PATENT PRESS BRICK MACHINE

THE subscribers have been manufacturing since May 16 1846 at Brace Brick Machine, and having since then been duly tested its ability, are now prepared to offer it to the public as the best machine in use for any part of the United States. The machine is designed to make Brick from crude clay, and will make 30,000 good merchantable bricks in a day, sufficiently hard to stack up in the kiln; thus avoiding the expense and labor of preparing the clay, during the winter, and handling the brick after they are moulded. It is simple, strong, not liable to great outer repair, and is constructed that it can be taken to pieces and put together, by any ordinary workman.

We are now building machines, and can furnish them on short notice. Persons who have seen our old rotary machine now in successful operation at Mill creek bottom, near the West end of Kelsh's Brick, where we have been for the last year, everything connected with it in all who may call. We have at present no authorized Agent. All letters addressed to us will be promptly attended to.

R. H. & A. CULBERTSON, McMILLEN & Co.

CINCINNATI.

BOLIVAR FIRE BRICKS.

EXTENSIVELY tested and approved during the past year, to be the principal iron manufacturers in the western country, and throughout the interior of Pennsylvania, will be ready for delivery on the opening of the Navigation.
