PUBLIC BATH AND WASH HOUSES.—Yesterday's New York Courer and Enquirer says:

Thousands of our citizens are not even aware that an establishment for washing and bathing at a nominal expense (yet sufficient to make it a paying business if suitably employed) has already been in operation in this city for a year. The first Annual Report of the "People's Washing and Bathing Association," shows that 50,375 have bathed in its accommodations at prices from three to ten cents, and that 10,038 have availed themselves of the facilities for washing, for which the charge is three cents per hour. The Association have a well arranged and spacious building in Mott street, 85 by 45 feet, containing three floors, two spacious swimming baths, fifty-three bathing rooms and sixty-eight sets of washing tubs, together with hot water, steam and drying facilities. The cost of the whole has been $42,000, and the first year's receipts $6,087 02. The annual expenses are estimated at $5500. It is hoped that another year's operations will show a profit on the investment, and demonstrate the practicability of multiplying such establishments in various parts of the city.

The example of the London wash houses is highly encouraging. That city already contains nine in operation and five in course of erection. Besides these there are in the United Kingdom at least twenty-five others. The governments of France, Belgium, Norway, and a large number of continental cities, are moving in the establishment of similar institutions.

MISCELLANEOUS.

IMPORTANT TO HOUSEKEEPERS.

SOMETHING better and more economical than Soda, Cream Tartar, or any other preparation for Raising Bread, Biscuits, Cake, &c., is DURKEE'S CHEMICAL YEAST, or BAKING POWDER, for raising Bread, Biscuit, Bread, Griddle and Johnny Cakes, Puddings, Dumplings, Corn Pones, Corn Cake, Apple Dumplings, Pastry, Pie, &c. &c. This article is one that every Family, Hotel, Boarding House, Saloon, Saloon, Ship, Steamboat, Vessel, Camp Hunt, &c., will find, upon a careful trial, to be the very thing needed by everybody, in all the ordinary avocations of life. It is most important advantages over the old system, are, 1. The bread made by further process, does not afford the same amount of nourishment to the system, that it does when made with yeast, or any other process, because the vegetable acid contained in fermented bread, prevents the proper use of the starch, which is converted into sugar, and consequently, a part only goes to nourish the system, while the acids tend to produce dyspepsia and its attendant evils.

2. The article has been thoroughly tested, and is universally liked. When used according to the directions, it is warranted to be light.

☞ Be careful to ask for DURKEE'S BAKING POWDER, and take no other, and you will not be deceived. Principal office, 120 Water street, New York. Sold by the Grocers and druggists generally.

ATTAINING FAVOR DAILY—There is no medicine so well adapted for all common diseases to pleasantness as the AMERICAN VERMIFUGE. Read this testimony:

(From F. P., Dunoyer, Esq., New Orleans.)

NEW ORLEANS, March 6, 1853.

Messrs. B. Fahnestock & Co.—Gentlemen: I am pleased to inform you that your Vermifuge continues to sell well in this city, and I find it gaining favor daily amongst our acquaintances, and customers, who were in the habit of using other medicines, are now determined to use B. Fahnestock's Vermifuge only, owing to its safety as well as efficacy. In fact I know of no Vermifuge sold in this city which stands so high in the estimation of the public. Please send me fifty gross more of your Vermifuge, as I find my present stock getting very low.

Respectfully,
F. P. DUNOYER.

Prepared and sold by B. A. FAHNESTOCK & CO., Wholesale Druggists, corner of First and Wood streets.

BOGLE'S HYPERION FLUID is the best article for the HAIR in use. The following speaks for itself: A Letter from the Rev. Mr. Chapman, Sandwich, Mass., late of the "Olive Branch."

BOSTON, April 6, 1852.

Mr. Bogle—Sir: I consider it a duty I owe you as well as to those who may be troubled with their head and hair, to acknowledge the efficacy of your preparation the Hyperion Fluid, by the use of which I have derived so much benefit. For years past I was troubled with a disease on the head, the skin of which was covered with a thick and very irritating humor, (or dandruff in its worst form,) which entirely worried the speech of the skin, caused great headache, and entirely unfitted me for study; my hair also came out, and dried, and at last became so hard and gray to cure which I tried all the advertised articles of the day, (and their name is legion) without derriving any benefit. I heard of your Hyperion Fluid, and although I had little faith in it, induced by those who had used it, yet I was afraid it was but another humbug of the day, but as a last resort I tried it, and to my great joy the system of no cure no pay, and I am glad to say it has entirely succeeded. The skin of the head is now clear from humor or dandruff, my hair is daily growing thicker, and it is in the best health I have been in for years. It is therefore with the utmost confidence I recommend your Hyperion Fluid to be all you represent it to be.

Yours, truly,
SAMUEL CHAPMAN.

TESTIMONY FROM TENNESSEE IN favor of B. A. FAHNESTOCK'S VERMIFUGE.—The Martyrs Union says: "We call the attention of our readers to the certificate of Mr. John Hertford, in favor of B. A. Fahnestock's Vermifuge. The gentleman is well known in this community, and anything he says can be relied on."

MESSRS. B. A. FAHNESTOCK & CO.—Gentlemen: For the benefit of others, I take pleasure in testifying to the valuable use of your Vermifuge. About ten years ago my attention was first called to it by a friend, an officer in one of the Banks in Nashville, in whose estimation it was then a standard article, having used it in his family with uniform success. My family order it as a valued remedy for one of my children, who had until then been very feeble and subject to frequent sickness. The Vermifuge was yesterday a great number of Weeks, and the child afterwards gradually recovered good health. I have since used it frequently in my family for most of the ailments of children, and generally with good effect.

One remarkable case in the family of a near relation, I will mention in particular. The child was about four years of age, had already been puny; often attacked with severe pains, and, at the age mentioned, nearly lost the use of the lower extremities. I recommended the use of your Vermifuge in the case, and left the half of a vial which I was taking home, with directions for its use. I learned afterwards that the child passed six enormous built of large Worms—the number not remembered—and, in a short time, by the use of the Vermifuge, the disease, and health began to improve. When I next saw the child, she was walking and enjoying perfect health! This recovery, from the very jaws of death, the friends attribute to the use of your Vermifuge.

PROFESSOR ALEX. C. BARRY'S TRIPOPHEROUS, or Medicated Compound, for beautifying, improving and preserving the hair, curing cutaneous diseases, burns, stings, rheumatism, and all irritations of the skin. A preparation, the sale of which amounts to one million of bottles annually, would seem to need no advertisement but as the thousands who purchase, has and approve of it having probably no idea of the enormous extent of the business done by Professor Barry, he gives herewith a plain statement of the facts derived from his books, and with them publishes his earnest and hearty thanks to his innumerable patrons.

Professor Barry's accounts of sales for the year 1852, show that during that year about 240,000 bottles of his Tripophenon were disposed of, and that the cash product of this immense sale was nearly $100,000.

This plain, unvarnished tale is a better commentary on the value of the articles than any thing its inventor could say. If it were not peerless in its effect upon the hair, if it were not invaluable as a family remedy for cuts, bruises, burns, skin diseases, &c., it would not, of course, be so universally in demand. The wealthy portion of the public would buy it at any price, but Professor Barry has reduced it to a figure so low that the poorest can avail themselves of its benefits

Sold in large bottles (price 25 cents,) at wholesale and retail, at the Manufactory and Depot, No. 197 Broadway, New York, and by the principal Merchants and Druggists throughout the United States and Canada, Mexico, West Indies, Great Britain, France, &c., and by

MISCELLANEOUS.

SAVE YOUR ICE.

Burnet's Patent Water Cooler.

WE are now prepared to offer our friends and customers a superior article of WATER COOLERS of entire new styles, and at greatly reduced prices. This article is the result of the application of scientific principles to the purpose intended, viz: to keep water as cool as possible, at less ice than any other, such the least possible quantity of ice.

The proprietors has long devoted his attention to this particular branch of domestic economy, and passing from one improvement to another, has, at length, arrived at near perfection, as it is possible to reach. A proof of this is found in the very general use of these Coolers throughout the country. A simple statement of facts in regard to these Coolers, will satisfy every one of their superiority. First, they are the only articles of the kind ever patented. They are furnished with two distinct compounding chambers, by means of which, with two pounds of ice in the gallon, water is kept at a temperature of 40° above zero, or 50° from freezing (ordinary). Thus, at a cost of some three cents per day, a family of ordinary size can have water supplied with water as cold as ice itself, larger chambers in the same proportion. This has been found by actual experiment to be a saving of at least seventy-five per cent. over the usual plan of using ice for this purpose.

Again, these Coolers are a great saving in this way saving much unnecessary waste and trouble.

Being manufactured in the most workmanlike style, and handsomely finished in every respect, they make a beautiful ornament for dining rooms, hotel, or steamboat.

An important improvement has lately been added to the Cooler, viz: a small pan (capable of holding from six to eight pounds of butter) inserted directly under the cover. This quantity of butter can be kept perfectly hard all day, without additional ice, a very important addition to the economy and comfort of a family.

If desired, the Cooler can also be furnished at a small expense with a FILTERING APPARATUS, which serves the additional purpose of removing all impurities from the water, rendering it perfectly clear and wholesome.

The Cooler and filter may be seen in operation at any time at BURNET'S HOUSE FURNISHING ESTABLISHMENT, No. 84 East Fourth street, CINCINNATI.

Persons residing at a distance will be enabled to receive a share of the patronage bestowed on the establishment.
