FINANCE AND TRADE.

THURSDAY, October 25, 1866.

The New York stock quotations to-day, as reported by Robinson, McClean & Co., were as follows: Gold, 146¾; 1881s, 112¾; 5-20s, old, 114¾; do new, 110¾; 10-40s, 109¾; 7-30s, 105¾@106¼. Michigan Southern, 92; Cleveland & Pittsburgh, 61¼; Pittsburgh, Fort Wayne & Chicago, 109¼; Erie R. R., 81¼; Union Telegraph Company, 53¾; Chicago & Rock Island, 105¾; Chicago & North Western, 57¾; do preferred, 70½.

There is but little that is new to be said about our local stock or money market. Money is in good supply, and parties in good standing experience no difficulty in getting all the accommodations they want at the customary rates. This, however, cannot be truthfully said about those who are looked upon with the slightest suspicion, and this is as it should be.

In local stocks there is but comparatively little doing. Bank shares are firm and in demand, but the extreme views of holders has a tendency to retard operations. Generally speaking, oil shares are very dull, though, there are some few exceptions. Marine, we are assured, has recovered from the little shock it received at the stock sale the other evening; having been offered and refused for it to-day. The production of this company is not falling off, as some have been led to believe; and, besides, there are two new wells about ready to test. It is true, however, that the great depreciation in the value of oil is having a depressing effect upon stocks of this character.

—The banking house of the Venango National Bank, in Franklin—a leasehold, with twenty years unexpired, and subject to a ground rent of $35 per annum—was sold by the Sheriff of Venango county, on Monday, the 15th, as the property of Hon. C. V. Culver, for $5,000.

—The gold interest upon the sixes of '81 and the old five and six per cents of '62, '64 '65 and '66, is due in January and July. Amount of sixes of '81, $285,731,850. The interest upon the 193 millions of ten fortieths is due March and September; of the first series of seven thirties in August and February; second series, June and December; third series, July and January. The first series of notes outstanding October 1st, amounted to 590 millions; the second to 300 millions.

—National bank notes outstanding October 1, $175,632,985. One year ago this circulation amounted to $194,182,659. Increase since June 10, 1865, $151,250,198. It should be remembered, however, that a very large amount of old State bank notes have in the meantime been withdrawn and consigned to the grate. These are in the differ-ent States several thousand-fold, which will manage in some way best known to themselves, but not to, need be known to the assessors, to keep their Note bills afloat. The express system may in some cases render aid and comfort in the premises. Packages of redeemed state bank notes are perhaps slipped while in transit, and forced out again without reaching home. In this way the ten per cent tax would be cunningly dodged. Or, one thing years centrally there were more of the old bills of some state banks in circulation than there could be found to be in the tax-paying bank issues ten per cent was both some way evaded. Legal tender in circulation Sept. 1, $355,190,522. Legal tenders in circulation Oct. 1, 1865, $354,183,939. Here is a very satisfying decrease. And it should also be remembered that over a hundred and fifty five millions of these legal tenders are after four years compound interest notes, and that the same are already paid by the Treasury as a portion of their lawful money reserve.

CENTRAL LIVE-STOCK MARKET.

OFFICE OF THE PITTSBURGH GAZETTE, THURSDAY, October 25, 1866.

CATTLE.

The receipts of cattle this week were unprecedentedly heavy—larger than during any previous week during the past twelve months, and with but comparatively few buyers, and very unfavorable reports from the East, the market was extremely dull and languid, and prices, as compared with last week, have still further declined. To-day the pens were nearly all full and overflowing, and as eastern buyers were all pretty well supplied, having bought about all the cattle they considered themselves safe in buying, drovers, in many cases, were obliged to stay on east, being unable to get anything like what they considered a fair offer. As will be seen by reference to the sales, the highest prices reported range from 7¼ to 7½ gross, though it is but proper to remark, that no really prime cattle changed hands, notwithstanding there was a very good supply of this particular grades sold. Prime fat retailing cattle would possibly have brought a cent—the same kind of cattle two or three weeks since sold readily at 8¼ to 8½ and even 9. Stock cattle are in fair demand, and, comparatively speaking, hold their own better than good cattle, but there is no disguising the fact that there are not buyers enough to take all that are offering.

SWINE.

The receipts of Hogs, as well as cattle, have also been very heavy this week, and with a supply largely in excess of the demand, prices compared with last week, have materially declined. Thus, fair to prime heavy average sold at from 10 to 10½ gross, while to-day the same grades ranged from 8½ to 9 cts, showing a decline of from 1 to 1½ cents per lb. The consequence is that those of our Western friends who have been so unfortunate as to have here this week have lost heavily—see a drover's letter—have lost fat tallow money. The general impression seems to be that Hogs are destined to rule low this season as the supply is much heavier than for several years past.

SHEEP.

Like Hogs and Cattle, there was also an over supply of sheep this week, and with but a limited demand and adverse reports from the east, the market ruled very dull, and prices are lower. We now quote at 7@7½ cts for fair to prime fat mutton sheep—against 8½ to 9 last week.

Chicago Cattle Market.

CHICAGO, October 24—The fresh receipts of Beef Cattle to-day are 1250 head. The market is only a repetition of what it has been for the present week. The unfavorable reports from New York, and the large decline in prices, has put quite a "damper" on shipping here, who say they cannot pay the prices asked, and until a reduction is acceded to, very few transactions need be looked for. The principal sales to-day are to city butchers and yard speculators, at a small decline in prices yesterday's quotations.

The sales of beef cattle to-day are as follows: 11 good desh steers, weighing 11,825 lbs, at 7¼; 20 cows, steers and sealawags, weighing 17,710 lbs, at 4¾; 16 cows and steers, weighing 16,960 lbs, at 6¾; 19 butchers' cattle, weighing 18,820 lbs, at 6¾; 41 cows, off cars, weighing 34,760 lbs, at 4¾; 1 head rough stock, weighing 1,350 lbs, at 4; 20 head common stock, weighing 17,950 lbs, at 5¼; 28 fair feeding steers, weighing 33,100 lbs, at 5¼; 21 head fair steers, weighing 23,100 lbs, at 6¼.

PITTSBURGH MARKETS.

OFFICE OF THE PITTSBURGH GAZETTE, THURSDAY, October 25, 1866.

The movements in produce continue somewhat restricted, and while the demand for the leading commodities is almost entirely local, yet there is a fair volume of business in the aggregate. There is no falling off in the receipts of Grain Flour, and produce generally; and consequently, the supply is fully equal to the demand, and there are no material changes in values.

GRAIN—No. 1 Spring Wheat is held firmly at 2.25, with a sale of 1 car. Oats steady with a very fair demand but unchanged—50 on track and wharf, and 55 to 55 from store. Sale of 400 bush Rye at $1.20—an advance; and 1800 bushels prime shelled Corn $1.02. Barley is less active but unchanged.

FLOUR—Is firm and fairly active but not quotably higher—$12 to 12.50 for Spring Wheat; and $13 to 13.50 for Winter Wheat. Sale of 100 bbls choice Spring Wheat on track, at $12.50; 300 bbls "Forest" and "Crescent" in store, at $12; 300 bbls "Forest" and "Crescent" in store, at $12.50; and 150 do "Jenkins Eureka" at $13.50. Rye Flour is selling at $7 to $7.25, and Buckwheat is quoted at $6.50 to $5 per cwt.

PROVISIONS—Bacon continues dull but unchanged. We quote at 17 for Shoulders; 18 for Ribbed Sides; and 20 for Sugar Cured Hams. Lard is dull with small sales of prime kettle rendered at 17½ to 18. Mess Pork is held pretty firmly at $34.50.

APPLES—Continue to arrive pretty freely, but the demand keeps up pretty well, and the market is steady at $3 to $3.25 per bbl for good to choice.

BUTTER—Is steady with a fair demand and we can report regular sales of prime Roll at 30 to 32.

CHEESE—Is dull but not quotably lower—17 for Western Reserve; 18 for Hamburg; and 19 to 22 for Goshen.

SEEDS—Flaxseed is wanted at $2, and but little offering, while Timothy is dull at same figure. Cloverseed is quoted at 8½ to 8¾.

SALT—Is reported steady with a demand fully equal to the supply, with sales at $2.80, in truck, and $2.90 to $3 from store.

CRANBERRIES—Steady, with regular sales at $13 per bbl. for common, and $20 for cultivated.

SWEET POTATOES—May be quoted at $12 per bbl for common, and $15 for good to prime Jerseys.

EGGS—Coming in more freely, but the demand seems to keep pace with the supply, and fresh packed still command 30.

PITTSBURGH PETROLEUM MARKET.

OFFICE OF THE PITTSBURGH GAZETTE, TUESDAY, October 23, 1866.

CRUDE—There is no new feature in the Crude market worthy of special notice. The demand continues very much restricted, both for present and future delivery, but as there is little or none here offering, prices have undergone no perceptible change—12 to 12½ bbls returned, and 12 to 12½ packages in clude—sale of 20 bbls, in bulk, at 12¼. It is said there are plenty of offers to sell on first rise at 12, and no buyers. At Oil City Crude is quoted at $2.50, although we are reliably informed that there was a sale there to Pittsburgh parties at $3.40. The advices from the East are by no means encouraging.

REFINED—There was again some little inquiry for bonded oil to-day, but prices are no better—in fact, they are hardly sustained, and the tendency is downward. We have a sale of 500 bbls to be delivered within the next ninety days, free on board cars here, 50 for November delivery in Philadelphia, at 37½ and 50 for December delivery, at same price. From the above it will be seen that quotations may be fairly given at 36½ to 37, free on board cars here, and 37 to 37½ delivered in Philadelphia. There are some very queer freaks in this oil business. We are continually hearing of officers who refuse some weeks since to accept 45 and 46, delivered in Philadelphia, which are now offering to sell at 37.

Since the above was put in type, we have an additional sale of 250 bbls, to be delivered free on board cars—market closed in Philadelphia at 37½.

ARRIVALS—There was but a single arrival reported to-day—20 bbls for Capt. James Wilkins.

Breadstuffs.

(From the New York Shipping List.)

There are plenty of English orders here for breadstuffs, but prices are so far above those of the leading foreign markets that the operation is simply out of the question. Prices at the sources of supply, under a plethora of the currency, keep up far beyond the general expectation, and this added to the extreme rates of freight to the seaboard, prevents any accumulation of shelve stock. The implicit reliance were to be placed upon many of the reports which reach us from the West we should not have more than half enough flour and grain of the current crop to meet the wants of home consumption, leaving altogether out of sight a surplus for export. We have not the slightest doubt that the crops were considerably shortened by bad weather during the harvest season, but we cannot believe that there are nearly so deficient as the growers endeavor to make it appear. Many of the published accounts bear unmistakable evidence, too, of having been gotten up to effect, and, unfortunately for trade and the great mass of consumers, they are not apply without their influence. The price of wheat has been up from 90c on the first of September, to $1.41 yesterday—an advance of 51 per bush in the face of accumulative evidence that the yield this year will be at least equal to that of any previous season, with enough in clothing the Commissioner of Agriculture, think it will be considerably in excess of any year in the history of the country. It is quite apparent, from a careful survey of all the surrounding circumstances, therefore, that we only must our exports continue on an extremely limited scale, but there is every prospect of an extraordinary high range of prices for breadstuffs, for many months to come. There are several cargoes of wheat now on the way here from San Francisco, and in all probability many others will follow, our market affording better margins than the of Europe for California shippers. A few days ago the young metropolis of the Pacific demonstrated to draw a small portion of her flour hence, and this reverse current is an and illustration of the probability of human affairs.

RIVER NEWS.

As navigation is virtually suspended at this point, it is not deemed worth while for the present to pay any further attention to the stage of water. The weather yesterday was cloudy and raw with indications equally favorable for either rain or snow.

There has been no arrivals or departures excepting the Forest City. The B. C. Gray and Sherman are reported at Cliffs House, and it is a little doubtful about their being able to get over until there is a rise. The Roe Roy, which boat was sticking there on Wednesday, succeeded in getting off after putting out the great bulk of her freight in a flat. The same flat, we presume, is sticking somewhere between here and Wheeling.

The Minnie, for St. Louis, and the America, for New Orleans, were still receiving freight, with the understanding that they are to leave on the first rise.

E. M. Shield, of Cincinnati, has been appointed Supervising Inspector of steamboats for the seventh U. S. District, in place of the veteran Captain John Devlin. We have heard no cause assigned for the change, nor it is that Capt. Devinney did not endorse "My Polly."

The Argosy and Bellevernon left Cincinnati for Pittsburgh on Tuesday, and the silver Crescent was advertised to follow on Wednesday. The Cincinnati Gazette, of Wednesday, says: "The boats here from San Francisco, and in all probability many others will follow, our market affording better margins than the of Europe for California shippers. A few days ago the young metropolis of the Pacific demonstrated to draw a small portion of her flour hence, and this reverse current is an and illustration of the probability of human affairs.

New York Financial Matters.

NEW YORK, October 2.—Money steady at 5 per cent. Sterling firm and quiet, at 109¾@109¾. Gold a shade lower, opening at 146¾, declining to 146¼, and closing 147¼. NEW YORK, Oct. 25.—The Post's money article says:—Although, however, there appears to be little or nothing in the present position or probable movements of the Treasury to cause apprehension, or produce a panic in the money, it cannot be denied, that there are numerous forces at work in other directions, which if not checked in time, may not improbably drive our financial Banks among petty breakers of monetary stringency. A large institution like the Treasury of the United States, when the institution themselves with engagements not commensurate with its resources, should be wise in time; over speculation is parent of revulsion, and a panic that is provided against, never occurs.

The Commercial's money article says: The money market is without change. The banks are continued very liberal in meeting the current active demand, but are getting 5 per cent, upon a larger proportion of their call loans, if not all, during the date for only A 1 borrowers. Discounts are active; for prime paper running over two or three months, 6@7 per cent is generally the rate. Discounters are opposed to long date paper, and six months paper seems to material dissatisfaction. The Gold market shows considerable firmness under efforts of banks to run up the price to near 150. A heavy short interest has been enlisted, and the borrowing demand is consequently more active, 1½ to 3-16 per cent. per day being paid on borrowed coin. Foreign Exchange shows a slight reaction. The movement of exports and the shipments of Five-Twenties last week leave materials of Five-Twenties that week leave materials for a further advance, but speculation, owing market continues somewhat unsettled, owing partly to a feeling of uncertainty as to the future course of the Treasury in the matter of Western 'ie week for the moment, and decline to 1 at the regular Board; Michigan Southern is the prominent feature, and sold at 92¼; Governments steady, at about yesterday's prices: Five-Twenties of 1862 moved 1 day's prices: Five-Twenties of 1862 moved 1.

New York Dry Goods Market.

NEW YORK, Oct. 25.—The trade in Dry Goods opened this morning with perhaps a little more life than for the past few days, the improvements in the general tone. Continued deliveries in the second hand of a depressing effect, and in some instances goods are offered on a little more favorable terms than last week. Prices remained to-day pretty much as they were, some goods tending downward, and others tending upward. Brown sheetings and shirtings were in good demand, and prices ruled firm. Cotton flannels continued to be in good demand, and prices ruled firm. Cotton flannels continued to be in good demand, and prices ruled firm. Cotton flannels continued to be
