B. A. FAHNESTOCK'S VERMIFUGE.
A FEW weeks since, one of my children, aged about five years, was unwell for several days, and the illness increased so alarmingly that I feared death would be the result. Having heard of the good effects of Fahnestock's Vermifuge when administered to the children of my neighbors, and thinking my child might have worms, from some of the symptoms, I gave it one and a half teaspoonfuls of the Vermifuge, and to my great astonishment it almost immediately discharged between pints and quarts of worms. Its health was soon restored, and it is now remarkably well. Previous to taking the Vermifuge, the worms would occasionally rise in its throat, and I often feared it would die from strangulation.
