## Republican County Ticket.

SENATE,
ELIAS H. IRISH, Pittsburgh.

ASSEMBLY,
WILLIAM YARNUM, Pittsburgh,
DAVID A. PRESSLEY, Allegheny,
CHARLES L. GOEHRING, Reserve,
DAVID E. BAYARD, Peebles.

SHERIFF,
WILLIAM ESPY, Lower St. Clair.

COMMISSIONER,
THOMAS MELLON, Collins.

DISTRICT ATTORNEY,
JACOB H. SHILLER, Pittsburgh.

TREASURER,
GOODMAN Y. COULTER, South Fayette.

COMMISSIONER,
JONATHAN BRAUFF, South Pittsburgh.

AUDITOR,
DAVID CORNELIUS, Sewickley.

SURVEYOR,
M. T. ANDERSON, East Deer

DIRECTOR OF THE POOR,
JOSEPH MILLER, Snowden.

☞ JOHN BAUSMAN, Esq., is employed by us as an agent for canvassing and collecting for the Pittsburgh *Daily* and *Weekly Gazette*. He will visit in that capacity the various portions of Western Pennsylvania and Eastern Ohio. He is our *only* agent for the purposes named. R. ERRETT & Co.

*August 29, 1859.*

☞ The address of the Republican State Committee will be found on our first page.

GEN. CAMERON.—We have noted, hitherto, without comment, the fact that various Republican and Opposition county conventions throughout the State have passed resolutions in favor of Gen. CAMERON as a candidate for the Presidency; but these avowals of a preference for that gentlemen have now become so numerous, that it is but fitting we should give them more particular attention.

The Republican Convention in Union county, held last week, adopted the following resolutions:

"That Gen. Cameron is our first choice for the Presidency of these United States, believing that he would manage the affairs of the nation with economy, restore prosperity throughout the country, and dispel the dark cloud which has been hovering over us.

"That if Gen. Cameron should be placed in nomination for the Presidency by our party, we firmly believe that he would carry the Keystone State, in 1860, by an overwhelming majority."

In Carbon county a similar resolution was adopted:

*Resolved*, That we have undiminished attachment for, and increased confidence in our distinguished Senator, Hon. Simon Cameron, of whom Pennsylvania is justly proud. She points with pride and gratitude to his long services in her behalf; to his fidelity to her interests; to the tried patriotism, eminent ability and enlarged statesmanship which have ever characterized his public acts. That, as a small measure of our recognition of his public worth, and of his eminent fitness for the high trust, with pride and enthusiasm we name him as the first choice of Pennsylvania, for the first office in the gift of the people of the nation.

—The Lebanon County Convention passed the following resolution:

*Resolved*, That we regard the Senatorial course of Gen. Cameron as eminently praiseworthy, and that we recommend him for the Presidency, in the confident assurance that his life-long identification with the interests of Pennsylvania will ensure our success in this State.

In Centre county, the nominating convention, after passing a resolution in favor of A. G. Curtin for Governor, gave expression to a very decided preference for Gen. Cameron for President; and in Northumberland resolutions were adopted in favor of Cameron for President and Taggart for Governor. Most of these conventions, in order to save the necessity of holding other conventions, also elected delegates to the State Convention of 1860, which will give force to their expressions of preference.

In addition to these counties, resolutions in favor of Gen. Cameron for President have been adopted in conventions or county meetings in Blair, Bedford, Huntingdon, Cambria, Clearfield, York, Dauphin, Snyder, Clinton, Lycoming, Montour and Westmoreland; and in other counties, such as Crawford, Erie, Indiana, Schuylkill, Luzerne, and the mining counties generally, such indications of preference have been given as to leave no doubt that the prevailing sentiment there is the same as in those we have before named.

These counties embrace a very large portion of the State. There can be no doubt that Gen. CAMERON is the preference of the united opposition in all the central and mountain counties, and throughout the mining region; while in the western and extreme eastern counties, all the expressions yet made are in his favor. Many counties have yet to hold their nominating conventions; and the current has been setting so steadily in the General's favor, during the last two weeks, that it is but reasonable to anticipate a general adoption of such resolutions as we have quoted.

There are, of course, many excellent opponents of the administration who have other preferences, and as the time for selecting a Presidential candidate draws near, these preferences will crystallize and assume a tangible shape; but the evidence of the popularity of Gen. CAMERON are now clear and numerous enough to enforce the conviction, both inside the State and out of it, that the delegation from Pennsylvania to the National Convention will be almost, if not altogether, a unit in his favor.

It is too soon, of course, to be arranging the Presidential programme, and we have no aims in that direction; our purpose is simply to group together the developements already made in this State, and direct attention to their significance.

BEDFORD COUNTY.—At a meeting of the opposition in Bedford county, held last week, the following resolution was unanimously adopted:

*Resolved*, That the ability, zeal and fidelity to the interests of Pennsylvania which have marked the course of our Senator in Congress, the Hon. Simon Cameron, justly entitle him to the confidence of his fellow citizens. Throughout his entire public career he has approved himself a sound, able and eminently practical statesman. We therefore cordially unite with our sister counties of the State, in expressing a decided preference for the Hon. Simon Cameron as our next nominee for President of the United States.

THE New York *Times* gives an account of the discovery of the dead body of a negro in the hold of a schooner recently arrived at that port from North Carolina. He was a slave, who had concealed himself there, hoping to escape into a land of freedom. How he must have loved Slavery, thus to risk suffocation and death rather than endure it an hour longer!

IMPORTANT DECISION IN VIRGINIA.—The Court of Appeals have unanimously affirmed the judgment of the Circuit Court in this county in the case of "Sanger vs. the Central Railroad Company." At the November term, 1856, of the Circuit Court of Augusta, Jacob Sanger recovered a verdict for $6,000 damages for injuries received by the plaintiff whilst a passenger on the cars of the defendant. The cars were thrown off the track by a large stone left lying near the rail, by the carelessness of some hands in the employment of the contractors who were "ballasting" the road, and the plaintiff had his leg broken. At the trial the company contended that they were not responsible for the acts of the hands in the employment of their contractors. The judge (Thompson) held that they were, and on this point the case went up. This is the first case in Virginia settling the extent of the liability of railroad companies as passenger carriers, and it holds them up to the most rigorous responsibility. The judgment amounts to over $7,000 at this time, exclusive of counsel fees paid by the company.—*Staunton Spectator.*

SAD OCCURRENCE.—*Three Persons Drowned near Wellsburg.*—On Friday, two young ladies, Miss Worthington and Miss Beall, started from the Ohio side of the river to attend a Campmeeting at Castleman's Run; when near Wellsburg they hailed a man to take them across the river to the Virginia side. Mr. Chamberlain, the gentleman whom they requested to take them over, started with a skiff. The young ladies stepped in, and when near the center of the river the skiff, being a worn out affair, filled with water and sunk, consigning the three to a watery grave. This melancholy occurrence has cast an universal gloom over the neighborhood where they resided. The bodies were recovered about four hours after the occurrence.

THE NINE HOURS' MOVEMENT.—Nothing has occurred within the last 24 hours in any way to alter the position in which the master builders of the metropolis and their former workmen stand to each other. The men, on their side, are hopeful and resolute, and many of them avow themselves ready to endure temporary privations in the hope that they may thus obtain what they look upon as a permanent advantage and as a right. There are cases, however, where enforced idleness, with its concomitant of want, begins to make itself felt; and, strong as is the sentiment against the declaration, no doubt there are many who would gladly resume work if they had the opportunity of doing so. The laborers especially—not usually a very provident class—begin to complain not only of the irksomeness of idleness, but of more pressing wants; and it is no uncommon thing to hear, as one passes a group at the corner of the street, such expressions as —"Well, I'm tired of kicking my heels about in this way—how long is it to last, I wonder?" or, "Well, I can't stand this much longer," and the like. Whoever is to blame, it is a painful thing to see thousands of hard-working men, most of them with wives and families, reduced to such a state; and great sympathy is expressed on all hands with those non society men who for no fault of their own are thus suddenly deprived of their means of subsistence.

But if the men are resolute and hopeful, the masters are reported to be firm and united. The marvel, indeed, is said to be that they are so unanimous, and the only explanation is that it is the "common cause" which binds them together. As stated yesterday, no defection of importance from their body can be traced by the Central Association, and it is alleged that there is not a single building work employing 50 men in and round the metropolis. The assurances received from the leading architects of London as to granting time in all cases are said to be most satisfactory, and letters have been received by the Central Association from as many as 50 London architects upon the subject. So far as has come to the knowledge of the Secretary of that body, there are only three or four instances of a purely private nature in which individuals under pressing circumstances are insisting on their works being completed within the time specified in the contract. If this be so, the larger builders have not so much to fear, perhaps, from the continuance of the lock-out as might be anticipated; but it might not be amiss for them to consider what effect the withdrawal of the counterfoil would be likely to have.—*London Times.*

A LOST CHILD PERISHING IN THE WOODS.—About a fortnight ago a bright little girl, six years of age, daughter of Mr. and Mrs. King, living about four miles from Kalida, Putnam county, in this State went with her mother to visit a neighbor, and while there accompanied the neighbor's children to carry water to the father, working in a field. On the way some childish quarrel occurred between them, and their little visiter, vexed and grieved, started to return to the house, which was in view. Probably reflecting more upon the wound which her feelings had received than of the path which she was following, she strayed away into the woods and was lost. The other children returned in due season, but Mrs. King was only surprised that her child was not with them. Search was immediately commenced, but when night came and the little one was not found the anxiety of the mother became terrible. For nine days the search was continued amid the utmost excitement, and without cessation, during which time the soul-harrowing suspense of the parents, and especially the mother, was indescribable, and she would neither rest nor refresh herself. On the tenth day the little one was found, lying over two logs—where it had fallen, too weak to proceed, within two miles of the spot where it was last seen—dead. It had removed all its clothing, and when found was quite naked, its bonnet hanging on a limb, and its dress lying in a little play-house which she had built a while away the lonely hours. It had died within a few hours of the time at which it was found. The spot had frequently been passed, but the most of the search had been extended too far. When the dead body of the child was taken into the presence of the mother, it had the hope which had sustained her throughout the search was gone; her reason tottered and she became insane.—*Columbus (O.) Statesman.*

NEW RAILROAD ROUTE TO THE WEST.—Another railroad line from East to West, through the interior of Pennsylvania, is about to be opened. The New York Tribune says that it has undoubted information that Mr. Cullen, the President of the Reading Railroad Company, has consented to enter into an arrangement by which in a few days, through passenger and freight trains will be running over his Lebanon Valley Branch, and East Pennsylvania Railroad, from Jersey city and Elizabethport to all points in the West and Southwest. This is a new route and certainly a very important one to New York. The Tribune adds:

It is 145 miles nearer to Cincinnati and St. Louis by this route than by either the New York Central or Erie, and 276 nearer to Cleveland and Chicago, and points west thereof. Over it passengers may be taken to the far west without change of cars, and freight can be loaded up in the cars at Jersey City or Elizabethport, and landed at Cincinnati, St. Louis, Cleveland, Chicago and Iowa City without break of bulk or transhipment. As this new route will be open in a few days for through business, we shall very soon see what effect it will have upon our two great New York lines, the Central and Erie. In winter, when these more northern routes are more or less blocked up, as they often are, this new line, (like the Baltimore and Ohio road,) will be clear from such obstructions. As Mr. Cullen has consented to make the desired arrangements, we presume no more will be heard of the Allentown and Auburn road as a rival line to the Lebanon Valley branch of the Reading road, for the through business, and for the coal trade of the main road.

ANOTHER AURORA.—Between 12 and 1 o'clock this morning the heavens were illuminated with a display which was in no respect inferior to the magnificent phenomenon of Sunday night. In the north, northeast, and northwest, at first, there was a light like that of the full moon, and showing everything in the streets as plainly.

This light seemed to come in waves, differing in magnitude, velocity, and color. At some moments the sky was as dark as it is commonly on Sunday. At 1½ o'clock the strange light shone from all points of the compass, and the deep crimson cloud floated in the south as well as in north, and the magnetic beams radiated from the zenith, and every moment was unlike the last. A chilly wind was blowing from the north.

We learn from our exchanges that the Aurora of Sunday night extended as far south as Alexandria and Washington, but not to Richmond. We hear of frost on that night in Michigan and Illinois, as well as in the Eastern States.—*N. Y. Trib.*

LAWRENCE, KANSAS, Aug. 25.—Trouble is apprehended in Southern Kansas, especially in Linn county, with the Missourians. One of Montgomery's men, named Wright, *alias* Pickles, was kidnapped from Kansas, taken over the line into Missouri for trial, on an indictment presented by a grand jury, for an old offence.

The people claim that the Amnesty Act, passed by our last Legislature, for past offences, released Pickles, and Montgomery is rallying his forces to demand his immediate and unconditional release or he will march over and rescue him from the custody of the Missouri authorities.

Some young men who are members of Montgomery's company, suddenly left this city a short time, and it is supposed that their old chief sounded the tocsin of war, and they have gone to his assistance.

THE LUMBER BUSINESS IN MAINE.—Lumbering, it is believed, will not be prosecuted as extensively in Maine the coming winter as in previous years, owing to the high rate of "stumpage" charged by the proprietors of timber lands. Stumpage is the tax charged to operators upon the amount of timber cut and in Maine is regulated by the market price of lumber; at St. John, N. B. it is now $3 per ton for timber, and $5 to $6 per M for logs. For some years it has been slowly advancing, until it has become so high as to render lumbering a more hazardous and less profitable business than ever, and many who have operated largely in Maine for years past, are now prospecting in the forests of New Brunswick, where the rates are far less onerous, though the timber is not as good as in Maine, and the facilities for driving logs less ample.

USE OF CHLOROFORM IN EUROPE.—It is officially reported to the Emperor of the French that chloroform was used in 50,000 surgical operations in the Crimea by skilled assistant surgeons without a single death; a similar success has followed its administration at Solferino, and Magenta; but in English hospitals there have been about 100 deaths in one-third of this number of operations in the Crimea. The London deaths from chloroform begin to be so common that coroner's inquests are rarely called for. Everything depends on the mode of administration.

AN INFANT FOUND.—On Saturday last a living infant was found in the stable of G. P. Reed, Esq., of this town. When found, it was carefully wrapped up in an old coat which had been in the stable for some time, and the precious bundle deposited under a barrel, where the child would have died, had not its cries been heard by a member of the Squire's household who happened to be in the stable, at the time. Mrs. Earl has taken charge of it and intends raising it. It will be well cared for.—*Ind. Independent.*

DICKENS DOES NOT REVISIT THE UNITED STATES.—A letter from London informs us that Mr. T. C. Evans, of New York, who recently went to London to persuade Mr. Dickens to revisit this country on a reading tour, and who offered him most magnificent terms, has *not* succeeded. Mr. Dickens, it appears, cannot afford, at any price, to leave England (and "All the Year Round") for the time which his voyages and tour would occupy.

UNION COUNTY.—The Republican ticket in this county is as follows:—Prothonotary, John Bigler; Commissioner, Samuel Marshall; Treasurer, Robert H. Laird; District Attorney, John B. Linn, Esq.; Surveyor, Conrad Sheckler; Auditor, Samuel C. Wilt.

In the representative district composed of Union, Snyder and Juniata, the Republican nominees are Thomas Hayes and W. F. Wagonseller.

The Republicans of Northumberland have nominated the following ticket:—Assembly, Amos T. Bissel; Commissioner, A. Blosser; Treasurer, Jacob Rohrback, District Attorney, Sol. R. Boyer; Coroner, Dr. W. H. Goddard; Auditor, Jacob R. Clark.

TIOGA.—The Republican ticket in Tioga is as follows:

Senator, Stephen F. Wilson; Assembly, L. P. Williston, Lewis Mann; Treasurer, James S. Watrous; Commissioner, Amos Bixy; District Attorney, Henry Allen; Auditor, C. F. Vail; Surveyor, E. P. Deane; Coroner, Joel Rose.

CARBON COUNTY.—The Republicans of Carbon county have nominated Gen. A. J. Wintersteen for Assembly.

In the district composed of the counties of McKean, Elk, Jefferson and Clearfield, Dr. T. J. Boyer, of ....., county, and A. M. Benton, of Tyrean, have been nominated as the Democratic candidates for Assembly.

THE Charleston Mercury publishes the following letter from a Southerner in Kansas, remarking that it points in the right direction:

PAOLA, K. T., August 15, 1859.—I take the liberty of writing you a few lines on a subject of interest to the South. It is pretty well conceded that Kansas will be a Free Soil, Black Republican State beyond question. The South has not done anything since '56, except to allow our Constitution to be rejected. We have about 2,700 Southern men in Kansas still, and they intend emigrating South as soon as Kansas is admitted into the Union. We are connected with a Southern organization, and, including all, we have about 17,000 men. The next theatre for action will be the Indian territory south of Kansas, including Cherokee, Creek, and Choctaw nations. The South should prepare for this in time, and stand by her territorial rights.

ANOTHER TOUR.—Jenny Lind (Madame Goldschmidt) has determined to exercise her voice again for the benefit of Mankind. Letters from London say that she is about to resume concert-singing, and to take a tour in Ireland accompanied by Herr Joachin.

A MODERN satirist speaks of Jupiter's wife as the "rusty Juno." The Boston *Gazette* says "the puns unconsciously, as rust is the oxide of iron, and we always heard the lady spoken of as "the ox-eyed wife of Jove."

THE Turin correspondent of the London Post states that sixty Hungarians, who escaped from the Austrian army, were retaken, placed before a battery, fired upon with grape, and all killed but two.

SUMMER COMPLAINT.—The fact is now too well established for any one to attempt to controvert it, that most of the diseases which often prove fatal in summer, are produced by excessive use of fruits and vegetables, by which the stomach is disordered, the liver deranged, the blood stagnated, and digestive organs, rendered inactive if not torpid. Cholera, Cholera Morbus, Bilious and Cramp Chole, Dysentery, Diarrhœa and such like complaints generally follow. The improved and popular remedy has become so deep seated and fixed upon the constitution, that the strongest and most active mineral medicines are unable to arrest their progress until the patient is prostrate, and all hopes of relief are ended. Who is it that has not seen a fine, healthy infant or adult, seized with one of the annoying disease above spoken of, and despite the skill and science of medical gentlemen literally waste away under their treatment? And how little treatment to be relied on? Simply by the fact, that instead of administering some remedy to stay the falling strength of the afflicted, and at the same time check the disease in its progress, the remedy prescribed aided in the exhaustion of the natural strength, and at the time the disease was mastered the sufferer was prostrate, and failing to excite a reaction the patient died from the effect of the poison administered to uproot the disease. Not so with BERRIAN'S HOLLAND BITTERS, which are compounded entirely of vegetable matter, and which have not only proved themselves the best tonic in use, but have never failed to correct disorders of the stomach and bowels when taken according to directions. In the cure of Summer Complaints they have no equal. Try them at once.

BAD COMPLAINT.—The Geminshaw Family concerning Roe's Holland Bitters is put up in half pint bottles only, and retailed at $1 per bottle. The great demand for this truly Celebrated Medicine has induced many imitations, which the public should guard against purchasing. Beware of impositions! See that our name is on the label of every bottle you buy.

BENJAMIN PAGE, JR., & CO., Sole Proprietors, 27 Wood street, between 1st and 2d sts., Pittsburgh, Pa.

aug3.dawF

NEURALGIA.—This painful and common disease, which physicians do not appear fully to understand, will be greatly relieved, and in most instances a permanent cure may be effected by the use of WILSON'S PILLS, which regulate the stomach and bowels, and produce a soothing effect upon the nerves which cause the pain.

Prepared and sold by B. L. FAHNESTOCK & CO., Wholesale Druggists, and proprietors of B. L. Fahnestock's Vermifuge, No. 60, corner of Wood and 4th streets, Pittsburgh, Pa. au30.d&wT

TO CAPITALISTS.

Valuable Iron Works in Missouri FOR SALE.

THE PROPERTY KNOWN AS "THE MARAMEC" or "MASSETS IRON WORKS," situated in Phelps county, in the State of Missouri, being five miles from Jamestown Station on the Southwest Branch of the Pacific Railroad, 104 miles from the city of St. Louis—belonging to the estate of Thomas James, deceased, is offered at private sale, for the purpose of settling said estate.

This property consists of some ten thousand acres of land, abounding in inexhaustible banks of the best class of Specular Ore, was located by experienced parties at an early day, and possesses superior advantages of soil and timber.

For the Manufacture of Iron it is unsurpassed. The Ore Bank is only one third of a mile distant from the Furnace, and can be mined and hauled at a cost not exceeding sixty cents per ton, which yields sixty-six per cent of metal in the furnace.

The Works, embracing the Furnaces, Forges, Flouring Mills, &c., are driven by a magnificent never-failing Spring—the principal head and chief source of the Maramec—which supplies, upon a twelve foot fall, ample power at all seasons of the year; is neither affected by drought, freezing or high water, and is unsurpassed for beauty and in the convenience and economy with which the power is permanently secured. The works are now and have been for several years in successful operation, the furnace making twelve tons of No. 1 Cold Blast Pig Iron every twenty four hours.

The Furnace Stack and Blowing Cylinders, &c., are new and of the most approved plan and construction. The buildings are complete in every particular, and of sufficient capacity for all purposes.

Parties wishing to purchase are invited to apply in person or by letter, to WILLIAM or ANVIL JAMES, at Maramec Iron Works, Missouri, or to Col. WM. K. BOND, at Cincinnati, Ohio, and every facility will be offered for a personal examination of the property, or a more specific description sent by mail, if desired. au23:d2m:2taw

PENNSYLVANIA
State Agricultural Society.

EXHIBITION.—The Ninth Annual Exhibition of the Pennsylvania State Agricultural Society will be held at Powelton, Philadelphia, on Tuesday, Wednesday, Thursday and Friday, the 27th, 28th, 29th and 30th days of September next. CHICKERING & SONS'
NEW SCALE
PIANO FORTES.

THE subscriber has now on hand a most splendid stock of Pianos, consisting of 6½ and 7 Octaves, in Plain and Carved Cases of the most elegant description, from the celebrated Factory of Chickering & Sons. The instruments are all provided with their latest improvements, as *Repeating-Action, Double-Dampers, Pile-Hammers*, and are of their

ENLARGED NEW SCALE,

By which a much larger sound board is obtained, consequently the tone is rendered very powerful, yet retaining its sweet and musical quality. By the perfection of the Action, the performer is enabled to produce all grades of tone from *pianissimo* to *fortissimo*, with the greatest ease.

CHICKERING & SONS' PIANOS are thus spoken of by the best artists and critics in our country:—

THALBERG says—"They are beyond comparison *the best* I have ever seen in the United States, and will compare favorably with any I have ever known."

GUSTAV SATTER says—"The opinion which I expressed three years ago, has been more than confirmed to me, by the continued use of them, viz: That for volume and pure quality of tone, with nicety of articulation, they are unequalled."

[From the National Intelligancer, Washington]

"They can safely bear comparison with instruments from any part of the world, in point of, tone, strength and elasticity of touch.

[From the New Orleans Picayune]

"For excellence of material, elegance of finish, and faithfulness of workmanship, and above all for volume and variety, mellow sweetness, brilliancy and permanence of tone, they are unequalled."

[From the Family Journal]

"The peculiar musical qualities belonging to the Chickering instruments, are a full, musical, rich and powerful tone, free from any wooden, colay tendency of sound, so disagreeable to the sensitive musical ear. They have also an easy, even and pleasant touch, and will keep in tune better than any Pianos known."

The public are invited to call and examine these splendid instruments, which are sold at

FACTORY PRICES AND WARRANTED.
