From California.

Arrival of the Steamer Crescent City.

The Steamer Crescent City, arrived at New York, from Chagres, bringing dates from San Francisco to the 23 November, from which we glean the following interesting news:

The number of arrivals from Europe and the United States were progressing with much spirit. There were at least 100 British vessels in the harbor of San Francisco on the 1st Nov. The town of San Francisco numbered in population at least 30,000 and the number of persons at the mines is confidently set down at 80,000 persons.

At San Diego straggling bands of overland parties are arriving daily. They are nearly naked, and the remainder of Captain Webb's unfortunate party. All are tired of further land travel, and are awaiting conveyances to San Francisco either by the steamer or in sailing vessels. A sailing vessel had taken off some two hundred passengers.

The delegates of the people assembled in Convention, have formed a Constitution, which is now presented for ratification.

The Convention to frame a Constitution concluded its labors on the 13th of October.

Politics in California.—The new Constitution has been submitted to the people of California, and is to be voted for or against on the 13th inst., The adoption of this instrument will be almost unanimous.

The political fires which have slumbered long remain pent up no more. Inconsistent with the character of the inhabitants, the nature of their occupations and the immdiate requirements of California as it may appear, our citizens have in mass meeting revived political distinctions, zealously advocated extreme if not *ultra* measures, and plunged into the unhesitating support of party principles, abandoning, in many instances, business pursuits, and wholly forgetful of the chief desire of their lives.

This heated state of public feeling is confined almost exclusively to the district of San Francisco. The mass meeting of the friends of Mr. T. B. King, held in this city on the 23d Oct., was a fire-brand thrown in the magazine—a step from which the Democratical portion of this community dissented, and the following day an appeal to the party was made and answered by a strong demonstration.

This meeting of upwards of 800 adherents to the Democratic party, after preliminary measures for organisation, adjourned, and on the 26th Oct., assembled again, appointed a day for the election by ballot of a committee to decide party nominations.

The issue of the approaching election may be determined in this district by a resource to party politics. It is hard to say which party is the strongest in this place—Democrat or Whig?

There are numerous candidates daily presented for the offices to be filled by the election of the 13th November. For Governor, we have the names of Peter H. Burnett, W. M. Stewart, W. S. Sherwood, for lieutenant Governor J. McDougal, F. J. Lippit.

For Representatives to Congress, Edward Gilbert, R. M. Price, G. W. Wright, L. Dent, W. Shannon, and a list of names before the people, of the aspirations of which, with their qualifications and prospects, we know nothing.

To the Senate of the United States, California will send J. C. Fremont; and the remaining seat will be probably T. B. King or H. W. Halleck.

The Convention.—We are advised that the House on the 3d, had under consideration the clause introduced by M. M. McCarver, prohibitory of the immigration of free negroes to California, and struck it from the Constitution by a vote of 31 to 8! It is believed that the bone of contention will be the apportionment of members of legislature, some considerable disaffection having been manifested at the report of the committee on this subject.

Proceedings in the Convention.—We have a supplement to the Alta California, dated October 28th, containing full reports of the debates on the new constitution. Section 7th provides, that if the Constitution shall be ratified by the people of California, the Executive of the existing government shall immediately cause a fair copy thereof to be forwarded to the President of the United States, with the respectful request of the people of California that it may be laid before the Congress of the United States.

At the general election on the 7th of November there were to be elected a Governor, Lieut, Governor, members of the Legislature, and also two members of Congress, it being uncertain whether, two members of the House of Representatives of the United States would be received, and it being impracticable to divide California into Congressional Districts. The two members of Congress are to be voted for on a general ticket by all the electors of State, qualified to vote at this election, and in case only one shall be allowed by the act of Congress admitting the State into the Union to take his seat in that body, the one for whom the highest number of votes was cast shall be declared elected.

Things at San Francisco.—The wharves are heaped up with merchandise, the streets are lined with ponderous baskets and bales of goods, (and, somebody says, to the council, not in a proper condition for winter rains) while loaded drays block up the throughfares, or by a lusty "look out" from the driver, startle the looker-on, and warn him that it is the age and place in which he must keep stirring: else be ridden down, or "go the wall" with the weakest.

The Overland Immigration.—The main body of immigrants are now daily arriving, and a Rough and Ready, tough and ready set of men they are. Numbers of them stop at Weaver's Creek, Dry Digging and Weaverville; strike their picks as soon as they reached the promised land, and from the word "Go" fall like so many hyenas. Some trusty members of their company are dispatched to Sacramento City, with the wagons and pack mules, and others proceed to San Francisco.

The immigrants from the western and southwestern States will make far better miners than our northern and eastern men. They are far more inured to toil, and the arduous journey over the plains has in a measure broken them into the traces. The main ranks of the emigration had turned the sink of Mary's River at latest accounts, and the relief trains sent out by Gov. Smith, were already in their midst. The fact of some of the immigrant trains, having left the beaten track and sought some half-dozen new routes will render Gov. Smith's praiseworthy efforts nugatory.

All those who have verged from the main route have found in the main road pasture for their stock, and those who have taken the most northerly or *Texican* route, leading into the Oregon route near the head of the Sacramento, have all come in well, although they represent the distance some 500 miles further.

The overland emigration is mostly setting in various dry diggings on the North Fork and at Weaver Creek. They are building log houses for substantial winter quarters, but it is to be feared that provisions to suffice such a multitude cannot be drawn into the mines before the rains close the roads against them. There must be unheard of suffering in remote parts of the mines during the winter. Men are grievously dissappointed in their expectations, become careless and desperate, and are determined to dare much and brave everything for gold.

Mexicans and Chilians in California.

An intelligent correspondent of the St. Louis Republican, writing from San Francisco, Sept. 27, has the following speculation:—

The Mexicans and Chilians who now work for themselves, and are acquiring more gold than the Americans, will be glad to come here and work in the deep mines for american capitalists at moderate wages. They alone understand and are accustomed to that description of mining; and they alone in a climate like this, are fitted for such slavish drudgery and extraordinary toil. When that comes to be the case, then, and even now, in anticipation of it, Government ought to hold out encouragement for the settlement of an American population in agricultural and grazing districts, by giving *the disappointed* gold seekers small grants of land, on which they may yet rear a home; for if the thousand of disappointed and unsuccessful Americans and Europeans who have, or may come here, are not only unfitted for mining, but likely to be superseded by a more skilful, but inferior race of men from Mexico and Chili, no other earthly resource will be open to them; they will not be able to buy land, or even to earn the money to do so; and if a large operative population be engaged in mining pursuits, a profitable field will thereby be created for agricultural and pastoral speculations suficient to engross the attention and energies of industrious citizens disposed or compelled to settle in the country.

HORSES.—We would call the attention of that portion of our readers who are in any way interested in horses, to the advertisement in another column, descriptive of the celebrated medicine called *Merchants Gargling Oil.* From the peculiar nature of the article, and the unparalled success it has met with in the hands of those who have the care of horses, it is but justice to say, that of the great number of medicines which have been offered, none have been so well adapted to the prompt cure of most diseases to which horses are liable. A pamphlet of description may be had *gratis* of the Agent.

CONGRESS.—All eyes are turned to Washington, but sensible people take time nevertheless, to call at Shepherd's in Chesnut above Third street, to look after adornments and comfortable clothing for their outer man. They are sure of being satisfied there.

MARRIED.

On the ninth of December, by the Rev. Mr. Yaeger, Mr. *Edward J. Kuhns*, of Cherryville, to Miss. *Rosannah Lerch*, of Allen township, Northampton county.

Highly Important

From Washington.

A dissolution of the Union threatened!! Six days have now elapsed at an expense of Three Thousand Dollars a day to the government and no organization of the House of Congress yet! The public is beginning to entertain fear for the safety of this great and mighty Republic! But still the news do not create as much sensation as the arrival and unpacking of "Old Schnurman's" second purchase of Winter Goods. The masses are astonished why it is, that other merchants cannot sell at the same low prices as he does, the secret, however is easily dissolved, it's because the "Old Man" knows how to buy cheaper than others. He therefore extends a general invitation to all classes to come and examine his wonderful stock of Goods now being displayed for inspection, before purchasing elsewere.

G. W. MERCHANT'S CELEBRATED

UNPARALLELLED in THE HISTORY OF MEDICINE AS THE MOST

Remarkable External Application ever Discovered!

Facts are Stubborn Things!!

WHAT HAS BEEN DONE CAN BE DONE AGAIN:

Ignorance of facts and philosophy, however, start at the assertion that any one remedy can possess within itself the virtue of curing many diseases. Experience of more than fourteen years has nevertheless established the fact that Merchant's celebrated Gargling Oil, or Universal Family Embrocation, WILL CURE most cases, and relieve all such as

Spavins, Sweeny, Ringbone, Windgalls, Poll Evil, Callous, Cracked Heels, Galls of all kinds, Fresh Wounds, Sprains, Bruises, Fistula, Sitfast, Strains Lameness, Sand Cracks, Foundered, Feet, Scratches or Grease, Mange, Rheumatism, Bites of Animals. Externalpoisons, Painful Nervous Affections, Frost Bites, Boils Corns, Whitlows, Burns and Scalds, Chilblains, Chapped Hands Cramps, Contraction of the Muscles, Swellings, Weakness of the Joints, Caked-Breasts, &c., &c., &c., &c., &c.

The celebrated Doct. Parker also writes as follows:—Dear Sir: I have prescribed your Gargling Oil in various cases of

Practical Surgery.

as a liniment, with marked success; and would commend it to physicians generally for external use in all contutions, tumors, sprains, white swellings, and in all rhumatic affection, where external means are necessary. As a discutent it is harmless where the febrile symptoms have been reduced by general treatment. In such cases it is the most efficient remedy within the circle of means now in use.

I would also recommend it to community at large as a safe and powerful remedy where there is no general fever in all the above diseases to be used freely and to counteract inflamation in a remarkable manner. In bruised wounds it prevents swelling and consequent soreness in hot weather.

From the peculiar nature of this Oil, and the unparalleled success it has met within the hands of the

Farrier, Farmer and Stage Proprietor,

it is but justice to say, that of the great number of medicines which have been offered, none have been so well adapted to the prompt cure of diseases; to which horses are liable; it has been very justly called a complete PANACEA FOR THE HORSE. For instance read the following:

To Owners of Horses.

This may certify that I have had for many years the care of from 100 to 200 Horses and having made use of Merchant's Gargling Oil for 2 years past and can safely say, that for all the diseases that horses are liable to, I never saw its equal. I use about one bottle per month, and recommend it to the public, as the best medicine for horses now in use. E. D. MINOR.

Caution to Purchasers.

Beware of COUNTERFEITS, and be sure the name of the *Sole Proprietor* GEO. W. MERCHANT, Lockport, N. Y., is blown in the side of the bottle, and in his hand writing over the cork.

Dont be persuaded to take anything else with the promise it is just as good &c. This is practised by those unprincipled dealers whose conscience will stretch like India Rubber, and who are of a kindred spirit of those in our large cities, whose nefarious practices have so recently been exposed to the action of Congress.

All orders addressed to the proprietor will be promptly responded to.

Get a pamphlet of the Agent, and see what wonders are accomplished by the use of this medicine.

Sold by respectable dealers generally in the United States and Canada. Also by Simon Rau Bethlehem, Pomp & Kensy, Easton, H. B. Duffin, South Easton, Lewis Smith & Co., Allentown C.
