PATENT PRESS BRICK MACHINE

The subscribers having obtained a patent, May 16 1846, for a Press Brick Machine, and having since then jointly tested the utility of the machinery, are now prepared to sell rights and contract to deliver machines to any part of the United States. The machine is designed to make Brick from common clay, and will make 20,000 per hour. Brick brick per day, sufficiently hard to stack up in the yard. Thus avoiding the expense and labor of preparing the clay, and of handling the brick after they are being moulded. It is simple, strong, not liable to get out of repair, and is constructed that it can be taken to pieces and put together with great facility, when removing it to other places. We are now building machines, and can furnish them at short notice. For a full description see our old refer to a machine now on exhibition at Mill creek bottom, near the West end of Eighth Street, which we will be happy to explain everything connected with it to all who may call. We have the present no authorized Agent. All letters to our address will be promptly attended to.
