CITY ACCOUNTS

To the Select and Common Councils of the City of Pittsburgh.

GENT:

The joint Committee of Councils appointed at their regular meeting in November last, for the purpose of auditing the city accounts, for the year 1843, beg leave to report:

That they have examined the Warrant Books of the Mayor, and compared the Warrants drawn with the different Vouchers, and find the same to be correct; they have also examined the payments made by the Treasurer, and find them to correspond with the warrants drawn on him, and have destroyed said warrants. They would further report that the balance of cash on hands is two thousand five hundred and thirty-five dollars and twenty six cents, one hundred and seventy-five of which is in depreciated and counterfeit money.

Your committee would further report, that on comparing the amount of warrants drawn, with the payments made by the Treasurer, there appears to be now outstanding as near as can be ascertained, the sum of $4240 72

in addition to which there will be due during the year 1843, in certificates bearing 6 per cent. interest, which were issued in the years 1842 & '43, the sum of 13,206 01

all of which will have to be paid for over and above the ordinary expenses of the current year.

Your committee have also examined the amounts paid in by the different city officers, and find them to agree with the treasurer's account current, which, with the reports of the different city officers is herewith submitted.

The committee have also thought it their duty to submit to Councils a Schedule of the permanent and temporary debt of the city, as well as a list of its property, with valuations annexed.

All of which is respectfully submitted.

JOHN SHIPTON,
MORGAN ROBERTSON,
Committee.

Pittsburgh, January 3, 1844.

In Select Council, 3d Jan. 1844, read and accepted, and ordered to be published with accompanying Documents.

ALEX. MILLAR, Cl'k

In C, C. Jan. 3d 1844; Report read and accepted and order for publication concurred in.

E. J. ROBERTS, Cl'k.

James A. Bartram, City Treasurer, in account with the Mayor, Aldermen, and Citizens of Pittsburgh, for the year 1843.

Do cost of stop cocks paid by bonds, as per resolution of Councils, in 1843,	994 00	
Total amount expended for supplying the city with water,	$438,815 45	

The Committee also report that they have counted and destroyed five thousand dollars of the torn and defaced scrip which had been replaced by the issue of new scrip, according to resolution of Councils passed the 29th of May, 1843.

The contracts being now all completed and the new works ready to put into operation; your committee have deemed it advisable to present to you honorable Bodies in addition to the expenditures of the present year, a report containing a condensed statement of the whole amount of the cost of the new works, together with that of the old, and embracing all the pipes laid down in the streets for the distribution of water from the commencement of the water works up to the present period, in order that the whole may be presented at one view to your inspection, as well as to affording to the citizens generally, a knowledge of the amount of their cost as well as of the amount of revenue required to be derived from them to meet the demands on the city Treasury incurred in consequence of their erection.

By the completion of the new works, the old basin lot, together with the houses and lots at the river, and the two steam engines and pumps, contained therein, will be no longer necessary to the public service, and can be placed in the market and sold at any time which may be desired by your honorable Bodies. And it is thought that such a price can be obtained for them as will redeem a very large portion of the scrip which has been issued in payment for the work, for which purpose your Committee would earnestly recommend that the proceeds of the said property be strictly appropriated.

The entire amount which has been expended for the purpose of supplying the city with water, as will be seen by the report (omitting the fractions) is four hundred and thirty eight thousand dollars, and which, after deducting the probable value of the property, say one hundred and thirty eight thousand dollars, which will be convertible into money by the Councils when the public interest seem to require it, will leave a balance remaining as the entire cost of the works of say three hundred thousand dollars.

The current annual expenses for the use of the works will be about Five Thousand Dollars, not including the salary of Superintendant and Assessor. The amount which will be required annually to pay the interest on the investment, will be eighteen thousand dollars—making together twenty three thousand dollars, which will be required to enable the works to meet the expenses and interest.

The amount assessed for the year 1843, as stated, is seventy-two thousand and seventy dollars, of which, including the collection more by the Assessor and Register, of nine hundred and thirty two dollars, chiefly after the report of last year, there has been collected ninetten thousand five hundred and four dollars,—of the amount which has been returned as uncollected, a very considerable part will no doubt yet be paid whether it be continued in the hands of the collector, or placed in that of the Register and Assessor, for collecting.

It is thus apparent that a certain revenue is at once derivable for the works, allowance being made for the increase expected from the extensions of the pipes, made in the year 1843, will, if the amounts assessed be properly collected, pay the interest and expenses, and may by proper management be made to yield a surplus, for the use of the City, without being at all burthensome to those persons using the Hydrant Water.

Your Committee are of opinion that a large additional revenue may be had by supplying the city of Allegheny with water from the New Basin, and which, it is believed, can be effected at a small comparative cost by intersecting the main of fifteen inches, leading from the Basin down O'Hara street, at Quarry street, and continuing it to the opposite side of the River. As it is now contemplated to take up the old supplying main on Fifth street, and re-lay it in Wylie street, so soon as the weather in the spring will permit, the city, thus having a supply at opposite extremities, no inconvenience could possibly arise from a want of water, in consequence of connecting with the present main at Quarry street, one for supplying the city of Allegheny, as stated.

Your Committee are satisfied of the practicability of the project as well as of the ability of the works to furnish them an adequate supply of water and at a much less cost than it could be obtained in any other manner, and as a Committee has been appointed by the City Councils of Allegheny, to enquire into and report upon the subject, we would respectfully suggest that due consideration be given to it by your Hon. bodies, should it come formally before you for your action.

Your Committee cannot close the report without bearing testimony to the very able and efficient manner in which the duties of the Superintendent of Water Works and of Register and Assessor have been performed by the present incumbents during the year, and hope that the duties assigned those officers may always be discharged in the same satisfactory manner to succeeding Committees.

All of which is respectfully submitted.

JOHN SHERRIFF.
WM. J. HOWARD,
WM. M. EDGAR.

Jan 5 1844

It is calculated by the superintendant that the new works are capable of supplying four millions three hundred and twenty thousand gallons of water every twenty four hours, and by laying an additional main pipe from the Pumps to the basin of the same size as the one now in use, double that quantity. The two Basins together will contain six millions seven hundred and fifty six thousand seven hundred and four gallons.

In C. C. Jan'y 5th, 1844, read and adopted, and ordered to be published in the papers authorized to do the city Printing.

E. J. ROBERTS, Cl'k.

In Select Council, 5th January, 1844, read and accepted, and order to publish concurred in.

A. MILLAR, Cl'k.

The Committee to whom was referred the petition of sundry persons purporting to be freeholders in section No. 847 of the City District, laid off in pursuance of the Act of Assembly, passed 16th June, 1843, Respectfully report—

That your Committee view the subject referred to them as one of the most important ever submitted to the consideration of Councils, and therefore laying aside all regard to objects of merely a local or temporary nature, it has been their earnest endeavor to approach it with candor and impartiality, having respect alike to the laws of the state, the interests, claims and wishes of the petitioners and other residents of the said section, and the citizens residing and holding property within the present city limits.

Your Committee cannot forbear expressing their regret that the said Act did not provide some equitable means of ascertaining the opinion of the majority of the citizens residing within the said district, in relation to their admission into the city, as they find it difficult to reconcile the idea of subjecting such residents, without their consent, to the heavy responsibility and taxation necessarily incident to their annexation to the city, with that jealous regard to the rights of all her citizens which characterizes the Constitution of Pennsylvania; while at the same time the Committee firmly believe that the important consequences that may result to the community which they have the honor in part to represent, from the adoption of this measure, no less than due regard to the dictates of justice and equity would have rendered it proper that the consent of the citizens should have been obtained before any steps had been taken to extend the boundaries of the Corporation.

Shortly after their appointment your Committee requested the City Solicitor to furnish them with his opinion on the legal points involved in the decision of this question, and they herewith present a copy of his communication, from which it will appear that the Supreme Court have decided that the Act of June 6.1836, is constitutional, and if that opinion be correct, the Councils are bound to admit any section of the said District upon their compliance with the Act.

Without presuming, however, to express an opinion at variance with such high authority, the Committee would observe that from a careful perusal of the opinion of Judge Kennedy, it does not appear that the question of the obligation of Councils, to admit such Districts if they considered such course injurious to the interests of the City, or contrary to the wishes of the citizens, was not entertained by the Court, but that the decision was confined to the operation of the law upon the District itself, and the holders of property situated therein, and expressly recognizes the principle, that the promotion of public interest ought always to prevail over considerations of private convenience or advantage.

Since the petitions were placed in the hands of the Committee, counter memorials have been presented by the holders of property in section No. 17, and twenty-one persons holding real estate therein, have requested permission to withdraw their names from the first named petition, thereby reducing the number of applicants below the required limit and clearly showing that considerable diversity of opinion exists within the District as to the propriety of its reception, while, from what the Committee are informed, equal difference of views exists among the inhabitants of District No. 3, upon the subject.

As far as the Committee have been able to ascertain the opinions of their fellow-citizens, they are generally opposed to the admission, believing that the enormous expense attending the extension of the pavements and other city improvements over the District would be by no means defrayed from the taxes that could be collected within its limits, and would therefore involve the city in increased expenditure at a time when its resources are scarcely able to meet the interest of the public debt and other unavoidable expenses. While the Committee have no reason to believe that such extension of the city limits would increase the facilities of borrowing money, or add to the security of the loans already contracted

It is also feared that the damages to be allowed the owners of the ground taken for squares, streets and alleys might ultimately fall upon the city at large, altho' the benefits thence arising would be almost exclusively confined to the owners of the property in their immediate vicinity.

Should your honorable bodies decide on the admission of the said Districts No 2 and 17, or either of them, it will be important to consider whether such District shall be received as a separate and distinct ward, which your Committee understand to be the desire of the petitioners, or whether it shall be incorporated with such of the existing wards as may be contigious thereto, and upon this branch of the question your Committee beg leave to present the following observations:

By the first section of the act of the 26th December, 1833, the Councils are directed to divide the city into four wards, as nearly equal in population "as may be" and the same act declares that the citizens of each ward shall annually elect one person as member of the Select Council and five persons as members of the Common Council; and the 11th section of the Act of 16th June, 1836, upon which the petitioners ground their claim for admission, recognizes the duty of Councils to divide the city into four wards equal in population. By the Acts of 1st of March and 4th of April, 1837, providing for the annexation of the Borough of the Northern Liberties to the city, under the name and style of the "Fifth Ward," it is enacted that the same number of persons shall be sent from that ward to each of the City Councils, as from the other wards, and the same acts contain provisions that the Justices of the Peace residing therein shall be known as Aldermen of the City, and exercise all the powers of that office, and also for the full organization of said ward, and the extension of the jurisdiction of all the City Ordinances and officers within the said District. None of these provisions are found in the Act of the 16th June, 1836, excepting a general extension of the city jurisdiction, nor is there any authority given to increase the wards of the city above *five*, the members of the Select Council above *fifteen*, or the Common Council above *twenty-five*. Whereas, the various provisions authorizing the division of the city into five wards equal in population, and restricting them to that number, are at once unlimited and imperative. It is, therefore, the opinion of the Committee that if your honorable bodies should deem it incumbent on you to admit the said Districts or either of them, it or they must of necessity be incorporated with the existing wards adjacent to them, and a new division of the city into wards must take place, having regard to the increased population of the city resulting from said admission. The Committee are not provided with the information requisite for such a division, which, moreover, by the 11th section of the Act of the 15th of June must be made at least thirty days before the time fixed for holding the city election.

Under the influence of the above considerations, your Committee would earnestly dis
