TERRIBLE ACCIDENT .- A fatal accicut, resulting in the death of E. E. near, of Philadelphia, and N. T. irry, of Potter county, Pa., occurred the mili of W. T. Lane, Blue Rock, s county, last Thursday afternoon, h inst. The particulars as we learn them are as follows: The two men were working at the foot of a long slide, a on the ice. Commonly the logs were about thirty seconds in the decent from the top to the bottom of the slide, the distance being about one mile; to prevent accidents a man was stationed midway of the slide, with a large horn, whose duty it was to watch the logs and in case of any accident to blow the horn and thus warn the men below of threatening danger. On the day of the accident the logs moved very slowly, until one log was put on the slide that had some toe on it, which assisted its momentum tosuch an extent that when near the botom of the slide it jumped off, striking a stump in its flight which sent it workling in the air. The man at the middle of the slide blew his horn, and at nearly the same moment the men at the foot of the slide saw the log coming and started to run. They had gone but a few yards when the log overtook them in its rapid descent, striking them both on the head causing almost instant death. A brother of Perry's was standing at the top of the slide who, on hearing the horn, exclaimed, "my brother is killed!" Perry was a married man with one child, and had been keeping the boarding house at Blue Rock for some time; until this winter he had driven team in the woods, but this winter was working on the slide at which he met his death. Rynear was a married man, having been married quite recently. Both of these men were young, neither over twenty-five years, and were cut down by the destroyer in the "flush and vigor of manhood." Truly "in the midst of life are we in death." The remains were brought to this place last Saturday, and forwarded to their respective friends in Philadelphia and Potter county. Blue Rock mill is pe-

culiarly unfortunate, having been burned

last summer, and having had five fatal

accidents within three years.

> Dr. Reuling of the Maryland Eve and Ear Institute writes that the disease known as Egyptian or granular inflamation of the eyes is spreading rapidly through the United States. It sometimes causes blindness, and it is very contagious. He adds, "I bave in many cases been able to trace the disease to the use of the so-called rolling towels. Such towels are generally found in our country hotels and the sleeping spartments of the working classes, and being thus used by nearly every one, are made the carriers of one of the most danger ous, and, and as regards its symptoms. most troublesome disease of the eye. therefore would strongly recommend that the use of the rolling towel be abolished, for thereby we will discard one of the great instruments for the spread of such a dangerous disease of the eye, by which thousands of working men are annuall deprived of their means of support." In the range of mountains in West-

ern North Carolina, known as the "Fox Range," a most singular phenomenon exists. It is a "breathing cave." In the summer months a current of air comes from it so strongly that a person can't walk against it, while in winter the suction is just as great. The cool air from the mountain in the summer months is felt for miles, at a direct line from the mouth of the cave. At times a most unpleasant odor is emitted upon the current from dead carcases of animals sucked in and killed by the violence. The loss of cattle and stock in that section in winter is accounted for in this way: They range too near the mouth of the cave, and the current carries them in. At times, when the change from inhalation to exalation begins, the air is filled with the various hairs of snimals; not unfrequently bones pleasantly hot, withering vegetation within reach, and accompanied by a terrible roaring, gurgling sound, as a pot boiling. It is unaccounted for by scientific men who have examined it, though no exploration can take place. It is feared by many that a volcanic eruption | Peekskill, N. Y., and two on the Citi-
