IT IS FIRE AND WATER PROOF.

It can be applied to NEW and OLD ROOFS of all kinds, steep or flat, and to SHINGLE ROOFS without removing the Shingles.

The Cost is only about One-Third that of Tin AND IT IS TWICE AS DURABLE.

This article has been thoroughly tested in New York City and all other parts of the United States, Canada, West Indies Central and South America, on buildings of all kinds, such as FACTORIES, FOUNDERIES, CHURCHES, RAIL ROAD DEPOTS, GASS, and on PUBLIC BUILDINGS generally; GOVERNMENT BUILDINGS, &c., by the principal Builders, Architects and others, during the past four years, and has proved to be the CHEAPEST and MOST DURABLE ROOFING in use; it is in every respect A FIRE, WATER, WEATHER and TIME PROOF covering for ROOFS OF ALL KINDS.

This is the ONLY material manufactured in the United States which combines the very desirable properties of *Elasticity and Durability*, which are universally acknowledged to be possessed by *GUTTA PERCHA AND INDIA RUBBER.*

The expense of applying it is trifling, as an ordinary roof can be covered and finished the same day.

It can be applied by any one,

and when finished forms a perfectly FIRE PROOF surface with an elastic body, which cannot be injured by HEAT, COLD or STORMS, SHRINKING of ROOF BOARDS, nor any external action whatever.

PENNSYLVANIA HOSPITAL.

[FROM OFFICIAL HOSPITAL REPORTS.]

MAY 19, 1860.—Ellen S., æt. 28, single, never was very strong. Two years ago she had an attack of acute rheumatism, from which she was confined to her bed for two weeks and subsequently from a relapse for four more. She has been well since then till last Saturday, while engaged in house cleaning, she took cold, had pain in her back, felt cold, not had no decided ch[illegible] days later her ankles began so swe[illegible] swelling of the knee jo[illegible] has now dull pain [illegible] very tender red and [illegible] the right is most se[illegible] tism, or, as it is now [illegible] It is a well remarked typ[illegible] which the case, and from this [illegible] own symptoms which p[illegible] in bringing her before you [illegible] remedy which has [illegible] treatment [illegible] Appreciating [illegible] highest [illegible] use [illegible] worth of new remedies [illegible] but this cannot be [illegible] are bound to give it [illegible]

CASE OF [illegible]

MAY 22, 18[illegible] patient for [illegible] s then labor [illegible]atism. She has [illegible] grains every two hours (interm[illegible] day after you saw her, I found her much more comfortable, better than she expected to be for a week or more, judging from her other attack. (The patient now walked into the room.) The improvement has steadily progressed, and you cannot fail to notice a marked change in the appearance of her joints, which are now nearly all of their natural size—our far our experiment would have seemed very successful; but, gentlemen, we must wait a little while before we can give a decided opinion as to what is to be the result.

Here is another patient who was placed on the use of the same medicine on Sunday last; she has long been suffering from chronic rheumatism, and I found her at that time with an acute attack supervening upon her chronic affection. The wrists and knuckles were much swollen and tense. She took the chloride of Propylamine in three grain doses every two hours, and you will perceive that the swelling of the joints has much diminished.

THREE DAYS LATER!!

MAY 26, 1860.—This is the case of acute rheumatism treated with propylamine, the first of those to which I called your attention at our last clinic. She is still very comfortable, and is now taking three grains thrice daily.

In this case it has seemed to be followed by very satisfactory results. The second case to which your attention was called at our last lecture, has also continued to do well. I will now bring before you a very characteristic case of acute rheumatism, and if the result be satisfactory, I think, as good jurymen, we shall justly render our verdict in favor of propylamin

He is a seaman, æt. 26, who was admitted a few days ago. Has had occasional rheumatic pains, but not so as to keep his bed, until eight days ago. The pains began in his right knee, subsequently affected the left knee, and later, the joints of the upper extremities. These joints are all swollen, tense and tender. His tongue is furred; his skin, at present day, though there has been much sweating. His pulse is full and strong, and about 90. He has now used propylamine for twenty-four hours.

This gentleman is what may be called a strictly typical case of acute rheumatism. There was exposure to cold and wet, and this exposure is followed by a feeling of coldness, severe articular pain, beginning, as it usually does, in the lower joints. There is fever and the profuse sweating, so generally attendant on acute rheumatism

I did not bring this patient before you with the intention of giving you a lecture on all the points connected with rheumatism, but to again give a trial to the new remedy we are testing, and to exhibit to you this typical case, as I have called it, than which there could not be a fairer opportunity for testing the medicine in question. We are, therefore, avoiding the use of all other medicines, even anodynes, that there may be no misgivings as to which was the efficient remedy. You shall see the case of a future clinic.

THE RESULT.

A FAVORABLE VERDICT.

JUNE 9, 1860.—The next of our convalescents is the case of acute rheumatism before you at our clinic of May 26th, which I then called a typical case, and which it was remarked was a fair opportunity for testing the worth of our new remedy. It was therefore steadily given in three grain doses every two hours for four days. The patient has got along very nicely, and is now able to walk about, as you see. I do not hesitate to
