PROFESSORS OF THE "BLACK ART." Are Messrs. STUART PETERSON & Co., of Philadelphia, and very accomplished ones too—they impart a certain *polish* to their manipulations that please the eye, appeals to the judgment, and reduces one to stamp them "Masters of the situation !" Now plainly, S. P. & Co. are not perambulating jugglers, or anything of the sort, but good, solid, matter-of-fact Philadelphia Stove Founders, whose manners are as well polished as their wares, and whose business integrity is fully as good. This firm is now offering to the trade the "Barley Sheaf," a cook that combines every desired quality. Send for a descriptive circular and beware of bogus affairs!

For Sale by RHINESMITH & RUPP Carlisle, Pa.

We call the attention of our readers to the advertisement in another column of the "Improved Star Shuttle Sewing Machine." This machine is sold at about one-half the price of other first-class machines. It has a beautiful, noiseless movement, and does to perfection all kinds of plain and fine sewing. The sales are rapid and there is an increasing demand for the machines wherever they are introduced. Agents will find in the sale of this machine, an opportunity rarely offered to make money.

WE JUDGE FROM THE IMMENSE Sales that Mrs. S. A. Allen's Improved (*new style*) Hair Restorer or Dressing (*in one bottle*) is preferred by every one. Every Druggist sells it. Price $1.

Of the almost innumerable number of preparations in the market for restoring gray hair to its original color, we know of none which gives so universal satisfaction as *Ring's Vegetable Ambrosia*. We have tried it and found it to restore the color in a truly wonderful manner—as well as to remove dandruff and all itching caused by humors of the scalp. Try it and be satisfied.

SPECIAL NOTICES.

We clip the following from the Editorial columns of the "LEADER," Cleveland, Ohio, one of the most influential papers of the West.

HOOFLAND'S GERMAN BITTERS.

In calling the attention of our readers to this valuable preparation, we do so with a full conviction that it is a highly scientific remedy for Dyspepsia, and all diseases arising from a disordered state of the Liver or stomach. In making this assertion, we are sustained by the testimony of many of the eminent professional men of the country. Lawyers, physicians, and clergymen, all bear witness to its great usefulness. It contains no alcoholic stimulant, but is purely medicinal, being compounded from the prescription of one of the most celebrated physicians of his day, and is well known and used by the faculty of the present time. It has been before the public in its present shape for over twenty years, and during that time has become "known all over the world." To those in need of a remedy of this character, we would say procure it at once, and do not waste your time and money on the many worthless compounds that now flood the market; and those who are not in immediate want of it, we would advise to be prepared to battle with disease by keeping it always in the house

HOOFLAND'S GERMAN TONIC

Combines all the ingredients of the Bitters with pure Santa Cruz Rum, orange, anise, &c. It is used for the same disease as the Bitters, in cases where some Alcoholic Stimulant is required. It is a preparation of rare value, and most agreeable to the palate.

PROOFS OF THE SUPERIORITY OF

THE AMERICAN

WALTHAM

WATCHES

The true value of Machinery applied to Watchmaking is not that by its use Watches are made rapidly, but that they are made correctly. Very few people know why a Waltham Watch should be superior to any other. In the first place, at Waltham the Watch is regarded as only a machine, to be constructed like any other machine, on mechanical principles. If the watches are good, it is because the machinery is good. Of course there must be no defect in the principle or plan of the movement—no mistake in the sizes or shapes of the pieces of which it is composed—nothing wanting in their properties, and no error in their positions. These points once thoroughly settled, it rests wholly with the machinery; constructed with infinite diversity of form and function expressly for the purpose, to produce the finished pieces. By means of multiplying guages and microscopes, tests and inspection for the detection of wear in the cutting tools, and for faults and flaws in steel or stone are made to accompany the work in every stage from begining to end. As a necessary result, the watch goes together a perfect machine. Every part is found to fit properly in its place, Every pin may be pushed till it pinches, and every screw turned home. Instead of a sluggish and feeble action, the balance, even under the pressure of the slightest mainspring, vibrates with a wide and free motion, and the beat has the clear ringing sound always characteristic of the Waltham Watch. The machine is a timekeeper from the start.

This system of watchmaking is unknown in foreign countries, and is entirely original with the Waltham Company. The Company claim that by it they produce watches that cannot be equalled for every quality which makes a watch valuable Simple in plan and correct in principle, the movement is not only beautifully finished, substantial, accurate and cheap, but is uniform in the minutest details, not easily damaged, and when repaired always as good as new. There are different grades of finish in the different varieties of watches made by the Waltham Company, as there are different sizes and shapes to suit all tastes and means; but every Watch that bears the genuine trade-mark of "WALTHAM" is guarantied to be a good one, and nobody need be afraid to buy it.
