Mr. Ishams (agent of the State of New York at the London Crystal's Fair,) took to England specimens of Phosphate of Lime—supposed Phosphate of Lime with, from two to eight feet above and below the bank of Lake Champlain, found on the South side of Lake Champlain, Essex Co., N. Y. He presented, a sample to the Royal Agricultural Society, by which it was immediately referred to its chemist, Mr. Hunter, who analised it and reported that it contained 30 per cent. of Phosphoric Acid, 40 of Lime, combined with Peroxide of Iron, Magnesia, and a little Potash, Soda, Chlorine. He estimated the value of the American Phosphate as about equal to that of its Belgian counterpart. Soon after Mr. J's return to this country, he received a letter from a leading English house, engaged in preparing artificial manures, stating that, should the Crown Point Mine prove equal to the sample exhibited to it, it will *be prepared to make an offer for the entire product*. Thus, while not one-tenth of our own farmers residing within a hundred miles of Crown Point know or care for the existence of any such mine, and hardly know what Phosphate means, the British farmers have probably secured the entire deposit, to fertilize their fields 3 000 miles away.—*N. ARRIVAL OF SERPENTINE PIANOS,
FROM THE CELEBRATED FACTORY OF
NUNNS & CLARK, NEW YORK.
JUST received and opening—One superb new rosewood SERPENTINE PIANO, of a style entirely new, and far superior for tone and elegance to any ever brought to this market. It combines with the power of the square Piano, the great ease of tone of the Cottage Piano, and is immeasurably superior to either in elegance and symmetry of construction, and perfection of tone. Persons of taste and taste in such matters, will not hesitate to give them the preference over any other Piano.
