Ancedote of the Elder Booth.

Mr. Elihu Burritt contributes to the February number of Packard's Monthly an interesting article under the title of is told of the elder Booth:

The elder Booth was a man who threw into his impersonations on amout of heart and soul which his originals could scarcely have equalled. He did Richard III. to passions, emotions, and experiences his of it as often as necessary, free of choice.

As to its virtues, Colonel Lee Milrm states fury, hope and revenge, with a depth and force that half amazed his auditors -He could transmute himself into the hero of his impersonation, and he could breathe a power into other men's written struction in qualifying himself for an orator, the veteran tragedian opened the Bible and read a few verses from Isaiah in a way that made the Cambridge scholar trembled with awe, as if the prophet had risen from the dead and was uttering his sublime visions in his ear .-He was then residing in Baltimore, and a pious, urbane oid gentleman of that city, hearing of his wonderful power of elocution, one day invited him to dinner. although strongly deprecating the stage and all theatrical performances.

A large company sat down to the table and on returning to the drawing room one of them requested Booth, as a special velocipedist on a tricycle or three wheeled arose from his chair, trembling with the and presence of the Almighty Being he forty-two inches in diamiter, and is propelled was to address. He was to transform himself into a poor, sinning, stumbling. benighted, needy suppliant, offering hobecome absolutely painful, until at last the one feature that renders it superior to those spell was broken as if by an electric shock, now in use, and that is the comparative ease as his rich-toned voic, from white lips, syllabled forth 'Our Father, which art roads. in heaven," &c., with a pathos and fervid solemnity that thrilled all hearts. He finished; the silence continued; not a voice audience, until, from a remote corner of the room, a subdued sob was heard, and frame, and seized Booth by the hand -"Sir," said he, in broken accents, "you have afforded me a pleasure for which my whole future life will feel grateful. I am an old man, and every day, from boyhood heard it before, never."

"You are right," replied Booth. "To ed me the severest study and labor for 32,164 tons; rails, 253 380 tons; manuisfied with my rendering of that wonderthousand comprehends how much beauty, tenderness and grandeur can be condensed in a space so small and words so simple. That prayer itself sufficiently illustrates the truth of the Bible, and stamps upon it the seal of divinity." "So great was the effect produced," says our informant, "that conversation was sustained but a short time longer, in subdued monosyllables, and almost entirely ceased; and soon after, at an early hour, the company broke up and retired to their several home, with sad faces and full hearts."

TRICHINA SPIRITS-DEATH OF SEVERAL PER-BONS FROM EATING DISEASED PORK.—The New York Sun, of Tuesday, has again broken out afresh, and so far with equality fatal results. After a careful scintific investigation into the causes of this dreadful malady, the savants traced it generally to rats, from which hogs receive it by feeding on them in sewers and elsewhere, and these in turn impart it to human beings who eat largly of pork. When these animacula get into the human body and effect a lodgment, the case is hopeless. It was proved by this investi-gation that boiling is the surest method of destroying trichina in meat. Last week seven boarders in a German boarding-house in Carlisle street, sickened with this melady and were taken to hospitals. Two of them died a day or two ago in the New York hospital, and a piece of flesh taken from the arm of one of the men while he was alive, when placed under the microscope, revealed millions of these creatures. It is also reported that several deaths have occurred from the fashionable practice of chewing from the same cause in different parts of the city.

From the Memphis Avalanche, Feb. 12. MAD-STONE.

Curious History of a Remarkable Mad-

For the first time in our life we saw, yes-For the first time in our life we saw, yos-tsrday, a genuine mad-stone, and heard its history from the owner, who inherited it from his father. The fortunate possesser is Colonel B. Lee Milam, of Waterford, Mar-shall county, Mississippi. Colonel Milam is a prominent citizen of his county, and his statements set at rest any doubts which we may have had about the efficiency of the madstone in curing the bites of mad dogs, cats, snakes, spiders, or other venomous animals or insects. Colonel Lee Milam is a native of Madison county, North Alabama, from whence he removed in 1835. The family came from Virginia, and the Colonel inherits also the middle name, being a second cousin of Gen. Robert E. Lee.

The mad-stone in his possession is about the size of a hen's egg, as heavy as so much brick and rather more porous, and is of a light clayish color. One end is flat, as if it had been sawed off, and a grain runs through the stone from end to end, as if it had, in some former age, been so much wood or bone.— About fifty years ago this stone was split in an interesting article under the title of three or four pieces, but was carefully fasten"Breathing a Living Soul into Dead Words," in which the following ancedote its office. The stone was brought from China in the year 1810, by Dr. Barker. The Dr. died in a few years, and the stone was sold at a public sale among his other property.— Mr. Jarvis Milem, the Colonel's father, was the purchaser, and at his death be willed have equalled. He did Richard III. to the stone to the present owner, with the con-the life, and more. He had made human dition that all the family should have the use

feel rage, love, despair, hate, ambition, that it has been applied with success in over one thousand cases, and has only failed in two, and in those the part affected could not be successfully reached. He has used it him-self over two hundred and fifty times. When applied it adheres as if by suction, and usually remains on ten or twelve hours. When words which perhaps was never surpassed. | the poison is all extarcted the stone falls off And what is rather remarkable, when he During the process a very offensive steach was inclined to give illustrations of this fills the room, making the air sickening in faculty to private circles of friends, he the extreme. The stone is then soaked in warm water from twenty-four to thirty-six nearly always selected some passages hours, when it becomes cleaused and is again from Job, David, or Isaiah, or other holy ready for use. Colonel Milam assures us he men of old. When an aspiring young can cure any case of dog, sucke or other bite professor of Harvard University went to where madues or desolution has not actualhim by night, to ask a little advice or in- ly set in. Cures have been effected even as ong as two weeks after the bite. Last week the stone was used successfully in several cases. It is known for many leagues around, and the people come from far and from near to be healed

Colonel Milam has been offered five thouand dollars for this wounderful stone, but niways refused to entertain the proposition. He said, playfully, yesterday, that he might sell it for ten thousand dollars if the buyer would promise to always allow him the use of it. Great is the mad-stone. converted. What says the medical world?

Five months since, a Dr. Ridley. of Boston, amputated the leg of a five year old son of his, who had been injured by being run over by an omnibus. For this damage to his son he collected six thousand dollars. It now turns out that the boy's great and next to the great toe were alone injured, and this not sufficient to acquire more than two splints, bandages trichina fever which prevailed here to such and a little care. But, to recover dama fearful extent a few years ago, says the ages, the Christian father gave him chloroform, amputated the leg below the knee, and recovered pay for the damages he alone had caused.

Ayer's Hair Vigor,

For restoring Gray Hair to its natural Vitality and Color.

A dressing which is at once agreeable, healthy, and effectual for preserving the hair. Faded or gray hair is soon restored to its original color with the gloss and freshness of youth. Thin hair is thick-

ened, falling hair checked, and baldness often, though not always, cured by its use. Nothing can restore the hair where the follicles are destroyed, or the glands atrophied and decayed. But such as remain can be saved for asefulness by this application. Instead of fouling the hair with a pasty sedi-ment, it will keep it clean and vigorous. Its occasional use will prevent the hair from turning gray or falling off, and consequently prevent baldness. Free from those deleterious substances which make some preparations dangerous and injurious to the hair, the Vigor can only benefit but not harm it. If wanted merely for a
