There is a singular natural curiosity in Sadawga Pond, in Whittingham, Vt., consisting of 150 acres of land floating on the surface of the water. The tract is covered with cranberries, and there are trees fifteen feet high. When the water is raised or lowered at the dam of the pond, the island rises and falls with it. It affords a fine shelter for large numbers of which are caught by boring a hole and fishing down through, as through the ice in winter.

Active steps are being taken in Philadelphia for the establishment of a zoological garden in Fairmount Park. Eighty-five thousand dollars have been subscribed thus far toward this end, and a number of liberal citizens will contribute \$25,000 when the fund shall have reached \$125,000. The Press predicts that before 1876 Philadelphia will have the greatest free zoological garden on the continent.

It is rather late in the year to record celebrations of the last Fourth of July, yet it is no trivial matter to know that our national anniversary was celebrated in Chinese waters by thunder of cannon and flying of hunting, not only by the United States ships in those distant seas but by all vessels of war from England and Russia. France and Holland alike, which were near the crafts manned by our countrymen. This tribute to American influence as a nation among all the peoples of the earth must be gratifying to every patriotic heart.

A young man at work near Indianola, Iowa, stood on a straw stack and boasted that he could turn a triple somersault in reaching the ground. He made the attempt and broke his neck.

Ninety railroad accidents occurred in this country during last month. These occurrences caused the death of eighteen and the injury of one hundred and nineteen persons. Carelessness and incompetency somewhere.

Reports from Columbus, Nev., do not speak well for the prospect of the town. The population is estimated at 250, of which 150 are professional gamblers, fifty laboring men, working at \$1 per day, and fifty dead-brokers who live on what they can beg of those who have money.

"Eli Perkins" writes that Dan Marks, a veteran baggage smasher, experienced religion at Round Lake, N. Y., and has since confessed in open meeting that he had smashed \$12,000,000 worth of trunks in twelve years, and had been too sick a good deal of the time to attend personally to the business.

A young man in Galveston, Texas, by birth a German of noble family, but who had gradually grown so poor as to have become a helper in the kitchen of an inferior hotel was recently convicted of stealing. He begged that he might be sent to the penitentiary, where he would be taught a trade by which he might earn his living, which was accordingly done.

The lady who tapped her husband gently with a fan at a party the other night, and said, "Love, it's growing late, I think we had better go home," is the same one who after getting home shook the rolling pin under his nose and said, "you mean old scoundrel you, if you ever look at that mean, nasty, calico-faced, mackerel-eyed thing that you looked at to-night, I'll burst your head open."

One of the most atrocious instances of "stealing the liver of Heaven to serve the Devil in" has come to light in Greenwich, Conn. A burglar who has been operating pretty boldly in that village was caught the other night and was found to be "Rev. Dr. John Moore," who had been editing the good people with lectures on "Science and the Bible," and who preached last Sunday from the text, "Go ye about and do good."

THE VOICE OF THE FROG.—In the Bible it is recorded that "Aaron stretched out his hand over the waters of Egypt; and the frog came up and covered the land of Egypt;" There was a similar occurrence in Cass county, Indiana, the other day. The Logansport Star relates the event and vouchers for its truth. For some days past the weather had been dry, and the ponds on the prairie failed in water. The turtles and frogs that had been living in the vicinity of one of these stood it for a day or two, but it finally became "too dry" for frog endurance, and they decided to migrate. The nearest pond that contained water was three miles distant, and to this turtles and frogs started in solemn procession—the turtles in advance, sagaciously piloting the way, and the frogs bringing up the rear with their deep bass and shrill tenor cries: "Go it, go it," "water, water." The procession stretched out over the prairie a quarter of a mile wide and three quarters of a mile long, and steadily marched on to the goal, when such a rollicking scene as ensued can better be imagined than described. It may be modestly added that this is but another illustration of the genuine spirit of energy and enterprise prevailed the Hoosier State, and in which Hoosier frogs tally one.

The elections in California on Tuesday hinged mainly on the opposition to railway monopoly. Instead of being discontented with the freight rates, the Californians find their special grievance in the high rates of passenger fare, and mean to vote against the railroad interests. A comparison of the rates with those in vogue East show that while from San Francisco to San Jose the distance is only fifty miles, the fare is \$2, and 50 cents extra if a ticket be bought on the cars. To Sacramento distant 138 miles on one road, and 84 miles on the other, the fare is \$4.50. To Ogden, 881 miles, the fare is \$50, all the fares being payable in gold coin. In the East, from New York to Albany, distance 145 miles, the fare is \$3.20; to Chicago, 961 miles, \$18.50. Though these rates may probably be warranted by the different circumstances in cost of construction, denseness of population through which the respective roads run, etc., yet anti-railroad is the fashionable war cry, and through efforts to bring down freight charges at the East and passage fares at the West the threatened railroad crusade may eventuate in a great national party, which, if it absorbs the acrimony that characterizes present political partizan zeal will not be wholly without good.

It is said that the Nebraska Indians are allowed to ride on all trains they can jump on while the latter are in motion. The tribe is being reduced very rapidly. This is by all odds the most effective and economic system of dead-heading on record.
