Reese's Patent Coupling and Foreplate,
FOR NAIL-PLATE AND SHEET-IRON,
CAN NOW BE SEEN IN OPERATION
at Messrs Sally, Brown & Co.'s Rolling Mill, Pittsburgh, or the "Sharon Works," Mercer county, Pa. The advantages of my improvement are—that it obviates the necessity of stopping the engine or throwing off the crab or connect the Rip Roll when Securing, as the top roll is connected and disconnected in an instant without respect to the engine, crab or anything else. The FOREPLATE is also constructed so simple and complete that it is placed or displaced in half a minute, without removing a spike, screw, bolt, or nut. The last, though not least advantage of my improvement is, that by it you are enabled to Secure the Rolls between heats, the making a higher polish (iron) than can be done with the old system of cot Screw. Further information, or a right to use the same, can be obtained at the Invention
WOOD REESE
Sharon Mill
