INVITATION TO TAILORS AND MANUFACTURERS of Clothing.—The American Button-Hole Machine Company are pleased to announce that, after years of patient trial, and the liberal expenditure of money in perfecting the first machine that talent, skill and care have selected and were prepared to offer to their celebrated labor-saving machines are justly regarded as one of the greatest curiosities of the age. A single machine will do the work of from 100 to 150 perfect button-holes in a day, instead of 1,000 to 1,500 in a day's work of a tailor. It also does embroidering, and sews on buttons at the same time. The machine is entirely simple in construction, and easily understood. Call and examine the specimens of work, and see the machines in operation, at the office, 650 Chestnut street, Philadelphia. oc18-3t

THE EUREKA OIL COMPANY OF THE STATE OF WEST VIRGINIA—Capital, $1,000,000, divided into 100,000 Shares at $10 per share. Subscription price $8 50 per share, payable in full pay ment for a $10 share. No further call or assessment to be made. $25 dollars per month for every $100 share of stock. Office, 28 MERCHANTS' EXCHANGE, Philadelphia. The District selected by this Company is one of great interest, and is certainly very promising. Oil wells are developed the results are very gratifying. The wells at Burrows Springs and Petroleum are producing largely, while those at Horse Neck and Campbell's Run (where our lands are situated) show that this is a great oil producing district. Indeed it is one prominently for oil boring wells now producing largely, viz: The "Greer Well," on Horse Neck, produces 150 barrels per day, and increasing. The last great well in this neighborhood is on Rawson's Run, a fork of Horse Neck, owned by Messrs. Cook & Brothers, of Philadelphia, and struck about three weeks ago. It flowed about 500 barrels of oil in a day, and on average has been pumping 225 barrels a day. It is a shallow well 200 feet deep. Messrs. Cook & Brother have a well 350 feet deep, which yields from 25 to 50 barrels of oil daily.

The territory secured to this Company has been selected with a view to the interest of its stockholders, it was known to the oil regions, besides having the opinion of a disinterested geologist from our own State, that the range of September, payable free of State tax on the 20th inst. NEW SKIRT FOR 1864.

A NEW AND GREAT INVENTION IN HOOP SKIRTS.

THE DUPLEX ELLIPTIC (OR DOUBLE) STEEL SPRING.

J. I. & J. O. WEST, No. 97 CHAMBERS STREET, NEW YORK.

Are the owners of the patent and exclusive manufacturers of this,

J. W. BRADLEY'S

PATENTED DUPLEX ELLIPTIC STEEL SPRING SKIRTS

This invention consists of Duplex (or two) Elliptic Steel Springs, ingeniously braided tightly and firmly together, sope to edge, making the toughest, most flexible, strong, and durable skirt ever made, enabling the wearer, in consequence of its great elasticity and flexibility, to place and fold the skirt within a nut-shell, and with the same convenience as a silk or muslin dress. It entirely obviates and remedies the objection to hoop skirts, viz: the annoyance to the wearer as well as the public, especially in crowded assemblies, carriages, railroad cars, church pews, and any crowded place, from the difficulty of contracting them to occupy a small space. This entirely removes the difficulty, while preserving the skirt the usual full and symmetrical form, and is the lightest and most stylish and graceful expansion for the street, promenade, or evening dress. A lady having enjoyed the pleasure, comfort, and great convenience of wearing the Duplex Elliptic Spring Skirt for a single day, will never afterward willingly dispense with the use of them. They are the best quality in every part, and will be the lightest, most durable, comfortable, and economical skirt made. Mechanic will be supplied at wholesale, and all retail dealers in these articles will furnish. Address

Corner of Sansom and Third streets.
