COURT OF QUARTER SESSIONS—Before Judges McClure and Parke.

Saturday, July 7.—An application was made for the release, on bail, of Samuel Dawson, now in jail and awaiting his trial for riot, by his counsel, Mr. Foster, who stated that the defendant's mother owned some land, and was anxious to give it as security and have her son released. On ascertaining that the property was situated in Mercer county, the Court refused the application until some other person would give the required security in this county. The defendant, it will be remembered, was one of the principal actors in the riot that occurred not long since in a tavern in Allegheny, in which Signor McElfresch was shot by officer Jamison, of the Allegheny police, for resisting officers in the discharge of their duty.

Sentenced.—John Linegroover, who was convicted some time since of selling liquor on Sunday and to minors, and recommended to the mercy of the Court by the jury, was sentenced to pay a fine of $15, the costs of prosecution and undergo an imprisonment in the county jail for 10 days.

John Rouser and Wm. Hinkle, a blind man, who were found guilty of obtaining money under false pretences, by selling another man's dog to Geo. Obar, of Allegheny, and recommended by the jury to the mercy of the Court, were each sentenced to pay a fine of 6¼ cents, the costs of prosecution, and undergo an imprisonment in the county jail for 15 days.

Walter Williams and William Earle, the parties who were tried about ten days ago and convicted of selling lottery tickets, were brought into court and arraigned for sentence. Mr. Swartzwelder made an appeal for mercy in the case of Earle, and read a clause in the penal code which provided that when the punishment was imprisonment for less than a year that the court might either send the prisoner to the jail or penitentiary. Mr. S. also alluded to the testimony in regard to Earle's character, all saying that before this affair they had never heard anything against him, but on the contrary, he was always spoken of as being an honest and well behaved man. In regard to his connection with the lottery business, it had been effectually proved that he was merely engaged there as a clerk, and received a mere pittance, some $3 or $4 a week, and that it was the only thing that he could get to do. The court, in answer to this, said that it was all very true, and that nothing in his whole trial had shown that Earle had ever been anything else than a good character. In regard to Williams, Judge McClure said, he, with several others, had been indicted over a year ago for the same offence, the others were convicted and sent to the penitentiary, but Williams' physician gave a certificate to the court at the time which went on to say that if the defendant was tried then in his bad state of health it might result fatally. Owing to this the trial had been postponed from time to time, and at length up came this last indictment, which developed a contempt for the laws that must be punished. In conclusion, Judge McClure gave the prisoners their sentence, which was in Earle's case six months in jail, and one year in the penitentiary for Williams.

Forgeries.—Frederick Hanlemann, a German, who was convicted week before last, of forging the name of a brewer in Birmingham, named John Shaffer, on a note for $45, and afterwards selling the note to Mr. Beilsteine, of Allegheny, for $40, was sentenced to one year in the penitentiary.

Edward H. Myer, a German, who was convicted for forging a certificate of deposit on the Bank of Pittsburgh, and trying to sell it, but was unsuccessful, was sentenced to one year in the penitentiary.

Will be Pardoned.—Judge McClure read a letter on Saturday, in the Criminal Court, which had been received by Col. Small, the County Jailor, from Wm. A. Heister, Secretary of State, in answer to an application that had been made to the Governor, for the pardon of James Brady, who, together with John Scott alias "Scotty," was convicted some three weeks since in the Court of Quarter Sessions, of highway robbery. It will be remembered they got a stranger, a Kentuckian, drunk, and led him down to the levee, where they relieved him of two watches, but were seen, and afterwards captured by the police. The prisoner was brought in to hear the contents of the letter, but was so weak that it required two men, to support him. When he entered the Court room an involuntary shudder of horror ran through the spectators at his death-like appearance, looking more like a corpse than a living man. He listened with no perceptible emotion to the Judge while he was reading the letter, which went on to say that the prisoner could not be pardoned, until he was sentenced, and that when he was, the Governor would exercise his power of mercy and pardon him. After he was through Judge McClure, in accordance with the spirit of the letter, proceeded to pronounce the sentence, which was to pay a fine of 6¼ cents, costs of prosecution and undergo an imprisonment in the Western Penitentiary for one year.

THE REGATTA ON SATURDAY.—A multitude of people—probably six thousand—assembled on the levee, Monongahela Suspension Bridge, steamboats, &c., Saturday, to witness the first regatta of the Allegheny County Regatta Association. The windows of all the warehouses along Water street, and the balconies of the Monongahela House were crowded with handsome and gaily dressed ladies, who seemed as much excited as any person in the whole of the vast crowd that were looking on. At precisely 4 o'clock the judges (Dr. Dilworth and Capt. Batchelor) took their stations, and the signal to open the ball, or rather the regatta, was given. The sculling match between the Undine Club's boat "Presque Isle," sculled by Joseph Bash, and the Crescent Club's boat "Wasp," sculled by A. Alman, commenced. The Cassiday's new boat having been withdrawn the day before, on account of not finding a man capable of working her, there was but two competitors for the first prize—$25.

The "Presque Isle" came in first, her time being 29:55, but the race has not yet been decided, as it is alleged she did not turn the buoy at the lower end of the course. Both boats reached the buoy in 7½ minutes, which was very fast time, as it was one mile and a half distant from the starting point. The second race came off at 5½ for $33, and was won by the Crescent Club's boat "Highland Maid," in 22½ minutes. The third and last race, (being the four oared amateur race, for $75. There were four entries.) was won by the Jackson Club's boat, "Calvin Adams," in 22:33, being closely followed by the "Princess," "Maid of Erin," and "Xanthe." The whole affair was a decided success, and every one seemed delighted with the fun.

LIVES AND SPEECHES OF LINCOLN AND HAMLIN.—Hunt and Miner have received a book bearing the above title, which has just been issued by Follett, Fisher & Co., of Columbus, Ohio. Wm. D. Howells and J. L. Hayes are the joint authors. It embraces 406 pages, and is illustrated with three steel engravings. Of this work the Cincinnati *Commercial* says:

"This book is a far more interesting and entertaining one that we ever believed it possible to make it. Not that Mr. Lincoln's life has been any more obscure or destitute of the elements of interest than most of our public men; but we have seldom found, even in the biographies of the most famous politicians of our country, unless exceedingly well written, anything to reward perusal. Such records are usually written by extravagant friends and admirers, or for mainly partisan ends; and they are greatly wanting, not only in impartiality of judgment, but also in discrimination and good taste.

From these blemishes we are glad to observe that the work of Mr. Howells is almost wholly exempt. He has skillfully maintained a just medium between extravagance on the one side, and tame and lifeless narrative on the other. Mr. Howells is a poet, but he has not attempted to play the romantic as a biographer. Yet there is just enough of the fine taste and discriminating insight which belongs to the poetic temperament, to tinge his performance with that nameless charm of style which will make it interesting to the literary reader, while it has all the simplicity and vigor which commend it to the popular multitude.

IMPORTANT IMPROVEMENT IN STEAM BOILERS.—It has often been observed that little or no improvement has been made in the use of steam since the era of its great introducer, Watt, in whose time the old atmospheric engine was supplanted. As far as regards this matter the world of improvement has been padding along at the same gait for a century, and the progressive spirit of the times seems to have been directed more towards every other subject of enterprise than it. We have, however, to announce this morning a most admirable improvement in the construction of boilers, which may contribute somewhat towards exonerating the present generation from the reflections implied in the preceding remarks. Messrs. Vaile & King, of Dayton, Ohio, have secured a patent for an entirely new description of boiler, which they claim combines cheapness, strength, durability, economy of fuel and generative power to an extent far exceeding the old style cylinder-boilers. It is of a square instead of round shape, not only on the external but the internal surface. Instead of consisting of long flues, fifteen feet in length, requiring the strongest draught to keep the extremity of the boiler farthest from the fire heated, it contains short, square, broad flues, to the farthest extremity of which the fire will penetrate without any more draught than that of a common chimney. It presents fully twice as much surface to the fire as the cylinder boiler, and the distances between the flues at every point are small and uniform, which, with the great exposure of surface, greatly enhances the power to generate steam. We attempt the following description of it:

Suppose six iron boxes to be made 4 feet long, 2 feet wide and 2 inches thick, and these to be joined together at one end by bands of iron round the outer edges of the one extremity, at an interval of two inches between each. Set the boxes upright, make a place for the fire underneath and build a wall round the four sides, closing in the spaces between the boxes. On the top place a steam chest similar to that used on locomotives. You would then have a complete boiler, so far as regards the principles involved in the improvement. The water would be received into the iron boxes and the fire into the spaces between them. And as it is intended that the former should be kept constantly filled with water, not partly full as in the cylinder boilers, the steam chest is provided for the reception of the steam that may be generated.—The boiler would be exactly two feet square and four feet long. The steam drum or chest would be three feet long and eighteen inches in diameter. If made of 3-16 iron, the whole, with the rivets, would weigh 1200 lbs. One hundred and twenty square feet of surface would be exposed to the fire, and steam enough would be generated to run an engine of twelve horse power. A cylinder boiler of the same weight would be 30 inches in diameter and 14 feet long. Its fire surface would be only *fifty-three* square feet, and its capacity would be only *five and one third* horse power. These calculations are correct and exhibit the merits of the new boiler with mathematical accuracy. It will be manifest that the old cylinder boiler of the same weight would possess less than half as much fire surface, less than half the capacity and occupy about six times as much room.

There are other advantages resulting from this simple contrivance. To heat long boilers, one end of the flues must be kept at nearly a white heat, in order that the other extremity of the boiler may not be a condenser instead of a generator. The firemen are constantly plying the furnace with fuel and raking out the cinders, in order to maintain the desired head of steam. The intervals between the flues, too, in the cylinder boiler are generally 5 or 6 inches through the thickest part, while in the patent of Vaile & King it is uniform and only 2 inches through. These two improvements give the one boiler an immense advantage over the other in the consumption of fuel. Two hours are generally necessary to raise steam in the one, while the same thing can be done in the other in fifteen minutes.

Before the invention was matured, it occurred to one of the patentees that they would be unable to control the steam, it would be made so fast. A very simple provision was, however, discovered to remove this difficulty so satisfactorily as to be an improvement on the cylinder boiler. A pipe with a stop cock was introduced into one of the flues, so as to admit a jet of cold air, and it was found the steam guage was very sensibly affected the moment the access of the cold air was allowed: also that the pressure could be reduced to any amount it might be desired to use, and kept within five pounds of it.

By conducting the water pipes supplying the boilers through one of the flues, it was found to obviate the necessity of a heater. The water is thereby raised to 212 degrees—the steam point—before it enters the boiler. This saves considerable expense in the building of the engine, and economizes heat. It also contributes to the safety of the boiler. The injury done by admitting cold water on heated iron is apparent to every one. But while the iron is cracked, hydrogen gas, which possesses tremendous expansive power, is generated, and in this way most of the explosions that occur are caused.

While exposing more surface to the fire, the plates to be riveted together will not be near so large. On each one the pressure at one hundred pounds to the square inch, will be 3,600 lbs. On the plates of a cylinder boiler the pressure is 18,000 lbs. at a head of one hundred pounds to the square inch. The *edges* will not be riveted, but dove-tailed. This is a new mode of fastening the plates originated by these inventors, and is stronger and cheaper than riveting.

Every engineer knows the advantage of working hot steam, over the tardy, sluggish operation of cold steam. In Messrs. Vaile & King's boiler the steam drum is surrounded by the smoke stack, which preserves a high temperature and prevents the steam from cooling.

The cleansing of a cylinder boiler is a tedious and laborious operation. The square boiler we have been describing is cleaned by means of a stop cock attached to each water box. The power of the steam forces the water through the apertures at the end, and all the sediment that may have collected there is removed more thoroughly than it could be done in any other way. There are no rivets on the edges, which is one advantage of the dovetailing, to clog the sediment.

The foregoing enumeration contains an imperfect account of most of the improvements introduced in this new style of boilers. They have been tried and work well, and we cannot go far wrong in conjecturing that they will in a great measure supplant the cylinder boiler as soon as their operation is properly understood. One is now being constructed at the instance of Mr. King, who is at the St. Nicholas Hotel, and will remain there during this week. It will probably be put up in a few days and then those who desire can see its merits practically tested. We shall give the result of the trial as soon as it has been made.

ANOTHER HURRICANE.—On the evening of the 4th inst., our county was visited by another destructive hurricane. We learn that all the houses in the village of Roseville, four miles west of this place, were unroofed. The house of Mr. Roseville is almost destroyed, and some of the family hurt. Several barns have been unroofed and torn down. The brick house of Mr. Hughes, three miles west of this place, was moved from the foundation, and his barn unroofed. The direction of the storm was from north-west to south-east, and passed about one and a half miles south of this place.

Later.—We have been informed that the house and barn of Mr. Lamb, north of Corsica, were blown down, and a Mr. Galley severely hurt. We hear of several persons being injured, more or less, but none fatally. We will give further particulars next week.—*Brookville (Jefferson Co.) Star.*

Notice to Builders and Contractors.

THE UNDERSIGNED [formerly Foreman for ROWLAND PARRY,] would respectfully inform those for whom he has done work, and the public generally, that he is now prepared to furnish SLATE, of different colors, (green, blue and purple,) or put on SLATE ROOFS in the most approved manner. Orders for Roofing or Repairing of Slate Roofs (if left at the office of ALEX. LAUGHLIN, near the Water Works,) will be promptly attended to. my12-6md THOMAS PARRY.

PROPOSALS will be received by the Committee on Monongahela Wharf, until TUESDAY, July 17th, 1860, for grading and paving about 1200 square yards of said wharf, extending westwardly from the mouth of Ferry street. Proposals to state the price per cubic yard for grading, and per superficial yard for paving, payable in cash upon completion of the work to the satisfaction of the Committee. Proposals can be left with S. MORROW, Chairman, No. 5 Market street, Pittsburgh. jy9:td

THE LATEST NEWS.

BY TELEGRAPH.

RECEIVED AT THE DAILY GAZETTE OFFICE.

Latest from California.

FAYETTEVILLE, ARK., July 8.—The Overland Mail coach, with San Francisco dates to June 18th, arrived here at 9 o'clock this morning. We subjoin the following summary of news:

Information reached this city on the evening of the 16th that the election in Oregon has resulted in the success of Mr. Logan, the Republican candidate for Congress by 150 majority, and that the Legislature elect stands as follows in respect to the contest for U. S. Senators: Democrats in favor of Lane and Smith 16; Democrats elected by Republican and Anti-Lecompton fusion 21; Republicans elected by the same fusion 13. The intelligence comes from a Democratic source, the Jacksonville Democrat, which paper remarks that the Democracy have lost everything but honor. It is understood in California that the election of Col. Baker, Republican, and an Anti-Lecompton Democrat to the U. S. Senate in August, when the Oregon Legislature meets.

Preparations are making to re-establish the Pony Express on a permanent footing. W. Finney, who left Carson Valley to restock the route is expected to return with a favorable report as to the disposition and the means of protection provided, so that the express may start eastward on Friday, the 22d inst.

The Indians on the express route and in Western Utah generally, are intimidated on account of the recent demonstrations, but no confidence is put in their remaining peaceable. The warriors have only fled beyond reach till the volunteers leave the field and the inhabitants again are unprotected.

It is said that an application is to be made to the General Government authorising Col. Jack Hays to raise a regiment of volunteers to follow up and chastise the Indians until permanent peace is established.

The following is telegraphed to Visalia:

SAN FRANCISCO, June 19, via Visalia, 19, 10 p. m.—The old Attachment law is to be revived on the 28th. Business firms in stiff circumstances will be forced into liquidation by it. Scott, Vantine & Co., and Wm. Howley & Co., of Marysville, have already stopped, carrying down R. E. Bremstr, of San Francisco, who has failed. The liabilities of the latter house are upwards of $300,00. They have confessed judgment for $100,000, protecting various parties. In the next ten days every unsound house will go by the board.

The Pacific and Atlantic Telegraph line was completed to Visalia yesterday.

The steamer Pacific arrived last evening, with dates of Portland and Northern Oregon to the 13th, not so late as the telegraphic news received overland, but additional advices from remote counties.

The election returns are still incomplete, but matters look better for the Democracy than previously reported. The Jacksonville Sentinel, of the 16th, says the probabilities are in favor of the election of the democratic candidate for Congress by a small majority. All parties concede 28 to 30 Anti-Lecompton and Republican members of the Legislature against 18 to 20 regular Democrats, giving the control to the Opposition.

San Francisco, 19th, 11 o'clock p. m.—The steamer John L. Stephens sails to-morrow, taking about 320 passengers and $1,400,000 for New York and $14,000 for England.

WASHINGTON, July 7.—It has been formally decided to give Mr. Winston (Administration Democrat of N. C.,) the Mission to Sardinia. Judge Stanley, the District Attorney at Cincinnati, who remained in the Convention to which he was sent, and refused to follow Cushing and the rest of the Seceders, is to be removed to-morrow or Monday. Mr. Hill, who holds a similar District Attorneyship in North Carolina, and like Stanley, did not go out, shares also his fate.

The representatives of the Great Eastern held a conference here to-day with some merchants of Norfolk, who are eager to obtain a visit of the leviathan to that port.

The administration has determined to transport the California paper mail by revenue cutters, co-operating with the Panama Railroad Co. Secretary Cobb has offered to furnish the post office department with the revenue cutter Harriet Lane as one of these steamers. Another authority states that it is understood that arrangement were concluded yesterday between the Postmaster General and Com. Vanderbilt, whereby the mails are to be shipped from New York to California three times a month until the 4th of March next. The mails for the Pacific will be dispatched from this city by the steamer which sails on Wednesday next.

WASHINGTON CITY, July 7.—Ellis B. Schnable entered the Constitution office this morning and assaulted Gen. Bowman with a stick, while the latter was sitting in his chair. One of the clerks effectively came to the rescue; when Schnabel made a hasty retreat. Immediate steps were taken for his arrest. The reason for the assault was the publication in yesterday's "Constitution" of an article reflecting on the conduct of Schnable.

Edmund French, late Assistant Superintendent of the Treasury extension, under indictment for embezzlement, died here this morning. His trial was to have taken place to-day.

WASHINGTON CITY, July 8.—The Constitution of yesterday announces Wm. H. Brown as Editor and Proprietor, Mr. Bowman having, in pursuance of the arrangements which have been in progress for some time, transferred to him all his proprietory interest in that journal.

Mr. Breckinridge has formally accepted the nomination for the Presidency. His letter will be published on Tuesday. The programme of the Breckinridge and Lane demonstration last night, included a serenade and an address from President Buchanan.

Mr. Pryor spoke two hours in Phenix Hall on Friday night, defining his position in regard to the Presidency. He declared his preference for Breckinridge and Lane over the other candidates. The building was crowded and the applause great.

ST. LOUIS, July 7.—The Democrat learns from passengers from St. Joseph that the new four story building in that city, owned and occupied by Messrs. Nave, McCord & Co., wholesale grocers, fell at two o'clock yesterday morning, crushing a frame building adjoining it, occupied by three families, instantly killing nine out of the ten occupants, viz: Mr. Boyer and three children, Mr. and Mrs. Cogswell, and four others, whose names are not ascertained. The building caught fire immediately afterwards, and the whole stock of Messrs. Nave, McCord & Co., was consumed. The store of Tootles & Farleigh, was also burned, together with the entire stock of boots and shoes. The total loss is estimated at $300,000; insurance unknown.

ST. LOUIS, July 8.—The Republicans have nominated a full State ticket, headed by James B. Gardenhire, of Cole county, for Governor.

NEW YORK, July 7.—The extensive flouring mill at the corner of Fulton and Furman streets, Brooklyn, near Fulton Ferry, was burned last night. Loss $75,000.

Mayor Wood publishes a letter endorsing Douglas' nomination, and proposes a Douglas ticket exclusively, in the Northern and Western States, and Breckinridge and Lane in the Southern.

NEW YORK, July 7.—Henry J. Jarrett, of Baltimore, was this day appointed agent of the visiting deck of the Great Eastern.

The arrangements with Vanderbilt for the transportation of the Pacific Mail is from July 11 to March 4. He is to receive the postages, and the President is to recommend Congress to give him reasonable compensation besides.

LOUISVILLE, July 7.—The Democratic Convention at Irvine, Estill county, on the 5th instant, comprising 31 counties, unanimously adopted resolutions endorsing Breckinridge and Lane, and repudiating Douglas and Johnson.

LOUISVILLE, July 7.—Cassius M. Clay addressed a great crowd in front of the Court House this evening, on the Pacific Railroad question, and other political topics.

LOUISVILLE, July 7.—River stationary, with four feet one inch water in the canal. Mercury 76.

DENVER CITY, June 28.—Indian depredations upon straggling parties and ranches were of so frequent occurrence that a meeting was held yesterday to consider what was best to be done in the matter. The mining news remains unchanged; no new or important discoveries have been made. Business is very dull; money tight and scarce. Weather hot and showery.

BUFFALO, July 7.—The Republican ratification meeting last night, was the largest and most enthusiastic political gathering of the campaign: The Wide Awakes, in uniform, and bearing torches, made their first appearance in procession. Hon. Owen Lovejoy, of Illinois, was the orator of the evening.

NORFOLK, July 7.—At the celebration of the 4th at Purga League, Accomac county, Wm. Garrison was killed by the premature discharge of a cannon, and Joseph V. Hall, principal of the seminary there, terribly injured. He has probably since died.

TERRE HAUTE, July 7.—During the proceedings of the Democratic County Convention to-day, Mr. Cornwell, the Postmaster, hurled an ink-stand at Mr. Cockerly, editor of the Journal, cutting his head badly.

ST. JOSEPH, July 7.—The Pike's Peak express arrived yesterday evening with $15,000 in dust.

The news by this arrival has been detained here until to-day, in consequence of a severe storm which prostrated all the telegraph lines.

BOSTON, July 7.—Private letters from official sources in England, state that the Prince of Wales will go as far East as Portland, and as far West as Cincinnati, in the United States.

ALBANY, July 7.—The rumor of the removal of Col. North, special agent of the Post Office Department, is well founded.

MONETARY AND COMMERCIAL.

The Money market is rapidly working out of the flurry of last Friday and Saturday. Capital is again seeking employment and rates going back to those which ruled during the middle of June. We hear of demand loans to-day on Treasury Notes and State Stocks at 4½ per cent, and on mixed collaterals at 5@6 per cent. The supply is ample for the wants of borrowers. Desirable lines of paper continue very scarce, and are in demand at 5@5½ per cent for short, and 5½@6 per cent for long dates. The steamer yesterday took $835,000 in specie.—*N. Y. Trib.*

THE BRITISH CORN TRADE.—The past week being mostly cold and rainy, very little progress has been made in the growing crops. The aspect of the wheat more especially decided unfavorable to an average yield. All spring corn, excepting oats, which still are promising, begins to look on healthy; and the grass which sprung up so suddenly on the first supply of rain, followed by a week's fine weather, is now found to be thin at bottom. The probability is that, even with a good time to get it up, hay will be light. Though the northern departments of France are backward, the general reports from that country are more favorable than the markets would seem to indicate. As the barley harvest has commenced in the South, oats are expected to be ready soon afterwards, and wheat on midsummer-day, if not sooner, is likely to follow. The chief complaint is made of the rye, the night frosts having caught it in time of bloom.

More favorable advices from Europe being received at New York, breadstuffs have been firm, with a good increase in the exports.

THE receipts at tide water, by the New York State canals in Flour, Wheat, Corn and Barley, for the 4th week of June of 1860 and 1859, have been as follows:

	Flour, bbls.	Wheat, bu.	Corn, bu.	Barley, bu
1859	26,600	431,409	365,300	......
1860	23,400	103,000	137,800	5,491
Increase	3,200	297,300	227,500	De 5.400

The aggregates of the receipts of the above articles so far for the years 1860 and '59, have been:

	Flour, bbls.	Wheat, bu.	Corn, bu.	Barley, bu.
1860	268,760	2,151,300	4,347,900	78,709
1859	137,060	433,000	741,900	128,400
Increase	131,700	1,718,300	3,607,000	De49,691

By reducing the wheat to flour, the quantity left at tide water this year, compared with the corresponding period of last year, shows an increase of 437,610 bbls of flour.

RIVER NEWS:

There was but little doing at the landing on Saturday either in the way of shipping or discharging. Beyond the regular packets there was no arrivals. The W. I. Maclay and Emma for St. Louis, and Clara Dean for Louisville, cleared, all having good trips. The river is falling slowly but steadily with less than 7 feet in the channel by the pier mark.—The weather on Saturday was all that possibly could be desired, being clear, warm and pleasant, with every prospect of a continuance of it.

We condense the following from the Cincinnati Commercial of Saturday:

The Mariner from Pittsburgh; and Grand Turk from Memphis, constitute the arrivals. The departures include the Rocket, Anglo-Saxon, S. P. Hibberd and Bay City for Pittsburgh, all with fair trips except the Bay City.........The Hastings and Dacotah from Pittsburgh, are due to-day and to-morrow.

A Convention of Engineers, represented by delegates from all the ports of entry in the South and West, will assemble on the 1st day of August. The objects of the Convention will be to establish a more perfect union among engineers.

Money market easy at 8@10 per cent. discount per annum. Exchange on New York firm at ½ premium.

NEW YORK, July 7.—Cotton without material change—Flour opened with a good demand for fresh ground common and medium grades, and a slight improvement in prices, but the market afterwards became quiet and closed rather dull at yesterday's figures; sales 13,500 bbls. Canadian is quiet and steady. Rye Flour is in good request at $3,60.—Whisky dull and rather heavy; sales at 21½, with buyers at 21¼. Wheat opened quiet and unchanged, but towards the close of change, holders, in view of scarcity and high rates of freight, were compelled to accept lower prices. Rye is quiet at 80@82. Barley dull and nominal. Corn is very quiet. Oats plenty and dull at 37@40 for Western and Canadian; and 40@41 for State. Pork quiet and firm; sales 300 bbls at $19 for new mess, and $18 50 for old do. Beef is dull and out of season. Butter continues dull and unchanged. Cheese steady at 7@10¼. Coffee remains firm. PHILADELPHIA, July 7.—Flour is unchanged. Wheat is steady: white $1 60@1 45; red $1 30@1 31. Corn 66@67c. Provisions less active. Bacon firm at 11¾@11¼c. Shoulders 9½@9¾. Whisky unchanged.

THE GREAT EASTERN ON EXHIBITION.—The Great Eastern was thrown open to visitors on Tuesday, at 9 A. M. Gangways had been placed front and aft, running from large manholes to the dock at a slight inclination. Police officers were stationed at the foot of the gangways to inspect the vessel. The ticket office is on the dock opposite the wheel house, and is arranged with two holes, but only one was open in the morning, and the man engaged at it was not busy all the time. Most of the visitors were ladies and gentlemen in couples, accompanied by a few children—a large proportion coming in carriages. It is only those who can afford to indulge in that kind of locomotion who will be likely to pay the $1 admission fee; for it practically excludes the army of mechanics and persons of small incomes who would be delighted to see the ship at a reasonable price. About 1,500 people were admitted during the day.

IRON AS MEDICINE—PERUVIAN SYRUP—A CURE NEAR HOME.—I publish below an extract of a letter from David Boyd, of Kiskiminitas Station of the Allegheny Valley Railroad, who was cured of a bad form of dyspepsia by the use of the Peruvian Syrup. Mr. Boyd is a hotel keeper, and is well known, and he has suffered for the last eight years. He informs me that he gained eight pounds in flesh by the use of one bottle of the syrup, and has authorized me to publish his letter, which is appended. I refer to the long advertisement of the Peruvian Syrup in another column for particulars of its curative powers.

DR. GEO. H. KEYSER, 140 Wood street, Sole Agent.

JANUARY 23d, 1860.

DR. GEO. H. KEYSER—Sir—Enclosed I send you three dollars for two bottles of the Peruvian Syrup. I got one bottle from you about three weeks ago. If you recollect me, I told you that I had something like dyspepsia. The symptoms were wind and pains in the bowels, and pains in the back of the neck, and at times diarrhoea. You recommended the Peruvian Syrup, and it has done me more good than any medicine that I have tried yet, and I have been taking medicine for the last eight years. You told me if I would take three bottles at one time, you would give it for five dollars, but not knowing whether it would do any good, I thought I would first try one bottle. Now that I am sending the balance of the money in so short a time, you will send me the other three bottles. DAVID BOYD.

MOTHERS! MOTHERS!! MOTHERS!!!

Don't fail to procure Mrs. Winslow's Soothing Syrup for Children Teething. It has no equal on earth. It greatly facilitates the process of teething by softening the gums, reducing all inflammation—will allay pain, and is sure to regulate the bowels. Depend upon it, mothers, it will give rest to yourselves, and relief and health to your infants. Perfectly safe in all cases.

This valuable preparation is the prescription of one of the most experienced and skillful female Physicians in New England, and has been used with never-failing success in millions of cases.

We believe it the best and surest remedy in the world, in all cases of Dysentery and Diarrhoea in Children, whether it arises from teething or from any other cause.

If life and health can be estimated by dollars and cents, it is worth its weight in gold.

Millions of bottles are sold every year in the United States. It is an old and well-tried remedy.

PRICE ONLY 25 CENTS A BOTTLE.

None genuine unless the fac-simile of CURTIS & PERKINS, New York, is on the outside wrapper.

Sold by Druggists throughout the world.

The simple remedy for all is to get at the primary cause of the disease: remove it, and you assist Nature to regulate. This can be done by the great

CATAMENIAL CORRECTOR,

Which has never failed to effect a cure when properly used according to the directions, and a fair trial given it.

It is prepared from the recipe, and under the personal supervision of a most Skillful Physician, who for a number of years confined its use to his private practice. For the few years that it has been before the public, it has gained for itself a position that will soon by its rapid increase of popularity, place it at the head of all remedies heretofore offered for Women's diseases, the more especially those above enumerated, which too often END IN CONSUMPTION.

Mrs. Winslow,

An experienced Nurse and Female Physician, presents to the attention of mothers her

SOOTHING SYRUP, FOR CHILDREN TEETHING,

which greatly facilitates the process of teething, by softening the gums, reducing all inflammation—will allay ALL PAIN and spasmodic action, and is

SURE TO REGULATE THE BOWELS.

Depend upon it, mothers, it will give rest to yourselves, and

Relief and Health to your Infants.

We have put up and sold this article for over ten years, and CAN SAY, IN CONFIDENCE AND TRUTH of it what we have never been able to say of any other medicine—NEVER HAS IT FAILED IN A SINGLE INSTANCE TO EFFECT A CURE when timely used. Never did we know an instance of dissatisfaction by any one who used it. On the contrary, all are delighted with its operations, and speak in terms of commendation of its magical effects and medical virtues. We speak in this matter "WHAT WE DO KNOW," after ten years' experience, AND PLEDGE OUR REPUTATION FOR THE FULFILLMENT OF WHAT WE HERE DECLARE. In almost every instance where the infant is suffering from pain and exhaustion, relief will be found in fifteen or twenty minutes after the syrup is administered.

MRS. WINSLOWS' SOOTHING SYRUP.

This valuable preparation is the prescription of one of the most EXPERIENCED and SKILLFUL NURSES in New England, and has been used with NEVER FAILING SUCCESS in

THOUSANDS OF CASES.

It not only relieves the child from pain, but invigorates the stomach and bowels, corrects acidity, and gives tone and energy to the whole system. It will almost instantly relieve

Griping in the Bowels and Wind Colic,

and overcome convulsions, which, if not speedily remedied, end in death. We believe it the BEST AND SUREST REMEDY IN THE WORLD, in all cases of DYSENTERY AND DIARRHOEA IN CHILDREN, whether it arises from teething or from any other cause. We would say to every mother who has a child suffering from any of the foregoing complaints—DO NOT LET YOUR PREJUDICES, NOR THE PREJUDICES OF OTHERS, stand between you and your suffering child, and the relief that will be SURE—yes, ABSOLUTELY SURE—to follow the use of this medicine, if timely used. Full directions for using will accompany each bottle. None genuine unless the fac-simile of CURTIS & PERKINS, New York, is on the outside wrapper.
