Reese's Patent Coupling and Foreplate,

FOR NAIL-PLATE AND SHEET-ROLLS.

CAN NOW BE SEEN IN OPERATION at Messrs Baily, Brown & Co's Rolling Mill, Pittsburgh, or the "Sliver works," Mercer county, Pa. The advantage of my improvement are—that it obviates the necessity of stopping the engine or throttle of the crab to turn off the top roll when forming, as the top roll is connected and disconnected in an instant without; neither is the action, nor anything else. The PATENT is also constructed so simple and complete that it is placed or displaced in half a minute, without removing a guide, cotter, bolt, or nut. The last, though not least advantage of my improvement is that it is you are enabled to form the Nail-hole or sheet-iron than has ever been yet best before. Further information, or a right to use the same, can be obtained of the inventor.

JACOB REESE,

Manager of "Clinton Mills," Pittsburgh.
