How the Romance of Indian Life was Taken Out of a Yankee Schoolmistress.

From the Kansas City Times. The steamer Fontenelle arrived at this city yesterday morning after a three months' trip to Fort Benton and the mountains. Among her miscellaneous cargo of robes, furs, peltrics, and Nebraska corn, was a female named Miss Amanda Barber, nee Squatting Bear, fered herself in 1867 as a voluntary missionary to the Brule Sioux, then oc-

Miss Barber created quite a sensation in the Eastern States by her marriage with a young Indian named Squatting Bear, who accompanied a party of Sioux to Washington in 1967. Miss Barber was at the time a clerk in one of the departments at Washington, in a position secured for her by Gen. Butler, before the impeachment fiasco. According to her own statement, made yesterday to our reporter, she was firmly impressed with the reality and perfection of the red men of the plains. She had read everything relating to the Indian tribes, from the reports of the Commissioner of Indian Affairs down to the latest dime novel. In a fit of enthusiasm or temporary insanity she offered herself to and became the wife of Squatting Bear, a junior chief in the Lone Horn band of Brule Sioux, and with him and his party returned to the Yankton agency, where she was duly initiated into her new life

as a white squaw.

Her romantic ideas of Indian life seem to have received a terrible shock since her introduction to her new home and relations, and though she endeavored to fulfill her mission as a teacher and missionary to the best of her abilities, her progress appears to have been as slow progress of civilization on the Plains. She states that her first great surprise was being required to mount on a wild, vicious pony and travel without saddle or attention over the country from the Missouri to the White Earth River, a distance of several hundred miles. Her inability to make the journey provoked mirth among her huscompanions, and finally exasperated Squatting Bear until he bound her with a rope to the pony's back and led the mimal himself to the westward trail. She was still more surprised to find her husband possessed of two other wives, one a vicious, dirty squaw of forty years of age, the other a girl of scarcely fourteen years. Her life in his wigwam, or teepee, was not as bright and happy as she expected it would be. Her husband's absence was taken advantage of by her rivals to compel her to perform the vilest drudgery, such as gathering wood, cooking meat, and scraping robes for the tanning process; but during Squatting Bear's presence at home Miss Barber appears to have been better

Her husband, in a violent fit of passion, killed his oldest squaw during the first year she was with the tribe, when, without warning or notice, she was hurried off to the main camp of the Brules, three days' journey toward the mountain, and from thence she accomparfied the tribe on its annual buffalo hurt, where she became sick from exposure and fatigue. She was left at a temporary drying camp at Rawhide River, where she attempted to escape by walking to Fort Fetterman, a disance of sixty miles. For this attempt she was beaten until nearly dead, and then sold by her husband for three penies to a Cheyenne chief who sported the expressive soubriquet of Coo-Coose, or Baconsides. She was taken north in 1870, and remained with the Cheyennes ever since, until her escape this spring. when she made her appearance at and claimed the protection of the authorities at Fort Benton. Miss Barber's experience would, no doubt, make a story more thrilling than that of the "Escaped Nun." She is a woman rather plain in appearance, skin tawny and black, eyes small, dark, and impressive, voice rather masculine—and, in fact, just such a weman as Mrs. Col. Anthony or Tennie Clafflin would choose for a second in command.

Miss Barber conversed with our reporter without the least diffidence and answered any questions asked of her. She says that so far as the romance of of it. Her efforts to teach and reform with indifference and contempt. She learned the Sioux language easily, but the Cheyenne dialect was harder to acquire. She has a much higher opinion of the Cheyennes than of the Sioux. The latter tribe she says are to blame for nearly all the thieving and murdering done in the white settlements. She found it necessary to paint and color like the rest of the tribe while she was with them, and twice witnessed the murder or execution of white men, one a soldier of the Thirty-Second United States Infantry, who had been taken while out hunting, who was burned and scalped; the others were two teamsters brought from Fort McPherson. All three were burned at a place called "Saddler's Hill," in the Nebraska "Bad

Miss Barber left the steamer Fontenelle at this port, and after a few hours' rest started on her way to the home of her friends at Milford, Massachusetts.

Instinct.

In speaking of the peculiar habits of animals which follow certain curious acts from one generation to another, the youngest in the series, without instruction or the force of example, doing precisely as one of its remote ancestors did hundreds of years before in the construction of a nest, building a clay house like the auts, digging a hole or in fashioning a tray door over the entrance to its den, as the tarantula always has in California, it is called instinct.

It is unhesitatingly acknowledged that this faculty or determination to exercise the propensity to repeat the doings of the parents, without ever having seen or known them, curiously exemplified in making hexagonal cells by the honey bee, cannot be explained. No amount of physiological or any other bind of learning furnishes the faintest shadow of a reasonable answer to the question, "By what means does nature impel individuals in those lower ranks

of dumb life to perform those marvels ?" Man possesses physical and moral in-stincts combined—and because it is so, he is a conscious progressive being. On the other hand, animals have instincts, but no meral attributes, and conse-quently never can rise above the level

AN EXTRAORDINARY STORY.

Love, Secret Marriage, Betrayal, Deser-tion, Divorce, and Revenge-A Bomb-shell for Washington Society,

From the Washington Capital.

Some six years since a young law student of this city fell in love with and ourted a beautiful girl, who returned his passion, and the two became en-gaged to be married. The young gentlenan was poor, however, and not yet adwho, in a fit of fanatical romance, of mitted to his profession, so that marry ing for the time seemed out of the ques-tion. He was madly in love, however, cupying the territory between the Cheyenne River and the Big Horn Mountains, Dakotah Territory.

Mon. He was madly in love, however, and fearing that before he could secure a sufficient competence to justify marrying he might lose the object of his secure. a sufficient competence to justify marrying he might lose the object of his affections, he pleaded with her to have a secret marriage, and promised that immediately after the ceremony she should return to her home, and he would, as usual, go to his bachelor quarters. After much persuasion she consented, and the two were united in wedlock at the Church of St. John, in Georgetown, by the Rev. Mr. Tillinghast, upon the - of June, 1866.

The young man for a while was true to his promise, but he soon became as importunate for the possession of her person as he had been for the secret marriage. Of course she yielded, but they both kept their secret, and as progress in the law was very slow, she, at his suggestion, brought an influence to bear upon the Administration that resulted in an appointment to a Western Territory. Her social position and connections were sufficient to control the appointment, and she had money enough

provide him with an outfit. The young man departed, and made quite a successful career for himself in his new field of operations, and, writing regularly and returning at intervals, he ssured her of his heartfelt affection and earnest endeavors to procure a home suited to her. This sort of thing continued for four years, when she was telegraphed to meet him at Cincinnati. She nastened to obey, and arriving at the last-named place, found her husband in a state of great excitement. He told er that he had got involved in some moneyed transactions, and the choice was presented to him of either marrying a very rich woman, who loved him to distraction, or being sentenced to the penitentiary, and that he had married and was now in her power. She could punish him for his dastardly conduct, and if she did that he could not complain; he added however, that he had parted from the woman at the door of the church, that he did not love her, and could not love any one but his lawful wife.

Appealed to in this manner she could only ask him what could be done, say-ing that she was ready and willing to shield him to the last. He then suggested a divorce, and said that he could go to New York and procure one without any difficulty. To this she consented, and the two wended their way to the great commercial centre, where he found divorce lawyer, and in three days a divorce was procured upon testimony manufactured between the husband and shyster, of the most extraordinary char-

acter. One man, for example, by the name of —, swore that he had known the plaintiff and her husband for years ness celling himself ----, swore that the occasion he had waited at such a place for the defendant until tired, and then has generally ceased. went to the room, knocked at the door, being told to come

That the marriage between the said plaintiff, and the said defendant, —, be dissolved, and their said marriage is hereby dissolved accordingly. And the said parties are and such of them is free from the obligations thereof. And further that it shail be law-ful for the said plaints if to marry arain in the same manner as though the said defendant was actually dead. But it shall not be lawful for the said defend-ant to marry sgain until the said plaintiff be actually dead.

Enter, S. Jones, Judge. The poor wife returned to her home feeling that she had done a heroic act in shielding the man she loved, and sustaining herselt with this thought time rolled on, until one morning she Indian life is concerned, she found none awakened to the startling fact that she awakened to the startling fact that she at Caledonia for the purpose of breeding had been cruelly sacrificed. She learned the better kinds of fish for distribution the young Indian children were treated that the man to whom she had clung through the waters of the State has was about to marry a fashionable lady of the first connection in the land. She sioners pride themselves on having the made inquiry, and found, to her sickenwas to be perpetrated. She hastened to New York and procured a certified copy of fish. Millions of the spawn of the of the decree, intending to appear at the church on the day of the mock marriage and forbid the bans by presenting a copy of the legal document that showed that, although separated from her, he was not authorized to marry another.

Unfortunately, through circumstances over which she had no control, she arrived too late. The cruel act had been accomplished. A grand wedding, graced by the presence of members of the Cabinet and our most aristocratic people, had occurred, and the papers were full of glowing accounts of the magnificent beremony. Our readers will recollect to thool. Every year large numbers of the event, and they will have occasion | various kinds of bass and other freshto recur to it again, as legal steps are water non pass into the Eric Canal from being taken by the betrayed wife's Lake Erie. These fish vary in size from friends to bring this wrong doer to four inches to fifteen in length, and may punishment. The wife is now satisfied be caught in immense numbers when that the whole story of the second mar- the water is drawn off in the fall. In

she is, of course, very indignant. In addition to all this we learn that tributed wherever there is a demand for this gay Lothario paid his court last any of these fish. It is not believed that winter to one of our most beautiful and accomplished belles, whose appearance in society always created a flutter among the gentlemen who flocked to her side or are convinced that any attempts to to bask in the sunshine of her smiles introduce this fish in our waters would and to enjoy the brilliancy of her conversation. It was supposed that the gentleman, as he then appeared to be, and this fascinating lady, whose family is one of the oldest and most exclusive in the country, were engaged; but it seems that while she enjoyed his conversational powers, she discouraged any tender emotions, and thus saved herself from occupying the unpleasant position which the last-mentioned bride now

holds. In a few days the fashionable circles of Washington and a certain lady of the Cabinet will all be at sea in a high state of astonishment and excitement, and a certain territorial official, now candidate for Governor, will be brought up with a round turn.

Progress of Fish Culture.

The importance of the results which may be obtained through a scientific system of fish culture has been made so manifest by practical experiment that organized efforts for stocking the public waters with artificially-hatched fish have been adopted in nearly all of the States. In consequence of the interest which has been excited on this subject, Congress has also taken the matter in hand, and appointed Prof. Baird, of the Smithsonian Institution, a commissioner to exumine into the condition of the national fisheries and the cause of their diminution in yield.

Prof. Baird's researches have develped some extraordinary facts. He spent the most of last summer on the Massachusetta coast, where he ascertained that fishing stations which in 1560 produced thousands of fish now furnish hundreds only, or at that ratio, giving a diminution of quite nine-tenths, and often more. The depreciation has been gen-eral, except with blue-fish, which are now as abundant as ever they were. This remarkable decrease of fish is ascribed by many to the use of the pound net. Of these there are only sixty along the entire coast of New England : yet they secure nearly all the fish that are taken, and control the supply of the market, in consequence of which the nook and line fishermen and the fykenen have almost been driven out of the business.

Four men will manage a pound net with a leader a mile long, and the catch of a single period of six hours has frequently been as large as one thousand blue-fish, or an equal quantity of other varieties.

Such a mode of destruction, carried on the year through, in season and out of season, would naturally account for a great decrease in fish; but the theory that it is the sole cause of destruction is damaged by the fact that the blue-fish, which are so plentifully caught in these contrivances, are as abundant as ever Prof. Baird, while he denounces the use of the pound net, furnishes a more rational explanation of the whole matter. To the increase of the blue-fish he as cribes the destruction of the smaller fish The oil factories have used up the menhaden to an extent which has made them scarce. The menhaden are the natural food of the blue-fish, and this supply failing the latter were driven to feeding on the killies, porgies, young weakfish, striped bass, and young shad. Whether this state of things can be remedied remains to be seen. The matter is one of importance, as fish contribute largely to the support of a large and industrious class of our population who nhabit the sea shore.

In regard to restocking our lakes and ivers with fish it has been demonstrated that it can be done without difficulty and at comparatively trifling expense. The yield of shad in the Connecticut in 1871 was far greater than it had been fowl for a long time.—Country Gent. for many years, many millions of shad fry having been placed in the river three Commissioners of Fisheries, Messrs. Horatio Seymour, Geo. C. Cooper, and R. and agreeable to the taste. Rarely h B. Roosevelt, have labored enthusiasticit been known to fail of giving relief. ally for the advancement of scientific in Dowingsville, Pa., a place the poor fish culture, and their report of their op-woman had never seen. Another wit-erations for the year 1871 affords evidence that their efforts have not been parties were bone fide residents of New unrewarded. Their operations on the York, and that he had frequently accompanied the defondant in nightly ing the supply of shad have been more visits to houses of ill-fame; that on one position to their work from fishermen

The progress made in fish culture in in, found the the New England States has convinced defendant putting on his clothes, with the most incredulous that unless active a prostitute undressed in the room, measures are pursued to keep pace with Upon this showing the divorce was our Eastern neighbors our fishermen granted, and the decree winds up as fol- will be driven out of the market and their occupation ruined. Last year over 8,000,000 shad eggs were hatched and is hoped that in a few years the fisheries fry will be artificially hatched, when the yield will defy diminution by all the engines of destruction that the wit of man can devise. But to effect so desirable a result the enforcement of laws which will give the breeders a chance to reach the upper waters, where they can hatch their young, is indispensable.

The State hatching house established been greatly enlarged, and the Commischeapest and largest fish-breeding estabsalmon trout were taken there from the propose to pay more attention to the cultivation of the salmon trout and less to that of whitefish than heretofore, for are a handsome game fish, and will bite readily at the hook.

riage was fabricated to deceive her, and this way the Commissioners have reached an inexhaustible supply, which is disthere are any streams in this State adapted to the culture of the true salmon (salmo salar), and the Commissionprove futile.-N. Y. Sun.

Petrifying Human Bodies. A traveller writes as follows to the London News: "The petrifaction of tury it was practiced by a medical proved fatal to him, he would to-day be man at Florence, and in one of the hospitals of the town the bosom of a woman popular vegetable specific contains no It has all the appearance of ivory, and is in a perfect state of preservation. FARM AND HOUSEHOLD,

CLEANING FEATHERS .- How shall we enovate old feathers, and also clean old | Bonds. ticks? This inquiry I have seen in the papers. My way is this: In June when the weather portends a heavy shower of rain. I lay the feather tick on the lawn or clean grass, and smooth it over even-

ly. One-half hour's heavy rain will clean one side of a badly soiled tick, unless there be grease spots. In this case I take a pail of hot suds, pour it on the spots, brush them, and let the rain rinse it out. I then turn it over and serve the other side the same. If the shower be of short duration, I put the bed out in the next rain. To dry the bed, lay up the tick on slat-work, clean rails, or something of the kind. If the feathers are much wet, so much the better. When drying, shake up, beat with light rods, pick up lumps if there be any. When the bed is dry, the tick will be clean, and the feathers almost as good as new. Some of our beds have been used thirty years. I have laid them in rain every summer; they are now clean and good. It takes but a short time to dry the bed, but when it is dry to appearance, it is not at all fit to sleep on, but should be laid on an empty bedstead a month or more, with the windows up. This caution may be unnecessary, as no wise head sleeps on feathers in summer.

As for the labor, I had rather clean five bods in the rain than one in the manner generally recommended—that is by pouring the feathers from the tick on a sheet in an empty room (when there is no empty room in the house), washing the tick, stirring up feathers thoroughly, returning to the tick, and laying in the sun for several days, turning and beating up often .- M. D. E. in Western Rural.

A PORTABLE ICE HOUSE .- Take an iron-bound butt or puncheon, and knock out the head, then cut a hole the size of a bottle-cork in the centre of the bottom. Put a wooden tube twelve inches smaller into it, so that it will not touch the edge of the butt, within six inches all around it. Fill up the space with pounded charcoal; put two pieces of wood under the centre tub when it is placed in the butt, and fit a cover with a handle tightly to it. Arrange hooks around the tub on which to hang fish or meat, &c. Fill a bag two feet square with pounded charcoal to lay over the cover of the inner tub, and fit a cover to the outside one. Bury it four-fifths of its height in the cellar, which must be dry; wet ground will not keep it fresh. Fill the inner tub one-third full of ice, which will not need to be renewed-oftener than once a month. A hole similar to the one bored in the outer tub should be made in the inner, to carry off the loisture. Keep the whole closely covered, and you will have a miniature ice house which will preserve fish, flash and

LEMON FOR A COUGH.-Roast the years previous by Mr. Seth Green, under the auspices of the New England Comlemon very carefully without burning missioners. It takes three years for cup upon three ounces of sugar, finely shad to attain their growth. Our own powdered. Take a spoonful whenever your cough troubles you. It is good and agreeable to the taste. Rarely has

A New Chicago Specialty.

A Chicago paper says: Divorce parties are coming into fashion in Chicago. Social philosophers say that all great questions pass through three stages, viz.: Ridicule, argument, adoption. Chicagoians have bravely encompassed them all, so far as divorce is concerned, and, as the world knows, now revel in puted luxury of full possession. In fact, divorce has thing, and like all kindred events, such as births and marriages, is celebrated with festive proceedings. The West division witnessed an affair of this kind 8,000,000 shad eggs were hatched and the other evening. There was a large gathering, and the newly-made widow the other evening. There was a large chant's Gargling Oil will be found an invalua-gathering, and the newly-made widow ble Liniment, and worthy of use by every res-received the congratulations of friends ident in the land. We know of no proprietary will be so improved that 500,000,000 of and relatives with as much pleasure as would a newly-wedded wife after the ceremony of marriage. A handsome divorce cake " was one of the features of the occasion. It was mounted by a handsome monogram, the letter "D, for divorce, being entwined with the lady's name before her marriage. There were also some highly suggestive pres-

A good wardrobe, economically pur ing disgust, that the day was actually lishment in the world, one which is chased, is indispensable to every bride, set upon which this infamous outrage capable of supplying all the public waters in the State with the salmon tribes article required is really indispensable to every housekeeper. A peculiar fagreat lakes to be distributed through the cility to purchase at close figures is ab-State, or to be developed and then dis-solutely necessary to the pater familias tributed. In future the Commissioners of large families and moderate circumstances, and it is at least desirable that dealers and jobbers in any and every the reason that the whitefish have to be kind of goods and merchandise, be entaken with a net, while the salmon trout abled to sort up stocks in small or large quantities as may be required, from time No means have been discovered of to time. All this can be accomplished hatching black bass, but substantially by addressing the New York Purchasing the same end is attained by another Bureau, 704 Broadway, N. Y. Endorsed by prominent New York men. Send for circular.

KILLED BY A FALSEHOOD,-"He is dead," said a friend of ours the other day, in answer to an inquiry after the health of a mutual acquaintance. "Dead! you don't say so. Of what did he die?" "Of Credulity" was the reply, "he believed in a patent medicine of which the chief ingredient was forty-red rum, and it proved the death of him." This was rue; the unfortunate man had taken for liver complaint, a compound of fiery alcohol and root juice, and it had killed him. Now, did that misguided invalid require a tonie? He did; but not a spirituous excitant. The writer of this brief statement is confident, from his own experience, that if the Martyr to Drugged Alcohol, had resorted to Dr. corpses is not a new art in Italy. The Peruvian Syrup, a Protected Solution of the Protoxide of Iron, is so combined as to have the character of an aliment, as easily digested and assimilated with the blood as the simplest food. It increases the quantity of Nature's (non Vitalizing Agent, Iron in the blood, and cures "athousand ills," simply by Toning up, Invigorating and Vitalizing the System. The en-riched and vitalized blood permeates every part of the body, repairing damages and waste, searching out morbid secre-tions, and leaving nothing for

disease to feed upon.

This is the secret of the won-derful success of this remedy in curing Dyspepsia, Liver Com-plaint, Dropsy, Chronic Diar-rhwa, Bolls, Nervous Affections, Chills and Fevers, Humors, Loss of Constitutional Vigor, Diseases of the Kidneys and Bladder, Female Complaints, and all diseases originating in a bad state of the blood, or ac-companied by debility or a low state of the system. Being free from Alcohol, in any form, its energizing effects are not fol-lowed by corresponding reac-tion, but are permanent, infusing strength, vigor, and new life into all parts of the system, and building up an Iron Constitution.

Thousands have been changed by the use of this remedy, from weak, sickly, suffering crea-tures, to strong, healthy, and happy men and women; and invalids cannot reasonably hesitate to give it a trial.

See that each bottle has PERU-VIAN SYRUP blown in the glass. Pamphlets Free.

Vinegar Bitters are not a vile Fancy Drink, made of Poor Rum, Whoskey, Proof Spirits and Refuss Liquors, doctored, spiced, and sweetened to please the teste, called "Tomics," "Appetizers," "Restocers, Etc., that lead the tippler on to drunkenness and ruin, but are a true Medicine, made from the undiversors and herbs of California, free from all Alcoholic Stimulants. They are the Great Blood Pariner and a Life-giving Principle, a Perfect Renovator and Invigorator of the System, carrying off all poisonous matter and restoring the blood to a healthy condition, enriching it, refreshing and invigorating both mind and body. They are easy of administration, prompt in their action, certain in their results, safe and reliable in all forms of disease.

No Person can take these Bitters according to directions, and tenum long unwell, provided

ing to directions, and remain long unwell, provided their bones are not destroyed by mineral poison or other means, and the vital organs wasted beyond the point means, and the vital organs wasted beyond the point of repair.

Dyspepsia or Indigestion. Headache, Pain in the Shoulders, Coughs, Tightness of the Chest, Diztiness, Sour Enucations of the Stomach, Bad Taste in the Mouth, Billous Attacks, Palpitation of the Heart, Indiammation of the Langa, Pain in the regions of the Kaliegy, and a hundred other painful symptoms, are the offsprings of Dyspeisia. In these complaints it has no equal, and one bottle will prove a better guarantee of its merits than a lengthy advertisement.

For Femnle Complaints, in young or old, married or single, at the dawn of wemanloost, or the turn of life, those Tonic Bitters display so decided an influence that a marked improvement is soon perceptible.

tible.

For Inflammatory and Chronic Rheumatism and Gout, Dyapepsia or Indigestion, Bilious, Remittent and Intermittent Fevers, Diseases of the Blood, Liver, Kidneys and Bladder, these Bitters have been most successful. Such Diseases are caused by Vitiated Blood, which is generally produced by derangement of the Digestive Organs.

They are a Gentle Purgative as well as a Tonic, possessing also the peculiar merit of acting as a powerful agent in relieving Congestion or Inflammation of the Liver and Visceral Organs, and in Bilious Diseases.

For Stein Diseases, Eversion, Tonic, Sch.

Discares.

For Skin Discares, Eroptions, Tetter, Sali-Rieum, Illotches, Spots, Pimples, Pustules, Roils, Carbuncles, Ring worms, Scald-Head, Sore Eyes, Lrysipelas, Itch, Scurts, Discolorations of the Skin, Humors and Diseases of the Skin, of whatever name or nature, are literally dug up and carried out of the system in a short time by the use of these Batters. One bottle in such cases will convince the most incredulous of their curative effects.

such cases will convince the most increasives of curative effects.

Cleanse the Vitiated Blood whenever you find its impurities bursting through the skin in Pimples, Eruptions, or Sores; cleanse it when you find it obstructed and sloggish in the verins; cleanse it when it is foul; your feelings will tell run when. Keep the blood pure, and the health of the system will follow.

Grateful thousands proclaim Vinneax Birrars the most wonderful Invigorant that ever sustained the sinking system.

Plu, Tape, and other Worms, lurking in the system of so many thousands, are effectually detailed the system of so many thousands, are effectually desired.

Pin, Tape, and other Worms, lurking in the system of so many thousands, are effectually destroyed and removed. Says a distinguished physiologist: There is searcief an individual upon the face of the earth whose body is exempt from the presence of worms. It is not upon the healthy elements of the body that worms exist, but upon the dieased humors and slimy deposits that breed these living monsters of disease. No system of Medicine, no vernifuges, no authelimities, will free the system from worms like these Bitters.

Mechanical Diseases. Persons sugaged in Paints and Minerals, such as Pambers, Engaged in Gold-heaters, and Miners, as they advance in life, will be subject to paralysis of the Howels. To guard against this take a dose of WALKER'S VINEGAM BITTERS once or twice a week, as a Processive.

Hillous, Remittent, and Intermittent Billous, Remittent, and Intermittent Pevers, which are so prevalent in the valleys of our great rivers throughout the United Stares, especially those of the Messissippi, Oloin, Missouri, Illinos, Tennessee, Cumberland, Arkansas, Red, Colonada, Bravos, Rio Grande, Pearl, Alabama, Mobie, Savannah, Roanoke, James, and many others, with their vast tributaries, throughout our entire country during the Summer, and Autumu, and remarkably so during seasons of unusual heat and driness, are invariably accompanied by extensive derangements of the stomach and liver, and other abdominal viscera. There are always more or less obstructions of the liver, a weakness and irritable state of the stomach, and great torpor of the bowels, being clogged up with vittated accumulations. In their treatment, a purgative, exerting a powerful influence upon these various organs, is essentially necessary. There is no eatharite for the purposa equal to De. J. Walker's Visus, is BITTERS, as they will speedily remove the dark-co-ared viscid matter with which the bowels are loaded, at the same time stimulating the exerctions of the live, and generally existency the healthy fourtings. dark-co...red viscid matter with which the bowers are loaded, at the same time stimulating the secretions of the live, and generally restoring the healthy function

of the digestive organs.
Serofula, or King's Evil, White Swellings, Scrotting of Name 2 (1997) Ulcers, Expressions Indoormations, Indoormations, Mercurial Affections, Old Sores, Eruptions of the Stim, Sore Eyes, etc., etc. In these, as in all other constitutional Diseases, WALKER'S VINIGAR BETTERS have shown their cases, WALKER'S VINIGAR BETTERS have shown their

eat curative powers in the most obstinate and intrac Dr. Walker's California Vinegar Bitters act on all these cases in a similar manner. By purifying the Blood they remove the cause, and by resolving away the effects of the inflammation (the tubercular deposits) the affected parts receive health, and a permanent cure

the effected parts receive health, and a permanent cure is effected.

The properties of Dr. Walker's Vinngar Bittreas are Aperient, Diaphoretic and Carminative, Nutritions, Laxative, Diuretic, Sadaive, Counter-Britant, Sudoriic, Alterative, and Anti-Bilous.

The Aperient and mild Laxative properties of Dr. Walker's Vinngar Bittreas are the best safeguard in all cases of emptions and malignant fevers, their balsamic, healing, and soothing properties protect the humors of the fauces. Their Sedative properties allay pain in the nervous system, stomach, and howels, either from inflammation, wind, colic, cramps, etc. Their Counter-Irritant influence extends throughout the system. Their Diuretic properties act on the Kidneys, correcting and regulating the flow of urine. Their Anti-Billous properties stimulate the liver, in the secretion of bile, and its discharges through the biliary ducts, and are superior to all remedial agents, for the sure of Billious Fever, Fever and Ague, etc.

Fortify the body against disease by purifying all its fluids with Vinegar Bittreas. No epidemic can take hold of a system thus forearmed. The liver, the stomach, the bowels, the kidneys, and the nerves are rendered disease-proof by this great invigorant.

Directions—Take of the Bitters on going to bed

orant.

Directions.—Take of the Bitters on going to bed at night from a half to one and one-half wine-glassfull. Eat good nourishing food, such as beef steak, mutton chop, venison, roast beef, and vegetables, and take out-floor exercise. They are composed of purely vegetable ingredients, and contain no spirit. I.WALKER, Prop'r. R. H. McDONALD & CO., Druggists and Gen. Agts., San Francisco and New York, &p SOLD BY ALL DRUGGISTS & DEALERS.

"Their Name is Legion."—Dyspepsia is the "Their Name is Legion." "Dypopes is the narent of more evils than flew out of Pandons's box. Billionstess, sour stomach, headache, constitution, nervous debility, namesa, and indescribable montal missry are among its terrible offspring. Give them all the coup de grace with Tansart's Errenvischer Sklizzes Aprikinn, which renovates and regulates the bowels, tones the stomach, and is a sure remedy for indigestion and all its concennitants.

SOLD BY ALL DRUGGISTS.
