Valuable Iron Works in Missouri FOR SALE.

THE PROPERTY KNOWN AS THE MARAMEC or "MASSEY'S IRON WORKS," situated in Phelps county, in the State of Missouri, being one mile from Jamesrown Station on the Southwest Branch of the Pacific Railroad, 115 miles from the city of St. Louis, belonging to the estate of Thomas James, deceased, is offered at private sale, for the purpose of settling said estate.

This property consists of an ample thousand acres of land, abounding in inexhaustible banks of the best ore of specular iron, was located by experienced parties at an early date, and possesses superior advantages of wood and timber.

For the Manufacture of Iron it is unsurpassed. The Ore Bank is only one third of a mile distant from the Furnace, and can be mined and hauled at a cost not exceeding sixty cents per ton, which yields sixty six per cent of metal in the furnace.

The Works, embracing the Furnaces, Forges, Flowing Mill, &c., are driven by a magnificent never failing Spring—the principal head and chief source of the Maramec River—which supplies, upon a twelve foot fall, ample power at all seasons of the year; is neither affected by drought, freezing or high water, and is unsurpassed for beauty and the excellence and economy with which the power is permanently secured. The works are now and have been for several years in successful operation, the furnace making twelve tons of No. 1 Gold Blast Pig Iron every twenty four hours. The Furnace Stack and Blowing Cylinders, &c., are new and of the most approved plan and construction. The buildings are complete in every particular, and of sufficient capacity for all purposes.

Parties wishing to purchase are invited to apply in person or by letter, to WILLIAM or ANVIL JAMES, at Maramec Iron Works, Missouri, or to Col. WM. K. BOND, at Cincinnati, Ohio, and every facility will be offered for a personal examination of the property, or a more specific description sent by mail, if desired. aug30dtm6tsw

NEW AGRICULTURAL SETTLEMENT, TO ALL WANTING FARMS.

A Rare opportunity in a delightful and healthy climate, twenty-five miles south-east of Philadelphia, on the Camden and Atlantic R. R., New Jersey.

AN old estate consisting of several thousand acres of productive land has been divided into Farms of from one to one hundred acres, and is now offered for sale. Have adopted, from various parts of the middle states and New England have settled there in the past year, its beautiful place, and raised a crop of corn, the product of which averaged one ear of from eight to ten inches in length, and sufficient for the production of a barrel of flour. Also, Grapes and Vegetables. IT IS CONCEDED THE BEST FRUIT SOIL IN THE UNION. The place is perfectly secure from frost—the extreme range of the thermometer Crops of grain, grass and fruit are now growing and can be seen. By examining the place itself, a correct judgment can be formed of the advantages offered. No land. The terms are made easy to secure the rapid improvement. Time land, with the only aid for actual improvements. The result has been, that within the past year, about thirty families have been erected, two mills, one steam, four stores, one fruit vineyard and a church or chapel, and a large number of other improvements, making it a desirable and active place of business.

THE MARKET
is the reader may perceive from the advertisement, is the BEST IN THE UNION.

Produce bringing double the price in Philadelphia to what it does from the city, will more than double the price than in the West. It is known that the earliest and latest fruits and vegetables in this latitude come from New Jersey, and are annually exported to the eighbor of Philadelphia.

In locating here, the settler has the advantage of living within a few hours ride of the great cities of New York and Middle States, he is near the old churches and schools, he is in a settled country, possessing every thing that comfort and civilization is all about. He can buy every article he wants at the cheapest rate, and sell his produce for the highest, on the West this is reversed, he has to go far for his clothing, drink, medicine, and will enjoy a more free and delightful climate, where fevers are almost unknown. The result of the change upon those from the north has generally seen to restore them to an excellent state of health.

In the way of building and improving, lumber can be placed at the door of any of the 250 parts of the assortment, bricks from the brick yard open at all the place, lime and tile can be procured in the place, good carpenters are at hand, and others are joining in the place where buildings and improvements can be made cheaper.

The reader will at once be struck with the advantages presented, and as he intends to buy the property he will have taken up before. The reason is, it was never thrown in the market, and unless these statements were correct, he would be invited to examine the land before purchasing. These are expected to do. They will see land under cultivation, and in the district of the settlement that they will no doubt, meet persons from their own neighborhood, they will witness the improvements and can judge the character of the population. If they come with a view to these cases should come prepared to stay a day or two and be ready for purchase, as location cannot be held on refusal.

There are two daily trains to Philadelphia, and to all such that who improve, the Railroad Company grant a free Ticket for one month, and half price thereafter.
