Roofing.—Galvanized Tin Plates.

THE subscribers beg to call the attention of Builders, Architects and owners of Buildings, to the many advantages which these plates possess over all other metallic substances hitherto used for roofing, &c., as they possess at once the lightness of wood, without its liability to rust, having now been tested for several years in this particular, both in this country and in Europe. They are less liable to expansion and contraction from sudden change of the atmosphere, than common tin plates, iron, zinc, or any other metal now used for roofing, and consequently form a much better and slighter roof, requiring far less frequent repairs, while the first cost is but a trifle more.

☞ Dyspepsia is the bane of many a man's existence. No tongue can describe the sufferings caused by this distressing disease. It unfits man for his station in life, whatever it may be, and makes him feel as though he would rather not exist than endure such misery. Yet these sufferings are produced in the first place by derangement of the stomach, and if this were met by using B. A. Fahnestock's Anti-Bilious Pills, the bowels would be cleansed, the accumulation of bile carried off, and a speedy and sure relief obtained.

Prepared and sold by B. A. FAHNESTOCK & Co., corner 1st and wood, also corner 6th and wood sts. oct18

☞ The excessive or morbid secretions of bile is well known to cause violent disturbance of the digestive organs, and bring on malignant and unmanageable fevers, which often put an end to life. The stomach must be cleansed of these foul secretions, and this can most readily be accomplished by the use of B A Fahnestock's Anti-Bilious Pills, which are a most valuable family cathartic. They can be given with safety at all times, and afford relief in a very short time.

Prepared and sold by B A FAHNESTOCK & Co., corner 1st and wood, and corner 6th and wood sts. aug29

PITTSBURGH BOARD OF TRADE
COMMITTEE FOR NOVEMBER

N. B. CRAIG. W. J. TOTTEN. J. MAY

OFFICE PITTSBURGH GAZETTE, Tuesday Morning, November 7, 1848.

In reviewing the transactions of yesterday, we find very little change in quotations from our last report. Business generally is quite lively, and in the way of general sales to the trade, a fair amount was done. The river is again on the rise, and business along the wharf shows renewed activity.

FLOUR—The receipts were larger than any previous day of the season, and shipments east continue quite heavy. The market is duller, and shows a further decline in prices. Sales of 200 bbls at the river in different lots at 4,12½, and of 160 bbls extra at 4,16. From store we quote regular sales in dray load lots at 4,25@4,30 ⅌ bbl.

GRAIN—We find no material change from our last quotations. Supplies are limited and sales moderate at the following rates:—Wheat 80c; barley 55@60; rye 50@55; corn 35@37, and oats at 27 @28c ⅌ bu.

PROVISIONS—Considerable dullness prevails in the market, but prices show no very material change. Sales of 47 casks bacon sides, western at 4½c ⅌ lb, short time; regular sales of hams at 6½ @6¾, and sides at 4½@4½c ⅌ lb, in small quantities. In lard we find very little doing, but may quote nominally at 7@7½c ⅌ lb.

BUTTER—Sales of keg at 8½@9c ⅌ lb.

CHEESE continues in fair demand, with regular sales of W R at 5½, 5¾ to 6c ⅌ lb, as in quality; sales of cream at 6½@7c ⅌ lb. Receipts are less abundant, but the market is fairly supplied.

OILS—Sales of linseed, and No 1 lard at 60c ⅌ gall.

FISH—The market is abundantly supplied, with regular limited trade transactions at the following rates—Salmon $19, mackerel No 1 $12, No 2 $10 and No 3 5,50@$4 ⅌ bbl; herring $6 ⅌ bbl, and cod fish at 4,50 ⅌ drum.

FRUIT—Of green apples we quote sales from store at 75c to $1,31 ⅌ bbl as in quality. Of dried apples we note limited sales at 62, and of peaches at 1,25@1,37 as in quality.

ROSIN—N C is held at 3,37½@3,50 ⅌ bbl.

GROCERIES—We find nothing new under this head, the market being without animation.—We may continue our quotations as follows:—N O sugar 5½@5¾, loaf do, 8@11c as in quality, and terms of sale. N O molasses 31, sugarhouse at 40@15c ⅌ gall. Rio coffee 7½@7½c; rice 5½@5½c ⅌ lb.

ASHES—Sales 3 tons scorchings at 4c, and of pots in a moderate way at 4@4½c; of pearls and saleratus, we could hear of no sales worth reporting.

SPLENDID LOT OF NEW PIANOS.

NUNNS & CLARK, New York;
Hallet & Cummings, Boston;

The subscriber has now open and for sale, a lot of most superior Pianos, selected by himself at the manufactories.

They consist of Rosewood and Mahogany Pianos, of 6, 6½ and 7 octaves, of various styles and prices, and embrace all the latest improvements. Those of Nunns & Clark, (for which celebrated Pianos he is agent,) have an improved way of stringing possessed by no other; also, a superior plan of leathering the hammers, preventing these Pianos from growing harsh and wiry after some use.

The Pianos of Chickering, of which he has a superior lot, are provided with the Circular Scale, and were selected by him from the manufactory in Boston.

The above will positively be sold at manufacturers' prices, and on accommodating terms.

The subscriber will invariably be found at J W Woodwell's, from 11 to 12 & 3 to 5 and from 1 to 5 P. M. Mr. Woodwell will attend to the business during the balance of time. H KLEBER,

GREAT MUSICAL NOVELTY—The subscriber has just received from Europe, and for sale, an entirely new invention of Piano Forte, called the CALINET PIANO FORTE, which possessing more power and sweetness than the square Piano, occupies but one fourth as much room, and is a much more showy and handsome piece of furniture. It is particularly desirable where there is a saving of space to be effected, being exceedingly neat and compact, and occupying no more room than a small side table. The subscriber has in hand a testimonial of its superiority from the celebrated Jenny Lind Martinetti, in his own house where it may be inspected.

B.—Those who are in want of a good instrument, are respectfully invited to examine these before purchasing elsewhere, as they cannot be excelled by any in the country, and will be sold lower than any brought from the East. RUST PROOF IRON.

THE undersigned have erected works in the city of New York, for the purpose of Galvanizing all articles of Iron, which it is desirable to PROTECT FROM RUST, such as Telegraph Wire, Bolts, Spikes, Nails, Wire for Fences, and any other article which may be required. For Hoops for Casks, as a substitute for hair Rope; for Clothes Lines, Lightning Rods, and a host of other applications, it will be found cheap and durable. They would particularly call attention to the Galvanized Wire for fences; it requires no paint, and will not rust. Also to Spikes and Bolts, the preservation of which is of so much importance, that it will commend itself to the notice of all those interested.
