QUACK MEDICINES EXCOMMUNICATED.—The Baltimore correspondent of the Washington Republic says:

"The Medical and Chirurgical Faculty of Maryland have issued an edict against all *secret* or *quack* medicines, and against all apothecaries who will not cease offering the same for sale. They also declare as unprofessional, and disqualifying a physician from membership in the faculty, the giving of certificates as to the efficiency of quack medicines; the making and compounding of any secret remedy with the view of its being sold in like manner as a secret remedy; and also the receiving of a per centage or any kind of remuneration from a druggist on prescriptions made by the physician."

"What (said a traveler visiting a heathen temple) must be the worshippers when such are the idols!" What must be the intelligence of the readers when such are the teachers, we thought, as we read a few days ago the following lines, being the first sentence of the leading editorial of an influential Southern journal:

"England seeks to establish a dangerous negro republic in Cuba, on our very borders."

How grave a charge is this flung at a friendly nation, without a particle of evidence, and perhaps without a second thought! England, as we have seen remarked elsewhere, has not interest enough with Spain to persuade her to put a stop to the slave trade, yet is undertaking to abolish slavery in the island! The preposterousness of the idea, to say nothing of the criminality of nurturing national jealousies by vague injurious imputations, should have repressed a charge so irritating to all who could credit it.

WHAT'S IN A NAME?—"A goose, too, so far from being a foolish bird, is a very wise one.—A flock of geese saved Rome once." "I shouldn't wonder," said Master Van, "for a flock of wild ones saved La Haive Island once. They got overloaded with sleet and wet snow, and lighted on the shore of one spring, and was caught there, and scilly saved the folks from starvation." "Well," says I, "out of gratitude to these birds, the Italians erected a college for 'em at Rome, and called it the 'Proper Gander College.'" *Sam Slick's Wise Saws.*

MISCELLANEOUS.

IMPORTANT TO HOUSEKEEPERS.

SOMETHING better and more economical than Cream Tartar, or any other article in existence, for baking.—DURKEE'S CHEMICAL YEAST, PALATABLE FOOD for raising Bread, Biscuit, Fried, Griddle and Journey Cakes, Puddings, Pot-Pies, and Bread, Sweet Cake, Apple Dumplings, Pastry, &c. &c. It is the same that every Family, Hotel, Boarding House, Eating Saloon, ship, Steamboat, Vessel, Canal Boat, &c. will find, upon a careful trial, to be the very thing needed every single day of their existence.

The many important advantages over the old system, are: 1. It saves the expense of milk, eggs, shortening, spoiled bread, and the trouble and expense of procuring good fresh water only being necessary.

2. In lieu of being required to stand to the fire and watching, consequently bread may be made in a few minutes notice, and always found upon having light, sweet, tender and palatable bread and biscuit, whether the hour be of the best quality or not.

3. Bread made by this process is much more nutritious, easier of digestion, better fitted for a weak stomach and invalids, lighter and lighter, when made with yeast. 4. The bread made by fermentation, does not afford the same amount of nourishment as the sweet article, that it does when made with this compound, because the vegetable substance is fermenting and decomposing, prevents the proper action of the gastric fluid upon it, and consequently, a part only goes to nourish its body, while the acids taken to produce dyspepsia and its attendant evils.

This article has been thoroughly tested, and is unlike, and superior to any other in the direction, it is warranted to suit.

Be kind enough to ask for DURKEE'S BAKING POWDER, and take no other, and you will not be deceived. Prepared and offered in Water street, New York, and by the best grocers and druggists generally.

ATTAINING FAVOR DAILY—There is no medicine so well adapted for all common diseases as Dr. SAM'L A. FAHNESTOCK'S VERMIFUGE. Read this testimony:

[From F. P. Dunoney, Esq., New Orleans.]

NEW ORLEANS, March 5, 1853.

Mssrs. S. A. Fahnestock & Co.—Gentlemen: I am pleased to inform you that your Vermifuge continues to sell well in this city, and I find it gaining favor daily amongst our citizens. Many of our customers, who were in the habit of using other medicines, are now determined to use Dr. Fahnestock's Vermifuge only, owing to its rapidity as well as efficacy. I therefore no longer hesitate to recommend it to the public which stands so high in the estimation of the public. Send me a fifty gross more of your Vermifuge, as I find my present stock getting very low.

Respectfully, F. P. DUNONEY.

Prepared and sold by S. A. FAHNESTOCK & CO., corner of First and Wood streets, Pittsburgh.

DOULE'S HYPERIC BUILD is the best medicine for the HAIR in use. The following testimonial speaks for itself. A letter from the Rev. Mr. Chapman, Sandy Spring, Isle of Wight County, Va.

SANDY SPRING, April 6, 1846.

Mr. Sopher—Sir: I consider it a duty I owe you as well as the public, to say that my whole head was covered with scurf as I have been, to acknowledge the efficacy of your Hyperic Build, by the use of which I have derived no small benefit. For twenty years I was troubled with a disease of the hair, the skin of which was covered with a thick coat of scaly humor, (or dandruff in its worst form,) which entirely destroyed my comfort in this respect, wet headache, and entirely unfitted me for study; my hair also came off very much, and I was at least to try and get rid of this, which I tried in vain, by the use of various articles, but to no purpose. I was induced to try your Hyperic Build, by seeing a great deal said about it, and I tried it in the spring of 1844, and I can say that I have not been troubled with dandruff since, and although it was highly praised by those who had tried it, I did not like to write and tell them so, but at last the day, but was induced by you to give it a trial upon the system of no sure no pay; and I am glad to say it has entirely succeeded. The skin of my head is now clear from scurf, and my hair is in a healthy state, and I feel it my duty to recommend it to all who may be afflicted with the same complaint, confidence I recommend your Hyperion Fluid to be all you represent it.

Respectfully, SAMUEL CHAPMAN.

For sale only by L. WILCOX & CO., cor. Market street and the Diamond, sole wholesale and retail agents for the city of Pittsburgh. my29

TESTIMONY FROM TENNESSEE IN FAVOR of S. A. FAHNESTOCK'S VERMIFUGE—The Knoxville Union says: "We call the attention of our readers to the certificate of Mr. John Hartsfield, in favor of Dr. Fahnestock's Vermifuge. The gentleman is well known in this community, and anything he says can be relied on."

MESSRS. S. A. FAHNESTOCK & CO.—Gentlemen: For the benefit of others, I take pleasure in testifying to the valuable qualities of your Vermifuge. About ten years ago I was attacked with a disease, which I by a friend, an officer in one of the Banks in Nashville, in whose estimation I was then a standard article, having used it in his family with very satisfactory results. My disease I took a very severe form, and I lost my health, and was unable to do any work, and was at least to try and get rid of the disease, which I tried in vain by the use of various articles, but to no purpose. I was induced to try your Vermifuge, and I tell you that I was cured by the use of two bottles of your Vermifuge, and I tell you that I was cured by the use of two bottles of your Vermifuge, and I tell you that I was cured by the use of two bottles of
