Warren's Improved Fire and Water Proof Composition Roofing.
HAVING been for the last eleven years exclusively engaged in the manufacture of the above roofing, and stands in all the principal cities of the Union, during which time it has been tested under every variety of climate, and has been invariably approved of, and wherever experience showed that it could be done, and having been called upon by the *Pennsylvania National Convention* to do a job in the city in 1856, and seeing the corresponding of the *Hungarian Bank* in 1854, (for both of which jobs they transported the roofing material from Philadelphia free of charge,) we have been induced to—on a branch of our business which we had not being prepared to fill unless to any extent, we confidently offer our roofing to the patronage of the public, as being superior and still further secure and more durability and perfect *protection against both fire and water* rendered by the application of this roofing material.
After which it can be walked upon without injuring it, from one half to one inch in the foot—but we can under favorable circumstances supply it to a greater pitch, as low as one inch in the foot. These being light, roofing of any kind can be put on without injuring the roof, and with perfect certainty of having good tight roofs. We append the testimony of some of our patrons, which may be relied on, for further information and references, please call at our office. All work warranted.
