Reese's Patent Coupling and Foreplate,
FOR NAIL-PLATE AND SHEET-ROLLS,
CAN NOW BE SEEN IN OPERATION
at Messrs Bally, Brown & Co.'s Rolling Mill, Pittsburgh, or the "Sharon Works," Mercer county, Pa. The advantages of any improvement are—that it obviates the necessity of stopping the engine or throwing of the roll to connect the top roll when Sourging, as the top roll is connected and disconnected in an instant without respect to the angles, wide or anything else. The FOREPLATE is also constructed so simple and complete that it is placed or displaced in half a minute, without removing a guide, scraper, bolt, or nut. The last, though not least advantage of the improvement is, that by it you are enabled to bear the Plate upon heats, thus making a higher polish on Nail-plate and Sheet-iron than has ever been got out. Further information, or a right to use the plate, can be obtained of the inventor.
JAMES REESE,
Manager of "Clinton Mills," Pittsburgh.
