Pittsburgh Gazette.

THE MILK YARD.—*Mowry, Ridgley*—My milk yard covers about one acre of ground, oblong east and west—with a good spring on the north-east corner, and a cheap but good house overall, where I cool my milk and prepare it for market.

A good stream of water from the spring and swamp runs through the northwest corner, which affords plenty of good fresh water for my cows at all times.

The south side is a row of stanchions for my cows, with a shed to cover all, so that in storms we keep dry while milking. The stanchions are seven feet from the wall, leaving room for a cart, to feed the cows grass or cornstalks, and a ditch behind the cows leading all the urine and liquid manure to a large cistern in the southwest corner of the yard.

In the center of the yard is a cheap shed, 50 by 15 feet, for manure.—In the spring I go into the swamp and cut large logs, and make a big fence all around just under the edge of this shed, so that the manure will not spread nor the cattle get over it. I spread a layer of logs of muck on the bottom, when it is ready for the reception of the manure from the cows, old leaves, refuse straw, weeds, muck, lime, ashes, plaster, &c., with an occasional soaking of liquid manure from the cistern. In this way I have every spring a pile of manure worth a *rough fortune*, where I should have realized not one-twentieth part by turning my cattle to grass. The cows are kept in the stanchions over night; then their dung is all in a pile, so it is but little labor to transfer it to the compost heap, and I am not afraid of the cattle hurting or hooking each other during the night. The stiller we keep them the less they eat to keep them in good condition.

I raise most of my cows, oxen and horses, and find by turning them into my wood lots, swamps, and the lot too stony to till or mow, I can raise them and not feel it half as much as pay $40, $50 or $60 for cows, or $160 for a yoke of oxen, or $300 for a pair of *good* horses, and I will keep none but the best, for I find that good stock eat no more than poor ones, and are much more profitable. AN EMPIRE STATE FARMER.

PLOWING BY STEAM.—This is an important subject to farmers, and is claiming considerable attention in the United States. We notice that the vicinity of Chelmsford, England, a successful experiment of the kind was made a few weeks since, in the presence of a large number of persons engaged in agriculture. The *Chronicle*, of that place, says:

The field selected was a piece of twenty-three acres, called Mill Field, near the White Heart Inn. The first start was with two double plows, but as it was exceedingly heavy soil, usually plowed with three or four horses, very foul, and from being lately drained, it did ill fare well, it was difficult for the engine to pass over it, and, after a pause, four single plows were attached, and although at first, from not being able to get the going gear to work favorably, some little delays were caused, after a time they did their work admirably, plowing from six to nine inches deep. The work was wonderfully straight, though done in the midst of a large concourse of spectators, who were evidently deeply interested in the experiment. So clung and tough—so deep and heavy was the nature of the soil, that, in answer to inquiries made as to how the matter was going on, the observation of those who knew the locality was: "Well, if it can plow now, it can plow anything." Many farmers who entered the field prejudiced were unreserved in their praise, and acknowledged that the wonderful machine, being still in its infancy, would, as improvements followed, effect an extraordinary change in the cultivation and management of land of every description.

New York Advertisements.

GOODYEAR'S PATENT VULCANITE, OR HARD INDIA RUBBER.

THE BEACON DAM CO., OWNERS OF Patents, manufacture from the above named material, and offer for sale at their Warerooms, No. 63 Maiden Lane, New York, by the package only.

STRINGS of every kind needed for Dressing or Professional purposes, pronounced by Physicians the most perfect articles ever made.

BREAST PUMPS.

POWDER FLASKS, warranted to keep the powder dry.

FURNITURE CASTORS, that will not deface the carpet.

TUMBLERS & SOAPTRAYS, Pen and Pocket

CUTLERY.

NAPKIN RINGS.

This *Wonderful Material* which is as firm as METAL—light as BONE—brilliant and JET—a poor conductor of HEAT—and consequently of ELECTRICITY—and on which ORGANIC ACIDS and ALKALIES *produce no effect*, is vastly superior to any *other* for the above named, and a great variety of other purposes, to which it is applied.

Dealers in all parts of the country are supplying themselves with their goods, and consumers who want the best articles of the kind, will buy no other.

Merrillo Flint Ware Works.
MERRILL & JAQUES,
142 Centre Street, New York,

MANUFACTURERS AND DEALERS IN Wrought Iron Pipe, fittings, Tools, and every description of apparatus connected with Steam, Water and Gas, for heating and lighting Steamers, Churches, Factories, Private Dwellings, Hospitals, Asylums, Villages, Factories and Halls.

Also, Valves, Cocks, Pumps, Gauges, Boilers and Boiler Plates made to order.

Our Screw Cutting Machines are entirely new, and our own Patent—warranted to do double the work of any other Invention.

Orders solicited from all sections of the Country, and promptly attended to. jeb3ydr

Philadelphia Advertisements.

ALLEN & NEEDLES,
No. 23 South Whitaker, and 25 South Water Street,
PHILADELPHIA,
WHOLESALE DEALERS IN OILS, Candles, Starch, &c. A full assortment on hand to which the attention of dealers is respectfully asked. mr30dy

AGENTS FOR THE SALE OF VIRGINIA MANUFACTURED TOBACCO,
No. 27 Exchange Place, Baltimore, Md.
☞Always on hand a large stock, which they distribute at the lowest market prices. ap29dyd

Arboricultural, &c.

Pittsburgh Hedge Plant Nursery.
SITUATED ON WILKINS AVENUE, about one-quarter of a mile from the second Toll Gate, on the Farmers' and Mechanics' Plank Road, an extension of Fourth street, and about three and a quarter miles from Pittsburgh.
WM. & JAMES MURDOCH, *Proprietors.*
July 14dtf

Shade Trees for Sale.
ALIANTHUS, ELM, LINDEN, Mountain Ash, &c., of extra size for planting, plant-ed in planting shade trees, for persons requiring his services. mr24dwtf

Special Notices.

BOOTS AND SHOES,
WHOLESALE AND RETAIL
JAMES ROBB, No. 89 Market street, between Market House and Fifth street, takes leave to call the attention of his friends and the public generally to his *third large supply* of the most fashionable and durable Boots and Shoes, which he is now receiving, and which, for style, comfort and durability, he shall not be surpassed by any house in the city. Purchasers will find it to their interest to call before purchasing elsewhere. Remember the place, No. 89 Market street, between Fifth and Wood streets. jeb1ydr

Medical.

THREE GREAT LIGHTS!
R. H. R. R.
MANKIND HAVE LONG BEEN EN-sulphed in darkness, as regards the true means of securing health—ridding the human body from disease, and preserving life. The sick, under the fallacious treatment of the regular faculty, are subject to a continued practice of probabilities and uncertainties. There is nothing certain or fixed in the treatment of the sick either in the old or new school of medicine.

Dr. Radway has succeeded in producing three remedies—known to the world as Radway's Ready Relief, Renovating Resolvent and Regulators. These Remedies are not only established facts inasmuch as they have never yet failed in their special or combined efficacy in producing fruitful and beneficial results—but, they are fast establishing a science—as they have in all cases, "when tried" succeeded in restoring to health—and ridding the body from disease after all other medical treatment had failed—and the most skillful physicians had given up the sick as beyond the power of human means to cure—and pronounced the dreadful mandate—Incurable.

Radway's Remedies are therefore fixed facts in the archives of medical science—they have been "often tried"—"never denied"—and are now "to be tried again."

FIRST GREAT LIGHT.

RADWAY'S READY RELIEF.

As a Special Remedy it is to be used in all cases where the human body is seized with the torturing pangs or paroxysms of pain—no matter whether the cause of the pain may be, whether it may be located—an application of the Ready Relief, either internally as a drink, or externally as an ointment, will in a few minutes restore the afflicted body to vigor, and be free from pain.

In all cases of Bowel Disorders, Dysentery, Cholera, Bloody Flux, Sick Headache, Nervous Headache, and other Nervous Affections, Neuralgia, Rheumatism, Sprains, Bruises, Toothache, Burns, Scalds, Wounds, Bruises, Cuts, Poisoning, either by the bites or stings of Reptiles, Insects, or Vegetable or Mineral poisoning by accidents—in all cases and under all circumstances where the human system is tortured by pain, Radway's Ready Relief can be relied upon as a quick, safe and certain remedy.

In cases of Intermittents, Bilious Fever, Typhus Fever, Ship Fever, Yellow Fever, Fever and Ague, Scarlet Fever, and all Malignant Fevers, Small Pox, Measles, Pneumonia, Rheumatic Fever, Scarlet Fever, and Ague, and all other Fevers, the Ready Relief used in connection with Radway's Ready Relief and Regulators, will positively cure the sick afflicted with these diseases, and protect the system against sudden attacks when under, and protect the system against sudden attacks when either of these malignant diseases prevail.

SECOND GREAT LIGHT.

RADWAY'S REGULATORS.

The discovery of these wonderful pills establishes a new era in purgatives, and as a principle is the science of medicine, is paramount to all other remedies—that a cathartic is purgative
