REPORTED & TELEGRAPHED FOR THE PITTSBURGH DAILY GAZETTE

Arrival of the Steam Ship Ohio.

HIGHLY IMPORTANT FROM HAVANNA

PROGRESS OF THE CUBAN EXPEDITION.

General Lopez Landed at Cardenas with 500 Men.

The Fort Besieged and Taken.

New York, May 24.

The steamer Ohio arrived from Havana, this afternoon, bringing dates of the 17th inst.

General Lopez landed at Cardenas on the 17th, and with 500 men took the town. The garrison, consisting of 600 men, surrendered, after losing three of their men.

Great excitement prevailed in Havana. The city is under martial law. Several thousand militia have been enrolled.

Troops have been despatched to protect Matanzas.

It was reported that troops were collected on Woman's Island. Several vessels had started to the place.

The Ohio, Falcon, and Georgia, were compelled to anchor at the entrance of the harbor.

General Lopez landed from the steamer which left New Orleans on the 7th inst.

Several other vessels, containing 1200 to 1500 men, had left New Orleans previous to the sailing of the Creole, but where, they are not known.

The resident foreigners were called upon to enroll themselves.

There were 1500 troops in Matanzas; 500 were despatched from Havanna, at 10 A. M., on the 20th, to reinforce them, and march against General Lopez.

It was rumored that the force under Lopez had increased to 2000, and they were already half way to Matanzas.

On the 16th news was received at Havana, that a large force were collected on Woman's Island, near Cape Yucatan, upon which, the General of the Marines, with several vessels, and about 2000 men, started immediately from that point.

Just before the Ohio left, the Memphis Pizarro came in with 165 prisoners, taken from that island.

The force on the Creole, with Gen. Lopez, who effected the landing, is only a small portion of the expedition.

It is known that some ten or twelve vessels have left New Orleans, and different parts of the Gulf, probably to land simultaneously at different points.

It was reported that Gen. Lopez had broken up the railroads leading to Cardenas.

In several places, the merchants and bankers in Havana, were removing their money, plate, &c., into the fort, for safety.

Capt. Shenck, of the Ohio, protested, through the American Consul, to the captain General and demanded a safe anchorage, but was refused—being told that if he did not like it, he might go to sea as soon as he pleased. The Spanish government would not be responsible for the safety of his ship.

None of the passengers, except those having passports, were permitted to go on shore. No communication was allowed between the passengers while in port—not even between the officers until a permit was obtained from the Captain General.

The Ohio was detained more than 15 hours after she was ready for sea, waiting for a permit to transfer her passengers.

CONGRESSIONAL.

Washington, May 23.

Senate.—Mr. Hale submitted a resolution to inquire into the necessity of altering the rules of the Senate in relation to the admission of persons upon the floor as spectators.

Mr. Mangum moved an amendment to the resolution, to the effect that printed permits be prepared, by which each Senator shall daily admit to the floor one person.

After a spicy debate the subject was referred to the Select Committee.

On motion of Mr. Yulee, his resolution in relation to the Cuban expedition was taken up, when Mr. Walker withdrew his amendments, and the resolution was passed without debate.

The Senate then resumed the consideration of the bill to promote the progress of the pacific seas.

After some time spent in the amendments proposed, the bill was again laid over, and the omnibus bill was taken up.

After some further debate the Senate adjourned.

House—Various reports from committees were presented—occupying considerable time.

Mr. Bocock introduced a bill to establish Military Affairs, reported back to the Senate the bill to increase the rank and file of the Army, and to encourage enlistments, with an amendment.

Mr. Jones moved to refer it to the Committee of the Whole on the State of the Union.

Mr. Bart explained the provisions of the bill—It merely proposed to increase the number in the companies which may be sent out in defence of the frontiers.

Mr. Johnson opposed the passage of the bill—It had not even been printed, and would be sent to the Committee of the Whole, and then be discussed.

Mr. Evans, of Maryland, earnestly supported the bill.

After a lengthy debate, and without coming to any conclusion, the House adjourned.

Washington, May 24.

Senate—Several private bills were taken up and passed.

The bill making compensation to land officers for locating military land warrants, was taken up and passed.

Mr. Hunsburr's resolution in relation to removals from office was then taken up.

Mr. Webster expressed a desire to make some remarks upon the resolution, upon which, it was made the order of the day for Tuesday next.

A bill was introduced to provide for additional security to the lives and property of persons navigating the western waters.

The Senate then proceeded to the consideration of the bill to establish a branch mint at New York. Several amendments were proposed and debated upon, when the further consideration of the bill was postponed till Monday next, to which time the Senate adjourned.

House.—Mr. Putnam, from the Committee on Roads and Canals, reported a bill for the construction of a road and bridge in Oregon, which was referred to the Committee of the Whole on the state of the Union.

The House refused to go into committee on private bills, and resumed the consideration of the bill to increase the rank and file of the army, and for the protection of the western frontier.

After considerable debate, the bill passed—yeas 107, nays 50.

The House then went into Committee of the Whole, on the private calendar, but without effecting any thing of importance, the committee rose, and the House adjourned.

NEW YORK MARKET.

New York, May 24.

MOON REPORT.

Private letters have given buoyancy to the market.

Flour is without change.

Grain—Wheat is dull, at 150c for Genesee. Corn is buoyant, with a good shipping demand—Prices are unchanged, but tending upward.

Provisions—The market is without change.

Lead is dull, with sales of soft American at 4½ per cwt; Se has been refined for a few to arrive.

Linseed Oil is steady at 65c.

Groceries—Sugars are in active demand, and prices are ½ better. Molasses is firm, but transactions are small. Coffee is heavy and quiet, with sales of 800@ per lb, for Rio.

Hemp—The stock of hemp is large, and the market inactive; small sales are making at $110@115 per ton.

The weather is dull, chilly, and unpleasant.

The Europa made her trip from Liverpool to this city in 11 days and 2 hours—the quickest trip on record.

CINCINNATI MARKET.

Cincinnati, May 24.

Flour—The market is unchanged, but no demand is fair.

Whiskey—Sales at 22½@22½ per gall.

Grain—No sales of Corn to report—only a few lots are in the market.

Groceries—Sugar is in good demand, with sales of 150 hhds. at fall prices.

Provisions—Sales of 250,000 shoulders, in bulk, at 3½, and 100 hhds. Smoke shoulders, at 4c per lb.

Other articles are unchanged.

The river has fallen 23 inches during the last 24 hours. The weather is pleasant.

EXTRA FAMILY FLOUR.

FOR the convenience of the citizens, the proprietors of the Pittsburgh City Mills have placed boxes for the reception of orders at the following places:—

J. & R. Floyd, corner of Ninth and Wood streets.

M. Hayward, shoe store, 400 Liberty & Market sts.

A. Nesbon, store, Third street.

L. Wilcox, jr., druggist, cor Fourth & Smithfield.

John P. Smith store, corner High & Wills.

Telegraph Office, Fourth street.

F. W. Kelly, grocery, Fifth st, corner of Liberty.

M. Grove, store, Penn street; Ninth Ward.

The flour waggons will call twice or thrice daily for orders, and the flour, &c. delivered promptly, either in barrels or sacks—each flour is preferable for family use—without charge for cartage. It is plain that no accounts can be allowed, and that drivers can have no permission to leave flour without payment.

We hope the public will be pleased with this arrangement, as we shall endeavor to do their business.

COMMERCIAL RECORD.

PITTSBURGH BOARD OF TRADE AND MERCHANTS EXCHANGE.

COMMITTEE FOR MAY.

M. BOSWORTH, C. ROSS, D. WILMARTH.

Office, Pittsburgh Gazette, Saturday morning, May 23, 1850.

The market yesterday, so far as quotations were concerned, present no marked change in any article from previous day's quotations. The weather was very pleasant, and in a general way, a fair amount of business was done.

FLOUR remains quite firm at full prices—the recent advance being well sustained. A moderate business was done yesterday, at $5 from first hands, and $5,12½@5,25 from store, according to quality and brand.

RYE FLOUR—With small sales, we may quote at $3,75@3,81 from store.

CORN MEAL—Moderate sales are effected from store and from the mills, at 60@65c ⅌ bu.

GRAIN—There is a general firmness in the Grain market. The arrivals are comparatively light. Sales of 600 sks prime Yellow Corn, on the wharf, at 56c, sks returned.

GROCERIES—In the Grocery market there are no changes to notice. Sugar continues very firm, at 5½@6½ for good fair, and 6¾@7¼ for prime. Molasses is held very firm, at 30c ⅌ gallon—some demanding 31c for prime in oak bbls.

PROVISIONS—All articles under this head remain firm, at our last quoted rates. Bacon is in active request, for Shoulders 4½, Sides 5¼, and Hams at 6@7c ⅌ lb, from store and from smoke house. Lard is quiet at 6c for bbls, and 6½@7c kgs for No 1. We note further sales of sugar cured hams, at 8½c, and of prime dried beef, at 9@9½c ⅌ lb for plain and canvassed.

CHEESE—The arrivals of Cheese are still comparatively light, at 6¼ for good common W R, and 7@7½c for Cream.

DRIED FRUIT—Of dried Apples the market is entirely bare. Peaches are in fair supply, with sales at $1,25 ⅌ bu, for choice halves.

LEAD—Lead remains without change, but firm, at 4c for pig, and 4½ for bar.

LEAD PIPE—The present range of prices of Lead Pipe is 6½ to 7c ⅌ foot, according to size.

SHEET LEAD—Sales at 6½c by the sheet, and 6½c ⅌ when cut.

WHITE LEAD—Pure lead is selling at $2, and No 1 at $1,50 ⅌ keg.

The Rivers, Floods and Crops—The accounts brought in by our exchanges from the West and South, are gloomy indeed. Tennessee, Arkansas, Mississippi, and Louisiana have been visited by disastrous and wide spread floods; thousands of acres of best Cotton growing lands are under water, and the prospect of the coming crops are exceedingly unfavorable.

The Natchez Free Trader, of the 11th inst, says:

All information respecting the upper rivers seems rather gloomy. The water, at this point, is within three inches of its highest point this season. But it is not feet for the breasts in the levee above, it would have been higher than it was during the year. A good many of the planters opposite to Natchez, in the parish of Concordia, Catahoula and Tensas, are suffering with the overflow. The amount of stock lost will be considerable. We have been informed by several of the planters in those parishes, that they have given on all hopes of making cotton this year, and a great many speak of removing their hands to the hills.

The Concordia Intelligencer, of the same date, referring to the flood, says:

From information received through travelling friends, it appears quite improbable that the river will fall in time to enable the planters in this region, whose places are inundated, to raise a crop of cotton. It is to be hoped that they may succeed in raising corn for their own consumption, but more than this cannot now be reasonably expected.

The losses from this overflow will be estimated in millions, and the market price of our great staple must necessarily be affected by it. The crop of this year was in favor, by the elements, and by the much dreaded cotton worm, to enable it to exceed that of last year. If either prove unfavorable, the next crop will fall short of two million bls.

The Raymond (Miss) Gazette, of the 10th, says:

The most melancholy tidings continue to come to hand, with regard to the condition of things along the Mississippi bottoms. The country is under water—the levees constantly breaking, and the floods rushing over entire plantations, sweeping away every vestige of improvement, and annihilating the last fond hopes of many a planter.

The Holly Springs (Miss) Gazette, of the 2d inst, says:

The prospect of the cotton crop, in this section of the country, from all we can learn, are very gloomy indeed. There has been no much cold weather, so late in the season, that the growing crops of the great staple present a very sorry appearance.

The Marksville Prairie Star, of the 1st inst, says:

From all the information which we can gather, the prospect of the crops in every aspect is discouraging. The cold weather and frost during the early part of the planting season, have had the effect of checking the growth of every thing, and we are confident that the crops generally are one month behind an ordinary season. The cotton crop is much injured, and owing to the high water, the corn crop wears quite an unpromising appearance. Neither is the corn crop good one; occasionally good stands have been obtained from the planters, but the instances cannot, from present appearance, furnish much, unless a very great improvement should take place.

The ship America was launched on the 12th, by Capt Devinney, of the Ocean Wave, for $2000. She is to be thoroughly repaired, and will run as a regular packet between this city and Lasalle, in the place of the Ocean Wave, during low water of the Illinois river.—St. Louis Rev.

Sir James Murray's Fluid Magnesia.

PREPARED under the immediate care of the Inventor, and established for upwards of thirty years. This elegant preparation is recommended in all cases of bile, acidities, indigestion, gout, and gravel, as the most safe, easy, and effectual form in which Magnesia may, and indeed the only one in which it ought to be exhibited, possessing all the properties of the Magnesia in its general use, without being liable like it, to form dangerous concretions in the bowels, it effectually cures heartburn, without injuring the coats of the stomach, as soda, potass, and their carbonates are known to do; it prevents the food of infants turning sour, in all cases it acts as a pleasing aperient, and is peculiarly adapted to females.

Sir Humphry Davy testified that this solution forms soluble combinations with uric acid salts in cases of gout and gravel, thereby counteracting their injurious tendency, when other alkalies, and even Magnesia itself, and failed.

From Sir Philip Crampton, Bart., Surgeon General to the Army in Ireland.

Dear Sir—There can be no doubt that Magnesia may be administered more safely in the form of a concentrated solution than in substance; for this, and many other reasons, I am of opinion that the Fluid Magnesia is a very valuable addition to our Materia Medica.

Sir James Clarke, Sir A. Cooper, Dr. Bright, and Messrs. Guthrie and Herbert Mayo, of London, strongly recommend Murray's Fluid Magnesia, as being the finest, more safe and convenient than the solid, and free from the danger attending the constant use of soda or potass.

Slipped the Officer.—A gentleman from Washington county was arrested by officer Randolph, on Thursday afternoon, and handed over to the Constable of Elizabeth Township, who held a warrant from Esq. Lake. The arrested party contended that the warrant was illegal, and that he could not be held upon it. His counsel, Mr. Woods, sued out a writ of habeas corpus, and the prisoner was taken before Judge McClure, Mr. Snowden appearing for the Constable. After hearing the arguments the Judge remanded the prisoner back into the custody of the officer, but instead of going with him he managed to step out and has not since been seen.

Committed.—Gordon, the man arrested for burglary, had another hearing before Ald. Mejor, yesterday afternoon, and was finally committed.

Police.—A man named Giblan was committed yesterday, in default of $500 bail, for having assaulted Officer Randolph with a pistol, on the day before. The officer was endeavoring to arrest him for disorderly conduct.

N. B.—The above is publishing by subscription of the most eminent in the engineering profession of the United States, and will be completed in 12 numbers, 25 cents each to those who remit their names and subscriptions before the 1st of June next, when the first six parts, or one half the work, will be published; after which the price will be raised to $1 per part.

To those making a present remittance of $3, and the remainder, $3 on the delivery of the work, which will be ready for the press in a few weeks, the work will be forwarded regularly as published. Parties remitting $5 shall receive it monthly, Post Free, to any part of the United States.

This is a work that was a great desideratum, and must prove of great benefit to the engineering profession generally, and especially to the lyre in practical engineering and mechanical knowledge; in truth it stirks us, that it would require years of labor and patient toil on the part of a young engineer to prepare the drawings, and collect the information that will be embodied in this work, and should he succeed, the tax would be no trifling sum of $50.—Scientific American, March 16, 1850.

In connection with this subject (Iron Rail Road Structures) we take occasion to call attention again to Mr. Duggan's valuable and expensive publication, exhibiting drawings, with full descriptions of the various stone, iron, and wood bridges, viaducts, culverts, &c. of all the Rail Roads in the United States. Mr Duggan is an accomplished Architect and Civil Engineer, who came from Ireland to take country to excercise his profession, but finding rail road construction here, in many respects, different from that to which he was accustomed in Europe, he applied himself to the study of our country, and the results of his investigations embodied in this work, are well calculated to meet the wants of engineers, and to assist draughtsmen, bridge builders, mechanics, and students.—New York Journal of Commerce, February 15, 1850.

LOCAL MATTERS.

REPORTED FOR THE PITTSBURGH DAILY GAZETTE

Theatre—The Serious Family will be produced to night. The nautical drama of the Ocean Child will also be performed entire. On Monday Mr. A. A. Addams commences an engagement of a few nights.

Household Words.—Our neighbor Holmes on Third street, is ready for his customers with his usual supply of new books and periodicals. He has received No. 6 of Dickens' Household Words, of which he will also furnish the back numbers. Also, the London Illustrated News for May 4th, with a supplement containing a memoir on the History and Topography of Rome, illustrated with a large and beautiful view of the city, taken in 1549; and the London Punch, of the same date.

A Relic.—We saw yesterday morning, at the Old St. Charles House, on Water street, part of the wheel of an artillery wagon which was found a few days ago in the Ohio river, near McKee's works. It is supposed to have belonged to the artillery of the French occupants of Fort Duquesne, as they are known to have thrown a considerable portion of their munitions of war into the river at this place, at the time of their evacuation of the fort.

Accident.—A man who was at work upon the hill side below the Marine Railway, day before yesterday, was precipitated over the crags, by the earth sliding from under him, and had his leg fractured in the fall.

Accident.—A man who was at work upon the hill side below the Marine Railway, day before yesterday, was precipitated over the crags, by the earth sliding from under him, and had his leg fractured in the fall.

Passing Counterfeit Money.—A man and his wife were arrested yesterday by officer Fox, for passing counterfeit money. They were committed for trial by Ald. Major.

Free Soil Meeting.—A meeting of Free Soilers was held in the Diamond Market Square, last night. It was addressed by Dr. Lemoyne, of Washington, John A. Wills, Esq., and others. Resolutions expressive of the sentiments of the meeting were passed.

The Tombs, in Allegheny, which have hitherto been in a very dilapidated and insecure condition, have undergone a thorough repair. They are now in a state to bid defiance to any attempt at escape, and are also made tolerably comfortable for their unfortunate occupants.

A Cold Bath.—A skiff, in which two lads were playing, was capsized near the upper Allegheny Bridge, yesterday. The little fellows swam to a raft which was lying at the shore, close by, and escaped without any further damage than a good wetting, and the loss of their boat.

MISCELLANEOUS.

MOSSELMAN ZINC.

THE Vieille Montagne Company supply their agents with Rooting and Flooring in sheets 2x7 feet, from 11 to 22 ounces per square foot. Corrugated in sheets 2x7, 27 oz. for roofing public buildings and depots. Roof sheathing, 24x48 inches, from 14 to 25 ounces. Nails, Spikes, Wire, Sugar Moulds, Perforated Zinc, Zinc Paint, &c.

They warrant their metal pure, and free from any admixture of iron, or any other substance, and recommend it for the manufacture of most articles in the house furnishing line, as it does not rust, is not affected by the action of water, and may be polished, painted, and japanned.
