### Stray Bits of Wisdom.

If things are not coming your way, it is a mighty good plan to change your way.—Anonymous.

### Nature Preserves Balance.

A starfish may lay 300,000,000 eggs; and but for their enemies, which preserve the balance, these creatures would fill the world's seas in one year. Nature is just as prodigal with other living things that have many foes. One female fish may lay 9,000,000 eggs—this number was actually found in the roe of a turbot weighing 17 pounds.

### Finding the Right Path.

Of all paths a man could strike into there is, at any given moment, a best path for every man—a thing which, here and now, it were of all things wisest for him to do; which could he but be led or driven to do, he were then doing like a man, as we phrase it.—Carlyle.
