AGENTS FOR THE
Celebrated Cough Remedy.
A SAFE, PLEASANT, SPEEDY AND EFFECTUAL CURE FOR COUGHS, COLDS, CROUP, ASTHMA, BRONCHITIS, CATARRH, AND WHOOPING COUGH.

THIS medicine has been used during the last 18 years with unequalled success in the cure of Pulmonary Complaints, and we can say of every person who has used it, that it has proved a cure, or at least afforded relief. We have sold it for over ten years, and can say, truth of it what we are able to say of any other medicine, in this vicinity, "what we know," after ten years' experience, and pledge our reputation for the fulfillment of what we here declare. In almost every instance where the infant is suffering from pain and exhaustion, relief will be found in fifteen or twenty minutes after the syrup is administered.

This valuable preparation is the prescription of one of the most experienced and skillful Nurses in New England, and has been used with never-failing success in thousands of cases. It not only relieves the children from pain, but invigorates the stomach and bowels, corrects acidity, and gives tone and energy to the whole system. It will almost instantly relieve GRIPING IN THE BOWELS, AND WIND COLIC, and overcomes convulsions, which, if not speedily relieved, end in death. We believe it the best remedy in the world for Dysentery and children, whether teething or any other disease, and we ask every one who has a child suffering from any of the foregoing complaints—to not let your prejudices, nor the prejudices of others, stand between your suffering child and the relief that will be sure, yes, absolutely sure—to follow this medicine, if timely used. Full directions for using will accompany each bottle. None genuine unless the fac-simile of CURTIS & PERKINS, New York, is on the outside wrapper.

For CHILDREN Teething.

DR. T. F. FRANK,
OCULIST,

WITH the expenditure of much labor has finally succeeded in obtaining a remedy that treatment for diseased eyes, so highly commended by writers on Ophthalmic medicine, which consists in the application of chemical fumes, has been found useful bearing in his profession.

Oculists have greatly neglected this only rational treatment for want of proper scientific organization, and with the risk of their patients eyes, substituted the vulgar practice of introducing the crude and irritating remedies into the eyes: either in the form of solid caustic, or irritating salves or washes. The consequence is, in many cases, the eyes are destroyed by the use of medicine that should cure them.

Dr. Frank has overcome this obstacle, and in the cure of his Ophthalmic Volatilizer appears to be successful.

For years past proved by the great number of cures, that his treatment is unparalleled.

The patient under it enjoys the full benefit of the medicine, without being exposed to the injurious effects produced by foreign substances, or the impure ingredient generally combined with them.

Pain and inflammation is almost unknown. In cases of long standing, and not an instance of failure, even in opacity of the pupil was produced in less than a month's treatment: on the contrary, every case has shown rapid progress. Granulations of the eye disappear after a short treatment of this kind, without the usual operation, leaving the eye in a perfectly normal condition, and in producing that atonic weakness which a long continued treatment is always followed by.

Weak eyes of old people receive strength, and in many confirmed Amaurosis, or cataract, there are several cases of that description being now under his treatment now, are rapidly recovering.

In operations for cataract and other diseases of the eye, this treatment produces a sure result, by preventing undue inflammation.

Patients from a distance will find it to their advantage to attend to their business during treatment; they can use the apparatus themselves, thus avoiding considerable expense.

Particular information will be given upon application, or by letter including two letter stamps, addressed to Dr. Frank at his residence, between the hours of 9 A. M. and 3 P. M. Hours 4 and 7.
