## BAKING POWDER

Royal Baking Powder is the greatest of time and labor savers to the pastry cook. Besides, it economizes flour, butter and eggs, and, best of all, makes the food more digestible and healthful.

The "Royal Baker and Pastry Cook"—over 800 practical and valuable cooking receipts—free to every patron. Send full address.

There are cheap baking powders, made from alum, but their astringent and cauterizing qualities add a dangerous element to food.

ROYAL BAKING POWDER CO., 100 WILLIAM ST., NEW YORK.

# REPUBLICAN CANDIDATES

(Condensed from Page 8.)

C. H. Soper—I intend to cast my vote for J. W. Carpenter for judge, because he is the best man in the field for all odds. I only do him justice when I say that he has always been an honest lawyer, as he is now the upright judge and citizen. As a neighbor I have known him for the last fifteen years, and during that time he has lived a studious and exemplary life. While Judge Carpenter is by nature somewhat shy and reserved in appearance, I always have found him kind to and considerate for others. And it made no difference whether it was during the agitation of a labor strife or in the height of prosperous industry. It is safe to say that the smiles of his face are no broader now, nor his willingness more pronounced to aid and assist than before he was nominated for this high office, because it is impossible for him to play the games of duplicity and hypocrisy.

Judge Carpenter has a conscience and sense of justice not dulled by evil habits and the company of bad men, and this commonwealth will benefit by it when he comes to preside where the lives, liberty and property of her citizens are at stake. The insult that is being foisted upon this community that Judge Carpenter would favor this or that man, or that he is the favorite of this or that clique of men, needs no condemnation. Judge Carpenter will be the Judge for the people according to law and equity. I shall vote for Judge Carpenter because he is a clean man; because he is in the prime of life and will have time and opportunity to serve his constituents well; because he will add fame to the bench of this county, already famous by reason of the wise and just judges who have graced the position. I shall vote for Judge Carpenter because his associates are and always have been good men. No man has ever occasion to question his honesty and integrity as a citizen, lawyer, judge. Having practiced law side by side with him for twenty years in the courts of this county, I know him to be both wise and just.

W. N. Leach—The opinion of all the lawyers is that Judge Carpenter has proven himself a most capable judge. The people north of the mountain, where he was born, and where I have my home, are Judge Carpenter's greatest admirers. His defeat would be a sore disappointment to his former neighbors.

O. B. Partridge—Judge Carpenter was appointed judge on the petition of a large majority of the active members of the bar, and they will all admit he has fully satisfied them that their judgment in his fitness was not misplaced. The people can make no better choice than the selection of J. W. Carpenter for judge.

Hon. C. P. O'Malley—I believe Judge Carpenter to be an able lawyer and that, if elected, he will continue to be a fair and just judge.

George W. Benedict, jr.—The opinion of the bar is that Judge Carpenter is a thoroughly competent, honest and painstaking judge. His furmindedness is his striking characteristic and his very nature repels anything low, small or mean. It is regrettable just now from his standpoint, but it will be a matter of felicitation later on the part of the people at large, that Judge Carpenter is not a politician.

John R. Edwards—There is no reason why Republicans should elect two Democratic judges in one year.

H. C. Reynolds—Judge Carpenter has the judicial temperament, he is a close student and in every way qualified to pay judgment, to make a good judge. Then again he is a Republican, and the Republicans are entitled to a majority of the bench.

C. E. Daniels—Naturally the county is Republican, Judge Carpenter is the regular Republican nominee and there is no reason why Judge Carpenter should not be elected judge. He has proven his fitness for the position, beyond all question, and especially has he demonstrated his possession in a marked degree of that prime essential of the judge—judicial temperament.

J. W. Houghton—Judge Carpenter is a clean man in all that the term implies, and he has proven himself an able judge.

Ex-District Attorney John R. Jones—I know Judge Carpenter to be an excellent lawyer. He has always been studious and painstaking. His character is above reproach and his ability is unquestioned. I have only the highest words of praise for Judge Carpenter.

George D. Taylor—Hon. J. W. Carpenter belongs to that all too small class of men, remarkable in this age of extravagant ambitions and strong temptations who because of their incorruptibility are fitted for the highest place. He goes on the bench free of all obligations and consequently able at all times to discharge his duty as he sees it, without being prejudiced by any interests that may be involved. He is a capable and learned lawyer, with a natural judicial mind, that enables him quickly and accurately to grasp and decide every question that comes before him.

W. J. Torrey—The younger members of the bar have only the warmest encomiums for Judge Carpenter. They will be well pleased to see him continued on the bench. He impresses everyone with his ability, dignity, carefulness and impartiality. I know of no good reason why he should not be elected.

Charles E. Oliver—Judge Carpenter should be elected, first, because he is the candidate of the Republican party, selected fairly and exactly as our party rules provide. Second, because an unfair effort is being made to make him responsible for others over whom he has no control, and third, because he has clearly demonstrated his fitness for the position.

H. S. Alworth—The election of Judge Carpenter as additional law judge of Lackawanna county will be a merited compliment to one who has the confidence of the members of the bar and the people of the county, and whose judicial qualifications are beyond question. He is careful, conservative and just and possessed of an ideal judicial temperament. Judge Carpenter should be elected.

Lewis B. Cotter—The time has gone by for side judges, not learned in the law, to sit as judges, except in the rural judicial districts. The interpretation of the science of human rights is the greatest science known to man. It requires men fitted by nature, by unlimited study of the law, and by a life experience at the bar. It requires men who have made the supreme effort of life to become masters of this, the greatest of all the sciences. Only the legal training thus acquired, and not a business training, can bring on the legal qualifications necessary in a judge. That Judge Carpenter possesses these his colleagues have declared, without regard to party lines.

## NEW PAVING ORDINANCE.

### Mr. Finn Working for a Much Needed Improvement.

At next Thursday night's meeting of select council, Mr. Finn of the Second ward will introduce an ordinance providing for the paving of Carbon street and Providence road, from the river to Court street.

A majority of the property holders representing a majority of the foot-frontage have petitioned for the pave and the Delaware, Lackawanna and Western company, the only large property holder failing to sign, has promised not to oppose the measure.

An ordinance has already passed for the repaving of Carbon street between Penn avenue and the river. The work is to be done after the Scranton Railway company builds its contemplated viaduct from the Mulberry street intersection of Millbn avenue to Providence road at the power house. This will change the route to Providence, and a result of the tearing up of the track on Carbon street. The city and the trolley company are to divide the cost of the repaving.

When these improvements are completed there will be a continuous line of pave from the central city to the city line on the north.

Both the repaving and paving will be with vitrified brick on a concrete base.

## MAD DOG CAUSED EXCITEMENT.

A mad dog created quite a stir in Blakely on Thursday afternoon, when two persons were attacked and bitten by the animal. The dog, which was a large St. Bernard, was first seen on Scott street, running frantically about and foaming at the mouth.

Chief of Police Davis was called and shot the animal, but not before it had attacked and bitten Mrs. Marvin Werrizell of Sixth street, and a young daughter of Constable Benjamin Harris.

# INDUSTRIAL AND LABOR

## SUPERINTENDENT CLARKE DENIES THE STORY.

### He Is Not to Become the General Manager of the D., L. & W. Road. The Board for Today—Changes the Pennsylvania Coal Company Is to Make at Pittston—Charles H. Memory Has Resigned His Position with the Temple Iron Company—Other Notes.

General Superintendent T. E. Clarke, of the Lackawanna railroad, stated to a Tribune man yesterday very emphatically that there is absolutely no truth whatever in the story printed in a Hoboken newspaper to the effect that he is about to become general manager of the road and make his headquarters in New York city.

"It is the veriest kind of rot," he said, "and undoubtedly emanated from some unreliable source." He also stated that the reports sent out from Summit, N. J., regarding the collision in which he was in, on Wednesday, were grossly exaggerated.

The rumors regarding Superintendent Ketcham coming to Scranton and Superintendent Rine going to Buffalo, Superintendent Clarke also said were untrue.

### Another Test of Engines.

The comparative pulling strength of Erie engine, No. 1563, and Lackawanna engine, No. 840, were tested yesterday morning in trial trip between Scranton and Nay Aug. The tests were in every way satisfactory to the officials of both roads, who witnessed them.

The best time was made by the Erie engine, a Brooks, which made the trip in thirty minutes, although the Lackawanna engine, a Schenectady, was but a few minutes more in covering the distance. Thirteen 80,000 pounds capacity cars were used in making the trips.

The tests were witnessed by Superintendent J. M. Davis, Master Mechanic Wilson and Road Foreman of Engines Bronson, of the Erie; Superintendent E. M. Fitzsimmons, Master Mechanic Elvin, Road Foreman of Engines D. W. Brown and D. E. Casey, of the Lackawanna railroad.

### Change in Time Table.

A change in the time-table of the Lackawanna railroad will go into effect at 12.01 a. m. tomorrow, which will affect the running of trains on the east, west and Bloomsburg divisions. They are as follows:

Main line east—Train No. 12, for New York, changed from 5.55 a. m. to 6.05 a. m. Train No. 4, from Oswego to New York and Philadelphia, due in Scranton at 12.45 p. m. instead of 12.40 p. m.

Train No. 6 will be put back on its former running time, leaving Scranton for New York and Philadelphia at 3.33 p. m. Train No. 42, milk and local, will leave Scranton at 3.40 p. m. instead of 3.20 p. m. Trains No. 19 and No. 20 will be discontinued. Train No. 28, east of Scranton, and Train 21, will also be discontinued.

Main line west—Train No. 1, which now leaves Scranton at 1.05 p. m., will be changed to 1.10 p. m. Train No. 3 will leave on former time for Buffalo, at 1.55 p. m. Train No. 5 will leave here at 6.50 p. m. instead of 7.05 p. m.

Bloomsburg division—Train No. 715 will leave Scranton at 6.35 a. m. instead of 6.25 a. m. Train No. 703 will leave Scranton at 1.55 p. m. instead of 1.50 p. m.

These changes are made necessary on account of the discontinuance of the Pan-American traffic over the road.

### Changes Contemplated.

The Pennsylvania Coal company is contemplating several changes and improvements at No. 10 workings within a short time. Tomorrow the company will shut down No. 10, jr., shaft for an indefinite period. This step will not affect the miners and laborers, who will be transferred to No. 10, sr., shaft where they will be employed.

The reason assigned for the shutting down of this mine, which adjoins the old shaft, is that the coal cannot be handled to advantage. The company intends sinking the old shaft to the Red Ash vein, from where the coal will be transferred from the abandoned one. It is thought the coal will be handled in a similar way from No. 9 shaft, thereby lessening expense.

The abandoned shaft and No. 9 shaft are down to the Red Ash vein, and, with the old No. 10 shaft at that depth, all the coal can be hoisted from the one place. There is some talk of the company abandoning the Ravine shaft, which is now being used as a pumping station. This may not take place right away, but it is being planned, as the water can be pumped up No. 10 shaft by putting in an additional Jeanesville pump.—Pittston Department Wilkes-Barre Record.

### D. L., and W. Board for Today.

Following is the make-up of the Delaware, Lackawanna and Western board for today:

FRIDAY, NOVEMBER 1.

[illegible]

SATURDAY, NOVEMBER 2.

[illegible]

### This and That.

Chief Clerk C. E. Foley and Attorney John R. Wilson of the Lackawanna coal department, spent yesterday hunting in the vicinity of Moosic.

Operations will be resumed at the Dodge colliery on Monday, after a period of idleness, during which a number of needed repairs have been made.

The Lackawanna Paint company, which moved from this city to Wilkesbarre a year ago, has again moved to Coxsackie, Fayette county, this state.

The railroads operating between Buffalo and Chicago, comprising the Central Traffic association, have followed the example of the roads west of Chicago in pronouncing against the proposition to discontinue free passes. The Eastern Trunk lines have given up the fight, which originated with them, and orders have been issued to prepare and send out the annual passes for exchange with other roads, as usual.

At a meeting of the Delaware and Hudson directors held in New York Wednesday Charles A. Peabody, jr., was elected to fill the vacancy caused by the death of Alfred Van Santvoord. Mr. Peabody represents William Waldorf Astor's interest in the property.

The new Delaware and Hudson freight depot is about ready for business. Workmen were engaged in laying tracks on the easterly side yesterday, which extend to Lackawanna avenue. The building has been painted and is also being cleaned throughout.

Charles H. Memory, of Pittston, has resigned as auditor of the Temple Iron company. Mr. Memory will go to Creson, near Altoona, to take the management of the new Webster Coal company, of which W. A. Lathrop, of Wilkes-Barre is president. Mr. Memory will be succeeded by George L. Houser, forwarding agent for the Lehigh Valley at Mauch Chunk. Mr. Houser was formerly forwarding agent at Coxton and lived at Pittston. His headquarters will be in this city.

The Delaware and Hudson company is equipping all its mines with emergency hospitals, to comply with the state law passed by the recent legislature, and which goes into effect today. These hospitals are being constructed in the workings of the several mines at places where the danger from fire and gas is slight. They will be equipped with antiseptic bandages and dressings and will undoubtedly be of great use in furnishing the means for the prompt treatment of injured men.

At the office of Philadelphia and Reading Railroad company, in Philadelphia, the following appointments have announced: George W. Somers, superintendent of the New England freight business of the New Jersey Central, to be Southern and New England freight agent of both roads, with offices at New Haven; Samuel T. Schnock, commercial agent of the Philadelphia and Reading railroad at Pittsburg, to occupy the same position for the New Jersey Central. These changes are taken as an indication that the work of consolidating the offices of the two railroads has begun, and further changes are expected.

## COLES FOR NOVEMBER.

(Storms and Signs.)

The month of November opens up with dark storm clouds hovering over the political and financial world. Earth is now passing through the House of Sickness. Keep your system in good order, so that it will be able to ward off the deadly disease microbes that will be one epidemic. The chief focus will be at "High flood" seventeen days during this month. Let men in business circles watch out for sudden changes. The first part of the month will be unfavorable for making long time investments. Mars, the "red warrior," will be in sign Aquarius, the Waterman, which will make Americans rash and headstrong, with a love for argument and resolution; will also cause floods, tornadoes and cyclones to visit many sections of the country. The new moon and the sun's eclipse both appear on the same date, which portends much evil. The eclipse will be visible throughout Eastern Europe, Asia, Africa. Pestilence and famine microbes love to inflict that people upon whom the shadow of the sun's eclipse has fallen. Note the terrible disease epidemics, storms, disasters, riots and perhaps wars that will follow in the pathway of the shadow of the eclipse.

STORMS AND SIGNS.

November will prove a peculiar month. The "fixed" rays of the sun coming in contact with the moon, ore or dead rays, will cause strange phenomena, sun dogs, and a strange appearing hazy atmosphere. We may also look for several beautiful meteoric displays this month. While some sections are enjoying sunshine and summer-like weather, other sections will have rain, hail, snow, slush and high winds, etc. The regular and local disturbance period are all marked on our Storms and Signs calendar. Price 10 cents. The greatest danger from regular storm periods during the month will be between the 2d and 4th, 16th and 21st, and during the last ten days of the month, and from secondary storm periods from the 10th to the 14th, 23d to the 27th, let sailors on the ocean and on the great lakes, like warnings; all people living along the sea coast should also watch out. Forest and prairie fires will be great danger. Earthquakes will be liable to occur now in the old countries and the United States. Watch out for an epidemic that will sweep the country, attacking the head, throat, lungs or bowels of both man and beast. The germ will be a cross between the la grippe and the fever germ.

The best days to hold during the current month will be the 1st, 11th, 19th, 20th, 21st, 23d, 27th and 28th. Remember that fish caught at low ebb tide is not in proper condition to eat.

All kinds of wild game killed on the following days will be in fine condition to eat: The 2d, 9th, 17th, 20th, 22d and 23d. All game should be dressed as soon as caught. Remember the sacred command: "Thou shalt not eat the blood."

Gather in all the good vegetable seed that you have in your garden or farm for next year's planting. Remember that you cannot sow poor, diseased seed on a high flood day, and get a good stand; and good seed sown on a high flood day will bring a bountiful harvest every time.

Do not fail to see a copy of Prof. Coles' "Storms and Signs," which contains information for all its readers. Price 10 cents a copy. When writing kindly mention the name of the paper you saw this in. J. C. Coles,

Editor "Storms and Signs,"

Kingston, Pa., U. S. A.

November 1, 1901.

# A Daily Nuisance.

## A Simple Remedy Which Will Interest Catarrh Sufferers.

In its earlier stages catarrh is more of a nuisance than a menace to the general health, but sooner or later, the

disease extends to the throat, bronchial tubes and even to the stomach and intestines.

Catarrh is essentially a disease of the mucous membrane, the local symptoms being a profuse discharge of mucous, stoppage of the nostrils, irritation in throat, causing coughing, sneezing, gagging and frequent clearing of the throat and head.

The usual treatment by local douches, snuffs, salves, etc., often gives temporary relief, but anything like a cure can only be obtained by a treatment which removes the catarrhal taint from the blood and the disappearance of the inflammation from the mucous surfaces.

A new remedy which meets these requirements and which so far has been remarkably successful in curing catarrh is Stuart's Catarrh Tablets.

These tablets act upon the blood and mucous membranes only. They can hardly be called a secret patent medicine as they are composed of such valuable remedies as Sanguinaria, Hydrastin, Eucalyptol and similar cleansing antiseptics which cure by eliminating from the blood and mucous surfaces the catarrhal poison.

Stuart's Catarrh Tablets are large, pleasant tasting lozenges taken internally, allowing them to dissolve slowly in the mouth, in this way they reach the throat, fauces and the entire alimentary canal.

If desired, they may also be dissolved in water and used as a douche, in addition to the internal use, but it is not at all necessary to use a douche; a few of them dissolved in the mouth daily will be sufficient. However, when there is much stoppage of the nose, a douche made from these tablets will give immediate relief, but the regular daily use internally of these tablets will cure the whole catarrhal trouble without resorting to the inconvenience of a douche.

Dr. Bement states "that the internal treatment for catarrh is rapidly taking the place of the old plan of douching, and local application and further says that probably the best and certainly the safest remedy at present on the market is Stuart's Catarrh Tablets, as no secret is made of their composition and all the really efficient remedies for catarrh are contained in this tablet."

Druggists sell Stuart's Catarrh Tablets at fifty cents for full sized packages. Ask your druggist and if he is honest he will tell you there is no safer, more palatable, more efficient and convenient remedy on the market.

# The Well Dressed Man

You see on the street is not necessarily a man of wealth.

You can be as handsomely attired if you let me supply your clothing needs. It is not a question of money. It is a question of taking your money to the right place.
