ANNOUNCES TO THE PROFESSION, THAT he has opened, in the rooms adjoining his office, in Hollidaysburg, a

SURGICO-MECHANICAL INSTITUTE,

for the application of *approved* physiological supports, in the treatment of Chronic Disease, and those numerous Weaknesses and Deformities of the body, in which *support* to the relaxed and dragging organs is an important condition of cure, and necessary to the success of internal treatment.—All the appliances used, are endorsed by many of the most eminent members of the Profession, and consist, in part, of Body Braces, for Prolapsus Uteri, (or Falling of the Womb,) and the diseases of the Heart, Lungs, Stomach, Bowels, and weakness of the Back and Nerves, which result from such "falling,"—Spinal Supporters, for every variety of Spinal affection,—Chest Expanders, to *erect* the body, and *enlarge* the Chest,—Pile and Perineal Elevators, Hernial Trusses, etc. The increasing importance of this department of pathology, and the difficulty the country practioner has in procuring *any* mechanical aid, much less those that act in harmony with nature, induces the undersigned, at much cost and labor, to supply what is alike, a professional desideratum, and necessary to guard the public against the imposition of UNSCIENTIFIC and INJURIOUS contrivances.

Physicians, and all others interested, are invited to call and examine. Those who desire to give their patients the auxiliary benefit, of any variety of scientific support, can send their patients to the Institute for that purpose, *without risk of any abuse of such confidence.*

A discount of 20 per cent to the profession on all instruments furnished them, or at their request.

Aroom will be fitted up specially for Ladies, with a Lady in attendance.
Hollidaysburg, Feb. 3, 1854—4m.

TO PHYSICIANS.

The attention of the Medical Profession in Penn. is respectfully invited to the following important facts:

1. Not less than two thirds of the American women are afflicted with Prolapsus Uteri, and its associated complaints; the result of natural delicacy of organization; defective physical education; early marriages; the various accidents of pregnancy, and labor, and general neglect of hygienic measures.

2. That as Prolapses Uteri is a displacement, or "falling" of this organ, it necessarily involves a like descent, or *dragging* of the Heart, Lungs, Stomach, and Bowels, and that one fundimental condition of cure in all these cases, is, the application of such a Physiological brace, or supporter, as will most effectively *brace* the weak back and *without compression, assist the relaxed* and over-taxed muscles in performing their natural office of *lifting* and *holding in their place,* the dragging viscera of the Chest and Abdomen from the depressed Uterus. The observation of every Physician, and the extensive and increasing use of abdominal supporters, (so called) furnishes conclusive proof of this.

3. That the Supporters now in use never have received the approval of the profession, because, they all, in common, act as *heating* and *confining clamps, compresses,* and *relaxing poultices,* creating a necessity for their perpetual use by *restraining* the freedom and exercise of the muscles, which they should only assist, and, also, *aggravating* the "falling" and dragging, by their *crowding* and *compressing* rather, than their bracing and elevating tendency.

4. In view of the above facts, which every Physician has been compelled to feel but too keenly, is it not the duty, as well as the interest of the Profession, to seek for an instrument which acts upon established principles of pathology, and which is at once effective, and necessary to the success of the practitioner, and professional in its origin and design?

The undersigned, therefore, acting in accordance with the true interests of the Profession, and after much investigation and outlay, now offers to them an instrument which fully meets all the above indications. The Brace invented by Dr. Banning of N. Y., has alone received the approbation of the Profession, or taken rank as a permanent contribution to Medical Science. While it *supports* the weak back and *lifts up* the abdominal viscera, the undersigned, by combining it with a recent invention, has added greatly to its efficiency in *erecting the body* and *expanding the chest,* and these instruments are believed to fulfil *every* indication that can be derived from mechanical support, while acting in complete harmony with the forces of nature.

Desirous of introducing these Braces through the cooperation of Physicians, and being enabled to furnish them at Manufacturers prices you are respectfully referred to the annexed quotations:

Fine Steel Body Brace, Retail Price,	$10.00
Silver Plated " " "	15.00
Fine Steel Erector Brace, Retail Price,	15.00
Silver Plated " " " "	20.00

Twenty per cent discount off these prices to Physicians.

A Scientific, Treatise, and Descriptive Essay, will be sent to Physicians, gratuitously, by addressing Dr. H. T. COFFEY,
Feb. 3, 1854—4m. Hollidaysburg, Pa.

Advantages of the Body Brace over Other Supporters.—1st. It is cool. 2d. It is light. 3d. Its pads can all be shifted up and down, right or left, as frequently as the necessity of the case may require. 4th. Its great and universal flexibility. 5th. It LIFTS UP—ALL OTHERS BEAR DOWN. 6th. Its pads are four, and press on the *weak hips,* and particularly on the *weak back, supporting, yet not restraining* the body. 7th. Its pads being of naked horn, stimulate and harden the muscles, while soft and cushioned ones (like poultices) *relax* and *weaken,* through heat and perspiration, and soon become rancid. 8th. It is so constituted as to admit of attaching to it any proper spinal apparatus, and also the most perfect pile and bernial truses. 9th. It may combine with its mechanical influences the virtues of the galvanic battery, locally or generally applied.

The Erector Brace and Chest Expander, in addition to the above, makes pressure upon the front of the shoulders, and without *constraint or compression, erects* the body, EXPANDS THE CHEST, and promotes health, grace and beauty. It is free from straps, bandages, or compresses, acts in harmony with nature, and defies scientific objection.—For those who have *weak backs, stooped shoulders, narrow* or *flattened chests* or *defective forms* it is the best invention ever presented to the public.

RULE OF MEASUREMENT.—For the Body Brace, draw a tape snugly around the body, one and a half inches below the tips of the hip bones, over the linen—for the Erector Brace, add measurement around the chest, under the arm-pits, and send the number of inches, cash companying the order, and the Brace will be sent to order, with an explanatory circular; and exchanged to suit, provided it be *immediately* returned, in an unsoiled condition.
