Tomato Pies.

Cover the bottom with alternate layers of sliced tomatoes, ripe and sound, and bread, crumbled fine, with butter and spice to taste, a bake pan with loaf bread sliced fine, and sprinkle fine sugar over each layer of tomatoes as it is put in. Cover with sliced bread, and bake as you do other pies. [A friend informs us that *green* tomatoes make the best pies, equal, he thinks, in all respects to green apples, and they are made after the same fashion. Will some of our housekeepers take advantage of this hint, and send us the result—with one of the pies.—*Ger. Tel.*]

PLOWING IN CLOVER FOR WHEAT.—A writer in the last Farm Journal, in Mifflin county, who signs with the initials J. W., offers the following as to his experience of the value of plowing in Clover for Wheat. It is worthy the attention of the general farmer.

In the summer of 1849, I had a small field of 4½ acres in clover, which I pastured a while, and then let the clover grow until it was fit to cut for seed. With a large plow and three strong horses, I plowed it, then harrowed it effectually, and let it lie until 28th of September, when I sowed it. In the harvest of 1850, I cut 135 dozen of wheat, which yielded 165 bushels or 36½ bushels per acre. It did not require to be seeded with clover the next season. I plowed it down last season again, and the wheat now looks, although a part was winter-killed. It is proper to state that the crop of wheat now looks fine, although a part was winter-killed. It is proper to state that the crop of wheat that was on it before the clover plowed down, did not exceed ten bushels per acre.

A Fact about Cast Steel.

Being in the machine shop of S. Benjamin & Co., of Winthrop, one of the firm, J. M. Benjamin, observed that he had been informed of a fact in regard to the working of cast steel which was not generally known, and which he thought would be useful.

When cast steel has been over heated its texture is changed—it becomes more crystaline, and apparently coarser—and is supposed to be spoilt. Various experiments have been tried to restore it to its original condition. In some of the books on working metals, it is recommended to repeatedly heat and cool it, giving less and less heats until it is restored. The simple remedy is when over-heated, to lay it by and cool gradually.

For the purpose of testing this process, a piece of cast steel was heated until a portion of its end was actually burnt off. After it was cooled, a piece was broken off and its texture examined and compared with a fracture in the other end of the same bar—the heated end exhibited coarse, crystaline, granular appearance spoken of. It was then heated and drawn out under hammer, when it was found restored nearly to its original texture, and broke as short, with as fine a fracture, as if it had never been over-heated.—*Maine Farmer.*

CASH BAD FOR INVENTIVE FACULTIES.—The Family Visitor states that the possession of cash has a sort of anodyne effect upon the inventive faculties. During the time that the Patent Office has been in operation, it is said that only five labor-saving machines have been invented by men of wealth. Of these five, one of them is devoted to a "new mode of smoking tobacco," and the other four to "easy chairs." This proves true the old adage, "necessity is the mother of invention." for a large portion of the new inventions were either directly or indirectly caused by necessity.

CHANGE OF FORTUNE.—Some years ago, a servant girl, who had robbed her mistress, a milliner in London, was transported to Sydney for a term of years.—Since the discovery of Bathurst plains, the female convict has written to her former mistress, that the colony was a good place; that she now kept her carriage, she was happy to return the amount which she had stolen, with interest; that she earnestly recommended her to come out and set up shop; and that, in that case, she should be happy to extend her patronage to a lady for whom she had so great an esteem.

AN ENGLISH IDEA OF AMERICAN GEOGRAPHY.—A parcel was recently received from England by a Boston merchant, with the following address:

"—— ——, Esq.,
Portsmouth,
Rhode Island,
New York,
U. S. A."

Such instances of ignorance, says the Traveler, are not very rare. The American schoolmaster is often abroad, but he seems never yet to have visited England.

The other night one of the men on board of the U. S. ship Pennsylvania attempted to make his escape from the service, by plunging overboard, in expectation of reaching the shore in safety. The poor fellow had scarcely touched the water, however, when he was seized by a large shark and speedily dispatched.—*Norfolk Argus, July 24.*

TERMS.—To any number of new subscribers before the 1st of September, we will send this paper (for the first year only) for $1, cash in advance—and the *Chronicle* into the bargain. Only $1 for two papers for one year—both good papers and Telegraphic news—beats the city press out of sight!

The Nominations

Of the Whigs of Old Union are now before the people. They were made with great unanimity—without excitement, or any feeling of bitterness—and, as far as we know, are as unexceptionable as any which could be made.

OLD NER, everybody knows.

JOHN BEALE is a very intelligent, plain, practical, every-day, hard-working Farmer of Juniata county, and now President of the Juniata Agricultural Society. While an Associate Judge in that county, he openly in public meeting renounced his adherence to the mis-named Democracy which protected British interests in preference to our own; and he has ever since been a warm advocate of the American Whig policy.

JOHN KESSLER is a Blacksmith of Middlecreek Township, a man of small estate, in the prime of life, and whose appearance is very favorable.

ADAM SHECKLER, of Old Buffaloe, is generally known as one of the most independent, intelligent, reliable and active Farmers of Buffaloe Valley. His vote was triumphant.

HENRY W. SNYDER, of Penns, for Auditor, can not be excelled.

JOHN S. HACKENBERG, of Washington Tp. for Coroner. Mr. Hackenberg is an active and respectable Whig; and we trust this is but a stepping-stone to more important offices.

—As a whole, we believe the ticket will prove acceptable to all Whigs who are inclined to harmonize all conflicting interests with a view to giving fair play to efforts for the success of Winfield Scott. "No vain regrets for errors past," but now let there be a manly rally for the WHOLE TICKET, FROM SCOTT TO HACKENBERG. Go to work, resolved to win every man upon our time-honored banner, from President to Auditor!

Gov. Bigler's Office Holders.

Gov. Bigler signed the bill giving the Commissioners of Union County power to guarantee stock in the Susquehanna Railroad. Not a remonstrance against this bill came in during the six weeks it lay before the Democratic Legislature that passed it. Leading men of the county (Democrats and Whigs) and all the papers urged the Commissioners to take stock—and they have. Forthwith, a howl of detraction and the blackest falsehoods are heard in denunciation of the deed. Gov. Bigler's *aid-de-camp*, Lt. Col. Robt. B. Barber, heads a Repudiation meeting, which is drummed up and *inspirited* by Charles Shriner, Gov. Bigler's Whiskey Inspector in Philadelphia, and John Cummings, who holds a State office at Columbia. Both these men, instead of attending to their legitimate, and sworn duties, spend their time influencing the local politics of a county distant from their official home, and stirring up sedition, tumult and alarm among an honest and peaceful people! We think Gov. Bigler gains himself no credit, and his *true* friends no good, by this conduct of his office-holders. And if it be continued, the inference will be strong that it has all been a contrived plan to make a little paltry political capital in this county, at the expense of its substantial interests as a portion of the State.

It is a little singular, moreover, that men in this region—Democrats all their lives—like HENRY W. FRIES, SAM'L. S. BARTON, and HENRY S. GROSS, are pushed aside as *unfit* to hold office, while *Charles Shriner* and *John Cummings* are preferred as recipients of Executive patronage!!!

But Gov. Bigler, some say, very benevolently argues that a *rejection* by the PEOPLE, is the best *recommendation* for HIM. Last fall, the People would not have James Campbell for Judge—Gov. Bigler makes him the Attorney General! His own party voted the nomination of G. W. Woodward for Senator—and Gov. Bigler promotes him a Supreme Court Judge!—May not this suggestion explain—it can not excuse—the singularity of his choice?

☞ It is said there are about twenty-five members of Congress, heretofore, Democrats, who are opposed to Pierce and King. Of them the N. Y. Tribune says:

"Some of them were in Baltimore, while our Convention was sitting, urging the nomination of Scott in order to insure Pierce's defeat. *We know them very well*, but will not subject them to annoyance and abuse by printing their names without their authority. They will proclaim themselves in due time."

WHIG COUNTY CONVENTION.

In pursuance of the call of Whig Standing Committee, the Delegates elected from the various districts in the county, assembled at the Court House in the Borough of New Berlin, on Monday the 9th inst., and organized by electing JOHN F. Upon the proposition the change the mode of holding Delegate elections the following vote was had—

For the Old System	32 votes
" " New System	8 "

So the proposition to change was lost.

The following resolutions were offered and passed—

Resolved, That the great majority of the people of Union county are now, as they have been for ten years past, in favor of the election of the war-scarred Hero and veteran Statesman WINFIELD SCOTT, to the Presidency of the United States. That his nomination sprung from the people, and we trust will be ratified at the polls.

Resolved, That in Gov. WM. A. GRAHAM, of North Carolina, we recognize a man of sterling ability and incorruptible patriotism.

Resolved, That by the election of Hon. JOSEPH BUFFINGTON to the Supreme Court of this State, and of JACOB HOFFMAN, Esq., for Canal Commissioner, the People will have in both those Departments a representative of each Party, and that thereby the interests of the WHOLE PEOPLE will be much better guarded.

Resolved, That Gen. SCOTT was never defeated when at the head of his forces; that we believe no General can defeat him, unless it be *General Apathy*; and, further, in order to prevent any such calamity, we urgently recommend—

1st. That a County Meeting of the Friends of Gen. Scott be held during next Court week.

2d. That the friends of Gen. Scott *immediately* form a SCOTT CLUB in every Borough and Township in the county; and that they make arrangements by which a Scott meeting shall be held in every School District once or twice before the Fall election.

Resolved, That we confidently commend to our fellow citizens of Dauphin, Lebanon, and Lower Mahonoy, our venerable co-worker—Ner Middleswarth—a man who has for more than thirty years received, and never betrayed, our confidence; and that we hope he may receive their support in the Congressional Conference and at the polls.

Resolved, That our Congressional Conferees be instructed to oppose the admission into their Conference of more than one vote from Lower Mahoney Tp., in Northumberland county.

Lightning Rods.

AFTER many years' close investigation and numerous experiments, the Patentee takes pleasure in informing the public that he has arrived at the true principle of protecting families, dwellings and property from the destructive influence of LIGHTNING. The calamities that every City, Town, Village and Country falls victim to annually, thro' the gross negligence of its inhabitants, is beyond calculation, especially when the remedy is so easy to obtain—this is found in

ARMITAGE'S
Patent Magnetic Lightning Rods,

and in this alone. This Rod has been examined by the most scientific gentlemen in the world!—Professors M'Murtrie, Johnson, Wallor and many others that have examined them, recommend and speak of them in the highest terms of approbation, and have pronounced them the only safe rods in use in this or any other country for the protection of Lives and Property. One advantage is to divide and throw back a part of the electric fluid harmless to the clouds; in time of a stroke this enables the rod to conduct that portion of fluid that belongs to the earth without the slightest danger of leaving the conductor. This rod has many other advantages over the old one. The only place of manufacturing is in

Vine St. 3 doors above 12th, Philadelphia,

where all persons are respectfully invited to call and examine for themselves. For sale Wholesale or Retail by THO'S ARMITAGE.

RECOMMENDATIONS.

PHILADA., Aug. 13, 1847.

I have this day carefully inspected a conductor or Lightning Rod, with vane and index, erected by Mr. Thomas Armitage, on Belevue House, Gloucester, and have no hesitation in saying that it is not only the best I have ever seen, but that it is the only one I have yet examined that is constructed on strictly scientific principles. It is with much pleasure that I recommend his conductor to the attention of owners of buildings.
H. M'MURTRIE.

I am well satisfied that the Magnetic Lightning Rod, manufactured by Mr. Thomas Armitage, of Philadelphia, is the best that has ever been made. I have spent several years in the study of the laws of electricity and magnetism, and have no hesitation in saying that these Rods are constructed upon the only principle of safety. The electric shock is received and dispersed by the magnet at the top of the rod, and it would be impossible, according to the laws of attraction and repulsion, for a building to be injured by a stroke of lightning when protected by one of these rods. I have been acquainted with Mr. Armitage for several years, and before he commenced the manufacture of these rods I examined the principle on which they are constructed, and felt convinced that their adoption would be attended with complete success. The increasing demand for these rods, and the extensive sales in all parts of the country, is ample commendation of their utility and superiority. TRACY E. WALLER, M. D.
