he Lands of this Company consist of 127 acres, in simple, situated in Athens county, Ohio, about five les north of the town of Athens, on Oil Run, which branch of Sugar Creek, running between it and the cking river. There are on the property two natural l Springs, where oil can be seen on the surface of the ter at all times; and, indeed, the whole tract abounds the very best oil indications. Heavy timber, suitable for building derricks and tanks, as well as for fuel poses, is in abundance.

The land of this Company is in the immediate vicity of the following named companies: Linscott, thens, National, Failer, Hocking Philadelphia, Hockg New York, and Cincinnati Oil Company.

xtract from Oil Trade Review and Petroleum Recorder.

"The Hocking Valley lies on the western border of e great Apalachian Mineral Basin, which extends m Northern Pennsylvania seven hundred and twenmiles to Central Alabama. It is from this basin, haps the richest in the world, that Pennsylvania, rginia, Ohio and Kentucky, draw their immense pplies of Coal, Iron, Salt, and Petroleum. While roughout the vast extent these four staple minerals e found in variable quantities, and not unfrequently ouped together, it is rare that any one locality proces them all in large quantities. Yet in the Hocking alley, yea, within a radius of twenty miles from the unty seat of Athens county, are to be found inexhaustible stores of Coal, Salt, Iron, nor Oil; of these petroleum is the last discovered, or, I might perhaps y, the last appreciated, and hence the least developed. It has for many years been known to exist in any localities of the valley, particularly in the county of Athens, Athens county. Those best qualified to dge, speak most promisingly of the oil in Athens unty."

It is the intention of this Company to immediately develop their territory by sinking a number of wells.

We would here state that a twenty barrel well of Lucinating Oil, such as is found in this section of Ohio, worth $35 per barrel on the ground, equals $700 day, or over $250,000 per annum, leaving nearly four times the cost of the whole number of corporate interests to the Company.

The par value and subscription price of the stock will determined at a meeting of the corporators, held for at purpose.

PRESIDENT,
ALEXANDER OMENSETTER.

TREASURER,
SAMUEL C. FOLWELL.

SECRETARY,
STACY H. BASSETT.

UBSCRIPTIONS BY MAIL PROMPTLY ATTENDED TO.

he property of this Company consists of one hun acres of land, on TWO-LICK CREEK, Cherry ll township, Indiana county, Pennsylvania. There is already on the land A FINE SALT WELL, 75 deep, with unmistakable appearances of Oil. The face indications are very good, and it is the expressed inion of scientific men, who are, from experience, versant with the oil regions, that the Company have ired a valuable tract of land to operate upon; ther, that Cherry Hill township, Indiana county, not fail to prove one of the most reliable oil producsections in the State of Pennsylvania. The recent ke of oil at a DEPTH OF 325 FEET, on the Little coning Creek, which is not very distant from the pany's lands, induces those interested to believe this will prove a SUCCESSFUL ENTERPRISE; and their design to push forward and develop the land h all possible judicious despatch, and thereby result the Stockholders a very profitable investment.

OR 150,000 SHARES.

$15,000 SHARES ALREADY ENGAGED.

This Company owns in fee simple one hundred and seventy-five acres of land. It is situated on both sides of HORSE SHOE RUN, about two miles from the town of WEST UNION, PRESTON COUNTY, WEST VIRGINIA, and about four miles from Cheat river, which is navigable. It was chosen for its strong surface indications of oil, and from its close proximity to the "Glade," which has been known as "Oil Glade" long before rock oil came into general use.

On the adjoining farm the owners, seven years since, endeavoring to strike a vein of water, struck a heavy vein is known to underlie this tract at the depth of thirty (30) feet, struck oil, but not knowing the character or value, made no further developments.

On the run which passes through this property the indications of oil are strongly marked, not only from the peculiar upheaval and dip or lay of the sandstone rock, and interveining beds of shale incident to all sure oil-bearing lands, but also from the ocular demonstration of it upon the surface of the water. It has been, and is, the custom of the fishermen in the neighborhood to light their faggots at night by setting fire to the oil floating upon the water. Salt Works have been abandoned in consequence of the oil interfering with the manufacturing of the same. The large proportion of bottom land in this tract, viz: eighty (80) acres, gives it great advantage over most tracts of this size, as there is ample room for boring one hundred and sixty wells.

A number of leases may be made, paying a good reality without any expense to the Company. It is well to remember that in this locality oil has been struck in paying quantities, at a depth of from thirty to one hundred and fifty feet. A competent superintendent has been engaged. Two engines, with all the necessary machinery, will be forwarded at once, and the work vigorously pushed forward. One 10-barrel well will pay over 100 per cent. on the investment, and it is confidently expected that this will be struck in large quantities, and that the stock will rise to par soon after it is all taken.

It is a noted fact that the famous Llewellyn and Rierpal Centre wells of West Virginia flowed, the former 1,400, and the latter 500 barrels per day, and there is no reason why we cannot expect to be as successful in our operations. Five Companies (two Baltimore, two Philadelphia, and one New York,) have already commenced operations in the vicinity of the "Golden Rule Company," one of which has already struck oil.

The object in making this a 10-cent Company is to enable every one to enjoy the profits, and not, as most Oil Companies do, permit the originators to make large fortunes.

The motto sufficiently explains our intention—

"THE GOLDEN RULE."

Do unto others as you would have others do unto you.

This Company is formed upon the

MUTUAL INTEREST PRINCIPLE,

whereby each Stockholder becomes an owner of the land, and at the ORIGINAL PRICE.

Its properties consist of

TWELVE HUNDRED ACRES IN FEE SIMPLE,

in Pennsylvania and West Virginia, and are as follows:

I. ONE THOUSAND AND FIFTY ACRES IN FEE SIMPLE, in Elk county, Pennsylvania, *about three and a half miles from the Philadelphia and Erie Railroad.* It is on the head-waters of the Wykoff's Run and Ransy's Run, both of which streams are tributaries of the Sinnemahoning river, and empty into it a short distance from the junction of the Driftwood and Bennett's branch. The Ransy Run crosses the track lengthwise on the northern side, and the Wykoff Run on the southern side. It is, therefore, well watered and supplied with sufficient power to drill and pump several wells, *thus saving great expense to the Company in development.* Its vicinity to the Philadelphia and Erie Railroad also gives great facilities for shipment of the various products that will be obtained by the Company, and will materially increase their value by lessening cost of transportation.

Its character as oil land is unexcelled; and while no actual yield has yet resulted from the numerous wells being bored in the vicinity, still the presence of oil in that region is placed beyond a doubt, by the escape of gas while boring, the very strong salt water, and the *oil floating on the water in the conductors;* in fact, all the indications that have accompanied the sinking of wells in the most productive localities on Oil Creek.

This tract of land was selected from many others, by experienced oil men, after a most careful investigation had been made by Professor WILLIAM F. ROBERTS, Geologist, and a report rendered of the same. The report is on file at the office of the Company. From it we make the following extracts:

"This tract of land is numbered on the county map of Elk 6,383. It is on the northern dip of the Bennett's Branch Coal Basin, which contains coal, iron, and bituminous one in quality, of workable sizes, and of easy access for chemining. With the coal, which is generally of the *fat* caking variety, is interstratified IRON ORE of good quality, argillaceous and calcareous fire-brick clay, building stone and a hearth stone for blast furnaces, and also limestone.

"In addition to the mineral wealth in the hill lands within the limits of this tract of land, its subterranean, crevice filled deposits of petroleum may become, when developed, of much greater value than its coal and iron strata combined. The surface indications are good evidences for oil beneath. The geological structure of the formation contained within the limits of this tract of land shows crevices and fissures as existing beneath, and *there* are the receptacles or receivers of the draining of petroleum from its native beds, the marine animal and vegetable strata, the fossiliferous rocks and shales of the Devonian series which immediately underlie the carboniferous or coal measures. *The illuminating oils and salines are found in the Devonian; the lubricating oil is met with in the lower portion of the carboniferous.* AS BOTH SERIES ARE CONTAINED IN THIS TRACT OF LAND, BOTH LUBRICATING AND ILLUMINATING OILS MAY RESULT FROM BORING WELLS, and within its boundary lines are many good sites for this purpose. A well was bored at Winslow, some five or six miles northwest of this tract of land, which is now yielding a strong brine. If this well had been bored deeper, oil, no doubt, would have been struck. In many parts of Elk county lands have been purchased and leased for boring oil wells *in a short time and at a great profit; properties will be secured for oil privileges.* The surface show, and geological position and character of the strata, are the same as exist in many localities where oil is now produced in large quantities.

"The timber growing upon this eleven hundred acres consists of hard and soft woods. It contains white oak, which must become of value for the manufacture of staves for oil tanks and oil barrels. Elk county is famed for the luxuriant growth of timber. This tract of land is valuable for lumbering purposes. The land, when cleared, makes good farms. It is susceptible of easy cultivation, and bears good crops."

This land has doubled in value since its purchase by the originators of this Company. The adjoining tract has just been sold to a company for immediate development at $75 per acre—*which makes the 1,050 acres alone amount to $78,750*—more than the whole paid-in capital of the Company; and a few miles from us a tract has been sold for one hundred and seventy-five dollars per acre.

A New York Company owns 50 acres of the tract purchased by this Company (originally consisting of 1,100 acres), and have their engines on the ground to commence operations at once.

II. ONE HUNDRED ACRES IN FEE SIMPLE on Coburn's creek, a tributary of the Monongalia river, Monongalia county, West Virginia, but 1½ miles from Morgantown (to which point the Monongalia is navigable), and but three miles from where boring is being rapidly pushed forward by the DECKER CREEK OIL COMPANY of West Virginia. Monongalia county adjoins Greene county, Pa., on the south, which county has recently become famous for its oil-producing qualities. It is directly on the line of the oil belt that passes from Canada through Elk, Forest, Warren, and Crawford counties to Greene county, Pa., and still south through Monongalia county, West Virginia, to the Great Kanawha region of that State. The greater part of this one hundred acres is boring territory. The hills bordering the land are broken up by a number of deep ravines (which are always selected as superior spots for drilling), and in which a number of wells can be sunk. There is a comfortable house on the property, and over 40 acres of well cultivated land.

III. FIFTY ACRES IN FEE SIMPLE on Coburn's Creek, but a short distance from the above One Hundred Acres. *This is all good boring territory*, and, in addition to this, there is a six-foot vein of Coal outcropping on the surface. The remarks which apply to the above one hundred acres being in the centre of the Oil Region, also apply to this tract.

Land in this neighborhood has recently been sold for $50 PER ACRE.

The originators of this Company confidently assert that no lands yet put before the public possess greater intrinsic value than those described in the above prospectus or promise a more remunerative return. And it will be the business of the Directors to see that immediate steps are taken for the successful and speedy development of the property. TWENTY-FIVE THOUSAND DOLLARS IN CASH has been set aside for that purpose; and the well-known experience in the Oil Business of those originating this Company is a sufficient guarantee to the Stockholders that the money will be faithfully applied to the purpose for which it is contributed, while, at the same time, no unnecessary expense or labor will be incurred in their operations.

Subscription Books will be opened and subscriptions to the Capital Stock of the Company received at the Office of the

EDWARD H. HANCE, of Hance, Griffith, & Co., No. 509 East NORTH Street.
H D FLING.
THOMAS T. MASON.
JOHN G. WILLIAMS, Superintendent.

Tract No. 1. Consists of a lease of five acres for the term of twenty years, with a royalty of only one eighth, situated on the celebrated "Mapel Farm," Dunkard Creek, Greene county, Penna., and in close proximity to the famed Wylie wells, Continental, and Kramer wells, which are flowing and pumping from 10 to 50 barrels per day.

Tract No. 2. A lease of thirty-five acres for the term of nineteen years, with a royalty of three-eighths, situated on the Myers Farm, Big Whitely Creek, Greene county, Penna. This tract is well timbered, and is underlaid by a five-foot vein of bituminous coal, (with quite a number of banks already opened,) both of which the Company have the full privilege of using, free of charge, to carry on their operations.

The most remarkable feature of the "Mapel Farm" is, that no well has ever been bored from 250 to 500 feet without producing oil in paying quantities and all that has been obtained so far has been the celebrated Amber Oil, which, in its crude state, is so pure that it is used by persons in the vicinity for illuminating purposes—selling readily at $22 per barrel.

It has also been tested by machinists in Philadelphia, and found equal to the best Sperm Oil for lubricating.

Mr. JOHN G. WILLIAMS, our superintendent, who is now on the property, has engaged men, and is vigorously prosecuting the work. Two wells will be put down at once upon the Mapel Farm, and one upon the Myers Farm.

20,000 shares only offered for sale, the larger portion of which has already been subscribed.

OFFICE, 23 SOUTH THIRD STREET.

AURORA

PETROLEUM COMPANY,

STATE OF PENNSYLVANIA.

Twenty-five Cents per Share for full-paid Stock. Capital, 300,000 Shares, at One Dollar, par value. Working Capital, 100,000 Shares, or $25,000.

This Company is organized on the plan called the "Front Floor," for each subscriber to the stock becomes a purchaser of the property at cost, shares all the profits and is therefore enabled to procure the stock, *fully paid*, at

TWENTY-FIVE CENTS PER SHARE.

The assets of this Company consist of fifty-three acres of land held in *fee simple* in the heart of the best Oil Avenue in Pennsylvania, where heavy lubricating Oil has been found. Three leases on the celebrated *Lubricating Company's Land* in Sugar Creek township, Venango county and one lease on the *Philadelphia Mutual Company's Land*, on Cherry Tree Run, with one-half the Oil of all of said leased premises.

All the property of this Company is located directly among the best developing territory of heavy Oil, and very of success to market.

There is room on the lands owned in *fee simple*, and that under lease held by the Company, for two hundred wells at least, that, in working for the Oil, will not interfere with each other.

Our assets, when you examine them, will satisfy you of the fact that many companies organized and working, whose subscription price ranged from $1.50 to $2.00, are not as good as this on the "ground floor," at 25 cts. per share.

TRACT No. 1—Is situate in Sugar Creek township, Venango county, about half a mile from the mouth of Creek Well, and contains twenty acres of land in *fee simple*. This property lies on a branch of Sugar Creek, which is considered the very heart of the *best Lubricating Oil* in the District of Pennsylvania. It is not over one mile from Creek, and two miles from the Allegheny river. The properties of the Sugar Creek, Lubricating, Sugar Dale, Rathbone, and Rockaway Companies are within a mile of this tract, and the success of these companies is a guarantee of the success of developing this property, which the Company intend to do at once.

TRACT No. 2—Is situate on West Oil Creek, in Oil Creek township, Crawford county, and contains eight acres of land in *fee simple*. This tract is above the Watson Farm, a number of wells now producing largely, and is about two and a half miles above Titusville, is *all bottom land*, and surrounded by oil developments.

TRACT No. 3—Is situate on Trout Run, a branch of Sugar Creek, near Oil City, and adjoining Rathbone and Mining Company, and is considered an A No. 1 location, and contains twenty-five acres of land in *fee simple*.

All of the above tracts have been selected with care, the titles undoubted, and free and clear of all incumbrances whatsoever.

TRACT No. 4—is a lease on the left branch of Patchell Run, between the Allegheny river and French Creek, directly in the centre of the two Oil Avenues now running through Venango county, and about one mile from the Sugar Creek Well, now yielding about seventy barrels per day.

TRACT No. 5—Is a lease near the above, and equally as good and eligible.

TRACT No. 6—is a lease near the above, and about half a mile from the new well just struck of about thirty-five barrels per day; and the Company intend to push the development of the above without delay, being where heavy lubricating Oil is found of the best quality, and located on the land of the *Ashland Petroleum Company*.

TRACT No. 7—Is a lease on Cherry Tree Run, in Venango county, about three quarters of a mile from the town of Cherry Tree. There has been a one hundred-barrel well struck on this Run, about half a mile from this property. The Big Tank Company's land is close to this property, on which there is now a well said to yield one hundred and thirty barrels per day, six wells going down, and several more will be commenced within sixty days. Wells are going down above and below this property, with fine show of oil. This tract is not over one and a half miles from the Egbert Farm, upon which are the celebrated Maple Shade, Jersey and Coquette Wells, all of which have produced over five hundred barrels per day, and are now yielding from two hundred and fifty to five hundred barrels. The Directors intend to do their best in pushing the full development of the property, in the county of Philadelphia, and State of Pennsylvania, is authorized to commence the business of banking under the act aforesaid.

In testimony whereof, witness my hand and seal of office this twenty-fifth day of January, 1865.

Seal of the Comptroller of the Currency.

DREXEL & CO.,

mh15-tmyl No. 34 SOUTH THIRD STREET.

TREASURY DEPARTMENT, OFFICE OF THE COMPTROLLER OF THE CURRENCY, WASHINGTON, January 25, 1865.

Whereas, By satisfactory evidence presented to the undersigned, it has been made to appear that THE NATIONAL EXCHANGE BANK OF PHILADELPHIA, in the city of Philadelphia, in the county of Philadelphia, and State of Pennsylvania, has been duly organized under and according to the requirements of the Act of Congress entitled "An act to provide a National Currency, secured by a pledge of United States bonds, and to provide for the circulation and redemption thereof," approved June 3, 1864, and has complied with all the provisions of said act required to be complied with before commencing the business of banking under said Act.

Now, therefore, I, HUGH MCCULLOCH, Comptroller of the Currency, do hereby certify that THE NATIONAL EXCHANGE BANK OF PHILADELPHIA, in the city of Philadelphia, in the county of Philadelphia, and State of Pennsylvania, is authorized to commence the business of banking under the act aforesaid.

TEN DOLLARS PERMITTED.

In testimony whereof, witness my hand and seal of office this twenty-fifth day of January, 1865.

HUGH MCCULLOCH,
Comptroller of the Currency.
