Woodsmen

Know that in spite of hard work in the clear forest air the blood often becomes impure. The heavy food served in the lumber camps is to a great extent responsible for this condition of the blood, which renders the body an easy prey to many forms of disease. There is no better blood purifier than Dr. Pierce's Golden Medical Discovery. It cures eruptions, pimples, eczema, scrofula, rheumatism, and other diseases caused by an impure condition of the blood. It cures absolutely and altogether by cleansing the blood from the poisons which breed and feed disease.

Accept no substitute for the "Discovery." There is no other medicine "just as good" for the blood.

"I will forever thank you for advising me to take Dr. Pierce's Golden Medical Discovery," writes Mrs. James Murphy, of Fonda, Pocahontas Co. Iowa. "It has cured me of chronic scrofula of twelve years' standing. I also had chronic diarrhea for twelve years. I am in good health now—better than I ever was in my life, owing to Dr. Pierce's Golden Medical Discovery. I took several bottles of the 'Discovery' before I stopped."

Dr. Pierce's Common Sense Medical Adviser, containing 1008 pages, and over 700 illustrations, is sent free on receipt of stamps to defray expense of mailing only. Send 21 one-cent stamps for the book in paper cover, or 31 cents for the book in cloth binding. Address Dr. R. V. Pierce, Buffalo, N. Y.

Dr. Humphreys'

Specifics cure by acting directly upon the disease, without exciting disorder in any other part of the system.

Dr. Humphreys' Manual of all Diseases at your Druggists or Mailed Free.

Sold by druggists, or sent on receipt of price. Humphreys' Med. Co., Cor. William & John Sts. New York.

This Is Your Opportunity.

On receipt of ten cents, cash or stamps, a generous sample will be mailed of the most popular Catarrh and Hay Fever Cure (Ely's Cream Balm) sufficient to demonstrate the great merits of the remedy.

ELY BROTHERS,
56 Warren St., New York City.

Rev. John Reid, Jr., of Great Falls, Mont., recommended Ely's Cream Balm to me. I can emphasize his statement, "It is a positive cure for catarrh if used as directed."—Rev. Francis W. Poole, Pastor Central Presbyn. Church, Helena, Mont.

Ely's Cream Balm is the acknowledged cure for catarrh and contains no mercury nor any injurious drug. Price, 50 cents.

MEDICINAL USE.

Physicians recommend and will advise the use of

LEWIN'S PURE RYE WHISKEY,

for the weak and run down system, and in many cases, if used properly, will prevent long and continued sickness. If you buy from us you are sure to get purest and best quality.

A large stock of the below brands always on hand:

FINCH, GUCKENHEIMER, GIBSON, LARGE, MT. VERNON, DILLINGER, OVERHOLT, THOMPSON, BRIDGEPORT.

and offer them to you unadulterated 6 year old at $1.00 per full quart, 6 quarts, $5.00.

GRANDFATHER'S CHOICE,

Whiskey guaranteed 3 years old, $2.00 per gal. On all C. O. D. or mail orders of $5.00 or over we box and ship promptly; express charges prepaid.

ROBERT LEWIN & CO.
411 Water Street
Telephone, 2179. Pittsburg, Pa.
Opposite B. & O. Depot.

REMOVAL

ROBT. LEWIN & CO., Wholesale Dealer in Wines & Liquors.

Now at 411 Water St., Pittsburg, will remove about April 1st, during construction of their new building to

14 Smithfield St., Pittsburg,

where they will be glad to meet all their customers and friends.

CURES THE COUGH.

A pleasant, never-failing remedy for throat and lung diseases.

Sellers' Imperial Cough Syrup

is absolutely free from spirituous or other harmful ingredients. A prompt, positive cure for coughs, colds, hoarseness, influenza, whooping cough.

Over a million bottles sold in the last few years attests its popularity.

W. J. GILMORE CO. PITTSBURG, PA.

At all Druggists. 25c and 50c.

CAULIFLOWER CULTURE.

Some Quite Novel Experience From Long Island Growers.

The general impression is that cauliflower cannot be successfully grown on sandy soils, and for the best results it should be grown on a lively loam. Experience has proved to the Long Island growers most conclusively that it is not the character of soil, but its condition, that insures success. The cauliflower, in common with all other plants, does not feed upon soil, but upon the elements of plant growth contained in the soil, and these can be furnished by the light as well as by the heavy soils. Then the question arises, Can it be grown without the aid of commercial fertilizer? Yes, but I should prefer under some circumstances its use. For instance, the cauliflower has a decided thirst for salt, an element that can only be furnished by the use of chemicals. On saline coasts the atmosphere will furnish that to a considerable extent, but not sufficient for its need, which on Long Island is satisfied by the salts used in the commercial fertilizers.

Last season was one of vicissitudes with this crop and showed in a few instances the value of salt. Let me state an instance. One of our best farmers had a field in which he was to grow cauliflower the past year completely flooded by a remarkably high tide, the first in the history of the farm. When the time for setting the plants came, they were set here the same as in other fields, which had been given the same proportion of fertilizer. When the harvest came, the flooded field produced one of the heaviest crops ever known, and it has been stated that profits were more than $1,000 per acre, while most other fields were total failures.

If I were to grow cauliflower on a sandy soil, I should take a piece of sod and treat it liberally with well rotted manure, which should be put on the surface and plowed under about June 1, then harrowed smoothly and left until about time to set the plants. Then I should cultivate as finely as possible without disturbing the sod and at the same time work in 800 pounds of common salt to the acre and look with confidence for a satisfactory crop, writes an Orange Judd Farmer correspondent.

Judging by the Eye.

A difference in yield of 50 bushels per acre of potatoes will scarcely attract attention as they lie in their places on the ground after digging.

In the personal experience of the writer these statements have been abundantly verified. On one occasion there were left unfertilized for comparison. At harvest time the workmen were instructed to dig fertilized and unfertilized rows, leaving the potatoes in their rows side by side for examination. When ready, the writer inspected them carefully, and while there was a slight difference observable the verdict rendered as the result of inspection only was "not enough increase to pay cost of fertilizer." Pressed with work the impulse was to have the potatoes picked up without further care, but a wiser thought prevailed and a definite area was laid off and the potatoes from it carefully measured, when to the surprise of all the yield of the fertilized rows exceeded that of the unfertilized by 62½ bushels per acre.

This occurred in August, and these potatoes had a ready market at 90 cents per bushel. The value of the increase was $56.25 per acre. The cost of the fertilizer was $14 per acre, and if $2 is allowed as the cost of applying the same the total expense on account of fertilizer was $16 per acre, leaving $40.25 as net profit. And yet we were on the point of turning away from this experiment, saying "the fertilizer does not pay."

After some experience in experimental work farmers come to know that "judging by the eye" is entirely untrustworthy.—J. L. Stone, New York.

Radishes In Hotbeds.

Radishes require less heat than lettuce, just as a crop of young cauliflower or cabbage requires less heat than tomatoes, egg plants or others of a tropical nature. If started in March, no strong bottom heat would be required, and they will succeed well on second heat such as is in a bed from which a crop of lettuce or other vegetable has just been removed. In this case the crop will often do better than when sown in a freshly made bed, as in the latter the ammonia, which new heating material always throws off, would have a tendency to drive the crop too much to tops.—Rawson.

Agricultural Brevities.

In some sections of New York not adapted to wheat growing buckwheat has become quite an important crop. It is not looked upon with favor by some practical farmers, but others believe that when the conditions of its successful culture are better understood its value to the state may be greatly increased.

Among cowpeas suitable for the north Whippoorwill is generally popular.

A number of Vermont farmers report having thrashed their corn this winter with ordinary thrashing machines.

There seems to be an active interest in cherry growing. Rural New Yorker advises that the best time to prune cherry trees is in the early spring, just before the leaves start. It considers it is well proven that Windsor and all other sweet cherries are less hardy than the Montmorency and others of the sour class. Richmond, Philippe and English Morello are other good kinds that are hardy, but they are tart in flavor.

HOOD'S PILLS cure Liver Ills, Biliousness, Indigestion, Headache. Easy to take, easy to operate. 25c.

RHEUMATISM CURED IN A DAY.

"Mystic Cure" for Rheumatism and Neuralgia radically cures in 1 to 3 days. Its action upon the system is remarkable and mysterious. It removes at once the causes and the disease immediately disappears. The first dose greatly benefits; 75 cents. Sold by J. C. Redic, and J. F. Ralph Druggists Butler. Apr 96.
