THE LOWLY LIFE.

A little flower so slowly grew,
It hardly seemed like aught of blue
Down in its rocky cleft,
What could the little flower do,
In such a darksome place?
But try to reach that eye of blue
And blush to Her Heaven's face.

And there's no life so lowe and low
But strength may still be given
From narrowest lot on earth to grow
The straightest up to heaven.

AGRICULTURE.

How to Distinguish Poisonous Serpents.

In this connection, it may not be uninteresting to mention some characteristics by which poisonous serpents in the United States can always be distinguished. In the first place, we have no venomous species with longitudinal stripes, nor any of which the color is entirely green, black, or brown. We may, therefore, eliminate all striped and all uniformly colored species—"garter snakes," "black snakes," "green snakes," etc. from the series of the kinds that are to be dreaded. Our poisonous serpents are all marked with transverse blotches, which are usually more or less distinct, and are also characterized by having a broad triangular head, considerably and appreciably wider than the narrow neck, this expansion of the head being required to accommodate the poison glands.

Again, the poisonous species possess a deep pit or cavity on each side of the face, between the eye and the nostril always very definitely marked, the nostrils being at the end of the snout. The stories, therefore, of the venomous character of the "black snake" and "garter snakes," are fabulous.

One North American serpant, the *Elaps fulvius* (the "harlequin," or "coral" snake), a species beautifully annulated with black, red and yellow, belongs to a poisonous family, in which there are small, permanently erect, poison fangs, instead of the moveable ones of the rattlesnake and copperheads. Our species has, however, never been known to attemp to bite, if, indeed, it possess the power to do any injury. The South American coral snake, an allied species, is said to be extremely dangerous.—*Spencer F. Baird, in Rural New-Yorker.*

PROTECTION AGAINST THE CABBAGE-WORM.—The European cabbage-worm, *Pieris rapæ*, recently introduced by way of Canada, which has proved so voracious and prolific, has become the terror of northern cabbage-growers, and threatens to traverse the country, unless checked by natural or other causes. Wherever the pest has reached, so far as heard from, very few if any remedies have availed to give relief to the gardener. The most noted success is that of P. T. Quinn, the market-garden reporter of the New York Tribune. He sends to us the following statement: On his return from California, last summer, he found his cabbages infested with worms, and threatened with total destruction. He went to work with his accustomed energy, experimenting, trying everything new and old promising riddance of the plague, all to no purpose, until he hit upon the following: 20 parts of superphosphate made of slush acid, 1 of carbolic powder, and 3 of unslacked lime, mixed well together and dusted thoroughly into each head four times at intervals of four days. The result was the saving of 75,000 cabbages, and a loss of but five per cent. The worms would eat fresh lime with impunity, and carbolic powder would destroy cabbages and worms alike, but the ingredients in the proportion named, with the unsavory perfume of the superphosphate, either sickened or disgusted his swarming enemies.—*Agricultural Report.*

EGGS BY WEIGHT.—When eggs are worth from six to twelve cents a dozen, it is a matter of no great importance whether they are large or small; but now, as they range from twenty to forty cents per dozen, there is an item worth looking after in selection. There is nearly a difference of half in the amount of meat to be found in different lots of eggs on the market, and justice can never be done the purchaser until they are sold by weight. Eggs weigh naturally one and a half pounds per dozen, and at forty cents per dozen are expensive meat. When sold for breeding purposes, the present custom of culling may be the best. There would be an advantage to the producer, resulting from a change as above suggested, as well as to the buyer, for then every breeder of poultry would seek such breeds as would produce the greatest number of pounds in eggs; while now a hen which is prolific is profitable, let her eggs be small as those of the partridge—the object being to get number, not size or quality.—*Ohio Farmer.*

The above is sensible. There is just as much reason in selling chickens by the dozen, as eggs. Who will start the egg business on a basis of sixteen ounces to the pound?

FIREPROOF WASH FOR SHINGLES.—A wash composed of lime, salt and fine sand or wood ashes, put on in the ordinary way of whitewashing, renders the roof fifty per cent. more secure against taking fire from falling cinders, in case of fire in the vicinity. It pays the expense a hundred fold in its preserving influence against the effects of the weather. The older and more weather beaten the shingle, the more benefit derived. Such shingles generally become more or less warped, rough and cracked; the application of the wash, by wetting the upper surface, restores them at once to their original or first form, thereby closing up the space between the shingles, and the lime and sand, by filling up the cracks and pores in the shingle itself, prevents its warping.—*Agriculturist.*

The *Maine Farmer* thinks the State of Maine is suffering at the present time from too much horse. It says that every farmer's boy is raising a colt, and looking forward to a splendid "trotter" worth $2,000 or $3,000. The editor calculates that it costs $[illegible] to raise a three-year old colt, and that their average market value at that age is not over $150, showing a loss of $45. He calculates the profit on a heifer of the same age, after allowing for cost of keeping and trouble, at $14.

A correspondent of the Germantown *Telegraph*, who lost seventy chickens by gapes last year, now says that fresh water daily, with a little drop of kerosene kept in it, will be found a certain preventative.

Have cabbages with the dew on, and beans when the new is off and the plants dry. Reverse this rule, and you will have neither beans or cabbages.

The Singer

SEWING MACHINE.

FIGURES, FACTS AND FANCIES.

The Singer manufacturing company in 1869 sold 86,781 machines. These figures, and those given below, are from sworn returns (to which any one can have access) made to the receiver, appointed by the owners of valuable sewing machine patents, who license most of the companies of lesser importance.

In 1869 the Singer Manufacturing Company Sold over the Lowville S. M. Co.,	86,781	machines.
Sold over the Frankfort "	35,548	"
Sold over the Grover & Baker,	33,133	"
Sold over the Empire,	73,341	"
Sold over the Florence "	75,120	"
Sold over the Wood "	67,694	"
Sold over the Howe "	41,781	"
Sold over the Wheeler & Wilson,	7,915	"
Sold over the Grover & Baker,	51,593	"
Sold over the Finkle & Lyon,	85,441	"
Sold over the Willcox & Gibbs,	89,580	"
Sold over the American D. H.,	78,989	"

It is a fact, and the figures show it, that the sales of 1869 far exceed those of our rivals in trade. It is also a fact, that we sold last year OVER FORTY THOUSAND more machines than we did two years ago. It is also another fact, that these increased sales are owing to the great and growing popularity of our New Family Sewing Machine. It is still another fact that ninety of every hundred machines made and sold by us are for FAMILY use. But the strangest fact of all is, that some dealers, knowing it would be vain to attack the reputation of our *manufacturing machines*, and who are free to admit all that can be said in their favor, thus hoping to secure the buyer's confidence, have the boldness to say that we have *no family* sewing machine, whereas our new machine for that purpose is capable of a range and variety of exquisite sewing, which amazes even those who are familiar with the best work of other family machines.

Now it is mere fancy to suppose, in the face of the above figures and facts, that such sayings as the one spoken of can have any weight. Instead of giving ear to such fancies, most people, before buying, (whatever may be claimed about Paris Exhibitions, or Fairs, where we seldom exhibit machines) examine and judge for themselves, and because in doing so they find our New Family Sewing Machine as superior to other family sewing machines as our manufacturing machines are for their purposes. The true World's Fair, held in every city, hamlet and home, has awarded us the premium of the highest sales.

These machines are left on trial. We ask no one to buy, unless perfectly satisfied that the machine is all it is represented.

Henry T. Helmbold's

Compound Fluid Extract Catawba Grape Pills.

Component Parts—Fluid Extract Rhubarb and Fluid Extract Catawba Grape Juice.

For Liver Complaints, Jaundice, Bilious Affections, Sick or Nervous Headache, Costiveness, etc. Purely Vegetable, Containing no Mercury, Minerals or Deleterious Drugs.

H

These Pills are the most delightfully pleasant purgative, superseding castor oil, salts, magnesia, etc. There is nothing more acceptable to the stomach. They give tone, and cause neither nausea nor griping pains. They are composed of the finest ingredients. After a few days' use of them, such invigoration of the entire system takes place, as to appear miraculous to the weak and nervous, whether arising from impaired or diseased H. T. Helmbold's Compound Fluid Extract Catawba Grape Pills are not sugar coated; from the fact that sugar coated pills do not dissolve, but pass through the stomach without dissolving, consequently do not produce the desired effect. The Catawba Grape Pills, being pleasant in taste and odor, do not necessitate their being sugar coated. *Price fifty cents per box.*

E

HENRY T. HELMBOLD'S

HIGHLY CONCENTRATED COMPOUND FLUID EXTRACT SARSAPARILLA

will radically exterminate from the system, Syphilis, Scrofula, Fever Sores, Ulcers, Sore Eyes, Sore Legs, Sore Mouth, Sore Head, Bronchitis, Skin Diseases, Salt Rheum, Cankers, Running from the Ears, White Swellings, Tumors, Cancerous Affections, Nodes, Rickets, Night Sweats, Glandular Swellings, Rash, Tetter, Humors of all kinds, Chronic Rheumatism, Dyspepsia, and all diseases that have been established in the system for years.

L

Being prepared expressly for the above complaints, its blood purifying properties are greater than any other preparation of sarsaparilla. It gives the complexion a clear and healthy color, and restores the patient to a state of health and purity. For purifying the blood, removing all chronic constitutional diseases arising from an impure state of the blood, and the only reliable and effectual known remedy for the cure of pains and swelling of the bones, ulcerations of the throat and legs, blotches, pimples on the face, erysipelas and all scaly eruptions of the skin, and beautifying the complexion.

M

Henry T. Helmbold's

CONCENTRATED FLUID EXTRACT BUCHU, THE GREAT DIURETIC,

has cured every case of Diabetes in which it has been given, irritation of the neck of the bladder and inflammation of the kidneys, ulceration of the kidneys and bladder, retention of urine, diseases of the prostrate gland, stone in the bladder, calculus, gravel, brickdust deposit, and mucous or milky discharges; and for enfeebled and delicate constitutions of both sexes, attended with the following symptoms: Indisposition to exertion, loss of power, loss of memory, difficulty of breathing, weak nerves, trembling, horror of disease, wakefulness, dimness of vision, pain in the back, hot hands, flushing of the body, dryness of the skin, eruption on the face, pallid countenance, universal lassitude of the muscular system, etc.

Used by persons from the ages of eighteen to twenty-five, and from 35 to 50, or the decline or change of life; after confinement or labor pains; for bed-wetting in children.

B

Helmbold's Extract Buchu is diuretic and blood purifying, and cures all diseases arising from habits of dissipation and excesses and imprudences in life, impurities of the blood, etc., superseding Copaiba in affections for which it is used, and syphilitic affections—in these diseases used in connection with Helmbold's Rose Wash.

LADIES.

In many affections peculiar to ladies, the Extract Buchu is unequaled by any other remedy—as in chlorosis or retention, irregularity, painfulness or suppression of customary evacuations, ulcerated or schirrus state of the uterus, leucorrhœa or whites, sterility, and for all complaints incident to the sex, whether arising from indiscretion or habits of dissipation. It is prescribed extensively by the most eminent physicians and midwives for enfeebled and delicate constitutions, of both sexes and all ages, (attended with any of the above diseases or symptoms.)

O

H. T. Helmbold's Extract

BUCHU CURES DISEASES ARISING FROM IMPRUDENCES, DISSIPATION, ETC.,

in all their stages, at little expense, little or no change in diet, no inconvenience, and no exposure. It causes a frequent desire, and gives strength to urinate, thereby removing obstructions, preventing and curing strictures of the urethra, allaying pain and inflammation, so frequent in this class of diseases, and expelling all poisonous matter.

Thousands, who have been the victims of incompetent persons, and who have paid heavy fees to be cured in a short time, have found they had been deceived, and that the poison, has, by the use of powerful astringents, been dried up in the system, to break out in a more aggravated form, and perhaps after marriage.

Use Helmbold's Extract Buchu for all affections and diseases of the urinary organs, whether existing in male or female, from whatever cause originating, and no matter of how long standing. Price, one Dollar and fifty cents per bottle.

L

H. T. HELMBOLD'S IMPROVED ROSE WASH

cannot be surpassed as a food wash, and will be found the only specific remedy in every species of cutaneous affection. It speedily eradicates pimples, spots, scorbutic dryness, indurations of the cutaneous membrane, itch, chapped hands and incident inflammation, hives, rash, moth patches, tetters or scald head, ringworm, tetter, and all purposes for which salves or ointments are used; restores the skin to a state of purity and softness, and induces continued healthy action to the tissue of its vessels, on which depends the agreeable clearness and vivacity of complexion so much sought and admired. But however valuable as a remedy for existing defects of the skin, H. T. Helmbold's Rose Wash has long sustained its principal claim to unbounded patronage, by possessing qualities which render it a *toilet cosmetic* of almost unparalleled and unequaled character, combining in an elegant formula those prominent requisites, *safety and efficacy*—the invariable accompaniments of its use—as a preservative and refresher of the complexion. It is an excellent lotion for diseases of a syphilitic nature, and as an injection for diseases of the urinary organs, arising from habits of dissipation, used in combination with the Extracts Buchu, Sarsaparilla and Catawba Grape Pills, in such diseases as recommended, cannot be surpassed.

D

Full and explicit directions accompany the medicines. Evidence of the most responsible and reliable character furnished on application, with hundreds of thousands of living witnesses, and upward of 50,000 unsolicited certificates and recommendatory letters, many of which are from the highest sources, including eminent physicians, clergymen, statesmen, etc. The proprietor has never resorted to the publication in the newspapers, his sales so do this, from the fact that his articles rank as *standard preparations*, and do not need to be propped up by certificates.

FISHLER & RANDOLPH.

Dec. 14, 1870.-1y.

TO THE FARMERS OF TIOGA COUNTY.

I AM now building at my manufactory, in Lawrenceville, a superior

FANNING MILL,

which possesses the following advantages over all other mills:

1. It separates rye, oats, rat litter, and foul seeds, and cheat and cockle, from wheat.
2. It cleans flax seed, takes out yellow seed, and all other seeds, perfectly.
3. It cleans timothy seed.
4. It does all other separating required of a mill.

This mill is built of the best and most durable timber, in good style, and is sold cheap for cash, or produce.

I will fit a patent sieve, for separating oats from wheat, to other mills, on reasonable terms.

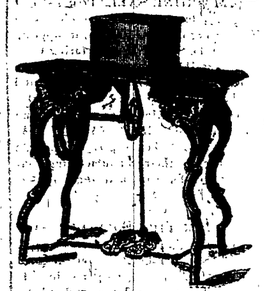
THE GOLD MEDAL



SEWING MACHINE!

THIS MACHINE has no superior, and is adapted to all kinds of work. It only needs a trial to be appreciated. It will hem, fell, seam, tuck, bind, quilt, braid, embroider, cord, gather and ruffle, and is the best and cheapest machine for family use ever offered to the public.

The DOUBLE LOCK ELASTIC STITCH MACHINE is superior to all others, for the reason that it sews direct from the spools and requires no winding of thread. It is easily adjusted, and not liable to get out of order.

Persons wishing to purchase a machine, should by all means try this one, before buying any other. Call on, or address
