The Wilmington Wins a Good Premium.

New London, Conn., March 29.—The United States gunboat Wilmington succeeded in making her trial trip Saturday, and made an average of 15 knots during the run, unofficial time. The condition of the tide on both legs of the course will increase the speed record rather than diminish it. It is estimated the boat has won a premium of $10,000 for her builders, the Newport News Shipbuilding company.

Dangers of the Grip.

The greatest danger from La Grippe is or its resulting in pneumonia. If reasonable care is used, however, and Chamberlain's Cough Remedy taken, all danger will be avoided. Among the tens of thousands who have used this remedy for la grippe we have yet to learn of a single case having resulted in pneumonia, which shows conclusively that this remedy is a certain preventive of that dread disease. It will effect a permanent cure in less time than any other treatment. The 25 and 50 cent sizes for sale by Gruhler Bros., druggists.

BOLSTERING THE LEVEES

To Provide Against Another Expected Rise in the Mississippi.

Greenville, Miss., March 29.—The gauge reads 46.9, a rise of four-tenths within 24 hours. Yesterday every hour was utilized by laborers on the levees. No time is being lost while the weather remains good. All realize that they must watch and work. Nearly a thousand men are at work upon the levees for the ten miles covering Greenville's front. An army of 500 new laborers, fresh from the plantations, arrived here today. The Greenville sawmills are working with full forces of men, while barges are being loaded with lumber and sacks to be sent to weak points in the levee. Nine steamboats are being used almost exclusively in the transportation of men and material to be used in strengthening the earthworks. Every energy is being used to prevent a crevasse, and with some hope of success. While the water is above the regular levees in some places dirt, lumber and bags of sand have been used to elevate the embankments above the water level.

The government boat Mississippi, with the Mississippi river commission aboard, stopped here yesterday, and in an interview with Judge Taylor, member of the commission from Indiana and one of the oldest men in the service, he said that of the 1,300 miles of levees less than seven miles have given way under the terrible pressure, only one-half of one per cent of the system. He thinks it possible that other breaks will occur during the next few days, as he expects one more foot of water for this section. To be prepared for the rise yet to come is now the purpose of those in authority here.
