MISCELLANEOUS.

HIBBERT'S CHEMICAL WRITING FLUID—In soliciting the patronage of the public for this article, it is but right and proper that the merits on which the claim for support is based should be fully and fairly set forth and also some guarantee be given that the community will not be imposed upon by using it.

In the first place it is well known that the generality of black "Inks" are composed of a precipitate, held together by gum Arabic, and when the water, either in whole or part is evaporated the gum and precipitate are left as a pasty mass in the pen or inkstand which contains it. It is also common to add vinegar to the Ink mixture to make it more fluid, which increases the evil by acting on the pen, if a steel one, corroding it through in a very short time. Now the "Writing Fluid" differs from these mixtures in every respect, as it is a chemical solution requiring no viscid matter to hold it together, therefore will never get thick, and being very fluid a large quantity flows from the pen into a given space, penetrating deeper into the fibre of the paper making a more permanent stain and one less easily moved by attrition than if it was only plastered on the surface. It also contains no matter that has an affinity for metallic iron, therefore will not corrode steel pens—it will not mould, and although it writes of a bluish green color yet in a few hours it becomes a deep black which will endure for ages. It is warranted superior to the foreign article known by the name of "Arnold's Writing Fluid," and one-third more given for the same price. As a guarantee against imposition of any kind being attempted the following recommendations will suffice, as all must be aware, that the names there given could not have been obtained by any means for an unworthy purpose.

We recommend "Hibbert's Chemical Writing Fluid" to the patronage of the public, as a first rate article in all respects; it flows free from the pen without clogging it up and in the course of a fewhours becomes a deep bright black.

Juniata Rolling Mills, Aug 20, 1847.

Mr Thos K Hibbert—Dear Sir: I have been using your Chemical Writing Fluid, and find it a first rate article for the office, it flows freely from the pen and becomes jet black in a few hours. Yours &c.
T H TUTTLE, Book-keeper for Bissells & Semple.

Pittsburgh, Aug 22, 1847.

Mr T K Hibbert—Dear Sir: Enclosed I remit you a bottle of your Writing Fluid, some three weeks ago, I consider it fully equal if not superior to Arnold's or any other ink now in use, I know of no ink that I prefer to it.
WILLIAM STEWART, Book-keeper for Jones, Byers & Co. Pittsburgh, Sept 11, 1847.

Mr T K Hibbert—Dear Sir: I am using your Chemical Writing Fluid, and find it to be a most excellent article for steel pens, as it does not clog them upon the generality of other inks; it flows free and becomes a deep black in a few hours. Yours, &c.
WILLIAM CARR, Book-keeper for Wick & McCandless.

"Secure the Shadow ere the Substance Fade."
COLLINS' CELEBRATED SKY-LIGHT DAGUERREOTYPES, the highest Premium Medal awarded at the Fairs of the Franklin and American Institutes for the best and most artistical specimens of Daguerreotype Portraits.

The recent improvement made by the subscribers, and now sole possessors of their establishment alone, viz: An Upper Light, has received the highest recommendations from the Press, and also written testimonials from all the first Artists in the Country, pronouncing their superiority over the great Side Light.

The peculiar advantage of this Light is that the Natural expression of the Eye can be obtained now more perfectly than heretofore. Citizens and Strangers are respectfully invited to call at Collins' Daguerreotype Gallery, and examine specimens, which probably the largest and most extensive in the United States, and examine for themselves the astonishing improvements made by the subscribers in this Wonderful Art.

N. B. Daguerreotypes taken in cloudy weather.

Pork Packing at Beardstown.
THE Pork Packing season is just approaching. I shall be prepared to pack pork and sausage on hogs on good terms—barrels, kegs and salt furnished if desired, at the lowest market price. It is well known to pork buyers the advantage of packing at this point—the number of hogs raised in the region is all to be unusually large, and of the finest quality, owing to the immense corn crop and the season being found to be very large and fat. Buyers who intend packing in the west would do well to call at this point before locating elsewhere. I will also pay a liberal commission for Farmers or Drovers; or if any of them wish to pack on their own account I will accommodate them with every facility. There contr to be 25,000 lbs pork packed at this point this winter, as the greater portion of the Hogs will be too large and fat to drive any distance, only at the sacrifice to the owner. I shall be prepared to pack any quantity, and recommend buyers to be in the field in due time, and make arrangements for packing before our river closes for winter.
