## TESTHERAVCL LEOTLRES: The temperance meeting at the cotrr honse on Tharsaly eveting of last week

 was not a brilizint success. Perhpps itwould not be oversiepping the bounds of wuth to say it was a decided hailure. But
to our mind the faillure was not less cunto our mind the fuilure was not less cun-
spicuous in the phan of the meeting than in its excoution. We reppectully supges
of the Good Templars that the publie can form an opinion of their sosiety by
observiug the conduct of its memters. There is nut much advantage in telling
how useful such a society is, so long ns "By their truits ye shall kuow them" the best rule of judgment in such cases

idea seened to be, nud the lecturer sell secmed to eneourrage it, thet the andirififed, by the vivid portrayal of the erucl-
fies practised by King Alcohol upon his molhapy victims ; in consequence of which
they might be ready to cry "Down with Alcohol," and at some futtre timis, i thing to carry that ery into effect.
At the risk of being charged with by some zealous tectotalhr, we venture to
call in question the utility of this wode of procedure at the present time. Huwere
it may have been in the past, we think
aduits of serious question whether an damage would result to the cause of cema-
perance, if the whole army of professional
temperance lecturers shoold abandon that
profession and devote their timio and tol

it is the duty of the press to advocate what
is for the pmblis guod, althongh it migh
enuse a litte temprary ineonvenience to
individuals.

It seems as though the public mind
ought, by this time, to be sufficuotly en.
of htened in regard to the consentucaces of lightened in regard to the eonseypuaces of
intemperance, the wrevgit of the urunk
ard's appetire, the danger of tippling, anu
such mattere, me to be nHe to do withou a class of specelat lecturers in that wepart-
dent. We therefore urge the inquiry upe

but the interesting relics he broyght back
with him are the most valuable rcsult his toil and suffering. We find in the Ger-
man papers some statements, furnished by Dr. Berfel himself, about the late royage
in the Polar scas of the steamer Albert, vosage $\left(80^{\circ} 14^{\prime}\right.$ north latitude. $9^{\circ} 52^{\prime}$ eas longitude) on the 20 th of J ane last. Here
the ice formod an impasible barrier, and aner cruising in various directions for two Spitzenberg, Amsterdam Lsland, and other
localaties, the object of the expelition was abandoned, and the vessel began her home. ing respectively to England, Norway, and Russia, have also been engaged this ycar
in suiled from Glafg $w$ in April last; but,
though her party reached Nova Zembla in May, and Spitzenberg in June, they were
unable to pass the 80 h degree. The Nor wegian expedition was a small affair, consisting of but a aingle sloop; but the cap.
tain pusied boldy into the Carian Sea, sailed along the Siberian coast, reached the White Islands, and returned howie after slanghtering great numbers of walruses
seals, and bears. The Russian expedition sailed in August, with the intention
of establishing dircet tion by sea between Norway and Siberim but we have
-Tribune.

Peterson's Ladies' National MagAZing for the med upon our table. It December has been placed upon our table. It abounds with
its usual quantify of interestivg reading
and exquisite fathaion plates. 'Published ly Charles J. Peterson, 806 Chestrut Street Philadelphia.
