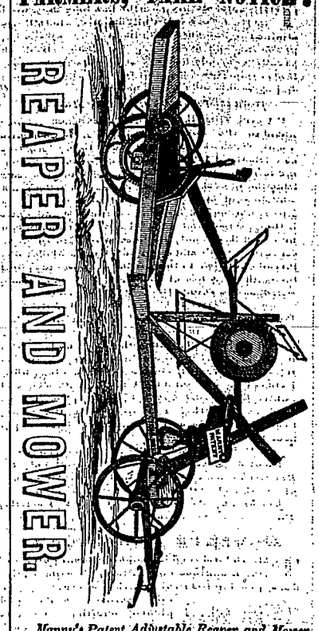
FARMERS, TAKE NOTICE!

REAPER AND MOWER.



Manny's Patent Adjustable Reaper and Mower, of which the above presents an engraved picture, is acknowledged to be one of the very best HARVESTERS now in use. In proof of this fact, this Machine was awarded the First premium for Mowing, and the second for Reaping, at the New York State Fair, in the great trial at Geneva, N. Y., in July, 1852, in competition with ELEVEN OTHER MACHINES; awarded a silver medal at the Ohio State Fair, for the best Reaper and Mower; and received the highest award at the Vermont and Michigan State Fairs, for the best REAPING and MOWING machine.

The true merit of this machine has given it a great triumph over all others; and being a perfect combination of REAPER AND MOWER, it comes to the farmer with double value.

This machine will cut from 8 to 12 acres per day, with two horses, and one person to tend it when mowing, and two persons when reaping. It will cut equally well all kinds of grain and grass, such as wheat, rye, oats, barley, millet, clover, timothy, and flax.

The machines are manufactured at various points, and cost, where made, $125 cash; or, half cash and half credit, $135.

☞ The above machines can be obtained by sending orders to C B Rogers, 29 Market st, Philadelphia; Lake & Reese, Easton, Penna; David Cockley, Lancaster; Hall & Boyer, Harrisburg; S M Hoover, Carlisle; George Arters, Mechanicsburg; Levi Shingluff, Martinsburg, Blair county, Pa.; and P Morris & Co., West Chester.

N. B.—Farmers wishing to purchase these Machines will please send in their orders early, otherwise they may fail to be supplied, as the orders first received will have the precedence. may 4 4t

Legal and Other Notices.

Notice to Bridge Builders.

THE Commissioners of Cumberland County will receive proposals, at their office in Carlisle, until MONDAY, the 20th day of June, 1853, for the building of a

STONE BRIDGE

across the Yellow Breeches Creek, at a point fixed by viewers below Eppley's Mill, by their variation from the public road leading from Bricker's Mill to Carlisle the bridge to be of the following dimensions, viz: To contain in length 124 feet from one abutment to the other, the abutments to be built upon a solid foundation which are to be approved of by the Commissioners; the height of abutments to be two feet above low water mark, at which point the heel of the arches start. The bridge to have three arches; the centre arch to be forty feet span, and the other two thirty feet in spans each. The centre arch to rise twelve feet and the other two arches to rise ten feet. There will be two piers in the Creek eight foot thick and twenty-five foot long, each. The piers to be carried up five foot, at which height the cutwater is to commence, battering and losing itself in the wall at eleven feet. The abutment to be ten ft thick, the wing walls adjoining, the abutments to be not less than five ft thick, and three ft back at the extreme ends, to finish two ft thick at the grades, and to be carried three ft above the grade with twenty inch wall from the grade properly coped, as hereinafter described. The extension of wing wall on the south end of the bridge will be twenty ft from the abutment, and the extension on the north end of bridge will be twelve ft from abutment. The grade of the bridge not to exceed three degrees from the centre of the centre pier, to where the approach strikes the road on either side. The breadth of the bridge to be 16 ft between the parapet walls in the clear. The entire work to be built of good Limestone and mortar. The mortar to be made of good sharp sand and lime of the following proportions, viz: six bushels of lime to one cart load of sand. The arches to be built of good flat stone, well bound all through the arches. The joints well broke; and to be 2 foot thick in depth. Ring stones to brake band and be closely cut, and laid, and not less than six inches thick. The parapet walls to rise three feet above the grade, the entire length of the bridge when finished. The walls to be coped with stone coping not less than three feet long and four inches thick, to be closely joined; joints not to exceed half an inch; the coping to project over the walls on both sides.

If the Commissioners should determine to dispense with the stone coping, the following will be adopted. The walls shall be roofed with the best river shingles, put on six inches to the weather. The rafters to be of such size as the Commissioners may determine, not to exceed six inches. The rafters to be built in the wall, three feet apart, and morticed or dovetailed down on scantling. Face boards on the inside to show six inches, on the outside five inches, and to be of good white pine, finished with three good coats of lead in oil.

All the foregoing work is to be done in a substantial and workman-like manner, and its durability insured for a period of three years from its completion. The work to be entirely fin
