany; Jas. McNaughton, M. D., of Albany; Edward Spring, M. D., of New York; Dr. S. Campbell, Fitchburg, Mass.; Dr. J. S. Shuley, of Lockport, N. Y. They recommend the waters confidently. *Dr. Spring refers to a case of cancer, and a long destitute of means to purchase any more, "I won't say that I have used the medicinal agents."* Dr. Campbell says, "They must be highly beneficial for the chronic diseases of the stomach and bowels."

In S. P. White read a paper on the subject of these Waters, before the Academy of Physicians, in the city of New York, in which he states that the Waters possess decidedly tonic, refrigerant, and astringent properties; and that the class of diseases to which they are more particularly adapted are chronic affections of the *digestive and urinary organs, and some of the cutaneous diseases; chronic dyspepsia; chronic diarrhœa; chronic dysentery; chronic diuresis; chronic cystitis; diabetes; cases of passive hemorrhage, such as Purpura hemorrhagica, and the colliquative sweats of Hectic Fever.* The Water may also be often used with advantage, he says, in cases of *low typhoid fevers, in convalescence from protracted fevers*, in cases the appetite and promote digestion; in diarrhœa, particularly such as are dependent on a relaxed or ulcerated state of the mucous membrane of the intestines, in colonic affections, or *tiflitis*, attended with phosphatic sediments, it is the suitable remedy, being preferable to muriatic acid as being more solvent and less apt to unnecessarily use to disorder the stomach. In febrile diseases, it can be used properly diluted, as a refrigerant to diminish thirst and preternatural heat. In skin diseases—in those forms of dyspepsia connected with an alkaline condition of the stomach, as in *Pyrosis*, or water-brash, it will prove better than hydrochloric acid. In cases of Celtic pyrosis, and other injurious consequences arising from the action of lead, this water will prove to be an admirable antidote. *In chronic sorenessof the larynx, chronic mucous catarrh, and humid asthma, chronic ophthalmia* (external) as a gargle in *ulcerated sore throats*, in cases of salivation, and in *leucorrhœa and gleet*; and also in piles.

When taken internally, a wine glassful of the Water, diluted, taken three times a day, is sufficient for an adult.

Other testimonials from physicians, and other respectable individuals, may be seen on application to the Agent.

Dealers supplied on liberal terms.

No Water genuine unless signed on each bottle.

H. W. BOSTWICK,
