MONDAY MORNING, NOV. 18, 1861.

Thrilling Adventure in Western Virginia.

The present war already has given birth to incidents of deadly peril and extraordinary personal bravery, that have rarely been equalled in the history of any previous campaign. One of the most thrilling adventures that we have yet heard was narrated yesterday in the office of the Michigan Central Railroad Line, by a Michigander who had been serving with an Ohio Regiment in Western Virginia, and who was now on his way home to Jackson. We will endeavor to reproduce the story as nearly as possible in his own words. Said he:

"I had been scouting for about twelve hours, and had lost all trace of my comrades and of the road. Night came on and I laid down in a piece of woods to sleep. Some time during the night I was awakened by a stinging feeling in my left ear, and jumped to my feet. Crack! went a rifle at a short distance, and a bullet whizzed by my other ear. It was bright moonlight, and directly in front of me I saw a cussed Secesher sitting on a rock, loading up to take another plug at me. You'd better believe I grasped my rifle putty quick and put behind a tree. So did Secesh. We staid behind our trees putty nigh quarter of an hour before either moved. Putty soon he peeked out, and I sent a ball through the tip of his nose. That paid for the piece of my ear that the skunk shot off when I was asleep. Then both blazed away whenever we got a chance, and for nigh unto an hour we peppered at each other, knocking off the bark of our trees, but not hurting one another much.

By this time it was nigh morning, and the moonlight a little dull, so that we couldn't see each other so well. Putty soon I see the fellow making for another tree, so I up and popped at him, but the darned thing missed fire. Jehosephat! but wasn't I mad, and I hadn't got another cap about me.

"Secesh got to another tree nigher to me, and popped away four or five times without hitting. Then I guess his ammunition gave out, for he didn't fire again, and we staid peeking at each other for a considerable time. At last he made for me, with his gun clubbed, and I followed his example. We met on a bit of open ground and went at it, hammer and tongs, until both our guns broke. Then he threw away his gun, and drew a mighty ugly great bowie, and made at me with a yell. I jumped for his throat, but stubbed my toe and went down, with Secesh tumbling over me. I thought praying time was come then if ever it was to come.

"I tell you gentlemen, it was a scary time for a man about them days. I rolled over and caught the feller by his wrist and throat, and we had a regular rough and tumble for the knife. He cut me four or five times, and I jumped to my feet with a yell for the old Wolverine State. I was the happiest man in all Virginny that moment. Secesh, he gives one spring at me, and I drew back to give him the full length of the bowie, when—"

Here he stopped, and appeared overcome by his recollections. His hearers eagerly pressed him for the result of the fight but he shook his head solemnly.

"Gentlemen," said he, "that was one of the most singular things I ever met with, and I don't yet understand. If I had heard anybody else tell of it, I shouldn't have believed it."

Everyone was at once anxious to know what had happened.

"Why, when I opened my mouth to shout 'Hurrah for the Wolverine State!' hang me if the fellow didn't jump clean down my swallow! I turned a double flip-flop down my own throat after him, caught him just as he went round the corner into my stomach turned him inside out so suddenly that he said it hurt him, and then engaged him at twenty dollars a week to exhibit as the Eighth Wonder of the World, The Man without a Skin!"

There was a sudden stillness among his listeners. Capt. Pearce was observed to silently wipe away a tear with one hand, whilst with the other he held out a free pass to Detroit.

THE SEA ISLANDS.—The region into which our arms have penetrated is one of the most singular and important in the country. It is the very centre of the real island region, which extends from John's Island, just south of Charleston, to Amelia Island, Florida. Here is raised the famous sea island cotton, which is so valuable that some of the crops sell for a dollar a pound. The product is small, and the process of ginning is slow, only the roller gin being employed. This cotton is not quoted in the market, the purchasers being few and represented by agents from England and France. The finer fabrics made from sea island cotton are sometimes worth fifty dollars a pound. It will be seen that the cost of the raw material is of little comparative consequence; and the best grades are eagerly competed for. In the earlier history of the cotton manufacture, this cotton, now so precious, was woven into fabrics intended for ordinary wear, and it was not thought that the upland description was calculated for fine sheetings and shirtings. The nearer the cotton grows to the sea the finer is the staple. A kind called main cotton, from the same seed, is raised on the main land, but although superior to the upland cotton, it is vastly inferior to the sea island. The planters in this region are very rich, very proud, very traitorous, and wholly South Carolinian.

FRESH CONSIGNMENT—
10 bbls. Family Flour,
24 do Superfine Flour,
21 do prime Beans,
8 do Cranberries,
12 do Russett Apples,
20 do Potatoes,

SEALED PROPOSALS.

SEALED PROPOSALS will be received by the undersigned, until 12 o'clock noon of THURSDAY, the 21st day of November, inst., for the erection of a MARKET HOUSE, CITY HALL, WEIGH SCALES, &c., in accordance with plans approved by Councils, which may be examined at the office of Messrs. Barr & Moser, Architects, No. 4 Diamond, Allegheny City.

Specifications will be ready for the use of bidders on MONDAY, 11th inst., and can be had from the Committee, or from the Architects.

All bids must specify the lowest price if paid in cash as the work progresses, and also the price if paid by the revenue arising from the rents accruing to the city from the stalls in Market House,—said revenue to be satisfactorily secured to the contractor.

Councils reserve the right of choosing the manner of payment. All bids to be subject to the approval of Councils.

Bidders will address their Proposals to the Chairman of the "Special Committee on Diamond Improvement," marked "Proposals for Allegheny City Diamond Improvement."

Councils will require all bidders to furnish a guarantee of their responsibility, before considering bids.

SAM'L RIDDLE, Chairman.

MANUFACTORY, 110 Water and 104 Front sts. PITTSBURGH.

To Farmers and Others.

FOR SALE,

SHOWERS'S SUPERIOR PATENT

GRAIN FAN AND SEPARATOR.

PATENTED JANUARY 10, 1860.

THE SUPERIORITY OF THIS FAN over all others in use consists in its cheapness, simplicity and durability. Second, in cleaning Grain faster, better and more thoroughly, with less labor than any other mill. The inventor of the above Fan has been long engaged in manufacturing and selling Agricultural Implements, convinced of the great want of a good Fan for cleaning the different kinds of Grain and seeds, presents this to the public with full confidence that it will meet their wants.

The undersigned, having purchased the sole right to manufacture and sell the above Grain Fan and Separator in Western Pennsylvania, Western Virginia, and all Ohio, and the right to sell in Indiana and Illinois, is now prepared to fill all orders, wholesale or retail, at 228 Liberty street, Pittsburgh, Pa. W. W. WALLACE.

J. A. BROWN,

Corner of Virgin alley, about six doors above the Post Office, Pittsburgh, where he will keep on hand a large assortment of Venetian Blinds of the latest styles, straight and circular Cornices of the latest styles, Plain, Fancy and Silk Trimmings of the different styles. Old blinds repaired, repainted and trimmed at reduced prices, also, Window Shades of different styles. Please call. These are times, I will fit you out with little money.

DITHRIDGE'S XX FLINT GLASS

OVAL CARBON OIL

LAMP CHIMNEYS,

PATENTED SEPTEMBER 18th, 1861.

THE BEST THAT HAVE EVER yet been offered to the public. They are the best for the following reasons:

1. Being of oval shape, the glass is everywhere equally distant from the flame, so that the draft is stronger and more regular.

2. The oval shape is better adapted to resist the action of sudden expansion, so that it is impossible to crack them.

3. The glass is made largely of Lead and Pearlash, giving a great degree of strength and elasticity. The chimneys which have been found to be so injurious as to explode even when not in use, are invariably made of Lime Glass instead of the Flint Glass, of which ours are manufactured.

4. But the greatest advantage of these Chimneys is that when you have one it will last forever, and if any should ever break one by the heat of the lamp, take it back to the Manufactory and we will replace the cracked chimney by a new whole one. This proffer does not include accidents or other causes of breakage where the chimney is not exposed to heat. [illegible]

Many retailers and consumers of Carbon Oil, who have felt the magnitude of the obstacle, which has existed in the great expense of chimneys, in the way of the general use of that oil, have found a remedy in the Oval XX Flint Glass Chimneys, which has made possible the use of Carbon Oil Light to those who use them, and consequently the consumption of oil greatly increased.

For sale by [illegible] E. D. DITHRIDGE.

SEA BATHING

NEAR

PHILADELPHIA.

FOR SEA BATHING, Atlantic City, N. J., (two and a half hours ride from Philadelphia) is more frequented than any other place in the United States.

Its Bathing, sailing and fishing facilities are unsurpassed.

Its Hotels and Boarding Houses, which will accommodate about Seven Thousand persons, are as well kept as those of Saratoga and Newport.

The Beach is nine miles in length, affording a magnificent drive, while the atmosphere of the place is remarkable for its dryness.

The Mails are carried twice daily two and from Philadelphia, and a telegraph extends the whole length of the road.

Trains of the Camden and Atlantic Railroad leave Vine Street Wharf, Philadelphia, at 7½ a. m. and 4 p. m., leave Atlantic at 6½ a. m. and 4½ p. m. Distance sixty miles. Fare $1.80.

MANSION HOUSE (United States) HOTEL and other houses now open.

Hotels.

ST. NICHOLAS HOTEL,

Broadway, New York.

Board Reduced to $2 per Day.

SINCE THE OPENING of this vast and commodious Hotel, in 1854, it has been the single endeavor of the proprietors to make it the most sumptuous, convenient and comfortable home for the citizen and stranger on this side of the Atlantic.

And whatever has seemed likely to administer to the comfort of its guests they have endeavored, without regard to cost, to provide, and to combine all the elements of individual and social enjoyment which modern art has invented, and modern taste approved; and the patronage which it has commanded during the past six years is a gratifying proof that their efforts have been appreciated.

To meet the exigencies of the times, when all are required to practice the most rigid economy, the undersigned have

Reduced the Price of Board to Two Dollars per Day,

at the same time abating none of the luxuries with which their table has hitherto been supplied.

VALUABLE IMPROVEMENT

In Steam and Atmospheric Hammers.

LETTERS PATENT were granted on Sept. 4th, 1860, to Thomas Beach, for a very simple and efficient improvement in Steam and Atmospheric Hammers, whereby the full stroke of the hammer is obtained, no matter what the thickness of the mass of iron to be hammered—thereby effecting a great increase of power where large pieces of metal are to be operated upon, and a corresponding saving of expense.

The subscribers are owners of said patent, and are desirous of selling rights to use said improvement, as well as territory under said patent. A model of said improvement is left at the office of Messrs. Bakewell & Loshing, Attorneys at Law, corner of Grant and Diamond streets, where parties interested may call and see it, and learn also the terms of license sale, &c.

P. S. WEAVER,

The number which can be made by any bidder within one month after receipt of the order, also the number which he can deliver within one week.

The Wagons must exactly conform to the following specifications, and to the established patterns:

Six mule (covered) wagons, of the size and description as follows, to wit:

The front wheels to be three feet ten inches high, hubs ten inches in diameter, and fourteen and a quarter inches long; hind wheels four feet ten inches high, hubs ten and a quarter inches in diameter, and fourteen and a quarter inches long; fellies two and a half inches wide and two and three quarter inches deep; cast iron pipe boxes twelve inches long, two and a half inches at the large end and one and seven-eighths inch at small end; tire two and a half inches wide by five-eighths of an inch thick, fastened with one screw bolt and nut in each fellie; hubs made of gum, the spokes and fellies of the best white oak, free from defects, each wheel to have a sand band and linchpin band two and three quarter inches wide, of No. 8 band iron, and two driving bands—outside band one and a quarter inch by one-quarter inch thick, inside band one inch by three-sixteenths in thickness; the hind wheels to be made and boxed so that they will measure from the inside of the tire to the large end of the box six and a half inches, and front wheels, and one eighth inches in a parallel line, and each axle to be three feet eleven and three eighth inches from the outside of one shoulder washer to the outside of the other, so as to have the wagons all to track five feet from centre to centre of the wheels. Axletrees to be made of the best quality refined American iron, two and a half inches square at the shoulder, tapering down to one and a half inch in the middle, with a seven-eighths inch king-bolt hole in each axletree; washers and linchpins for each axletree; size of linchpins one inch wide, three-eighths of an inch thick, with a hole in each end; a wooden stock four and three-quarter inches wide and four inches deep fastened substantially to the axletree with clips on the ends and with two bolts, six inches from the middle, and fastened to the hounds and bolster, (the bolster to be four feet five inches long five inches wide, and three and a half deep,) with four half-inch bolts.

The tongue to be ten feet eight inches long, four inches wide and three inches thick at front end of the hounds, and two and a quarter inches wide by two and three-quarter inches deep at the front end, and so arranged as to lift up, the front end of it to hang within two feet of the ground when the wagon is standing at rest on a level surface.

The front hounds to be six feet two inches long, three inches thick, and four inches wide over axletree, and to retain that width to the back end of the tongue; jaws of the hounds one foot eight inches long and three inches square at the front end, with a plate of iron two and a half inches wide by three-eighths of an inch thick, fastened on top of the hounds over the back end of the tongue with one half-inch screw bolt in each end, and a plate of iron of the same size turned up at each end one and a half inches to clamp the front hounds together, and fastened on the under side, and at front end of hounds, with half inch screw bolt through each hound, a seven eighth inch bolt through tongue and hounds in the centre of jaws, to secure the tongue in the hounds; a plate of iron three inches wide, one-quarter inch thick, and one foot eight inches long, secured on the inside of jaws of hounds with two rivets; and a plate of the same dimensions on each side of the tongue, where the tongue and hounds run together, secured in like manner, a brace of seven-eighths of an inch round iron to extend from under the front axletree, and take two bolts in front part of the hounds, same brace three-quarters of an inch round to continue to the back part of the hounds, and to be fastened with two bolts, one near the back end of the hounds, and one through the slider and hounds; a brace over front bolster one and a half inch wide, one-quarter of an inch thick, with a bolt in each end to fasten it to the hounds; the opening between the jaws of the hounds, to receive the tongue, four and three-quarter inches in front, and four and a half inches at the back part of the jaws.

The hind hounds four feet two inches long, two and three-quarter inches thick, and three inches wide, jaws one foot long where they clasp the coupling pole; the bolster four feet five inches long, and five inches wide, by three inches deep, with steady iron two and a half inches wide, by one-half inch thick, turned up two and a half inches and secured on each end with three rivets; the bolster stocks and hounds to be secured with four half inch screw bolts, and one half inch screw bolt through the coupling pole.

The coupling pole nine feet eight inches long, three inches deep, and four and a half inches wide at front end, and two and three-quarter inches wide at back end; distance from the centre of king bolt hole to the centre of the back axletree six feet one inch, and from the centre of king-bolt hole to the centre of the mortice in the hind end of the pole eight feet nine inches; king bolt one and a quarter inch diameter, of best refined iron, drawn down to seven-eighths of an inch where it passes through the iron axletree; iron plates six inches long, three inches wide, and one eighth of an inch thick on the coupling tree and tongue where they rub together, iron plate one and a half by one quarter of an inch on the sliding bar, fastened at each end by a screw bolt through the hounds; front bolster to have plates above and below eleven inches long, three and a half inches wide, and three eighths of an inch thick, corners drawn out and turned down on the sides of the bolster, with a nail in each corner, and four countersunk nails on the top; two bands on the hind hounds, two and two and a half inches wide, of No. 10 band iron; the rub plate on the coupling pole to be eight inches long, one and three-quarter inches wide, and one quarter of an inch thick. Doubletree three feet ten inches long; singletrees two feet eight inches long, all well made of hickory, with an iron ring and clip at each end, the centre clips to be well secured; lead bar and stretcher to be three feet two inches long, two and a quarter inches wide, and one and a quarter inch thick. Lead bars, stretchers, and singletrees for six mule team; the two singletrees for the lead mules to have hooks in the middle to hook to the end of the fifth chain, the wheel and middle pairs with open rings to attach them to the doubletrees and lead bar.

The fifth chain to be ten feet long to the forks; the fork one foot ten inches long, with the stretcher attached to spread the forks apart; the links of the doubletree, stay and tongue chains, three-eighths of an inch in diameter; the fifth chain to be seven-sixteenth inch diameter to the fork; the fork to be five-sixteenth inch diameter; the links of these and of the lock chains to be not more than two and a quarter inches long.

The body to be straight, three feet 6 inches wide, two feet deep, ten feet long at the bottom, and ten feet six inches at the top, sloping equally at each end all in the clear or inside; the floor to be two and a half inches wide, and three inches deep; front pieces two inches deep by two and a half inches wide; tail piece two and a half inches wide and three inches deep; and four inches deep in the middle to rest on the coupling pole; top rail one and a half inch thick by one and seven eighth inch wide; lower rails one inch thick by one and seven eighth inch wide; three studs and one rail in front, with a seat on strap hinges to close it up as high as the sides; a box three feet four inches long, the bottom five inches wide front side, nine and a half inches deep, and eight and a half inches at the top in parallel line to the body all in the clear; to be substantially fastened to the front end of the body, to have an iron strap passing round each end, secured to the head piece and front rail by a rivet in each end of it passing through them, the lid to be fastened to the front rail with two good strap hinges, a rap of five-eighth iron round the box a half inch from the top edge, and two straps same size on the lid near the front edge, to prevent the mules from eating the boxes; to have a joint hasp fastened to the middle of the lid, with a good wooden cleat on the inside, a strap of iron on the centre of the box with a staple passing through it, to fasten the lid to; eight studs and two rails on each side; one bolster fastened to the body, six inches deep and four inches wide at king bolt hole, iron rod in front and centre, of eleven-sixteenths of an inch round iron, with a head on the top of rail and nut on lower end; iron rod and brace behind, with shoulders on top of tail piece, and nuts on the under side, and a nut on top of rail; a plate two and a half inches wide, of No. 10 band iron on tail piece, across the body; two mortices in tail piece, and hind bar two and a quarter inches wide and one inch thick, to receive pieces three feet four inches long, to be used as harness bearers; four rivets through each side stud, and two rivets through each front stud, to secure the lining boards, to be of the best quality iron, and riveted on a good bar; one rivet through each end of the rails; floor five-eighths of an inch oak boards; sides five eighths of an inch white pine, tail board three quarters of an inch thick, of white pine, to be well cleated with five oak cleats riveted at each end through the tail board; an iron plate three feet eight inches long, two and a quarter inches wide, and three-eighths of an inch thick on the under side of the bed piece, to extend from the hind end of the body to eight inches in front of the hind bolsters, to be fastened by the rod at the end of the body, by the lateral rod and two three-eighths of an inch screw bolts, one at the forward end of the plate, and the other about equidistant between it and the lateral rod. A half inch round iron rod or bolt to pass diagonally through the rails, between the two hind studs to and through the bed piece and plate under it, with a good head on the top and nut and screw at the bottom, to be at the top one foot six inches from inside of tail board, and on the bottom ten inches from the hind rod. An iron clamp two inches wide, one quarter of an inch thick around the bed piece, the centre bolt to which the lock chain is attached passing through it, to extend seven inches on the inside of the body, the ends, top and bottom to be secured by two three-eighth inch screw bolts, the middle bar at the ends to be flush with the bed piece on the lower side. Two lock chains secured to the centre bolt of the body one and eleven inches, the other two feet six inches long, to be of three-eighths of an inch round iron; feed trough to be four feet six inches long from out to out, the bottom and ends of oak, the sides of yellow pine, to be eight inches wide at bottom, twelve inches wide at top, and eight and a half inches deep all in the clear, well ironed, with a band of hoop iron around the top, one around each end and three between the ends, strong and suitable irons to fasten them on the tongue when feeding; good strong chains to be attached to the top rail of the body, secured by a staple with a hook to attach it to the trough. Six bows of good ash, two inches wide and one-half inch thick, with three staples to confine the ridge pole to its place; two staples on the body, to secure each one of the bows; one ridge pole twelve feet long, one and three-quarters inches wide by five eighths of an inch thick; the cover to be of the first quality cotton duck No. —, fifteen feet long and nine feet eight inches wide, made in the best manner, with four hemp cords on each side, and one through each end to close it at both ends; two rings on each end of the body, to close and secure the ends of the cover; a staple in the lower rail, near the second stud from each end, to fasten the side cords. The outside of the body and feed trough to have two good coats of white lead, colored to a blue tint, the inside of them to have two coats of venetian red paint; the running gear and wheels to have two good coats of venetian red darkened of a chocolate color, the hub and fellies to be well pitched, instead of painted, if required.

A tar pot, an extra king bolt, and two extra singletrees to be furnished with each wagon, the king bolt and single-trees similar in all respects to those belonging to it.

Each side of the body of the wagon to be marked U. S., and numbered as directed; all other parts to be lettered U. S.; the cover, feed box, bolts, linchpins, tar-pot, and harness bearers for each wagon to be put in a strong box, (coopered,) and the contents marked thereon.

It is to be distinctly understood that the wagons are to be so constructed that the several parts of any one wagon will agree and exactly fit those of any other, so as to require no numbering or arranging for putting together, and all the material used for their construction to be of the best quality; all the wood thoroughly seasoned, and the work in all its parts faithfully executed in the best workmanlike manner.

The work may be inspected from time to time as it progresses by an officer or agent of the Quartermaster's Department, and none of it shall be painted until it shall have been inspected and approved by said officer or agent authorised to inspect it. When finished, painted, and accepted by an officer or agent of the Quartermaster's Department, and delivered as herein agreed, they shall be paid for. M. C. MEIGS, Quartermaster General U. S.

PROPOSALS FOR ARMY WAGON AND AMBULANCE HARNESS.

OFFICE OF ARMY CLOTHING AND EQUIPAGE, Corner Howard and Mercer streets, New York, August 2, 1861.

PROPOSALS will be received at this office for furnishing, by contract, Army Wagon Harness:

The proposals should state the price at which they can be furnished at the place of manufacture, and the price at which they can be delivered at this depot, the number which can be made by the bidder within one month after receipt of the order; also the number which he can deliver within one week.

The harness must exactly conform to the following specifications and to the established patterns:

Four-mule harness as follows, to wit:

WHEEL.

Two Quilors.—Breech straps 3 feet 6 inches long, 3½ inches wide, sewed into 14 inch rings of ⅜ inch iron; hip straps 3 feet 11 inches long, 2½ inches wide, stay pieces 2 feet long, 2½ inches wide, with 1½ inch buckles; cross straps to buckle into stay pieces, 6 feet long, 1½ inch wide; side straps 4 feet long, 1½ inch wide; tie straps 18 inches long, ½ inch wide, tapering to a point.

Two Belly Bands. Long side two feet 3 inches long, 2 inches wide, with a two inch buckle; short side 1 foot 6 inches long and 2 inches wide.

Two Hair Collars. 18 to 19 inches long, with double straps and safe leathers and buckles ⅝ inch wide.

Two Pair of Strong Hames to suit, made of white oak root, ironed with hooks, breast rings 1½ inch square, staples and line rings.

Two Pair of Hame straps. Lower one 5 feet 6 inches long, ⅝ inch wide; upper one 4 feet 6 inches long, ⅝ inch wide.

Two Bridles. Crown piece 2 feet long, 1¼ inch wide; cheek pieces each 10 inches long, 1¼ inch wide; front piece 13½ inches long, 1¼ inch wide; stay pieces, from blinds to crown pieces, 18 inches long, 1¼ inch wide; nose piece 12 inches long, 1 inch wide; blinds 6 inches long, 5½ inches wide; reins, long side 4 feet long, 1 inch wide; short side 2 feet long, 1 inch wide, with 1 inch buckle; butts, tinned mullen, to weigh 5 lbs to the dozen.

Two Pair Chain Pipes, 2 feet long, 2½ inches wide.

Two Pair Trace Chains, 7 feet long, 16 links to the foot of No 3 iron, with T on one end, weight 7½ to 8 lbs per pair. Twisted or straight.

One Pair of Breast Chains, 22 inches long, 14 links to the foot, of No 3 iron. Twisted.

Two Neck Straps, 3 feet 1 inch long, 2⅜ inches wide, with 2⅜ inch buckle.

Two Neck Chains, 4 feet 6 inches long, 14 links to the foot, No 4 iron, T and loop to be riveted on to the neck strap. Twisted.

One Saddle, made on Attakapas tree, head, gullet and cantle ironed; covered in the usual way with half-tanned horse hide; flaps 20 inches long, 16 inches wide; surcingle 7 feet 3 inches long, 3⅛ inches wide, with a 3⅛ inch buckle on one end, to be fastened to the saddle by being riveted to two curved straps 1½ inch wide, these straps are placed one on each side of the saddle tree, one end is tied to the front part of the bar, the other end to the extension of the bar behind the cantle, Spanish saddle fashion; stirrup leathers 4 feet 7 inches long, 1½ inch wide, with 1½ inch buckle; stirrups, malleable iron, tinned, butt eye pattern, to weigh 13½ lbs the dozen pair.

LEAD.

Two Collars, 17½ to 18 inches long, made the same as for wheel harness.

Two Pair of Hames to suit, of the same material as for wheel harness, ironed, with hooks, breast rings and line rings, with straps as in wheel harness.

Two bridles, same as for wheel harness.

Two Neck straps and Chains, same as for wheel harness.

Two Belly Bands, [illegible]

Two Pair Chain Pipes, [illegible]

Two Pair Trace Chains, [illegible]

Two Cruppers and Hip straps. Back strap 5 feet long, tapering from 3½ inches to 2½ inches wide. Hip straps each 3 feet 4 inches long, 1¼ inch wide, each with a hook at one end.

Two Back Bands, 3 feet 4 inches long, 3½ inches wide.

Two Martingales, 4 feet long, 1¼ inch wide, to buckle into the bit.

One Coupling Strap, 5 feet 6 inches long, ¾ inch wide.

One Check Rein, 4 feet long, 1 inch wide, to buckle into the bit at each end, with a ring sewed in the centre to receive the lead line.

One Lead Line, 21 feet long, ¾ inch wide, with a buckle at one end, and an 8 inch loop at the other.

One Whip, heavy plaited horse hide, 6 feet 6 inches long.

One Horse Brush, oval, of bristles, — by — inches.

One Curry Comb, No. 2 — 8 bar.

The whole to be packed in a box about 18 inches wide, 17 inches deep, 36 inches long, made of 1 inch stuff, coopered, wood hoops or iron as may be required.

Four Horse Harness, as follows, to wit:

WHEEL.

Two Quilors. Breech straps 3 feet 8 inches long, 3½ inches wide, sewed into 4 inch rings of ⅜ inch iron; hip straps 4 feet long, 2 inches wide; stay pieces 2 feet 2 inches long, 2 inches wide, with 1⅝ inch buckles; cross straps to buckle into stay pieces, 6 feet long, 1½ inch wide, side straps 5 feet 6 inches long, 1½ inch wide; tie straps 18 inches long, 1½ inch wide, tapering to a point.

Two Belly bands. Long side 2 feet 4 inches long, 2 inches wide, with a 2 inch buckle; short side 1 foot 6 inches long and 2 inches wide.

Two Hair Collars. 22 to 23 inches long, with double straps and safe leathers and buckles ⅝ inch wide.

Two Pair of strong Hames to suit, made of white oak root, ironed with hooks, breast rings 1½ inch square; staples and line rings.

Two Pair of Hame straps. Lower one 5 feet 6 inches long, ⅝ inch wide; upper one 4 feet 6 inches long, ⅝ inch wide, of alum tanned leather.

Two Bridles. Crown piece 2 feet 2 inches long, 1½ inch wide; cheek pieces each 10 inches long, 1½ inch wide; front piece 13½ inches long, 1½ inch wide; stay pieces, from blinds to crown pieces, 18 inches long, 1½ inch wide; nose piece 13 inches long, 1 inch wide; blinds 6 inches long, 6 inches wide; reins, long side 4 feet 9 inches long, 1 inch wide, short side 2 feet long, 1 inch wide, with 1 inch buckle; bitts, tinned mullen, to weigh 6 lbs the dozen.

Two Pair Chain Pipes, 2 feet 6 inches long, 2½ inches wide.

Two Pair Trace Chains, 7 feet long, 14 links to the foot, of No 2 iron, twisted or straight, with T on one end, weight 9 lbs per pair.

One pair of Breast Chains, 23 inches long, 14 links to the foot, of No 2 iron, twisted.

Two Neck straps, 3 feet 3 inches long, 2½ inches wide, with 2½ inch buckle.

Two Neck Chains, 4 feet 6 inches long, 14 links to the foot, twisted No 4 iron, T and loop to be riveted on to the neck strap, swivel in the chain.

One Saddle, made on Attakapas tree, head, gullet and cantle ironed, covered in the usual way with half-tanned horse hide, flaps 20 inches long, 16 inches wide; surcingle 7 feet 3 inches long, 3⅛ inches wide, with a 3⅛ inch buckle on one end, to be fastened to the saddle by being riveted to two curved straps 1½ inch wide, these straps are placed one on each side of the saddle-tree, one end is tied to the front part of the bar, the other end to the extension of the bar behind the cantle, Spanish saddle fashion; stirrup leathers 4 feet 7 inches long, 1½ inch wide, with 1½ inch buckle; stirrups, malleable iron, tinned, butt eye pattern, to weigh 13½ lbs to a dozen pair.

LEAD.

Two Bridles, same as for wheel harness.

Two Collars, 20 to 22 inches long, made the same as for wheel harness.

Two Pair of Hames to suit, of same material as for wheel harness, ironed, with hooks, breast rings and line rings, with straps as in wheel harness.

Two Neck Straps and Chains, same as for wheel harness.

Two Belly Bands, same as for wheel harness.

Two Pair Chain Pipes, same as for wheel harness.

Two Pair Trace Chains, same as for wheel harness.

Two Cruppers and Hip Straps. Back strap 6 feet long, tapering from 3½ inches to 2½ inches wide. Hip Straps with buckles each 3 feet 8 inches long, 1½ inch wide, with wrought hooks.

Two Back Bands, 3 feet 7 inches long, 3½ inches wide.

Two Martingales, 4 feet long, 1½ inch wide, to buckle into the bit.

One Coupling Strap, 5 feet 6 inches long, ¾ inch wide.

One Check Rein, 4 feet 1 inch long, 1 inch wide, to buckle into the bit at each end, with a ring sewed in the centre to receive the lead line.

One Lead Line, 21 feet long, ¾ inch wide, with a buckle at one end, and an 8 inch loop at the other.

One Whip, heavy plaited horse hide, 6 feet 6 inches long.

One Horse Brush, oval, of bristles, — by — inches.

One Curry Comb, No 2 — 8 bar.

The whole to be packed in a box about 21 inches wide, 18 inches deep, 36 inches long, made of 1 inch stuff, coopered, wood hoops or iron, as may be required.

The whole to be made of the best material, sewing to be made with good waxed thread, and subject to inspection during the process of manufacture and also when finished.

When 6 horse harness is required, the lead collars, bridles, hames, neck straps, belly bands, chain pipes, trace chains, crupper and hip straps, back bands and coupling straps are doubled; one bearing chain 8 feet long, 16 links to the foot, of No 2 iron, with a T on each end added; and lead line to be 28 feet long.

The whole to be made of the best material, sewing to be made with good waxed thread, and subject to inspection during the process of manufacture and also when finished.

Where 6 mule harness is required, the lead collars, bridles, hames, neck straps, belly bands, chain pipes, trace chains, crupper and hip straps, back bands and coupling straps are doubled; one bearing chain 8 feet long, 14 links to the foot, of No 3 iron, with a T on each end added, and lead line to be 28 feet long.

Proposals will also be received for making and delivering ambulance harness for two or four mule or horse teams—a specification of which will be hereafter furnished.

Forms of proposal and guarantee will be furnished upon application to this office, and none will be considered that do not conform thereto.

The privilege is reserved by and for the United States of rejecting any proposals that may be deemed extravagant.

Proposals will be indorsed on the envelope inclosing them, "Proposals for furnishing Army Wagon and Ambulance Harness," and addressed to Major D. H. VINTON, Quartermaster U. S. Army.

Fourth Accommodation Train for Wall's Station leaves daily (except Sunday) at 6:15 P. M.

Returning Trains arrive in Pittsburgh as follows:—Express, 1:15 A. M.; Mail, 8:06 P. M.; Fast Line, 1:30 A. M.; Johnstown Accommodation, 10:05 A. M.; First Wall's Station Accommodation, 7:50 A. M.; Second Wall's Station Accommodation, 8:50 A. M.; Third Wall's Station Accommodation, 1:05 P. M.; Fourth Wall's Station Accommodation, 6:05 P. M.

Trains for Blairsville and Indiana connect at Blairsville intersection with Johnstown Accommodation and Express Trains East and West.

The traveling public will find it greatly to their interest in going East or West, to travel by the Pennsylvania Railroad, as the accommodations now offered cannot be surpassed on any other route. The Road is ballasted with stone and is entirely free from dust. We can promise safety, speed and comfort to all who may favor this Road with their patronage.

FARE:

To New York.......$10 00 To Baltimore.......$9 51
" Philadelphia.......10 00 " Lancaster.......[illegible]
" Harrisburg.......[illegible]

Baggage Checked to all stations on the Penna. Railroad, and to Philadelphia, Baltimore and New York.

Passengers purchasing tickets in cars will be charged an excess according to distance traveled in addition to the station rates, except from stations where the Company has no Agent.

NOTICE.—In case of loss, the Company will hold themselves responsible for personal baggage only, and for an amount not exceeding $100.

N. B.—An Omnibus Line has been employed to convey Passengers and Baggage to and from the Depot, at a charge not to exceed 25 cents for each passenger and baggage.

For Tickets apply to J. STEWART, Agent, at the N. R. R. Passenger Station, on Liberty and Grant streets.

IMPORTANT.—All persons purchasing tickets for St. Joseph and other points in Northern Missouri, the State of Kansas, or the Territories, should insist on having tickets that read by the

NORTH MISSOURI RAILROAD,

The only rail route from St. Louis to St. Joseph. It is the shortest and quickest line, by thirteen hours, to the remotest point reached by rail, and is always as cheap as any other.

Buy your tickets to Kansas and all points in Northern Missouri by the North Missouri Railroad.

ISAAC H. STURGEON, President and Gen'l Supt. of the North Missouri R. R.

HENRY H. SIMMONS, Agent.

DOLLAR SAVINGS BANK,

No. 65 Fourth Street.

CHARTERED IN 1855.

OPEN DAILY FROM 9 TO 2 O'CLOCK, also on Wednesday and Saturday evenings, from May first to November first, from 7 to 9 o'clock, and from November first to May first, from 6 to 8 o'clock.

Deposits received of all sums not less than one Dime, and a dividend of the profits declared twice a year, in June and December. Interest has been declared semi-annually, in June and December, since the Bank was organized, at the rate of six per cent. a year.

Interest, if not drawn out, is placed to the credit of the depositor as principal, and bears the same interest from the first days of June and December, compounding twice a year without troubling the depositor to call or even to present his pass book. At this rate, money will double in less than 12 years, making in the aggregate SEVEN AND ONE HALF PER CENT. A YEAR.

Books containing the Charter, By-Laws, Rules and Regulations furnished, gratis, on application at the office.

President—GEORGE ALBREE.
